Unveiled: super-fast Mega STE

by Andrew Hutchinson

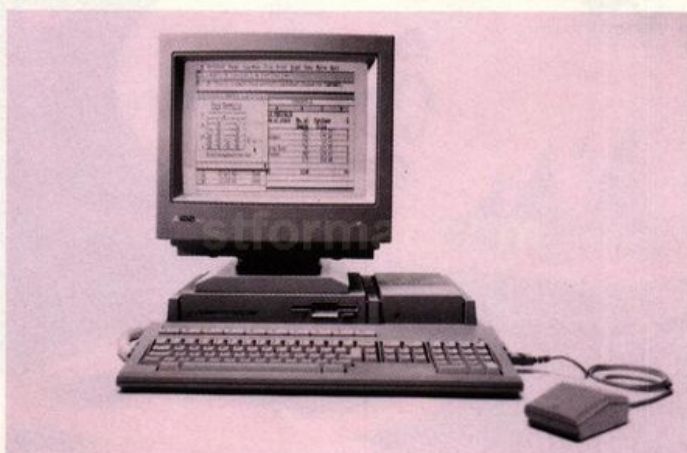

Atari USA have unveiled the latest addition to the ST range of computers.

The Mega STE is a hybrid, combining all the features of the Mega ST with the superb graphics and sound of the STE, but with one surprising addition: it's twice as fast.

The new machine, aimed principally at the business market, has a specification which leaves all comparable machines standing. Atari have also made the decision to bundle it with a series of DTP packages for the American market – including some of the best professional programs ever released for the ST.

An entry level package includes *Fleet Street Publisher 3*, while more expensive options include *Pagestream*, *Calamus* or Atari's own top of the range *DeskSet 2*.

Not surprisingly, Atari have decided to stick with the 68000 chip, the central processor in the existing ST range. But what is astonishing is that the new com-

■ With an absolutely cracking tech-spec, the stunningly fast Mega STE looks set to give Atari a superb start to 1991

puters run at 16MHz – twice as fast as the STFM or 1040 STE. The machine can switch between this rate and the usual ST rate of 8MHz, so it's quite capable of being used as a rich person's games machine.

Also included is a new version of TOS, the ST's operating system, apparently owing much to replacement desktops such as

Neodesk from Gribnif software or *Gemini*, the German Public Domain program.

An entry-level Mega STE comes with 1MByte of RAM which is expandable to 4MBytes by the addition of easy-to-install SIMM cards. A 16K memory cache speeds disk access times by remembering file access routes. All the ports and sockets which have made the ST and STE so popular have been included, along with a VME slot for expansion cards such as Ethernet (a networking card).

In America, Atari are bundling the entry level Mega STE with a high resolution monitor at \$1,799.95 (about £930). This compares favourably with the price of a Mega ST1, which costs £599.99 with a high resolution monitor.

■ In this issue *FORMAT's* Editor Steve Carey challenges Atari UK's boss Bob Gleadow to defend his company's record. Gleadow's response is nothing if not robust – but is it convincing? Turn to page 32 and you can be the judge...

THE MEGA STE: FULL SPEC

Internal architecture

CPU: Motorola 68000 running at 16MHz
BUS: 16-Bit external, 32-Bit internal, 24-bit address
RAM: 2MBytes expandable to 4Mbytes
ROM: 256K internal, 128K external
Blitter graphics co-processor chip
Built-in 3.5 inch double-sided floppy drive
8-Bit digital stereo sound
4,096 colour palette

Keyboard

Separate, low profile, QWERTY typewriter keyboard
94 keys including ten function keys and separate numeric keypad
Keyboard processor to reduce CPU overhead

Operating system

TOS 2.0 with GEM operating environment (see News from abroad, page 25, for full details)
Automatic boot in ROM
Interface includes new icons, multi-windowing, pull down menus, keyboard short-cuts

Input/output ports

Printer: parallel interface at 8-Bit
Modem: RS 232C running at between 50 and 19,200 baud
Hard disk drive: DMA port running at 10Mbits/sec
MIDI: In/Out
Mouse and Joystick ports
VME expansion slot
High-speed port for LAN (local area network) applications

Price

\$1,799.95 – about £930 at current exchange rates –including monochrome monitor. UK launch details: to be announced.

ST FORMAT COMMENT

With the release of the Mega STE, Atari have taken a terrific step forward. The new computer promises to be popular with both the business user and the hardened games player alike. Its specification is more than a match for the PC compatible dinosaurs and the Commodore Amiga range of games machines.

All arguments about graphics and sound are no longer relevant, as the new STE has the same graphics and sound as the Commodore Amiga games machine, but at more than twice its clock speed. What's more, software houses (particularly those in the States) are more likely to support the machine because of its business configuration.

The ST's massive software base should prove to be one of the new Mega's greatest selling points. With such a wealth of productivity and recreational software already around, can Atari go far wrong?

Well, yes and no. Atari America is a far different animal from the British division. The catalogue of mistakes which the company made when releasing the 1040 STE, and its reluctance to admit it screwed up, are bound to make many people think twice about investing in the computer. It would be for the benefit of all of us if they do buy Atari.

Do you have ST news for us? Call ST FORMAT on 0225 442244 and speak to News Editor Andrew Hutchinson – or write to News Desk, ST FORMAT, 30 Monmouth St, Bath BA1 2BW. (Leads treated in strictest confidence if you wish.)

SPINDIZZY

WORLDS

"IT'LL MAKE YOUR HEAD SPIN"

Spindizzy is back! Hanging in space is a cluster of worlds and for each world a different quest awaits. GERALD (a Geographical Environment Reconnaissance and Land-Mapping Device) is all set to explore the solar system, collecting energy crystals scattered around the scrolling 3D environment. You'd better have your Spindizzy skills honed to perfection to escape before the crushing time-limit spells an end to your game-conquering aspirations!

"Will provide you with hours of absorbing entertainment" – **ST Format**

"It's great. You'd be more than a bit dizzy to miss it!" – **The One**

The STE on the move

Atari are releasing an STE version of the luggable ST, Stacy, which is said to overcome the earlier edition's battery problems.

Price hasn't been fixed, though the current Stacy retails at £1,799. The major difference between the two portables is the fact that the new STE version runs off its own batteries, enabling the user to operate the computer for up to 35 hours without being anywhere near a mains socket, or so Atari claim.

The launch last year of a portable ST could have been a major coup, if Atari's stupidity and incompetence hadn't queered the pitch. Musicians everywhere were highly excited at the prospect of

■ At last! The Stacy, mark two – a luggable ST that works

taking hitherto studio-bound equipment (the ST) on the road with them – but were appalled to discover that the machine was quite exceptionally useless away

from the mains. The batteries were inadequate and the machine was an embarrassing flop. Now it's a whole lot more attractive, and could well take off.

A falling Star

The Star LC24-10 printer has just received a major price cut, dropping from £343.85 to £297.85. The LC24-10 is a 24 pin printer and thus has very high quality text and graphics output. The printer comes with a built in NLQ (near letter quality) font and a claimed speed of 180 characters per second (cps).

■ This Star printer is even better than we said it was in last month's review...

Incidentally, our grovelling apologies to Star and to our readers for the interference by that bungler's friend The Printer's Gremlin which resulted in us totally screwing up the prices in our review last issue of Star's LC-200 and LC24-200 printers.

The former costs £297.85, the latter £366.85 (£424.35 for the colour version).

Given that our reviewer mistakenly believed them to cost much more, our revised verdict is as follows: LC-200, 90% (and therefore **FORMAT Gold**); LC24-200 93% (also **FORMAT Gold**). Star Micronics ☎ 0494 471111. Er... oops?

ST finds a new PAL

At last there's some video hardware for the ST! Syntronix – who've been producing genlocks and signal splitters for other, lesser computers for several years now – have just moved onto the ST.

By far the most interesting result of their labours is an RGB recording system, enabling you to record RGB signals from the ST onto video tape. Once the recording is on VHS tape, playback can be routed through the ST's own monitor. A piece of kit of this type is of most interest to animators or designers who need output on tape and not computer disk. The hardware is being released at an introductory price of £199.95.

The company have also produced a budget version at £59.95. Syntronix's product specialist Mr Jara believes that "young lads now have a chance to get into video hardware for their ST" (oh, bit of sexism there). He sees a large market for devices of this type, especially considering how notoriously under-supported the ST has been in video hardware. Syntronix ☎ 0332 553024.

Sample the delights of ST sounds

The price of sampling cartridges has always been high, but within the last two years budget versions such as the STOS sampler have started appearing. Now *Master Sound*, one of the most popular cheap samplers, has been updated to version 2.

The software has been completely revised to include a spectrum analyzer, an oscilloscope and a three dimensional display. All the standard features are included such as filter, shrink, overlay and

loop (these are apparently Good Things and The Right Answer). *Master Sound 2* costs £39.95 from Microdeal ☎ 0726 69692.

■ Sample the filtering and looping experience that is *Master Sound 2*

Buy your ST a PC – for under £100

That ever-popular PC emulator PC Speed has just taken a massive price cut of nearly 50%, to just £99. PC Speed's UK distributors Compo are confident that a "whole group of ST users who haven't been able to get into PC emulation, now can." Neal O'Nions, Compo's managing director, puts the extraordinary price down to "the magic of German production

techniques," but doesn't explain what magic has suddenly enabled the hardware to sell for half its previous price and still, one assumes, turn in a profit.

The £99 wonder was released at the Computer Shopper Show in early December to a Christmas bargain hunting, hardware hungry crowd. Details from Compo ☎ 0480 891819.

Sound investment

C-Lab's *Creator* and *Notator* packages are the best MIDI sequencer programs you can buy, and are used by many professional musicians. Both have just been updated, adding further functions to their already chock-full specification.

Notator now includes a Hyper Edit function and real-time MIDI generation facilities. If your timekeeping is poor, an Adaptive Groove function will soon sort out your minims from your quavers. *Notator* costs £499, while *Creator* can be yours for a mere (?) £299 from Sound Technology ☎ 0462 480000.

■ C-Lab's legendary and wallet-thinning *Creator*. A cracker and no mistake

Atari plan more shows

Following the undoubted success of the six-city October train tour (see page 210 for a full report), Atari have announced a "major programme of events" for 1991. An exclusively-Atari exhibition is promised, together with attendance at all the main computer shows – a swift change of heart just months after the company astonished observers by missing the September Computer Entertainment Show at Earls Court. Alongside these events the company intends to hold regional roadshows, demonstrations and workshops.

■ See the special report on Atari's plans for 1991 in this issue, beginning on page 29.

The next issue of **ST FORMAT** is on sale Thursday 10 January.
Can you afford to miss it? See page 218 now for your free order form!

➤ Zak McKracken teams up with Indy (and Dad)

Two of the best graphic adventures of the past year, the Lucasfilm games *Zak McKracken and the Alien Mindbenders* and *Indiana Jones: The Last Crusade*, have been bundled together by US Gold. *Zak McKracken* follows the adventures of a group of teenagers who discover a spooky old house and decide to check it out, with predictably disastrous results.

Indiana Jones follows the plot of the film closely. You've got to foil the nasty Nazis from finding the Holy Grail while in the process keeping your Dad out of trouble. The dual pack costs £29.99 and represents excellent value for anyone who hasn't already had the pleasure.

■ Virgin have teamed up with budget software house Mastertronic to release games at a price that would gladden the heart of Ebenezer

■ Indy tells a nasty German the exciting news about his teaming up with Zak for US Gold

Scrooge (who features in this issue on page 217). *Double Dragon*, *Silkworm*, *Xenon* and *Gemini Wing* are on sale even as you read this for just £7.99 each.

Golden Image's ball-deficient mouse that feeds on light

It's all very well buying yourself a flashy new mouse to replace the neolithic Atari job (and what a crap mouse it really is), but they still get clogged up with dirt. The answer is to do away with the ball altogether. Cue Golden Image and their amazing Optical mouse.

This wonderful beast has no

moving parts and a claimed lifetime of 5,000,000 cycles (apparently that's a lot better than a standard mouse). The shell of the unit is ergonomically designed to make extended use a joy rather than a pain in the palm. The optical mouse costs £39.95 from Golden Image ☎ 081 518 7373.

■ Despite being deficient in the ball department, this mouse works just fine

WANTED!

Editors
Sub-editors
Staff writers

Britain's fastest growing publishing company, Future Publishing, is looking for exceptionally talented and ambitious magazine staff to work on existing titles and planned launches.

Future, based in beautiful Bath, already publishes *Amiga Format*, *ST Format*, *New Computer Express*, *Commodore Format*, *Your Sinclair*, *Amstrad Action* and *Sega Power*, as well as *PC Plus*, *8000 Plus* and *Mac Publishing*.

In return for your blood, sweat etc etc the company offers a good salary, an excellent working environment and the opportunity to take on new and exciting challenges as Future continues to expand.

If you have good reason to think Future needs you, send your CV, together with examples of published work – or 500 words on "What magazines are for" – to Greg Ingham at the address below. (Editors: send copies of recent issues.) Do it today if you know what's good for you.

Future Publishing Ltd, Beauford Court, 30 Monmouth Street, Bath, BA1 2BW Tel: (0225) 442244

■ There's about mumbleteen decent chess programs for the ST, and unless you're Gary Karpov (which you're not), any one of them is going to beat you into a cocked hat.

So what does a new program have to offer that's so different? Well, for a start, it could teach you where you're going wrong.

Chess Mate is designed to help club players improve their opening repertoire. It contains a database of some 500 variations on disk, enabling you to learn a near lethal opening game. *Chess Mate* costs £49.95 from Chess World Software ☎ 051 526 0794.

Are you sure you want to battle your way through the blizzards and crowds on Thursday 10 January to pick up the next *ST FORMAT*? No? Turn to page 201 to find a way of getting someone else to do the dirty work for you!

Short stories

■ The 16-bit Computer Fair, held on the 4th, 5th and 6th of January, is an excellent event to see European and American software and hardware.

Among the companies booked to exhibit are Microdeal, Gasteiner, Silica, Power Computing, Hybrid Arts and 2-Bit Systems, while German know-how is represented by GE-Soft, Protar Electronics and Manfred Carle.

And all the way from the States come Double Click software, producers of the excellent DC Desktop and DC Utilities.

The show's at the Novotel Hotel, Hammersmith (where Atari had their summer show); open from 10 to 6, admission £5.

■ Computerised map program *Autoroute* could be the answer to (some of) your petrol bills.

You simply type in where you want to go to and from, the speed you want to drive at and which type of road you prefer, and the computer comes up with a selection of routes.

The good news is that NextBase have just knocked the price down to £69.95. Harried map-readers can contact Next Base on ☎ 0784 460077.

■ Philips have just produced a limited edition version of their popular CM8833/II colour monitor, surely an early contender for Most Ridiculous Hardware Item 1991. The Philips "Artist Series" monitor is styled after the work of the early twentieth century artist Piet Mondrian. "Mondrian was inspired by the notion of man, art, nature and machine existing in harmony," says the press release, clearly written by someone vastly relieved to have a chance at last to write about something other than those techie wiggly-type thingies.

Art loving ST users who demand stereo sound, medium resolution colour graphics and, er, coloured squares around the edge of their monitor can get it from Silica Systems ☎ 081 309 1111. Price for the one-off 2,000 "special edition" is £269.

■ Highly respected printer manufacturers Citizen are pushing their new 24 pin printer as a perfect Crimble pressie (last minute panic buying, anyone?). The 124D, which costs £321, can run at 120 cps in draft mode – not very fast, but more than adequate for most people's needs.

Phone Citizen ☎ 0895 72621 to complain about their atrocious taste in publicity pictures (one of their no doubt excellent printers sharing the limelight with some drunken old git in a red coat and a beard – you'll have to look elsewhere for it because we sure as hell ain't using it). "Bah" and, not to put too fine a point on it, "humbug."

ST User's Cover Disk and that virus

An ST magazine has infected the disk collections of thousands of readers with a virus. Nestling within the bootsector of ST User's December disk is an unwelcome "free gift," the Green Goblin Virus, so-called because it flashes onto infected screens the phrase "The Green Goblin strikes again."

The ST User virus, which is understood to have been discovered on 3 April 1989 in England by Clive Duberley, is capable of ruining any game disk that gets infected (it writes to the bootsector, meaning that you could then not load the game). For this reason, incidentally, you should always keep the write protect tab on your games in the "on" position – that is, you should be able to

see through the little hole in the corner of your disk.

ST FORMAT spoke to the magazine's publisher Hugh Gollner, who initially claimed that the ST User virus is "harmless," though he later admitted that it could indeed write itself onto the bootsector of commercial games.

According to Gollner the ST User virus found its way onto the disk while the master was in the care of the duplicators, Stanley Precision. "They were asked to remove some other program file," he said, "so they took off the write protect tab and that's how it happened." (ST FORMAT's Cover Disk Editor Neil Jackson points out that he would never permit, let alone request, his disk masters to be altered after they had left him, for this very reason.)

"It could have happened to anybody," Gollner claimed. "It's just as likely for something like this to happen to a piece of commercial software."

So just what does the ST User virus do? Whenever a disk is

■ Caught! The Goblin virus, let loose on an unsuspecting ST by ST User's cover disk, is apprehended by FORMAT

accessed, the virus keeps a total of these disk accesses in its own internal counter. When this counter reaches 16 it inverts a part of the screen. If you are using a GEM-based program, for example, with the ST User virus infecting your machine, all of a sudden, after you save or load a file, the menu-bar may turn upside-down.

The ST User virus is also reset-protected (jumps to \$7FE64/\$FFE64), which suggests a strong similarity between it and the more common Ghost Virus. "In fact the only major difference that I have found," says virus expert Mike Mee, author of *Super Virus Killer* (STF Cover Disk 8), "is that the Ghost virus sits very low down in the ST's memory, whereas the

Four steps to avoid infection

■ Switch off your machine for a good half-minute before inserting a new disk – this eradicates any resident viruses from your ST's memory

■ Keep the write protect tab on (in other words, you should be able to see through the little hole on your disk), especially when using commercial software

■ Always keep back-ups of important files and disks – especially your ST FORMAT Cover Disks

■ Use a virus detector and killer – CRL's Virus Killer (£9.95; ☎ 081 533 2918) is one of the best, though Mike Mee is putting the finishing touches to one he claims will be the "best yet." **WARNING: do not use a virus killer on games or other auto-loading commercial software**

How ST FORMAT protects you from viruses

ST FORMAT's Cover Disks are duplicated by Discopy Labs of Daventry. Before we send them a master disk we check it with a variety of virus detectors and killers – including CRL's and Mike Mee's. Discopy then also check for viruses before transferring the data to optical disk for the duplication process.

This new master is then once again checked for viruses in an "infection-free" area, and a large orange sticker is attached to it so that it is known to be safe. STs are always switched off for a good half-minute between disk insertions to prevent cross-infection. We have never asked Discopy to alter a master.

The ST User virus: the facts

The ST User virus set itself in memory at the location of \$FFE00 – \$FFFD9 (this is on a TOS v1.09 1040STFM – STE addresses may differ). On a standard 520STFM the addresses are \$7FE00 – \$7FFD9. This is exactly 32256 bytes above the start of the screen, so a simple calculation from within BASIC is an easy enough check. Here's a little routine in GFA Basic that enables you to check your own memory for the existence of this nasty program:

```
' Green Goblin Virus check by Mike Mee - for ST FORMAT
scr_addr=&B108(2) ! Get screen address - changes depending on memory
' Now check 'get_bpb' (&B472) & 'res_valid' (&B426) for virus infection
IF LPEEK(&B472)=scr_addr+32256+&B88 AND LPEEK(&B426)=&B31415926
PRINT "OH DEARY ME - THE GREEN GOBLIN VIRUS IS INFECTING THIS ATARI ST"
GOSUB panic_stations ! Jump to your own routine here to deal with virus
ENDIF
```

ST User virus is sitting just above the end of the screen."

ST User apologise for the trouble they have caused their readers. Company boss David Hirst also promised to fax us details of what the magazine's readers should do, but funnily enough that was the last we heard from him.

He's on ☎ 0625 878888.

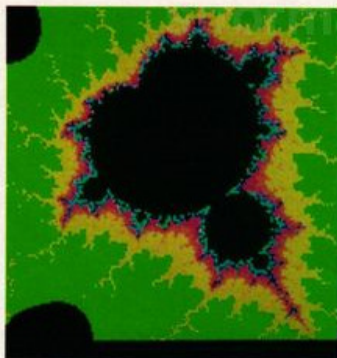

■ And in a bad month for ST FORMAT's competitors, a disk-based ST magazine called *Stampede* has gone into voluntary liquidation, leaving subscribers out of pocket and angry. *Stampede* died mainly because of low editorial standards and lack of reader loyalty.

The publishers boasted that they gave a free game away with each issue (price £3.99), although quite often these were old games which didn't rate very highly in the first place. Oh, and they also had a virus on their cover disk (blimey, they're all at it) in issue 2.

Putting order into chaos

One of the more interesting companies to set up in recent months are FraChaos, specialising entirely in Fractal and Chaos images which echo progression and regression in nature (snowflakes and leaves to you and us).

The company have many articles and reviews of fractal software and books as well as more than 10,000 fractal images on file. FraChaos ☎ 0326 40973.

■ What the hell is this? Call ☎ 0326 40973 and find out...

New Year's resolution

Use a DTP program for any length of time and you soon discover that, good as the Atari SM124/5 monitors are, they can't show you enough information at once.

The Titan Designs Reflex graphic cards seek to remedy this problem by boosting your resolution.

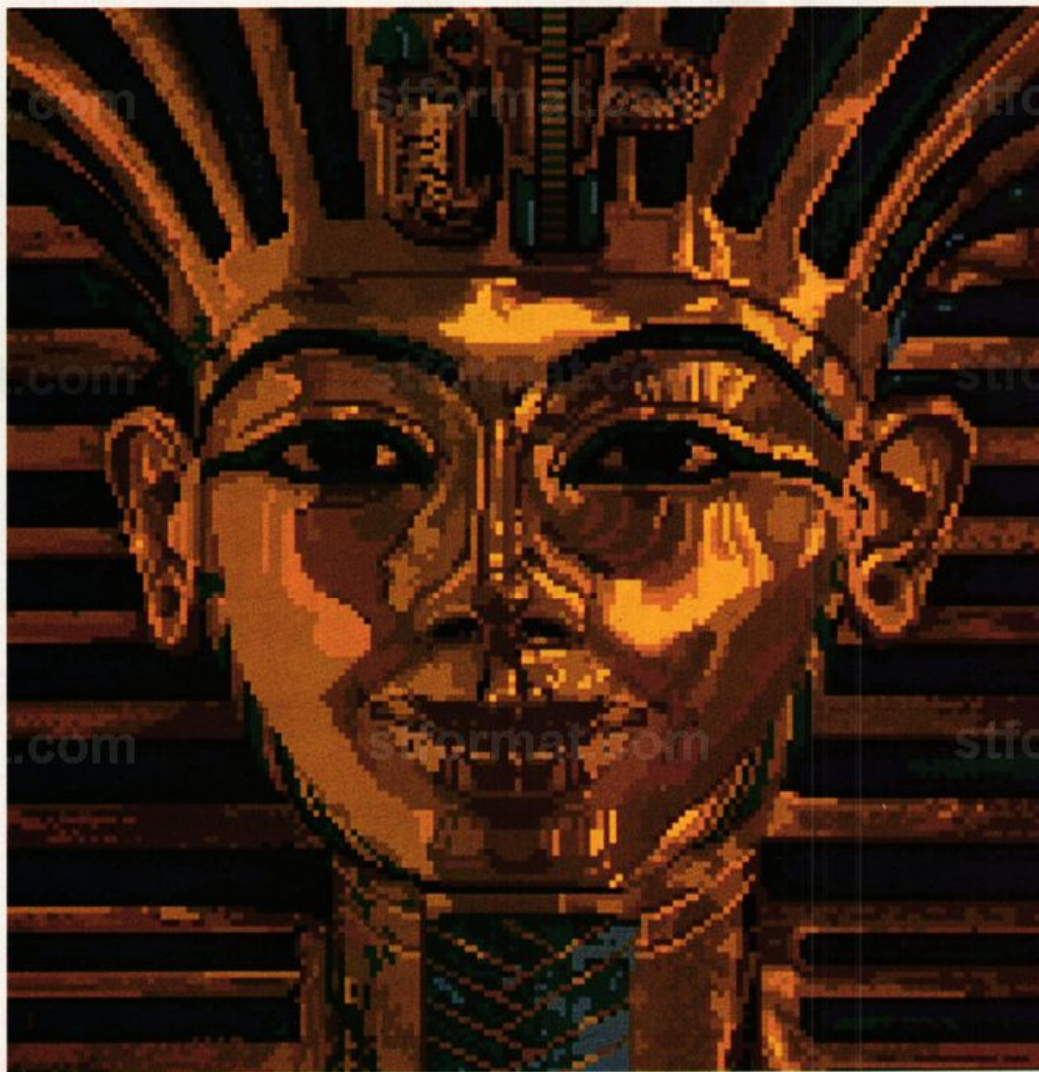

Their 1024 card enables you to display a screen resolution of 1024 by 800 on an SM124 monitor or 800 by 1024 on an A4 Por-

trait monitor.

The 2048 card stretches an amazing 2048 by 1536 out of your ST, but you need a 21 inch CAD monitor to see it.

The cards plug into the 68000 bus connector and are compatible with all models of ST. The 1024 card costs £230, but at the time of going to press no price had been set on the 2048 card.

Titan Designs ☎ 021 706 6085.

Guaranteed to paint a smile on the face of every ST user.

You see, the rumours were true, DeluxePaint on ST is now in the shops.

And there are some who would argue that it's the best on the market.

"The current version available for the ST far outstrips all earlier incarnations."
ST FORMAT.

We'll just say that there's none better.

Now you can design your own fonts, work on multiple animations, print up to poster size, do multi-colour airbrushing and full animation in 512K.

There are also a set of extra features, like mirror symmetry, 3D perspective and split-screen magnification with variable zoom.

And all for only £59.99. So you can see, it's been well worth the wait.

Available now £59.99

This month's festive guest presenter: **Queen Elizabeth II** (Gawd bless 'er)

ATARI ST GALLUP SOFTWARE CHARTS

F19 Stealth Fighter continues not to live up to its name, sitting astride the top of the charts where everyone can see it. By contrast, Ocean's challenger *F29* slips out of sight, down to 44.

Honours in the top ten are fairly evenly divided, with Microprose (including Microstyle), Mirrorsoft and US Gold picking up a brace apiece and Ocean, surprisingly, coming in with just one.

Also selling strongly: *Degas Elite*, EA's ancient art package, at number 51, revived in the slipstream of *DeluxePaint* (which still fails to put in an appearance anywhere in the top 60: EA insist they're "well pleased" with its performance).

Incidentally, how is it that mighty EA can manage only one appearance anywhere in the top 40 (though *Powerdrome* and *Imperium* are in positions 41 and 53 respectively)?

Traditionally Christmas is a time of great speculation, though US Gold may be very wise in refusing to join in the "Let's get the Christmas number one" game.

It'll be our March issue before we have all the results in, but for what it's worth (ie not very much at all) the guesses around the *FORMAT* office about what'll hit the Yuletide top spot go like this: "*Supremacy* is quite a good bet; *MIG-29* beat the wotsit out of *F-29*" (Mark Higham); "*Teenage Mutant Hero Turtles*, definitely" (Neil Jackson); "*Speedball 2*" (Andy Hutchinson); "I'd like it to be *Stun Runner*, if it's out in time, or *Total Recall*, but I expect it to be those *Turtles*" (Steve Carey).

How wrong can we be? **stf**

■ Main chart: last month's position in brackets; *STF* refers to issue and score of review in *ST FORMAT*. These full price and budget *ST* charts are compiled and supplied by Gallup. © European Leisure Software Publishers Association Ltd 1991

■ Straight in at three, the stonking Psygnosis whopper *Shadow of the Beast*, now impressing friends on an *ST* somewhere very near you...

■ At two, though hardly the birth of the cool in the graphics department, *Kick Off 2* is nonetheless one hell of a damn fine game...

■ But still at number one, and still not living up to its name, *F19 Stealth Fighter* continues to be eminently visible in the *ST* charts

**A HARD DRIVE
THE SAME SIZE AS A FLOPPY!**

Power Computing, leaders in the home computer peripheral market are proud to present the Slimline Series Hard Disk Drive. Our new drive is an amazing 23cm long, 10cm wide and a mere 3cm high! The drive contains a whisper quiet drive mechanism with autoparking heads as standard. It can be powered either directly from the Atari ST using a lead provided (requires the ST to be opened), or from the optional power supply.

The drive comes complete with the industry standard ICD Hard Disk Utilities, reputed to be the best and most comprehensive available for the ST.

23cm x 10cm x 3cm - that's the same size as our FLOPPY DRIVES!

Available in 20MB, 40MB and MASSIVE 110MB Sizes!

Whisper quiet - New design eliminates the need for a fan

Find out now for the good news! Due to advances in design, the Power Slimline hard disk drives come to you at prices even cheaper than the existing hard disk "dinosaurs" made by many manufacturers!

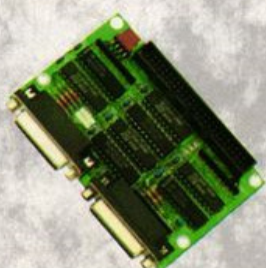

Power Slimline Series Hard Disk	20MB £299	40MB £399	110MB £599
5V Power Supply	£25		

Also Available Now... Build Your Own Hard Disk!!

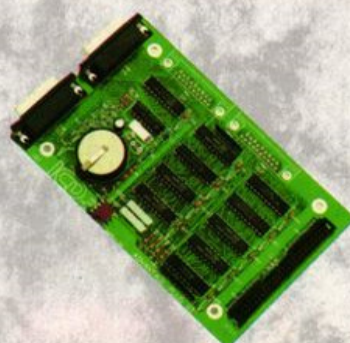

These high-quality ICD interfaces are ideal as a start for building your own hard disk drive unit. They are compatible with all popular makes of SCSI drive and come complete with the powerful ICD Hard disk utilities and full fitting instructions

previews

What games never made it in time for Christmas? Hands up those programmers who couldn't hit that deadline! These are some of the games you'll be spending your Xmas money on next month

WELLTRIS

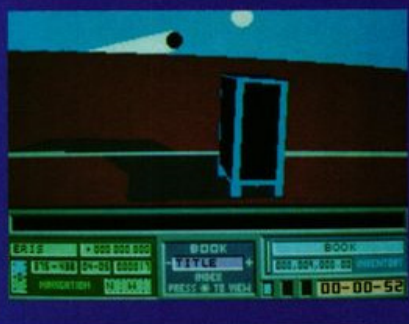

Infogrames

You went barmy over *Blockout*, now go wild over *Welltris*. This 3D version of the classic Tetris is played in a well – hence, I suppose, the name. Falling 3D blocks tumble down the well, and you have to move them around using the keyboard in an attempt to stack them neatly on top of each other. It sounds maddeningly simple, but if Tetris is anything to go by it could end up being earth-shatteringly addictive.

DAMOCLES MISSION DISKS

Novagen

We've seen so many different tips and solutions for *Damocles* that it must already be one of the most well-played ST games ever. Offering you the chance to delve even deeper into the game are two new scenario disks. Mission disk one features five brand new missions set in the same environment as the original game. Apparently there are many elements to *Damocles* which mere mortal gamers have never seen, and the new mission disks reveal some of these long-concealed features.

MIG-29

Domark

If you just can't stand the thought of yet another shoot-'em-up then take time out with this latest flight simulator. This time you're in the seat of one of the world's most advanced front line attack aircraft, the MiG-29 Fulcrum. Last spotted in the TV showing of *Top Gun*, the MiG-29 is equipped with cannon as well as air-to-air and air-to-ground missiles. These missiles have a camera positioned on the nose, and the game includes the option to watch from this viewpoint as the missile finds its target and detonates. With heaps of real-life training missions, you're almost certainly guaranteed the flight of your life. Catch the full review in next month's *ST FORMAT*.

Picture courtesy of Osprey Publishing

CYBER ASSAULT

ARC

3D games are becoming not only more and more popular but also increasingly complex. In this first from Arc, your playing character is constructed of 3D polygons with very effective shading. You can run or walk through a 3D landscape and get involved in all sorts of puzzles. The scenario and game style are still to be decided but the technical side of the game looks very competent. Apart from the Turcan

wargame series, however, Atari's Arc label isn't exactly renowned for coming up with great games, so don't hold your breath waiting for a really top quality challenge.

ROD-LAND

Sales Curve

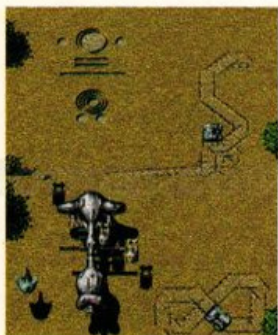

If the thought of shoot-'em-ups brings you out in a cold sweat, then what you need is some colourful, simple bunny wabbits and cuddly seals to blast. *Rod-Land* is a cutesy game based on the popular Jaleco arcade game. Your playing characters are two sickly sweet fairies with pointed ears, magic shoes and special rods. You use the rod to stun the baddies and then bash 'em against the floor to kill 'em. Mindbending stuff!

SWIV

Sales Curve

If you can stand it, *SWIV* is another vertically scrolling shoot-'em-up in a similar vein to *Xenon 2*. It's programmed by the same team who worked on *Silkworm* and *Ninja Warriors*, and they're claiming it's the fastest shoot-'em-up ever. Where have we heard that before? The

game is played with either a jeep or a helicopter and the bad guys comprise all sorts of flying craft, with gigantic super tanks, copters and bird-like craft as the typical end-of-level aliens.

Like *Ninja Warriors*, *SWIV* incorporates a fast loading system which enables alien sprites to be loaded from disk during the gameplay. In this way there's never any need to pause between levels. It sounds promising, but we've seen so many vertically scrolling shoot-'em-ups that another might be just enough to make you chuck.

Z-OUT

Rainbow Arts

Suddenly shoot-'em-ups are where it's at. After announcing a follow-up to *Turrican*, Rainbow Arts are now screaming about a follow-up to *X-Out*. *Z-Out* puts you on a mission to destroy Alpha Centauri which is an excuse for stringing together six levels of manic shoot-'em-up action. One shoot-'em-up is pretty much the same as another but Rainbow Arts are shouting that this boasts 40 colours on screen at once and super fast parallax scrolling. We'll believe it when we see it.

TURRICAN 2

Rainbow Arts

At this time of year it's easy to imagine a TV game show called "Name that shoot-'em-up," with money-grabbing gamers falling flat on their faces when they confuse the mid-level guardian in *Dragon Breed* with an end-of-level freak in *R-Type*. There are just so many shoot-'em-ups cluttering the shelves at the moment that you could easily get it wrong.

Now to confuse matters still further comes a follow-up to *Turrican*. Additions to this new version include some clever firing techniques, improved bonuses and better visuals. Also promised is the best soundtrack you've ever heard, with sampled music correctly synchronised to come in at strategic points during the action. We'll believe it when we hear it. **stf**

THE SIM CITY PHENOMENON

"There are simulators and there are simulators." So said Barry Sheen – or he would have done if he'd had the chance to smash his legs to pieces in a simulator instead. Some, like *F19 Stealth Fighter* and *Falcon*, succeed not only as simulators but also as absorbing games. Climbing aboard a *Stealth Fighter*, flying across the Gulf and letting rip in some bloody dogfights is not only educational, it's damned addictive. Then there's the *Sim City* style of simulator. On paper it looks so interesting you want to yawn, but start playing and the only yawns are those that come the following morning after a 3 am stint playing mayor.

The idea of the game is to plan your own city, placing residential, commercial and industrial zones around a map – not exactly riveting stuff if you're looking for aliens to bash. Anyone who's played *Sim City* well into the night (and who could resist it?) can soon spot its limitations: it very quickly becomes very annoying that there's no such thing as a sewage system in the game and that you can't build schools or different types of residential zones.

To remedy this deplorable situation there are two new architecture disks planned for release this month from Infogrames. Architecture disk One features three new settings – Ancient Asia, Medieval Times and the Wild West. The second architecture disk is set in the future and contains Future USA, Future Europe and Moon Colony. Each

setting includes different graphics for the landscape and buildings, and new scenarios and problems have been added. In Future USA, for example, you have to construct a spaceport for interplanetary travel and decide between using nuclear fission and fusion power plants. Get it wrong and thermo-nuclear pollution could upset all your plans.

After the architecture disks comes

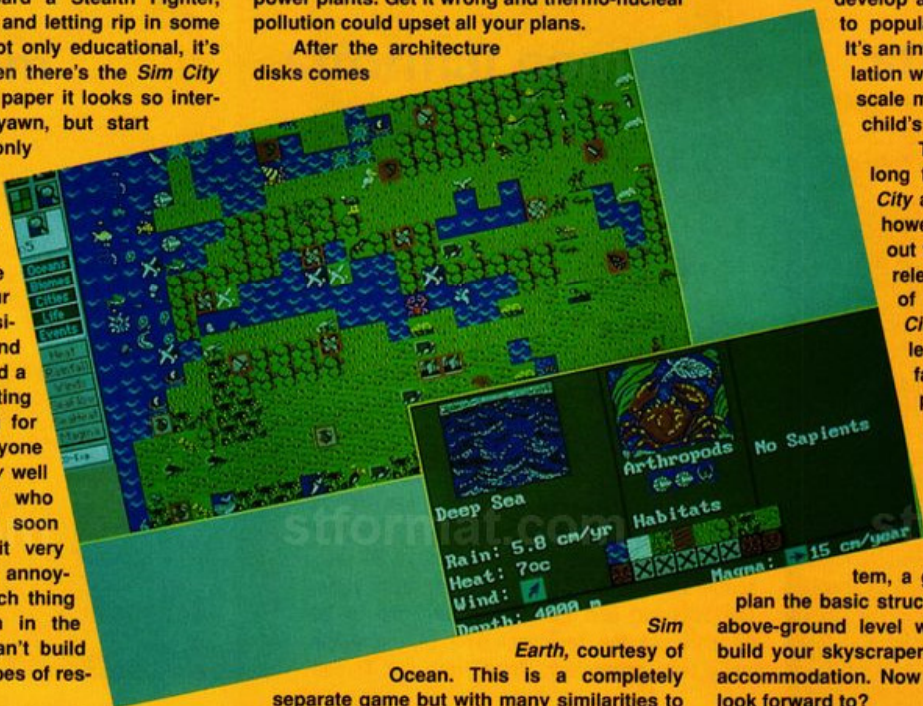

fashion to those in *Sim City*, you can change the way Earth develops, perhaps encouraging fish to become the dominant race rather than humans. By changing the polar wobble, adjusting the weather conditions and toying with the vegetation, you can encourage people to develop and then cross the seas to populate more of the globe. It's an intense and detailed simulation which in sheer scope and scale makes *Sim City* look like child's play.

Those of you who still long to see the original *Sim City* achieve its full potential, however, should keep an eye out for *Sim City 2*, due to be released around the middle of 1991. It takes the *Sim City* idea several gigantic leaps forward, so that you face more of the kind of problems which confront real city planners.

Sim City 2 is divided into several levels – an underground level, on which you can plot the city's sewer system, a ground level where you

plan the basic structure of your city and an above-ground level where you can actually build your skyscrapers and different kinds of accommodation. Now isn't that something to look forward to?

What is certain is that *Sim City* has given a new meaning to computer gaming, proving that you don't need monsters – and indeed opponents – to make a completely overwhelming and addictive challenge. Its follow-ups are set to make this even more obvious, introducing an ever increasing number of gamers to this new kind of simulator.

Sim Earth, courtesy of Ocean. This is a completely separate game but with many similarities to *Sim City*. Instead of planning the development of the whole Earth instead. You begin the game at different points in time, from when the crust begins to cool and the continents drift, right through to the future where the threat of nuclear contamination hangs over the entire planet. Using a set of icons in a very similar

**YOU'LL NEED IMAGINATION,
SKILL, DARING... AND ERR...
£100* FOR A 1Meg MACHINE.**

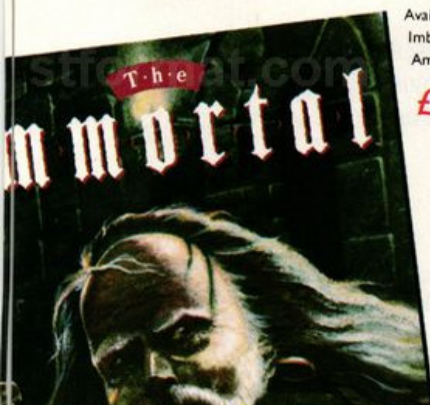

* £100 is the estimated cost to upgrade your Amiga or ST from 512k to 1mb.
If you already have a 1mb machine it won't cost you anything more but the price of the programme!

It's a sad fact of life that only the fortunate few will ever get to experience Will Harvey's masterwork - The Immortal.

Still, those of you who are lucky enough to possess 1mb equipment or a monstrously generous maiden aunt and a birthday coming up, you're in for a rare treat.

Using a uniquely realistic three quarter angle, you are lead through eight levels of labyrinth in a quest to find your long lost teacher Mordimar. In a world of intrigue and betrayal, mystery and blood curdling violence, you are pitted against the most ghoulishly lifelike opponents you'd never want to meet.

All in all, this is one dungeon challenge that no true enthusiast can afford to miss - no matter what the cost.

Available end of September.
1mb RAM required.
Amiga/Atari ST.

OUR PERFORMANCE

& SUPERIOR QUALITY...

...RESTS ON OUR NAME!

When it comes to mice and scanners, *Naksha* clearly lead the way. *Naksha* build mice and scanners with high precision designs and the very best components.

The *Naksha Upgrade Mouse* is silky smooth, operating at a high 280dpi resolution. Supplied with Mouse Mat and Pocket. No Cables — No Fuss. Simply plug in and go.

Naksha Scanners with a switchable resolution between 200 and 400dpi halftones and dual roller tracking, remain straight and true. *Naksha Scanners* come supplied with interface, "express IT" software and either *Degas Elite** or *Deluxe Paint II**.

The *Naksha Mouse* and *Scanner* are available for both the Commodore Amiga and the Atari ST range of computers.

For further information call (0925) 56398 OR any of our distributors listed below for your nearest dealer OR visit any Dixons, Harrods, Selfridges, Bentalls or Makro store.

**Degas Elite* supplied for Atari. *Deluxe Paint II* supplied for Amiga.

Desktop dynamite

■ Two easy ways to upgrade your ST's Desktop. The utterly brilliant NeoDesk 3...

Following the success of Neodesk and Gemini, the popular replacement Desktops, Double Click software have released their own version. DC Desktop has many of the features Neodesk includes, such as placing icons directly on the desktop. Bootup pictures, an icon editor and unique folder icons are all available. DC Desktop is available now, direct from Double Click software, price \$39.95 (£20) ☎ 0101 713 977 6520.

■ Double Click are also planning to be present at January's 16-bit Computer Fair (see *Short stories*, page 12), offering an excellent opportunity for you to see their gear. Be there – we know we will!

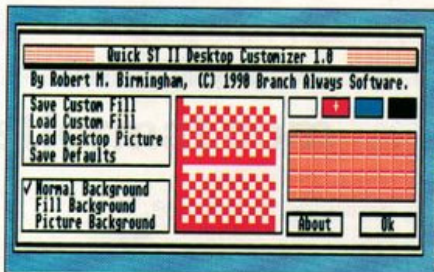

How to accelerate your ST

The cost of a hardware accelerator board is prohibitive to most ST owners, so a software option is bound to be very attractive to speed freaks everywhere. Quick ST, one of the most popular accel-

erator programs, has just been updated to version 2.2.

The program speeds up text and graphic operations considerably and requires a mere 30K of memory. It also supports

the blitter chip and, perversely enough, accelerator boards. Software compatibility is claimed to be very much higher, enabling such applications as DTP to be radically speeded up. Quick ST 2.2 is available from Branch Always Software at \$24.95 (£15) ☎ 0101 206 643 9697.

■ Make your ST go "Whoosh!" for just £15, with the newly updated Quick ST

news from abroad

Top Mac emulator gets big upgrade

Spectre GCR, the popular Macintosh emulator for the ST, has just received a major overhaul. Version 3.0 is now available and includes some very exciting new features indeed.

- The Mac's keyboard mapping has been implemented to support up to 16 hard disk partitions.
- Movement between Mac and ST modes is now easier and warm boots in Mac mode are available.
- The Aync Laserwriter driver is supported, as is the full use of Init files.
- Sound can now be toggled on and off in Mac mode and the Mac's keyboard layout (numeric keypad and cursor keys) are fully implemented.

On the subject of Mac emulation, an American businessman recently pleaded guilty to counterfeiting half a million dollars' worth of Apple Macintosh 128K ROM set chips. So, you are no doubt asking, what? Well, many are believed to have ended up inside Spectre GCRs. Apple are reluctant to release their ROM chips for sale over the counter, so acquiring the chips is always going to be a problem. (Incidentally the whole case was exacerbated by the fact that the man, Dennis Hayes, was selling some of the pirated chips to reputable Apple dealers!)

■ Sales of ST DTP packages have rocketed over the last two years. Each software house produces its own, rarely interchangeable, fonts. Now a new program from America enables you to convert fonts between Calamus, Pagemaster and Postscript Types 1 and 3, thus quadrupling the number of available fonts.

Fontverter 1.5 takes the fonts and enables you to set a list of variables which control spacing, baselines, kerning and bitmapping of the font. Fontverter costs \$49.95 (£25) from Megatype ☎ 0101 206 643 9697.

TOS version 2.0: the full features of the new Mega STE series

As we went to press fuller details were emerging of the latest version of the STE operating system – which includes the Desktop and all the ST's "house-keeping" duties such as file and disk copying. This version of TOS, v2.0, is the one that comes on both the high-end TT and the newly launched Mega STE (see news story, page 9). We downloaded this information from the influential American on-line magazine ST Report.

Basic desktop features:

- Separate .INF files can be loaded to re-configure your desktop
- Menu options can be operated with a keystroke
- Pathnames can be assigned to function keys
- All new desktop icons
- Printing can be carried out by dragging a document icon to the printer
- A help function has been added
- GDOS is vastly improved
- The control panel is completely redesigned: accessory files are now referred to as modules and can be installed or removed at will

Window functions:

- File masks can be assigned to drives
- A "select all" option is available on each window
- In file operation, selected files stay selected until the operation is complete
- Scrolling a window doesn't deselect any files which go off the top
- The cursor keys can now scroll a window
- Directory listings of active windows can be printed out individually
- Seven disk windows can be open at one time
- Background colour can be changed, as can typeface and border pattern
- "Size to Fit" option enables you to reposition icons to fit a window's size

Icons:

- File icons can be placed anywhere on the desktop
- A resource file can now load in user-designed icons when the start up routine is initiated
- Install device now enables you to install individual partitions with individual icons on the desktop
- File drive paths are represented by desktop icons

File Management:

- "Unsorted index" menu option, from the desktop view menu, displays the files in the order they are on the disk
- "Delete item" option enables you to trash selected items in a window (useful if the window is obscuring the trash can)
- "Find file" option enables you to search out specific files wherever they are on the hard disk
- [Alternate] *, opens disk or partitions *
- [Control] *, replaces the contents of the active window with the directory of disk *

Application Parameters

- All-new desktop configuration option:
- Select background colours, border patterns, typefaces and icon colours
- Switch resolutions with a single keystroke
- In "copy file" operations, choose whether to preserve the file's date or not
- Install application has been improved to accept GEM with parameters (GTP)
- An application's default directory can be set.

**12 Months On Site Warranty,
featuring 24 hour response time
is available as an option on all
ST's for just £29.99 extra.**

Service Centre

Diagnostic service £15

Our Engineers can repair ST's and Amiga's in minimum time at competitive rates. We also offer a diagnostic service for which the customer is given a quote for the total cost of repairing the machine.

ROM switch + TOS 1.4 £49.99

This switch allows two sets of ST ROM's to be fitted to an ST and switched between to ensure compatibility with all software. Machines must have TOS 1.09 in two ROM form. If six sockets are fitted, no soldering is required. TOS 1.4 (2 ROM's) and two extra sockets are supplied.

Exchange ST PSU's £59.99

We can offer fully compatible PSU's for ST's at this price in exchange for the damaged PSU. Our engineers can fit any STFM memory upgrades for £20. We can also fit SIMM's, TOS, Blitter chips, PSU's for just £10. Phone for details.

Please Read: Terms of Sale.

We are the longest established Atari dealer in the U.K. We have developed an extensive customer service policy which means that we test all Hardware/Software prior to despatch to ensure that goods arrive in working order. Although our prices are not always the cheapest we do endeavour to offer consistently good service and backup. This isn't just our opinion, we were voted "Best Dealer 1989" by the readers of ST World magazine, not for "the number of boxes shifted", but for quality service.

On Site Warranty: We have recently changed our backup programme by offering 12 months on site warranty as an extra with all ST's therefore giving the customer a wider range of options. We already offer on site warranty on all Star printers and Philips monitors listed at no extra charge.

All prices are correct at copy date 20/11/90, and are subject to change without prior notice. All prices are accurate while stocks last. Phone for up to date prices. All prices include VAT, there are no hidden extras (WYSIWYG). Delivery (in Mainland UK) is free, on orders over £100 (add £10 for next day courier delivery. All prices available on Mail Order Shop prices may differ.

ALL MERLINS PRICES INCLUDE V.A.T. AND POSTAGE (UK Mainland)

Whilst every effort is made to ensure that the information shown in our advertisement is correct, you should ALWAYS confirm any Offers, Prices, Availability etc. prior to placing your order. We endeavour to supply everything as shown and we will ONLY change anything should it be forced upon us by manufacturers or our suppliers. Because our advertising is booked so far in advance, Merlin therefore reserve the right to alter equipment specifications, withdraw any product/offer or update prices (and that can be either up OR down), without prior notice. PLEASE CHECK DETAILS PRIOR TO ORDERING.

Merlin guarantee NEVER to supply anything that has been subject to change without you, the customer, being informed of, and agreeing to, that change.

ORDERING: Just phone our 24 hour order line using your Access/Visa card, OR, send a cheque/postal order with your requirement details. (Cheques need clearance unless issued by Bank/Building Society for you)

WARRANTY: Goods that prove faulty within 30 days will be exchanged for NEW. After 30 days, and within 12 months from purchase (6 Months for software), faults will be rectified by the relevant manufacturers' repair agent and returned to you by courier. 'Sorcerors Seven' s/w will ONLY be exchanged for the SAME TITLE; no refunds can be granted (...due to piracy of s/ware by a minority who spoil things for everyone)

DELIVERY: Goods will be despatched by post FREE OF CHARGE to UK Mainland addresses unless you request courier service (up to 25kg) as follows:
NEXT WORKING DAY...add £6 to order, TWO WORKING DAYS...add £5
THREE WORKING DAYS...add £4, SATURDAY DELIVERY...add £12
(Merlin will ALWAYS despatch goods day of order unless otherwise discussed)

COLLECTION: Merlin Express are predominantly a mail order company but we welcome customers to our trade/collection counter who wish to pick up goods from us. Why not pay us a visit, we will always be pleased to help you with your enquiries.

Atari: back on the right tracks?

1990 was hardly Atari's best year.

What may be new is an admission that all is not well, and a determination to make sure 1991 goes a whole lot better.

Steve Carey sifts the evidence

Rearrange the following words into a meaningful sentence: "Atari, 1990, a, vintage year, was, for." No, sorry, can't be done. 1990 was a bit of a stinker, and the sooner Atari are in a position to say, "Yes, but look what we've done since," the better.

Remember the Great STE Fiasco? Atari upgraded the ST and discovered that not only was old software incompatible, but many new games were non-STE friendly. Remember the

"What Atari say in public and what they admit off the record do not always coincide"

launch of the much-heralded ST-luggable, Stacy, the batteries of which packed all the lasting power of an ME victim after a marathon? Remember the Great STE fiasco, part two, when a faulty DMA chip meant that it screwed up your hard drive? Remember Atari refusing to guarantee, even after it had been put right, that the STE would run with third party hard drives?

There are faint signs that Atari may be putting all that behind themselves. So far the evidence is mostly anecdotal, stemming from the latest American launches (see News), the right kind of noises coming out of Slough for a change, a general agreement among those who may justifiably claim to be in the know and a fairly successful attempt, in the Whistle Stop Tour, to take the show on the road. The reply by Atari UK's Managing Director Bob Gleadow to the open letter sent by *ST FORMAT* (see pages 32 and 33) hardly offers any great cause for hope, but what the company says in public and what it's prepared to admit off the record do not always coincide. Is Atari really back on the right tracks?

Admittedly, talking to an Atari employee may not be the best way of finding out. On the

other hand, it makes a pleasant change to talk to someone at Atari who doesn't regard a tentative stab at an analytical question as a full-scale assault on the company, and who isn't a tired old cynic with more interest in killing bad stories than in confronting them.

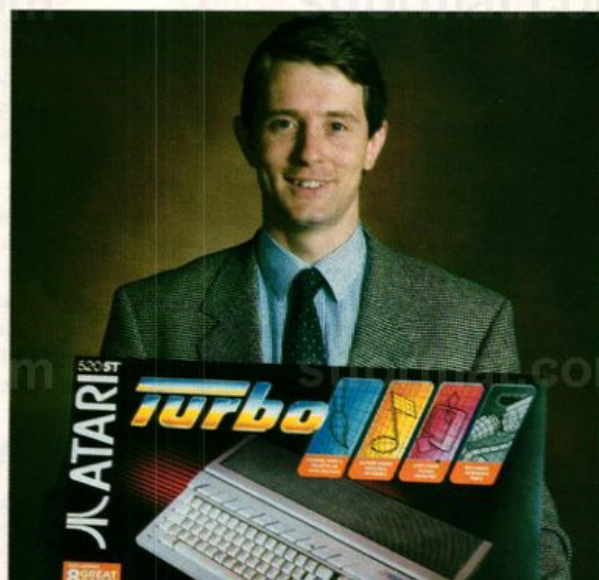

Peter Staddon, Atari's (fairly) newly appointed Marketing Manager, appears to be just such a one. He is predicting great things for Atari in 1991 and is prepared when pushed to admit that things could have been done better in the past. So how would Staddon categorise Atari's year? Considering the tough economic climate, he points out that a claimed 40% increase in ST sales is exceptionally good.

He insists too that the STE problems and the underlying management problems are now firmly behind the company. "If you want to see how we do things now, look at the TT," he says. But didn't that take two years to arrive, and suddenly double in speed in the three months before its eventual launch?

Staddon sticks to his guns, insisting that this demonstrates Atari's ability to respond flexibly to a changing marketplace: "at 16MHz it would still have been a very impressive

"Atari insist that problems with the STE and with underlying management are now firmly behind them"

machine; at twice that speed it's blindingly fast." The delay demonstrates that Atari is prepared to launch only when the time is right, he says – a bit of self-justification that simply takes the breath away.

■ Peter Staddon, Atari UK's new Marketing Manager, is proud of Atari's exceptional sales in 1990 but is still prepared to admit they could have done things better

There is a new determination at Atari to put the past behind them. And it really is very important indeed that Atari recognise the existence of the problem, rather than, as has been

"The ST is the cheapest entry into the 16-bit market by £100"

the case, insisting that it's all an invention cooked up by a computer press that is never happier than when it's telling bad news.

One important reason Staddon is keen to stress that the ST is going to do so well in 1991 is the price differential. "It's a point that's often overlooked, but the ST is the cheapest entry into the 16-bit market by £100, and that price puts us within reach of more people than would otherwise be able to afford to buy a 16-bit machine.

"The installed user base of STs in this country, allowing a generous ten per cent for natural erosion," Staddon proclaims, "is now over half a million." And how many of those have been sold in 1990? "That's not a figure that we're making public, but it is over 150,000." We're doing just great – it's the oldest argument in the book, principally because it's impossible to contradict. Despite requests, objective sales figures are still not forthcoming.

As for 1991, Atari plan "aggressive support" for the ST. And while on the record Staddon is saying little very specific, it's clear that there are Big Plans afoot. Asked about the Panther, for instance – the ST games console that is widely rumoured to be in the pipeline – Staddon grudgingly admits that the thing actually exists, but he adds, "It's not something we're prepared to talk about."

The launch in the States of the 16MHz Mega STE in November (see report in this

"We have a very strong position in the professional music industry, and I don't want us to lose that"

issue's News pages) – something Staddon was unable to discuss at the time of interview – certainly has a good smell to it. Bundling the new machine at \$3,000 with an excellent DTP program and the latest Atari laserprinter is a smart move, but the really clever bit is that 16MHz is twice as fast as the current ST. The decisive move to sort out the TOS nonsense is yet

another indication that suddenly Atari are beginning to get on top of things.

Furthermore, at last Atari appear to be get-

"The TT is the Rolls Royce of the Atari range"

ting the music message, too. "We've got to stress the music side," Staddon says, "the fact that MIDI is built-in to every ST. We have a very strong position in the professional music industry, and I don't want us to lose that."

"Secondly, we need to impress on people that the ST is used in this very specific and professional music environment. So if you have an ST just to play games, that's OK, but by highlighting serious applications like this, we can show people that there's much more they can do with it."

It's an important argument, particularly coming from Atari themselves. If the ST can be presented in the media as a powerful, serious, professional machine then it will be that much more desirable than if it is presented solely as a games machine. And so? And so, the more people buy the ST, the bigger and better will be the software and hardware support, the more

secure will be its future and the longer we'll all be using the machine.

Something similar applies to the TT. What difference does it make to the average 520ST owner that Atari also produce a machine that is aimed at a very different market and costs over £2,000? Staddon's answer: "If someone goes into a shop and sees the ST on sale at £299, and next to it, from the same company, a serious, fast and incredibly powerful business computer, that's going to inspire confidence. This company knows what it's doing. The TT is the Rolls Royce of the Atari range."

This too is shrewd. Not only does it provide a direct upgrade path (the TT runs everything the ST does), but there is also bound to be a "trickledown" effect. Already the TT Desktop is apparently to become part of the new Mega STE, and there's no reason why subsequent launches shouldn't lift ideas from the TT's internal architecture.

Suddenly there is evidence that Atari are getting back onto the right tracks again. At the moment you'd have a better chance of saying who killed Laura Palmer than predicting how Atari's 1991 may go. But it's unlikely to be as bad as this year. **stf**

THE ST IN 1991: OBSERVATIONS FROM PEOPLE IN THE KNOW

Atari Marketing Manager Peter Staddon's point of view is not altogether surprising: "We're doing fabulous," he's saying, "and we're going to do even more fabulous next year." So what's new? After all, what else would you expect a Marketing Manager to say? **ST FORMAT** also canvassed the opinions of some people whose livelihood depends on Staddon

"We sell to people who bought their ST as a games machine and find they can do more with it"
– David Link, HiSoft

being right but who aren't in the company's pocket, and whose comments are therefore worth hearing.

It emerges that there's a rather pleasing tug-of-war going on between those who try to claim the ST as a serious machine, and those who point out that it has primarily sold to games players and has very successfully convinced games players to do more with it.

If the argument is ever settled, we're all going to suffer. As it is, many games players soon discover that there's more to life than games – and, more importantly, that their ST is not being fully exploited. It's a bit like buying an expensive hi-fi and just playing the radio – fine while it lasts, but why limit your options?

"From listening to the way they are talking," says Mike Dale, boss of Signa (Calamus suppliers and DTP heavyweights), "it seems

Atari are planning to address the serious side more than they have done hitherto. What we've achieved in the past has been down to what we've done for ourselves."

The only hard evidence of a change of attitude so far, Dale says, has been the Whistle Stop train tour: "It was a different way of going about things. At last it's beginning to happen." Dale appears to argue that there's no real gap between the top of the ST market and the TT. "Anyone who would have bought a Mega will now buy a TT," he says. "If you price up a Mega 2 and bring it to the same peripheral spec as the TT, the difference is just £100. And at that price, why not buy a TT?"

"The ST will still continue to sell well in the education market, which can't afford TT prices," claims Dale. "A number of people are part-exchanging Mega 4s for TTs, allowing us to put Mega 4s into education for around £600-£650."

David Link of HiSoft states, "We have always been very happy to sell to people who bought their ST as a games machine and find they can do something more with it. A lot of the people who whinge about Atari not marketing the ST as a serious machine aren't making sense. It's not Atari's job. In this country, the ST has been sold basically as a games machine that can do more."

"There certainly seems to be an undercurrent of 'Let's get things right for a change,'"

■ Mike Dale, boss of software house Signa, sees signs that Atari are at last beginning to recognise the ST is also well suited to serious applications

says Paul Glover of the ST Club. "I think it's important to remember," he adds, "that these may well not be Atari UK's problems – especially with hardware."

"I think business users buy the ST despite, rather than because of, Atari," he continues; "they almost seem to be ashamed at the things it can do."

■ What do you, the Atari customer, think? Are Atari doing enough? What more can they do? We want to hear your views. Write to: Atari 1991, **ST FORMAT**, 30 Monmouth St, Bath BA1 2BW

"Atari seem ashamed at the things the ST can do"
– Paul Glover, the ST Club

PageStream®

Reality at its Best!

You've just come up with a great idea! Now all you need is PageStream, the desktop publishing program that will make those great ideas a reality!

Bring your words and graphics together to express yourself like never before. Jot down your ideas, transfer them into PageStream, mix and match type styles, add pictures, save documents and print them out. Get stunning results every time.

With PageStream you can create anything from simple business cards to sensational brochures.

Select from a wide variety of text handling features; change lettering styles, sizes and shapes. Add impact and attention to your page layouts.

Place previously created graphics into your layouts or design your own illustrations with PageStream's drawing capabilities.

Pre-define unique page characteristics such as line spacing, paragraph formatting and character spacing. This gives you a uniform text appearance throughout your multiple page documents.

Print to a wide assortment of printers. PageStream supports dot-matrix, inkjet, laser, non-PostScript and PostScript printers.

Enhance your ideas with a touch of colour. PageStream provides you with a wide spectrum of colours and in addition you can modify these colours to meet your exact needs.

In short, we take the hassle out of presenting your ideas clearly. PageStream is reality at its best!

This entire ad was created using PageStream.

■ "The ST is a fine machine that Atari seem incapable of selling properly," argues Steve Carey, *FORMAT's* Editor

Dear Atari..

ST FORMAT's Editor insists that Atari coul

Dear Bob,

In the year and a half since its launch, *ST FORMAT* has grown very rapidly to be Britain's best-selling ST magazine. Our success is founded upon the success of the ST (and in some measure, we like to think, vice versa), and we therefore have every reason to hope that the machine will continue to do well.

Please, therefore, take this letter in the spirit in which it is meant. We have no reason to want Atari to look bad.

1. The frustrating thing for us - as we believe it is for dealers and ST owners - is that the ST is a fine machine that Atari seem incapable of selling properly. Take, as one example, the great ST upgrade fiasco. The STE, it seemed, made its appearance in late 1989 because stocks of the ST were in short supply, and not because Atari deemed it the best moment for it to be launched.

2. Because Atari introduced the machine at such short notice, without informing developers and software houses, no-one was prepared for problems of incompatibility. It's one thing to find that ST owners are being encouraged to upgrade to the STE, and are left to find out for themselves that many of their older games, Public Domain and in some cases serious commercial software won't run. After all, ran Atari's argument, we did tell the programmers what the rules were (not that that's any consolation at all to the poor, unhappy customer).

But it's quite another thing not to let software houses and programmers know the STE's new specification. The result was that, at one stroke, Atari managed to make life difficult for developers (who had to write patches so their work would run on the new machine), software houses (who had to cope with a sudden and unexplained rise in failure rates and therefore returns), retailers (whose customers were appearing and demanding instant action) and, last but not least, the customers themselves, who were being sold software that had no chance of working on their new machines.

That's quite an achievement. And, to cap it all, Atari have never, to this day, apologised. "We screwed up," they should have said: "we're very, very sorry and we'll be doing our very best to make sure it never, ever happens again."

3. As proof that Atari's attitude had not improved ten months later, the unfortunate STE postscript takes some beating. A large batch of STEs - some suppliers were putting the figure as high as 50% - were suffering sudden and inexplicable failures when linked to hard drives, causing data to be lost after just a few hours.

Atari's response was to be "more than satisfied" with the performance of the STE; to try to kill the story by denying it was a problem; to

ST FORMAT

fix the faulty DMA port on faulty machines on request, but do nothing about recalling faulty machines before they had been sold; and then, to cap it all, to insist categorically that Atari could not guarantee that the STE would run satisfactorily with third party hard drives.

That, coming from a company with claims - or perhaps that should be pretensions - to being a business supplier, is nothing short of disgraceful. (Never mind that, a while later, Atari very quietly let slip that they'd repaired the offending DMA chip. Apparently your STE is all right if it has a red dot on the box next to the serial number.)

When is the current version of TOS, long past its sell-by date, going to get the upgrade it deserves? When is the TT version, which appears, ludicrously, to have been improved by Atari noticing Neodesk and Gemini, to become part of the ST?

4. Finally let's take one very small but telling point. The language disk in the new Discovery Pack is still on a single-sided disk - a little surprising when single sided disk drives disappeared yonks ago. But when the new ST owner formats a disk to back up the language disk onto, he or she will do so as a double sided disk. Result: "The source disk is not the same type as the destination disk" (one of GEM's less helpful alert boxes!). You're then dumped back to the Desktop - without having been able to perform the copying operation. Aargh!

To you or to us that wouldn't be a problem, but what on earth is a new ST owner going to make of that? Paul Glover of the ST Club tells me he's had half-a-dozen phone calls on the subject from confused Atari customers in a week.

5. The train tour is - we hope - one indication that Atari have turned a corner and are making a determined effort to push what is still a bloody great machine. We here at *ST FORMAT* are convinced that, if this kind of effort can continue, Atari's fortunes can be revived and the ST can enjoy even greater success than it already does.

Let me stress once again that we at *ST FORMAT* have no reason at all to want to see Atari do badly. The ST is a superb machine - at its price, we believe, the best - and your users have proved (not least by their attendance on the Whistle Stop Tour) incredibly loyal to Atari. Isn't it time for that patience to be rewarded rather than tried?

Yours,

Steve Carey
Editor, *ST FORMAT*

the top 50 games of 1990

In an Alan Whicker voice... And so, as 1990 becomes nothing more than a fading sunset on a motorway to oblivion, we look back at those joyous nuggets of truth, honesty and white-hot gameplay that are the ST FORMAT games of 1990. Join us, then, as we raise our lipstick-stained beer mugs, slap each other on the bottom (in a manly, public school sort of way) and say "Dear, dear 1990. I loved dear old 1990 you know." Our man with the swingometer: Andy Hutchinson

SHOOT-'EM-UPS

Just what is it that makes one shoot-'em-up *cor!*-inducingly better than another? If you think about it, it's not the graphics, the sound or the eight zillion field parallax scrolling. No, it's some super-duper added ingredient that makes you return to the game yet again even after those bloody-minded mid-level spike

monsters with the fire spitting tongues and the bad breath have got you for the fifth time that day. With a shoot-'em-up, more than any other type of game, it's that extra ingredient which marks out the cream from the crap. Here's ten that caught the bloodshot eyes of the ST FORMAT boys...

PLATFORM GAMES

The platform game has been around since the distant and very dim past of 8-bit computers - in fact the very first massive selling software title was a platform game called *Manic Miner* (takes you back a bit, eh?). The ten in this list differ wildly. With platform games, the only things that count are your timing and your

eyesight, because jumps, walks, leaps and puzzles are the name of the game. So if you're easily frustrated then take the dog for a walk off Beachy Head instead: you're bound to find that much more enjoyable than dying for the fiftieth time in *exactly* the same spot, on the *same* level, with the *same* power ups

SIMULATORS

Surprisingly enough, it isn't always technical accuracy that marks out the good from the bad: a decent simulator is one which takes account of the fact that it is only a simulation and capitalises on that to create something that'll make more than two trips out of the disk box. Quite often the best are the

ones which choose slightly out of the ordinary themes, such as a body hair simulator or a bottom burping pub toilet game. Sports, city and flight sims - all have an explicit aim to create another world that can become incredibly realistic - if you just suspend disbelief. Some are better at allowing that than others

ADVENTURES

Once upon a time adventures used to be about finding the right word to tell the computer ("*>Go North. >Enter shop. >Exit shop. >Go South. >Die of boredom*"), and consequently most were a test of your vocabulary and patience rather than your intellect or imagination. Transformed over the last five years, the genre

has evolved into a very graphical format with the emphasis on gameplay and ease of use. The mouse has replaced the keyboard and the brain has replaced the thesaurus. Here are ten of the dooziest adventures of 1990. If you haven't looked recently, isn't it about time you re-examined your prejudice against adventures?

PUZZLES

Why does your toast always fall butter side down? Why is belly button fluff always blue? Why do you never get pulled over by the police when your MOT and tax are fully up to date? It's a puzzle. The computer variety of puzzle comes in various shapes and dizguyzis but the weighting needs to be just right or you feel

the need to take a large aubergine to your ST, and goodness knows we wouldn't want that. In many ways the most addictive kind of game you will ever play, and 1990 has seen a crop of the kind that keep you seeing squares, pipes and spherical objects when you're trying to get off to sleep

■ **Xenon 2**, for many the high point of shoot-'em-ups; for others, the one that killed 'em

1. Xenon 2 ImageWorks

An easy choice for the top spot, and one few would argue with. This game has everything: a rocking soundtrack, wicked graphics and the kind of gameplay which the Bitmap Brothers manage to squeeze out of an ST with alarming and enviable regularity. Best moment: visiting the dodgy alien Arfur Daley in the shop

STF rating 90%

2. Blood Money Psygnosis

Psygnosis churn out exceptionally high quality games. They also have exceptionally high quality, shiny packaging which looks very, very nice on the old box shelf. This one is an absolute corker, with frantic two-player action that can't be faulted. It would hardly be going too far to call this an all time classic

STF rating 90%

3. R-Type Activision

It's impossibly difficult to convert some arcade games to the home computer, but Activision do a competent job of this mega-blast. Disappointing in some quarters, but nonetheless with quite enough bloody huge end-of-level aliens to make you shout, "Lumme, look at the tentacles on that!"

STF rating 90%

■ **Ocean's** outrageously entertaining **Rainbow Islands** – desperately good fun

1. Rainbow Islands Ocean

Certain games are renowned for causing the ST FORMAT team more than a few headaches around deadline week: this is one. Funny, absorbing and addictive – no game has the right to be this much fun. **Warning:** don't start playing this game if you've got to be somewhere else within four or five hours

STF rating 93%

2. Rick Dangerous 2 Microprose

After the first *Rick Dick* was criticised, and rightly, for being too hard, the programmers tried hard to make *v2* more playable. They succeeded. *Dick 2* combines wicked puzzles, doody graphics and a cutesy theme. A cross between Indiana Jones and Charlie Chaplin, Rick'll keep you playing forever

STF rating 86%

3. Flood Electronic Arts

The Bullfrogs (of *Populous* fame) put novelty and originality into a stagnant genre. *Flood* is an absolute treat. You guide a little dinosaur character around a weird landscape collecting rubbish. Instead of a clock counting down, the screen slowly fills up with water. No extinct creature should be allowed to have this much fun

STF rating 91%

■ **Flight sims** have never been this good: **F19**. – Oh hello lunch, nice to see you again

1. F19 Stealth Fighter Microprose

The mummy and daddy of flight simulators. This one is so good that mad Saddam blagged a load of copies to gen up on the American threat (he did, honest). If you don't own it yet, put it at the top of the Crimble list or use that John Menzies voucher on something more exciting than the new *Mayfair* calendar

STF rating 96%

2. Kick Off 2 Anco

...And then there's the best soccer game of all time. Great gameplay, fast action and a four player option. The kind of game that breaks up families, ruins lifelong friendships and causes outbreaks of violence. It is also the game reviewers play when they are not reviewing games. One of the all-time classics. No argument

STF rating 92%

3. Sim City Infogrames

You stop wondering why city planners are so bad when you start making life unbearable for the citizens of your own silicon city. The most reverend Mark Higham himself still spends many a night making life hell for the little people... and then he loads up *Sim City*. The first ever playable "educational" game?

STF rating 92%

■ **The best adventure ever?** **Operation Stealth** is certainly well up there, we reckon

1. Operation Stealth Delphine/US Gold

Taking the graphic adventure to new limits is this corker from France. You take on the role of John Glames, a spy sent to recover a stealth bomber. Some seriously brainfusing puzzles are mixed in with superb graphics and unfaultable gameplay. According to many, the best thing that ever happened to adventures

STF rating 93%

2. BAT UBI Soft

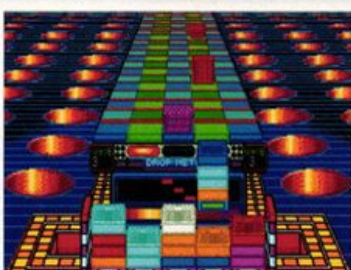

Everything about *BAT* is revolutionary, from the ease of use and the active icons to the sound card which comes with it, not to mention the sheer size of the game. All you have to do (all!) is save a planet from annihilation while at the same time keeping your bottom in two pieces. Supremely wicked game

STF rating 92%

3. Chronoquest 2 Psygnosis

Psygnosis bring their own very distinctive look to the adventure format. You zip between different time zones such as Ancient Greece, Medieval France and the era of the swash-buckling Musketeers. Notable for scaring the wits out of Mark "little boy lost" Higham when one of the girly characters spoke back.

STF rating 88%

■ **Klax:** Do not in any circumstances begin to play this game if you have to be somewhere

1. Klax Domark

In the most addictive puzzler of the year, a series of tiles shuffle morosely down a conveyor belt and you have to arrange 'em in rows at the other end. A simple concept, well programmed and perfectly weighted. Perfect for *après* Waltons Sunday afternoons, though not one to pass away a few minutes: too addictive

STF rating 87%

2. Light Corridor Infogrames

The game of Pong, brilliantly updated in this superb test of hand and eye coordination. You control a paddle, with which you knock a large silver ball down a corridor. Like pinball from the ball's point of view and one of those games that you find yourself seeing in your mind's eye when you're trying to sleep

STF rating 82%

3. E-Motion* US Gold

"He said the elasticity connected with molecules in the process of continual change in relation to the physical position of said objects." "What did you say, Dot?" "I said, your tie's in your gravy, you wally!" A bizarre but playable game about particles and Einsteinian motion

* Gravy not included

STF rating 76%

SHOOT-'EM-UPS

4. Thunderstrike Millennium

This radical 3D shoot-'em-up provides a new twist to a jaded format. Wicked graphics and lots of tasty little extras make the game really worth playing. Saucier than a very saucy thing, faster than a very fast thing and hotter than a plate full of chillie-peppers. Not one for your granny, probably

STF rating 88%

5. Turrican Rainbow Arts

Reviewed last issue, the new kid on the block (*blurg, puke*) takes the shooting explore-'em-up to new and dizzy heights. Whacking great fists and loadsa bats make life very hard, very tough, but very rewarding – provided you can stay the pace. Just the kind of thing to take out your post-Christmas huff on

STF rating 82%

6. Simulcra Microstyle

Taking the *Thunderstrike* style one step beyond is this nifty little title. You control a buggy-cum-spaceship-cum-deathstar which has to bring down forcefields while fighting off the hordes of nasty blighters who want your goolies for the mantelpiece. Only duff thing about the game: what the hell does that name mean?

STF rating 81%

7. Wings of Death Thalion

Taking a step in both directions at once – not quite as painful as it sounds – is this traditional ruin-their-day-'em-up. Piloting your wonder ship, you transform from a pesky li'l mosquito into a mighty eagle, drilling holes in just about anything which comes your way. Go ahead, punk, make my bed...

STF rating 81%

PLATFORM GAMES

4. Batman Ocean

With *Batman* the monster movie hit of last year, it wasn't a surprise when this game, combining platforms and car racing in a nifty package, sold many thousands. A batjump above your average licence, though we perhaps overrated it on first release. Hence it gets a lower position than its mark would indicate

STF rating 91%

5. Strider 2 US Gold

Son of Strider, striding about in a very striding sort of way, Strider has to wave his sabre (oer, etc) at all the nasties out to get him. The main twist is that when he warms up he transforms into a menacing robot with a death wish. Not a classic, for sure, but a damn fine bit of striding, as Dale Cooper might put it

STF rating 79%

6. New Zealand Story Ocean

In this, the first of 1990's bumper batch of cutesy games, you move a furry blob around the levels, avoiding the wildlife and collecting the collectables within an increasingly impossible time limit. Pixel perfect jumping required, with very little chance of success unless you really, really work at it. Just brilliant

STF rating 78%

7. Indiana Jones and the Last Crusade (the arcade game)

US Gold

Another super-large licence from the Lucasfilm stable. The basic plot of the film is replicated, with Indy conquering rats and climbing granite walls. Pretty goddam frustrating in parts. Oh yeah, and Dad came too

STF rating 77%

SIMULATORS

4. Wayne Gretzky's Hockey Mirrorsoft

Attempting to recreate ice hockey on a computer is always a hard task, so it's reassuring that Wayne's offering has all the violence left in. Yes, folks, in this game you can turn your teammates' faces into goo and then have a shower together after the game

STF rating 90%

5. 3D Tennis Palace

Adopting a revolutionary graphical style, Palace score a big hit with this great, great tennis game. The fact that the players look like stick men who've been run over several times by a steam roller doesn't detract from the game's playability one bit. One to wear out your joystick

STF rating 88%

6. Greg Norman's Ultimate Golf Gremlin

Everything is variable – including the advice of the caddy: "Sir, I'd recommend a wood... Yes, but the wood goes better with your jumper, Sir... Oh, and how should I sod off, Sir? No, Sir, a three-iron would be better suited to clubbing me senseless..."

STF rating 86%

7. Fighter Bomber – Activation

Loads of different planes and a plethora of missions single *Bomber* out. You can fly practically any plane you like, practically anywhere in the world, practically. Of course don't try landing a light plane in Red Square or you could end up filling cruet sets in a Siberian salt mine

STF rating 84%

ADVENTURES

4. Mean Streets US Gold

The detective story gets kicked into the 21st century with dark and atmospheric *Mean Streets*. You are Tex Murphy PI and you're investigating a murder. Searching houses, hacking computers and stomping on heads – this is the lot of the futuristic PI. A very addictive puzzler, now with added humour

STF rating 84%

5. Space Quest 3 Sierra

A bodacious graphic adventure with an extremely slick and professional feel to it. Packed full of headnumbing puzzles, the third *Space Quest* game reaches new heights of hand-on-face, tittering chuckles. The kind of adventure that adventurers love, and impress non-adventurers with as an example of what can be done

STF rating 83%

6. Zak McKracken and The Alien Mindbenders Lucasfilm

Striking a note with kiddies, adults and games reviewers, this one has a decidedly movie-like feel, enabling you to interact with some very weird characters indeed. Very nearly a stunningly good game

STF rating 82%

7. Loom Lucasfilm

Yet another from the Lucasfilm factory. Bobbin is a weaver. He has a nice cloak and he's also nifty with a magic staff. You have to save his guild from spending eternity as a gaggle of geese and in the process restore harmony to the troubled land. Super graphics, super jokes and whizzy magic spells

STF rating 81%

PUZZLES

4. Pipe Mania Empire

Taking its cue from the legendary *Pipeline* game of eons ago, *Pipe Mania* involves a body of water making its way around the screen. You have to lay down a series of pipe connectors before the fluid comes gushing out of the last pipe. Opinion is divided: Higham loves it, the rest of us loathe it

STF rating 76%

5. Manix Millennium

Fat Filbert's in trouble, his cosy little world turned upside down by some malevolent force with a sick sense of humour. To restore the landscape to its original hue and colour, you bounce around, avoiding the hazards such as spikes and acid. Like *Pacman* on wacky baccy, according to Higham (who should know)

STF rating 71%

6. Plotting Ocean

Whittle away a wall of blocks, each of which has a different pattern on it. To do this you fire a similarly patterned block at it, and then the blocks above drop down. The two-player mode is brilliant 'cos you can upset the other player's game by playing really selfishly (tee, and in a very real sense, hee)

STF rating 72%

7. Vaxine US Gold

Well received *E-Motion* follow-up, mainly because of superb graphics and sheer phenomenal speed. A body is invaded by some thoroughly 'orrible germs – and you're the cure, a dose of penicillin sent to destroy them. It's doctors and nurses at a particle level, and every bit as much fun as it sounds

STF rating 84%

8. Rotox US Gold

Looking like Robocop with a Jetpack and a headache, Rotox is a slightly weird build-and-then-blow-'em-up, set in a futuristic world. The varying player viewpoints make it highly playable and joystick fracturing in the extreme. Not everyone's cup of tea, but an excellent, violent outing in the best traditions of the genre

STF rating 81%

9. Saint Dragon The Sales Curve

One of a sudden, inexplicable outbreak of "Dragon" titles, this shoot-'em-up has a couple of tasty twists that make it eminently addictive. You take on the role of a swivelling multi-segmented Dragon. The mission: destroy everything in sight – and then get straight home for tea and biscuits, young man

STF rating 78%

10. Anarchy Psygnosis

In something of a departure from the usual Psygnosis style, Anarchy has a very small, dinky box and is a cover version of that classic game, Defender. Loads of add ons, a screaming soundtrack and just *lively* gameplay. Not exactly what you'd expect from Psygnosis, but what the hell, a great game anyway

STF rating 77%

8. Axel's Magic Hammer Gremlin

Yes, well, basically Axel has this great big hammer to smack on all the nasty creepy crawly walky roundy things which people – er, occupy Funnyland. Then he has to rescue the pretty princess and take her back to his bijou residence for a fairytale romp ever after. Quite

STF rating 76%

9. Twin Worlds UBI Soft

Revenge is the name of the game in this platformer from France. You're an Elf on a mission, namely to sort out the nasty so-and-so's who did your dad over – and then it's gnome-ward bound (*eurgh!*). By no means as sickly cute as this brief summary would suggest, Twin Worlds has quite a following

STF rating 69%

10. Toyoties Infogrames

A humorous little game, this. You are Cyprian, sent by the king to find his son Barnaby. Bags of weird and wonderful creatures and some cunning puzzles to keep you guessing. On reflection, however, we don't believe it's lasted quite as well as we originally reckoned. Hence it gets a lower position than its mark suggests

STF rating 81%

8. Debut Pandora

Not ones to go for the small theme, Pandora aim to do nothing less than simulate an entire sodding planet. You can monkey around with the atmosphere, the climate, the water and life as we know it. Best bit: being environment unfriendly and making life absolute hell for the poor creatures living on the planet

STF rating 77%

9. F29 Retaliator Ocean

Not a particularly realistic simulation, but nonetheless extreme fun and my personal favourite. All that hi-tech weaponry and super fast graphics give me a serious case of hot rocks syndrome. And it's friendly, too: definitely the flight simulation for people who find flight simulations more trouble than they're worth

STF rating 76%

10. Cricket Captain D & H Games

Every facet of the game of cricket can be changed in this nifty sim. You can manage or play or both, and all standards of play are catered for, from international to ST FORMAT second Eleven (never picked up a bat in their lives). Playing this game is far more interesting than watching the real thing (but that isn't saying much)

STF rating 73%

8. Dragon's Breath Palace

"What's the matter, perm go wrong?" "No, I bred this dragon too quickly and it pooped on me head." That's just one of the problems you face in this really rather wizard game. Breed dragons and send them on daredevil missions to face wicked people, or just down the shops for a packet of Jaffas and some toffee Poppets

STF rating 92%

9. Drakkhen Infogrames

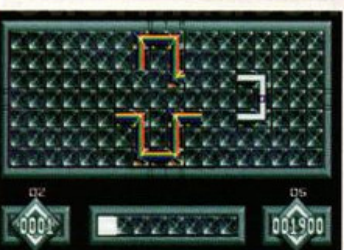

A medieval romp through some lovingly tooled locations is the order of the day in this French *aventure*. Ironically enough, in this one you've got to mince around wiping out dragons rather than breeding them (see 8). Lots of friendly point-and-click action. But what's this sudden fascination with dragons, anyway?

STF rating 79%

10. Dragonflight Thalion

Role playing crossed with graphic adventure games in this tasty Thalion game. Once again those pesky dragons are the cause of all the grief. This time they save the earth from a severe bout of the grievous nasties. Loads of clicking, pointing and helping elves. Great if you like that sort of thing, which you do

STF rating 71%

8. Atomix Thalion/Active

Not more sub-atomic jiggery pokery, surely? Well yes, it is actually. Your mission is to create molecules by shunting atoms about, sort of like the Enola Gay really. There are 30 levels of an extremely wicked nature just waiting to ruin the day of anyone with a God complex who thinks he can complete the whole thing

STF rating 79%

9. Blockout Rainbow Arts

Blockout is a yet another variation on a well-worn theme, a 3D version of the 1988 Russian blockbuster Tetris. Aim a series of funny shaped blocks down a tunnel so they fall flat along the bottom. The shapes can be rotated in three dimensions, but after two or three levels you soon learn that your joystick can't

STF rating 72%

10. Loopz Audiogenic

You create loops. And, er, that's it, really. Not as simple as it seems, and maddeningly addictive. (*Note: Hutchinson insisted on us putting this one in, even though the rest of us thought it was crap – Everyone else*)

STF rating 58%

For newcomers and experienced users alike

"The most comprehensive compilation of ST hints, tips, cheats and buying guides ever published!"

GET THE MOST FROM YOUR ST, written by **FORMAT** Deputy Editor Mark Higham, reviews the wealth of software and hardware designed for your ST, including technical tips and game cheats that never made the pages of **ST FORMAT**.

Find out which word processor you really need to write letters. Track down the trickiest cheats to the very best games. Discover the foremost DTP package for laying out newsletters. Get wise to the finest sequencer for compiling tracks. Uncover the ultimate graphics package to design posters. Everything is put under the microscope in **GET THE MOST FROM YOUR ST**.

If you can't afford to buy the professional packages, how about taking a dip into the Public Domain? **GET THE MOST FROM YOUR ST** lists all the best PD software across all fields to help you discover where your interests really lie without breaking your bank manager's heart. There's also a comprehensive guide to Britain's best ST Public Domain libraries.

But the book is more, much more, than just reviews. It also explains all those weird word processing and DTP terms, describes what equipment you need to build your own (remarkably cheap) recording studio and details the merits of different programming languages.

Then, when you get your software home,

refer to the tips sections and find out how to get the very most from your software and hardware.

Subjects covered in the book include word processors, desktop publishing, games, public domain, scanners, hard and floppy drives, monitors, printers, graphics, business, communications, video, education, programming, emulators and more!

Two optional companion disks accompany the book. These contain a professional-quality word processor, one of the all-time best comms packages, an absorbing game, a virus checker, brilliant art programs, educational software and really crucial utilities. **stf**

Are you wasting your valuable time setting your ST's clock?

Frontier's Forget-Me-Clock II is the answer

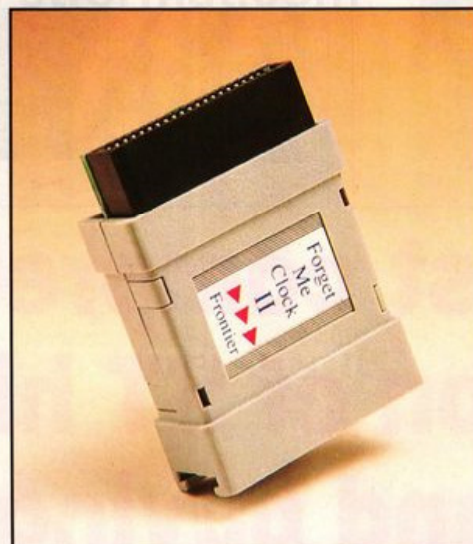

If you're one of those people who has an auto-run program annoyingly prompting you for the time and date every time you turn on your ST or ST^E or even worse, if you're one of those ST or ST^E users who doesn't set the system clock then Frontier's Forget-Me-Clock II cartridge is the solution you've been hoping for.

Just Plug It In And Go

With the Forget-Me-Clock II plugged into your ST or ST^E's cartridge port the system clock (used by the Control Panel) and keyboard clock will automatically be set at turn on or reset by a small auto-run program supplied with the Forget-Me-Clock II. No longer will you have to waste your time setting your ST's clock. Using the Forget-Me-Clock II also means that files saved on disk are always properly time and date stamped making finding the latest version of a file the simple task of just looking for the file with the latest time and date.

Full Pass Through

Frontier's Forget-Me-Clock II is a clock cartridge unlike any other. All other clock cartridges for the ST will tie up the cartridge port making it impossible to have your ST's system clock set automatically while still using another cartridge. The Forget-Me-Clock II has a full cartridge pass through which means that any other cartridge for the ST can be plugged into it while it is plugged into your ST. The Forget-Me-Clock II remains totally invisible so

Frontier's Forget-Me-Clock II Cartridge With Pass Through

that the other cartridge can be used normally, but it still automatically sets the system and keyboard clocks in your ST.

No Need To Open Your ST

Installing some clock cards for the ST means that you have to open your ST's case and pry computer chips out of their sockets. The Forget-Me-Clock II is a cartridge which plugs into the cartridge port on the side of your ST which means that its installation couldn't be simpler - you just plug it in and turn on your ST.

Software Included

Every Forget-Me-Clock II cartridge is supplied with time and date setting software for the Forget-Me-Clock II's clock together with a small auto-run

program which automatically sets your ST's system and keyboard clocks every time you turn on or reset your ST. Built into the setting software is the facility to stop the Forget-Me-Clock II's clock to save on battery life when the Forget-Me-Clock II is not being used.

Satisfaction Guaranteed

The Forget-Me-Clock II is supplied under Frontier's ten day money back guarantee, which means that if you don't like the Forget-Me-Clock II for any reason, you can return it for a full refund within ten days of purchase. The Forget-Me-Clock II has been designed to work with any model of ST whether it be ST, STM, STF, STFM, ST^E or Mega ST.

Two Year Guarantee

The Forget-Me-Clock II carries a full two year guarantee which includes the battery. Battery life has been tested to be many times the guarantee period. Frontier will supply replacement batteries outside of the guarantee period for a small charge.

Price

Forget-Me-Clock II Cartridge £24.99

Price includes VAT. Please add £1.15 for postage and packing to all orders under £50.00. Frontier accepts payment by Visa or Access. Price subject to change without notice. Goods subject to availability.

Frontier Software

Side 1

GOLDEN AXE – Exclusive! Fully playable demo of Virgin's forthcoming arcade licence. It's absorbing! It's addictive! It's a beat'em-up – so get in there and get bashing!

PUZZNIC – Exclusive! Ocean's mind-bendingly good puzzle game makes it to the Cover Disk as a fully-playable four-level demo. Don't just take our word for it – try it yourself!

DEGAS HISTOGRAM – A handy accessory for everyone who already owns the DEGAS art package. Check the colour usage on any picture at the touch of a button

Side 2

PERSONAL FINANCE MANAGER

PLUS – Christmas? Bah, humbug! Count the cash with Ebenezer using this demo version of Microdeal's accounts package

DOT2DOT – The full edsoft program teaches you numbers with dot-to-dot drawings

SELECTOR – Choose your accessories, your resolution (not your New Year's one) and set up your system with this handy utility

ART GALLERY – An on-line gallery at a moment's notice – just add piccies!

READER – Reads documents out loud!

LARGE, OR WHAT?

More bytes than a nest of mosquitoes! (Er, I think you'll find that's bites, actually.) To bring you more programs than any other disk mag, we use file-crunching techniques and disk formats so advanced that they double as Professors in their spare time. A massive 1,249K (approx) of games, demos and utilities gets neatly folded, twisted, levered and jemmied into every single ST FORMAT Cover Disk.

ON THE SIDELINES

Sadly, the earliest 520STs were fitted with single-sided disk drives, meaning they couldn't read double-sided disks – until now. The ST FORMAT Cover Disk has been specially prepared to enable all ST owners to read at least Side 1. Now is that nice of us or what?

ALL YOU NEED IS HERE!

Thanks to the non-standard, never-knew-there-was-so-much-in-it disk format by ST FORMAT's favourite mad inventor, Rob Northen, everyone can load and use Golden Axe, Puzznic and the Degas Histogram. Double-sided drive owners are luckier than a very lucky thing, for they can also access Personal Finance Manager Plus, Dot2Dot, Art Gallery, Selector and Reader, immediately. Others have to see page 46 first.

DOING THE DOUBLE

To read Side 2 with a double-sided drive just double-click the left mouse button on the folder named SIDE_2. It should open up like a normal folder, listing all the files contained within.

IS YOURS A BIT ONE-SIDED?

If you have a single-sided drive and you try opening the SIDE_2 folder, you see an alert message telling you that the data on the disk may be damaged. This is just the ST's way of telling you it can't read Side 2. Don't fret, just click on CANCEL and you'll be OK.

TAKE YOUR VIRUS MEDICINE

Before you bung it in, back it up! Accidents do happen and you could lose the lot, so make a copy of the disk and write-protect the original before you put it in your drive to be absolutely safe. Write-protect the copy too, 'cos that's the safest way to stop it picking up nasty, horrible viruses from other disks.

If you don't do this, don't come crying to us after the worst happens. We'll be distinctly unsympathetic.

GOLDEN AXE

BY: VIRGIN

SIDE: 1

MACHINE: ALL COLOUR STs

FOLDER: GOLDENAX

FILES: NEOFUN.PRGM

GOLDENAX.TOS

ST FORMAT is proud to present a fully-playable demo of Golden Axe, the new fantasy beat'em-up from Virgin. It's reviewed on page 87 – but don't turn that page yet! Take the game for a little test-drive round the block, play it for yourself, then read the review and see if you agree with our assessment.

In this demo version, you play the part of Tyris Flare, a tough but – if you'll pardon the slightly sexist expression – delectable Amazonian woman. Armed with your trusty ninja sword, you are out to squash (or, if you prefer, cut off) the head of one Death-Adder, an evil meanie who's responsible for the death of your poor old Mum and Dad.

On your way you encounter death in several forms, since there are tons of Death-Adder's troops out looking for you. The first group you meet are heavily armed centuri-

ons who are out to thrash you and bash you until you drop.

In this version of the game you have unlimited lives, but it's not really a lot of fun just being killed all the time, so if you want to practise (for when you buy the real thing) here's what to do:

- To move to the left or the right, simply push the joystick in the corresponding direction.

- To move into the screen (that is, forward), push up on the joystick; to move out, pull it down.

- To fight in close combat, hit the Fire button repeatedly. Tyris Flare herself decides what tactic to use, depending on her opponent and its position, 'cos that's the kind of independent, got-her-act-together sort of woman she is.

- To do a reverse chop, making Tyris spin around on the spot and lash out behind herself, hit the joystick Fire button while pushing in the opposite direction to the way Tyris is facing. So if she's looking left and an enemy is behind her, hit the Fire button and pull right, towards the enemy.

- To do a flying chop, first push the joystick up and hit Fire to make Tyris leap up into the air. Then when she's on the way down, you can repeatedly stab the Fire button to make her hack the head of any opponent who is dumb enough to

be standing within slashing range.

- To barge an opponent out of the way, push the joystick left or right (depending on the direction you want to go) once to make Tyris start walking. Then push again in the same direction to start her running. Finally hit the Fire button to make her jump using a side kick to knock her adversary to the floor.

- To deal with the little blue gnomes that appear from time to time, simply approach them from behind and give the Fire button a stab. Tyris kicks them firmly in the bottom, whereupon they drop magical goodies for her to use.

This demo version, however, has no magic powers working (awwww!), so you need to get the real thing if you want to find out what they do.

STARTING OUT

Enter the GOLDENAX folder by double-clicking on it and then run the GOLDENAX.TOS program by double-clicking on that too. Then just wait for the program to load up and decompact. Just in case you're wondering, you're the dainty-looking character in the, er, bikini.

■ Turn the page for an introduction to the second fully-playable demo on the Cover Disk, Ocean's brain-straining puzzle game, *Puzznic*

■ Take the role of Tyris Flare, the well 'ard Amazonian beauty, and go out boshing a few nasties in fantasy land with your Golden Axe

■ Warning! Any attempt to imitate Tyris Flare by wandering down the street in your bikini, wielding a huge weapon, is likely to get you nicked!

PUZZNIC

BY: OCEAN
SIDE: 1
MACHINE: ALL COLOUR STs
FOLDER: PUZZNIC
FILES: OCEAN.PC1,
 PUZZNIC.CMP, PUZZNIC.PRG,
 PUZZNIC.PC1

Yet another exclusive playable demo comes to you courtesy of ST FORMAT and Ocean, in the form of *Puzznic*, the maddeningly addictive puzzle game. (This one's reviewed this issue as well, on page 73 – but why not put us to the test again and play the game before you read the review?)

There are four full levels for you to get stuck into. Your task is to move similar blocks so that they touch each other, either side-by-side or on top of each other. When

you join two or more blocks they disappear, leaving you to get on with all the other groups of similar shapes. If you can make all the blocks disappear before the time runs out, then you move on to the next level, inheriting a time bonus before you go.

Moving the blocks about is easy, but working out where to move them is harder. A flashing square cursor appears on screen and this can be moved about using the joystick. Position the cursor over the block that you wish to move and then hold down the Fire button. Now when you move the joystick the block concerned will move too. This enables you to slide it along the floor or over the edge of a precipice so that it ends up next to another block of the same type.

Beware, though! If there are three blocks all the same, you must make them all disappear at the same time. If you don't, you are left with one remaining block which

cannot be removed and the level cannot be completed.

The panel on the left gives you a summary of the distribution of blocks and tells you how many need to be paired or tripled in order to win the level.

You can use lifts and sliding floor blocks to help you by placing blocks on top of them, to be carried up and down while you reposition blocks below.

STARTING OUT

First enter the PUZZNIC folder by double-clicking on it. Then just double-click on PUZZNIC.PRG and wait for the OCEAN screen to be displayed. You are now in the game and level one awaits you.

■ *Puzznic*, Ocean's arcade puzzle game, is guaranteed to send you square-eyed! Push the blocks about, make the matching ones touch each other and clear the level

■ *Puzznic*'s later levels feature helpful lifts and sliding platforms which you can use to help you move the patterned blocks to their correct positions – or out of your way...

PERSONAL FINANCE MANAGER PLUS

BY: MICRODEAL
SIDE: 2
MACHINE: ALL STs
FOLDER: PFMPDEMO
FILES: PFMPDEMO.PRG,
 PFMPCFG, PFMPRSC,
 EPSON.PCD, EXAMPLE.MNY,
 MANUAL.TXT, README

Sort out your finances for the new year with this demonstration version of *Personal Finance Manager Plus*. It can help you to plan for regular incomings like salaries, blackmail cheques, alimony payments and so on, while taking into account all those regular outgoings, like standing orders to the betting shop, protection money and the like.

Full documentation is in the file MANUAL.TXT, which you should print out or read before plunging into Per-

DEGAS HISTOGRAM

BY: PUBLIC DOMAIN
SIDE: 1
MACHINE: ALL COLOUR STs
FOLDER: DEGHISTO
FILES: DEGHISTO.ACC,
 DEGHISTO.RSC,
 DEGHISTO.DOC

This useful accessory is a boon for all users of the popular *Degas* or *Degas Elite*. It runs as a hidden .ACC program, and must be accessed from within a *Degas* art package.

Degas Histogram can give you an accurate breakdown of the colour distribution in any of your *Degas* workscreen slots. It enables you to examine the usage of all of the colour palette registers, and the information is displayed as a neat histogram or bar chart, showing percentages for each one. You can even isolate palette colours and view the *Degas* screen in individual colour slices.

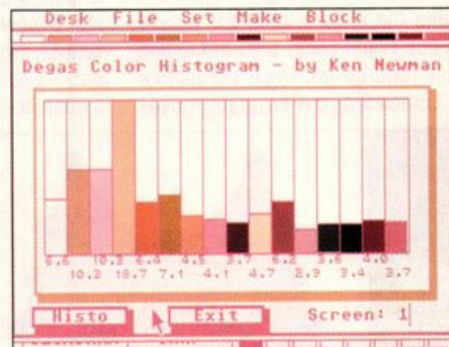

STARTING OUT

For more information on the program, read the DEGHISTO.DOC file. Do this by double-clicking on it and selecting SHOW (on screen) or PRINT (if you have a printer connected).

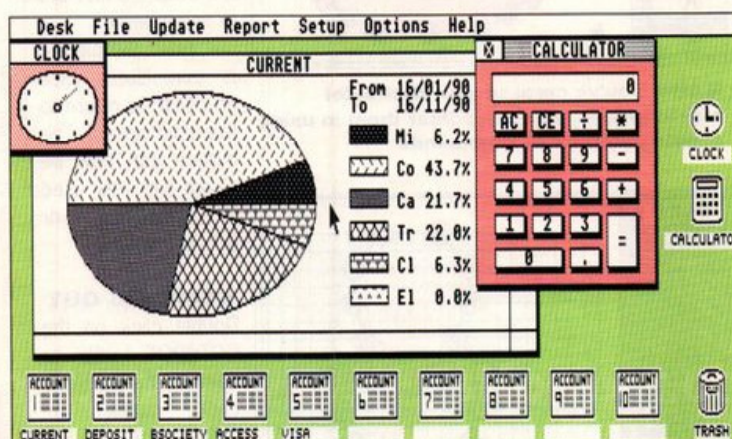

To use the accessory, you must copy DEGHISTO.ACC and DEGHISTO.RSC to the same disk that contains your version of *Degas*. The two files must lie in the root directory (the main directory that contains all the other folders, but isn't a folder itself).

WARNING! Do not copy DEGHISTO to your original copy of *Degas*: this may invalidate any warranties you have (or screw up your original software if things go wrong). Make sure you are using a backup copy of *Degas*.

To use DEGHISTO, first reset your ST with your new *Degas*/-DEGHISTO disk in the drive. The DEGHISTO accessory is automatically loaded and stored away in memory, waiting for you to use it. You find it in the DESK menu in the top left hand corner of the *Degas* display. To activate it when you want to run it, simply highlight it by placing the cursor over the name DEGHISTO and then click the left mouse button.

■ Find out just how colourful your pictures really are using this Histogram accessory from within *DEGAS Elite*

■ *Personal Finance Manager Plus* can handle all your accounts, standing orders and budgeting – as well as add up and tell the time

sonal Finance Manager Plus. Some features like printing have been disabled on the demo version, and it's wise to read README too, where all is explained.

STARTING OUT

Open the PFMPDEMO folder and double click on PFMPDEMO.PRG.

Personal Finance Manager Plus loads automatically and runs in medium or high resolution. It does not work in low resolution.

■ Need more help? Want to know more about what *PFM-Plus* can do for you? Simply turn to our special feature beginning on page 214.

DOT2DOT

BY: D A BRUMLEVE
SIDE: 2
MACHINE: ALL COLOUR STs
FOLDER: DOT2DOT
FILES: DOT2DOTS.DAT,
 DOT2DOTS.LST,
 DOT2DOT.PRG,
 DOTMAKER.LST,
 DOTMAKER.PRG

Dot2Dot is one of the best and most enjoyable PD educational programs available for pre-school kids (but why confine the fun to them?). In it, you have to join a sequence of dots - labelled with numbers or letters - to produce a picture. Then you can colour in the masterpiece using a more than generous palette.

Once the program has loaded you can choose which picture to complete by clicking on NEW. To make the picture, take the mouse to dot 1 and click, then dot 2 and click, and so on. Once the picture is completed, the program moves

onto a colouring screen where the pic can be completed by selecting colours from the palette and clicking in the relevant area to be coloured. When you have finished, click on DONE and the program returns to the drawing screen.

There are three small boxes at the bottom of the drawing screen which enable you to select what characters appears in the dots: you can choose numbers and upper or lower case letters. And finally, you have the option of dumping the sequence of dots or the outline pic itself to an Epson-compatible printer.

Dotmaker is a complementary program which allows parents and teachers - or anyone with that creative streak, really - to make their own Dot-2Dot pictures.

After loading the Dotmaker program you can opt to edit an existing picture or create a new one from scratch. If you wish to work on an existing picture, LOAD it first, then click on EDIT. To create a new picture, you begin by simply clicking on EDIT. To add dots click on DOT, move the mouse to the grid and then click

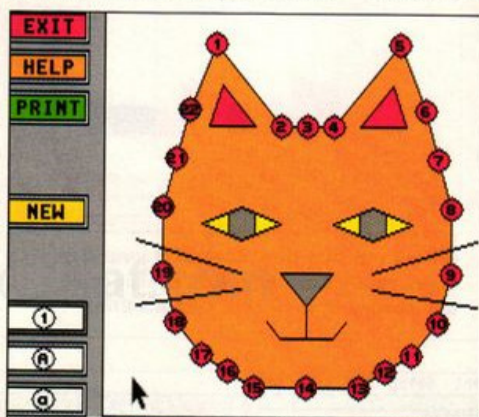

on the position of each dot in order. Lines can be added using LINE; these are used to help identify any object in the picture and do not influence the puzzle itself. Dots can be removed or replaced using ALTER, and UNDO removes the last dot or line entered.

After the picture is completed, click on DONE to return to the main screen. The picture can now be saved and later used in Dot-2Dot or printed, or both.

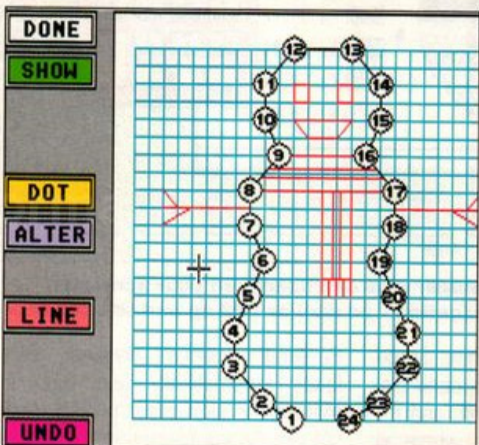

STARTING OUT

Double click on the DOT2DOT folder to open it, then double click again on DOT2DOTS.PRG. Follow the on-screen prompts as the program loads. To use Dotmaker open the folder in the same way and double click on DOTMAKER.PRG.

This issue STF begins a survey of PD edsoft - see page 192

■ After you've created your dot-to-dot masterpieces, you can colour them in using simple paintbox fill commands

■ If you get bored with the range of dotty pictures, you can always design your own. Anyone want to have a go at designing a dot-to-dot nuclear power station?

SELECTOR

BY: DAVID HEILAND
SIDE: 2
MACHINE: ALL STs
FOLDER: SELECTOR
FILES: ACC_SEL.C.PRG,
 DESKTOP.INF, MEDIUM.INF,
 HIGH.INF, README.DOC

This handy utility makes starting up your ST an easy, flexible task. The program runs automatically when installed and enables you to select up to six accessories (which must be on the same disk) at boot-up time. A menu is displayed showing all your possible choices, as well as a number of extra options for booting up in HIGH, LOW or MEDIUM resolution, changing keyclicks, altering the Screen Hz rate and more still.

STARTING OUT

Read the file README.DOC for notes from the programmer himself and then format a blank disk. Use the "Create Folder" facility of GEM to make an AUTO folder and then copy ACC_SEL.C.PRG into it. Copy all your favourite accessories to the root directory (that is, not in any folders) on the same disk. Now when you boot from this disk, Selector automatically takes over and displays your options.

Directory of all accessories in Drive C:
 Use cursor keys and [SPACE] to change applications
 Press [RETURN] to load accessories selected.

■ The accessory selector asks you exactly which accessories you want to load at the beginning of each session. You can also tweak the resolution and the sync rate before the Desktop appears

ART GALLERY

BY: CODEHEAD SOFTWARE
SIDE: 2
MACHINE: ALL STs
FOLDER: ARTGALRY
FILES: ARTGALRY.ACC,
 ARTGALRY.TXT

This neat accessory gives you the ability to view any DEGAS, NEOCHROME or TINY screen picture at the touch of a button, before returning to your original program. It shows a directory of files which could be displayed and you simply select the one you want. The screen changes to that of the picture and stays that way until you click the mouse button.

STARTING OUT

First read ARTGALRY.TXT for information from the programmer himself and then copy ARTGALRY.ACC to the root directory of a blank disk. Reset the ST and the accessory is automatically loaded and stored in memory waiting for you to select it. You access it by looking in the GEM Desk menu, in the top left hand corner of the screen, highlighting the name and clicking the left button.

■ The Art Gallery accessory can load three types of picture files, whenever you feel the need to take a quick peek at your pics

IS YOUR DISK A DUFF?

In any disk duplication as earth-shatteringly humungous as ST FORMAT's, it's possible that a tiny proportion of disks might be faulty. If you're unlucky, sorry.

You're guaranteed a replacement if you send your disk to ST FORMAT January disk returns, Discopy Labs Unit A, West March, London Rd, Daventry, Northants NN11 4SA.

Do not send it to any other address. Only Discopy Labs can replace your duff disk. We have no spares ourselves and are too busy putting the mag together to be able to help. Sorry.

Brilliant control, the air of excitement and fantastic playability transport you into the atmosphere of World Class Soccer.

READER

BY: PUBLIC DOMAIN
SIDE: 2
MACHINE: ALL STs
FOLDER: READER
FILES: READER.PRГ, HELPPFILE.DOC

This handy little program reads text files back to you, in almost perfect English (or any language, depending on the language of the file). All you

■ **McAiPof Reader** is a document reader which can recite text files to you while you sit back and listen. Lazy? Now you don't even have to look at the screen!

need to do is tell it the name of the file you want read to you and away it goes. It can handle questions and exclamations by raising and lowering the pitch of its voice, in exactly the same way as a real person would. Who knows? It could be reading the news in a few years!

STARTING OUT

Open the READER folder by double-clicking on it. Then just double-click on the file READER.PRГ and the reader loads and is ready to run.

STOP PRESS! Because of an unforeseen compatibility problem, some STs may not be able to run Reader correctly. Whoops! We're sorry! If your ST comes up with a line of bombs when trying to load this program, fear not.

Just reset your machine and wait for next month, when **ST FORMAT** includes a second version of the program which cures the problem.

If you're not affected, then you can put your feet up and enjoy the dulcet tones of your ST's new-found voice.

Do what my son, knock it on the head etc, it's the...

COVER DISK HOTLINE

0225 442244

WEDNESDAYS (2pm to 6pm)

Flummoxed by files? Dumbfounded by disks? Perplexed by Cover Disk programs? If you have a problem with the disk – and you're sure there is no corrupted data – phone 0225 442244 between 2pm and 6pm on Wednesdays with your query. Ask nicely for **ST FORMAT**'s Cover Disk Hotline and in short order you'll be through to our Disk Editor or one of his handy helpers.

Before you call have ready the info we need to help you: the model of your machine; the version of GEM/TOS you're using; and details of anything you've got attached to (or plugged inside) the computer. Have the disk handy and your ST up and running, and a pen and paper handy to take any notes.

ENOUGH TO GET YOUR BACK UP

Because the oooh-it's-tight-in-here **ST FORMAT** Cover Disk is non-standard and squeezes in a whacking great 700K of data *per side*, the back-up procedure is not standard. Follow these steps, though, and you won't encounter any problems. Do it any other way and you could mangle your Cover Disk. And then where would you be?

1. Format a couple of blank disks – single-sided if you've got a single-sided drive, double-sided if you have a double-sided drive.
2. Write-protect the original Cover Disk and insert it into the drive (if you have two drives, you lucky devil, insert the Cover Disk into drive B). Double-click on the drive B icon to open a window showing Cover Disk contents. If you haven't got a second drive, a message appears requesting you to put disk B in drive A. Simply click on OK.
3. Insert one of the freshly formatted disks into drive A. Double-click on the drive A icon and open up a window. You may be asked to insert disk A in drive A – you already have, so just click on OK again.
4. Highlight each folder in the drive B Cover Disk window and drag them into the drive A window, one at a time.
5. If you have only one drive then you'll be asked to insert disk A and disk B at regular intervals. Don't mix the two up! Disk B is the Cover Disk and disk A is the freshly formatted disk.
6. When you get a "disk full" error message, recopy the last folder – and subsequent folders – onto the second freshly formatted disk.
7. Double-sided owners, double-click on SIDE_2 once you've finished copying all the folders from side A of the Cover Disk, and repeat the above.
8. Don't forget, you must not try to use the standard Atari disk copy function (dragging floppy A onto floppy B) – it won't work.

SINGLE SIDED? YOU DON'T HAVE TO DO WITHOUT!

You single-sided drive owners don't have to miss out: to get hold of the B-side of this issue's Cover Disk, all you have to do is send your name and address with a cheque or postal order for £1.75 to: **January B-Side Disk, ST FORMAT, 30 Monmouth Street, Bath Avon BA1 2BW.**

Please be patient, though: we usually do B-sides in batches once a month, and if yours arrives just after we finish one... sorry, it'll just have to wait.

THE DISK NEEDS YOU!

We need *your* software – games, utilities, demos – anything good, original and preferably short. If you've written anything worthy of the **ST FORMAT** Cover Disk (and remember, it's the ones we reject that makes ours the best), send it with this form and full documentation to: Neil Jackson, **ST FORMAT** Cover Disk Editor, 30 Monmouth St, Bath BA1 2BW. Allow four weeks for a reply.

Name _____
Address _____
Daytime 'phone _____
Program title _____
Size of files in K _____
What's so brilliant about it _____

Don't forget to: ■ Include on-disk and paper documentation ■ Write your name and address on the disk

■ Use a virus-free disk ■ Keep a copy of your program, because contributions are non-returnable

Please sign the following declaration: This program is submitted for publication in **ST FORMAT**. It is wholly my own work and I agree to indemnify Future Publishing against any legal action should copyright problems arise.

Signed _____

Note: we pay out up to £800 for contributions to our Cover Disk. But to earn that kind of dosh, of course, you'd have to write something pretty spectacular, original and complex.

READING DOCUMENTATION FILES

In virtually every folder on the Cover Disk there's a file with the extension .DOC. This is a help file containing instructions on using the program in that folder. Be sure to read all help files and README files before running any program.

To read a help file (or .DOC file), simply double-click on it. Click on CANCEL if you don't wish to read the file; click on PRINT to send the document to a printer; click on SCREEN to send the text to your monitor.

After each screenful of text the display halts. To scroll up one line at a time, press [Return]; to scroll up a complete page, press the spacebar; to return to the Desktop, press Q or [Control]-C.

Future Publishing Ltd cannot be held responsible for improper use of any programs on the Cover Disk or for any damage resulting, so if you wreck your entire disk collection because you fail to read a help file, it's your problem, tough luck, them's the breaks, etc. Follow the instructions and you'll be OK.

■ **Steve Kelly of the Bitmap Brothers** – aiming to make Renegade much more than “just another software house”

■ **Bitmap Brother Eric Matthews**, whose idea of using Bomb the Bass to do the music for *Xenon 2* led, eventually, to the setting up of Renegade

■ **Mike Montgomery**: aiming to break the culture of mediocrity that exists in the software industry

The departure from Mirrorsoft of the Bitmap Brothers, responsible for such ST classics as *Speedball* and *Xenons 1* and *2*, has sent ripples throughout the games programming world. Is it true, as they allege, that the ST charts are full of rubbish, that programmers are being treated as idiots, and that the people who run the major software houses

“There seems to be a lot of Ocean and Codemasters games around, generally a lot of rubbish”

– **Mike Montgomery**

are interested only in making money? Is it true, too, that the Bitmaps are just the first of many well-known teams – rumours continue to surround the future of Bullfrog – who’ll decide they could do it, and do it better, for themselves?

Certainly something must be seriously wrong for the highly publicised Brothers – Steve Kelly, Mike Montgomery and Eric Matthews – to end what was widely thought to be one of the computer industry’s most lucrative partnerships and set up shop with, of all things, a record company. Does a stated desire to be “taken seriously” really justify all that?

“Renegade was established to reward people appropriately and give them control over

the Bitmaps go it alone

Henriques d’Arbo talks to the team behind Xenon and Speedball about their part in forming Renegade, the software house that wants to be different

what they do,” says Martin Heath, boss of Rhythm King, whose three-year old company has a multi-million pound turnover and current chart successes including *Betty Boo* (a keen ST games player herself) and *S’Express*. “It became apparent when I first met Eric that he was not too pleased with his publisher. Programmers are being treated as if they are idiots. I met some publishers, and most of the people running these companies are business

men with nothing else at all to do but use their ability to make money.

“They are sympathetic to the programmers, but the decisions they made were often very faulty. It was decided, as with Rhythm King Records, that the artists should get their just rewards.”

“I think that’s too much of a generalisation,” responds the man who originally signed the Bitmaps to Mirrorsoft, Managing Director Peter Bilotta: “after all, the record business is older and more mature than the computer software business – though things are changing; I’ve seen changes since I’ve been in it, in terms of things getting more mature.

HOW THE BITMAPS PLANNED THE HYPE

“The hype surrounding ourselves was all planned,” Mike Montgomery admits. “We wanted to change the attitude people have towards programmers. When you open magazines and see people dressed up looking really stupid it doesn’t help our case as programmers to be taken seriously.”

The Bitmap Brothers originally got together when Mike Montgomery was working for Leisure Software (*Scrabble* and *Cluedo*) and Steve Kelly was working for Psion. “Steve came down to our offices to get some information regarding the game,” Mike recalls. “We started talking and became friends. Steve was also doing some work with Eric [Matthews, the third Brother] and then Eric did some work for Leisure Genius on a program I was involved with. It was like a triangle forming up.

“Then *Xenon* came up and we thought it was time we got together as a group to do this project. We all got on so well we continued. Then came *Speedball*.” And the rest, as they say, is software history.

What about *Xenon 2*? Did the Bitmaps actually do the programming themselves? “No. *Xenon 2* was programmed by The Assembly Line,” says Mike, “and at that time Steve and I were working on *Cadaver*, so we were actually involved with the design and graphics.”

According to the Renegade philosophy, what really matters are the creative ideas that go into a project. The intention of Renegade is to share the workload to achieve the best results. On the day *FORMAT* visited, for instance, Richard Joseph was in the office to put the final music touches to *Speedball 2*.

The idea for Renegade originated when Eric Matthews came up with the concept of working with Bomb the Bass on one of their games – *Xenon 2*. “Games have always really fascinated me,” says Martin Heath, “so when I met Eric, I thought, great, it’s an ideal way to do two things. Firstly, I can help out somebody in games and secondly, find new ways to promote music.” It all grew from there.

“Programmers are treated as if they are idiots”
– **Martin Heath, Renegade**

“In fact, there are quite a lot of creative people from the record business moving into the software business” – though Bilotta declines the invitation to name any: “They’re only gradually coming into Europe now.”

Renegade claims to be different, to offer a truly creative framework for development, with its “Big Idea” the promotion of the programmer as opposed to the promotion of the company

that produces the program. Artists and organisers share responsibility for decisions, although Eric, Mike, and Steve, the original Bitmaps, have final say on all programming matters.

It certainly seems as if Renegade has a collective downer on the software industry as a whole. "Publishers have not initially been interested in the classic big sellers," says Bitmap Brother Mike Montgomery, citing *Sim City*, *Populous* and *Lost Patrol* as examples. "Only after a great deal of trying were these games eventually accepted – this should never be the case!" Mediocrity rules, he says: "Looking at the charts, there seems to be a lot of Ocean and Codemasters games around, generally a lot of rubbish."

What about Mirrorsoft: are they as bad as the rest? "Mirrorsoft are actually better than most of the others," Montgomery is quick to reply. "We insisted on certain requirements while working for them and they agreed."

Aren't Mirrorsoft pissed off to be losing their star team? "No, we're not pissed off," says Managing Director Peter Bilotta, "not at all. We have a range of hot licences, hot developers and hot labels. We do try to spread things, so we're not pissed off at losing a team."

Asked whether Mirrorsoft aren't watching a big investment disappear down the drain, Bilotta argues forcefully that Mirrorsoft always try harder than most to give programmers and developers a profile that's suited to their own

requirements, and "not everyone wants a high profile like the Bitmap Brothers!"

Bilotta recalls that, at the time the Bitmaps were originally signed up by Mirrorsoft, it was not only recognised that they were a highly talented team of individuals, but that they "knew what they wanted out of life. We knew how they felt about things, and that eventually they might well want to go independent. So we had a contract for a certain number of games only. After that they left to set up on their own, to achieve their own independence, which is something we

always knew they might do." In fact, Bilotta argues the Bitmaps stayed longer than Mirrorsoft thought they might. Still, with *Speedball 2* due to be

wrapped soon, the contract between Mirrorsoft and the Bitmap Brothers comes to an end.

How does Bilotta think Renegade will do? "It's too soon to tell. In theory I don't believe they are that much different from ourselves in terms of the way they conceptualise the marketplace – though they'd no doubt disagree!"

"We wish them the very best. They really are a tremendously talented team, and I'm sure they'll succeed. I think they may discover some of the constraints that publishers work under, now that they're doing it themselves."

And there we leave them, Mirrorsoft and the Bitmaps singing each other's praises. Yet the fact remains that the Bitmaps have now struck out on their own, in direct opposition to

"No, we're not pissed off. Not at all"
– Peter Bilotta, Mirrorsoft

WHAT COMES NEXT?

What keeps the Bitmaps going? "Just solving the problems that occur writing a game makes it all worthwhile," says Bitmap Steve Kelly. "For instance, we set ourselves the goal of making *Speedball* faster than *Xenon*, producing big aliens on screen while still ensuring the program ran smoothly."

"We have some of the best graphics artists around. At the moment we feel we cannot improve dramatically on our graphics or programming, so we concentrate on the weakest element – sound."

Given that the Bitmaps are now working closely with sound specialists, is this going to have any effect on their games? Are they going to pay it more attention in the future? "At one stage we used to set aside very small amounts," Mike Montgomery admits, "but things have changed. Eventually we shall use STE facilities to their full potential. We will be supporting it more in the future. *Gods*, one of our next releases, will be using more of the machine's capabilities."

the company with whom they made their mark. In the next year we can expect to see a good deal of healthy competition as both go flat out to prove they're better off alone. More importantly, we can also expect more of the kind of game that only the Bitmaps seem capable of creating. What's going to be interesting is talking a year from now to the programmers who work for Renegade, and hearing how they think the whole business could be better run – or not, as the case may be... **stf**

WHAT'S COMING FROM THE BITMAPS... AND WHAT THEY PLAY

Renegade's first release is *Magic Pockets*, featuring a little terror called the Bitmap Kid – "streetwise," according to Steve, "very cartoony, with baseball cap, cool shades and magic bottomless pockets!" It's cutesy as hell, with the Kid seeking toys that dropped out of his pockets into the magic kingdom.

At the start of the game he pulls a black hole out of his pocket, puts it onto the floor, jumps in and finds himself in the magic kingdom. He's faced with many problems, not least the many nasties that prowl everywhere – snails, bats and others. But he can blow large bubbles and trap them inside, squirt water pistols (once he finds them), do some biffing with boxing gloves or even use the weather against 'em: he can conjure up a whirlwind to clear a path or use lightning to singe someone.

"*Pockets* is an ultra-smooth multi-directional scrolling game," Steve says, "with five huge levels, each varying with different backdrops, puzzles and style of gameplay. The kid traipses through the jungle, caves, a lake, a mountain and a space level in his quest." The graphics are by Mark Coleman, who previously worked on *Xenon 2* and *Speedball*. The

game is due around March of this year.

The second release, *Gods*, is based upon the tasks of Hercules. "It's an eight-way scrolling arcade adventure," says Eric, "and the player embarks on four tasks that relate to each level of the game. On one world, for example, you have to find three chalices."

Each level is split into subsections so that

**"Next from the Bitmaps:
an ultra-smooth, multi-
directional scrolling game
with five huge levels"**

a player can re-start at the last sub-game. *Gods* combines platform levels, ladders and beat-'em-up with simple puzzling. You can find up to 20 different weapons, similar to *Xenon 2*, each with different properties.

You need to complete certain tasks in a specific order to be able to progress. The game starts with simple puzzles, like avoiding traps and collecting keys. Reveal an object,

weapon or potion and you get a scrolling text with information about it plus maybe some clues about what it does. You can also visit shops to buy and sell weapons, including fireballs, bombs, and daggers.

The game is very large, with each level being roughly 25 screens long by 3 screens high, but its main feature is the intelligence programmed in. Objects are always in the same place but don't appear unless a sequence is correctly completed. If you manage to complete sections in a specified time, things are revealed; take longer and they aren't. If you're not having much success, however, the degree of difficulty stays low. This ability to monitor a player's skill is a really innovative feature.

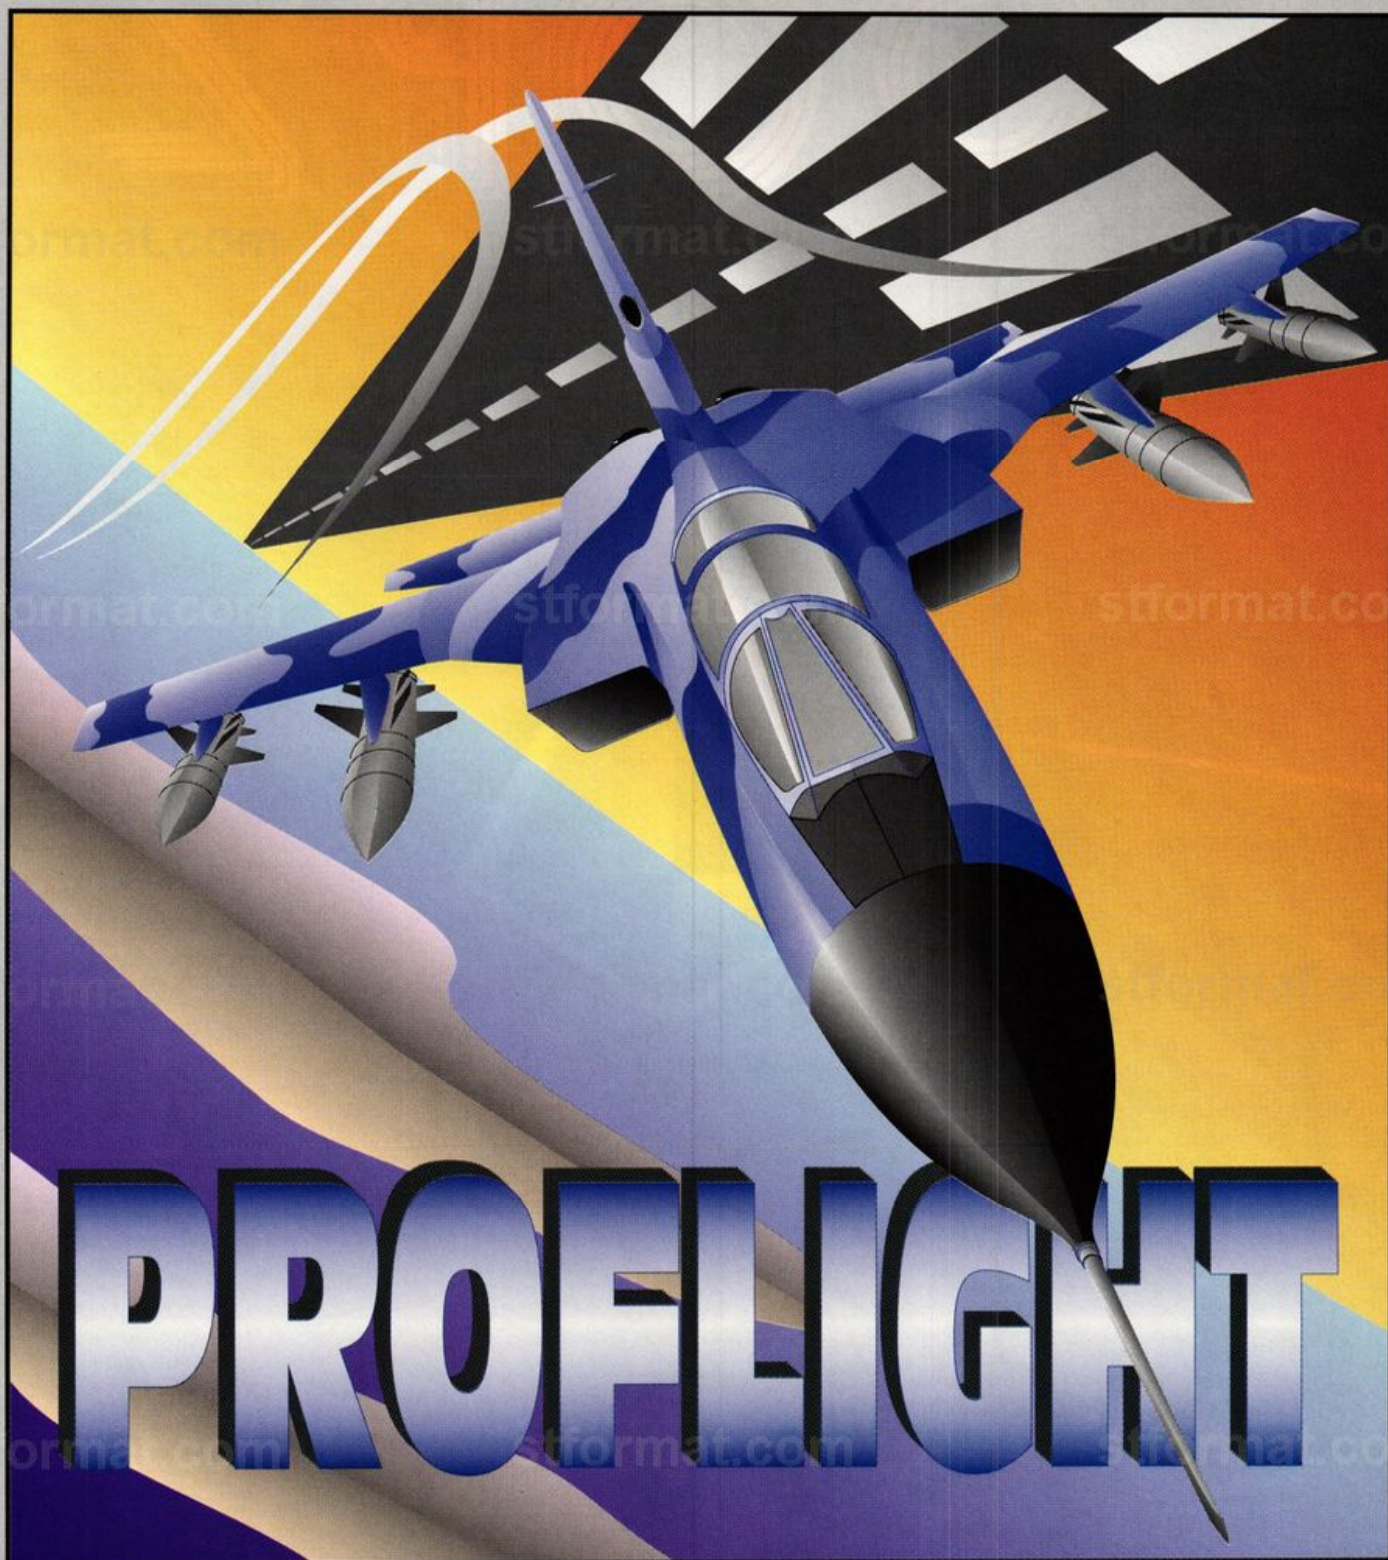

■ Who do the Bitmaps themselves rate highly? What do they play off-duty?

"We love *Plotting*," says Mike. "We've also played a small demo of *Paradroid 90* recently. The exchange sequence is terrific and drives me wild. Andrew Braybrook is the programmer we rate most highly."

■ Three early views of *Gods*, the second Renegade release, a huge eight-way scrolling arcade adventure due early this year

The Tornado Flight Simulator for your Atari ST

HiSoft is delighted to announce, at last!, the immediate availability of ProFlight.

ProFlight; a supremely accurate simulation of the Panavia Tornado military aircraft, a plane that is the fastest aircraft in the world at ground level (Mach 1.2) and one of the fastest at any level (Mach 2.2) with advanced swing-wing technology that gives it a truly multi-role capability. ProFlight uses complex and exact flight equations that allow you to fly this powerful fighter just like its pilots.

Everything is there ... you can fly peaceful reconnaissance missions or roar into full attack with cannons, bombs, heat-seeking Sidewinder and radar-guided Sky Flash missiles.

ProFlight comes complete with a professional 170-page, ring-bound flight manual which details every aspect of flying this exciting aircraft together with a pull-out specification sheet of the Tornado.

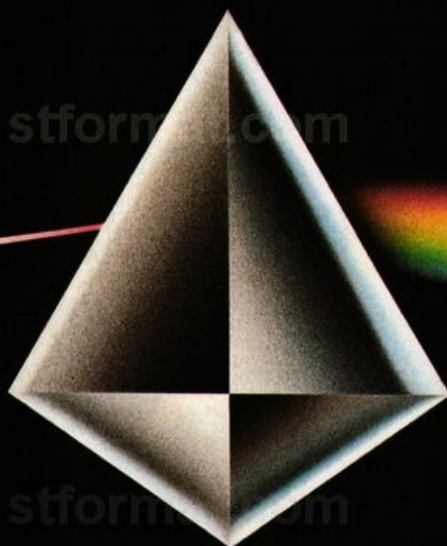

ProFlight is available from all good computer stores and costs only £39.95 inclusive (UK only); if you have difficulty locating your copy, please call HiSoft on 0525 718181 and ask to speak to Julie.

screenplay

Mark "Party Animal" Higham leads the **FORMAT** team into a veritable

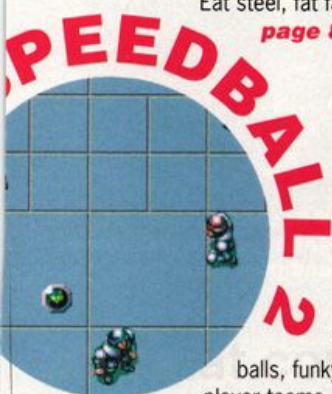

orgy of game play (lights considerably dimmed...)

GOLDEN AXE

Play the role of a Schwarzenegger clone, a semi-naked version of Maria Whittaker or a bearded Dudley Moore in this conversion of the classic arcade smash. Wield that crazy sword and draw blood at every opportunity. Eat steel, fat face!

page 87

Solid steel balls, funky visuals, nine-player teams. No, it's not the

ST conversion of the Kama Sutra (obligatory oooer) but the Bitmaps' latest futuristic sports sim. You thought American footsie looked mean, but after a *Speedball* match you need your limbs surgically reassembled

page 82

LOST PATROL

Good mo-o-orning, Vietnam! You thought the Vietnam war was over? Pah! What do you know? Take a trip back in time with this Vietnam simu-

lator. Lost in a paddy field with a psycho in your squad, this is almost as lively as a holiday in Kuwait

page 65

SUPREMACY

That Mrs Thatcher should have been thrown into a pile of burning poll tax demands a long time ago. President Bush ought to be put out to graze on a Scottish golf course, and as for Saddam Hussein - well, he's just crying out for a frontal lobotomy. If you thought they're screwing up the planet, then have a go for yourself and see how you could do, smartarse. This *Sim City*-style world simulator puts the ball firmly in your court

page 60

THE STF RATINGS SYSTEM

GRAPHICS: (out of ten) For the quality of visuals and animation, including how big and colourful the sprites are, how smooth the scrolling is, and so on.

SOUNDTRACK: (out of ten) Sampled sounds are realistic and rate highly but ST sound chip noises tend to send your eardrums convulsing.

INTELLIGENCE: (out of ten) How clever do you need to be to tackle the game? Puzzle and strategy games should be tough; few shoot 'em ups are mentally taxing.

INSTANT APPEAL: (out of ten) You take the game out of the box and drop it in the drive. How well does it draw you in? How easy is it to get into?

LONG TERM INTEREST: (out of ten) You've had the game for a couple of weeks. Is it covered in dust, in the bin or still in your disk drive?

OVERALL: (in percentages) Terrible graphics and wonderful sound make a game look hot, but they don't make it great. The overall score comes after joint discussion between the *FORMAT* reviewers, and depends on the quality of the gameplay and its long-term appeal.

● It is *FORMAT* policy to review only finished games - the games you could buy - never incomplete or demo versions.

ALPHA WAVES

Executive toys come to the ST, with mood enhancing colours and soothing sounds to lull you into a false sense of security. Far reachin', man! page 99

ATF 2

Scramble! Scramble! Can *ATF 2* knock *F-19* off of its flight sim throne? page 74

BADLANDS

Battle for road supremacy in this post-apocalyptic "Matchbox car" racing game. Scalextric was never this much fun page 96

CAR-VUP

If you thought men made the best drivers, think again. Crashing is the name of the game in this cutesy platform challenge page 93

CORPORATION

Long awaited, eagerly anticipated and full of promise - but there's a problem: *Corporation* doesn't live up to those high expectations page 113

LOTUS TURBO ESPRIT

The first split-screen two-player racing game: put your car in gear, push your foot to the floor and see if the lights go green before you do page 69

MURDERS IN SPACE

Someone aboard space station Alpha is killing the crew. Can you find out who, before you yourself become the next victim in this orbiting Agatha Christie adventure? page 101

PANG

Blast psychedelic bubbles in this puzzle head-to-head. Cuter 'n a button and more addictive than chocolate page 107

PUZZNIC

Move those blocks and try to avoid backing yourself into a corner with this mind-bending puzzle game page 73

SPECIAL CRIMINAL INVESTIGATIONS

Blast the shite out of criminals from Paris to the Sahara without even hitting the channel tunnel in this sequel to *Chase HQ* page 114

TOYOTA CELICA GT RALLY

From snowstorms to desert, rainy England to sunny Mexico, this rally game takes you past more sights than the Orient Express page 89

ULTIMATE RIDE

Put on your leather jacket, squeeze that throttle and wring that wrist in this blistering bike racing game page 77

9 LIVES

Bob Cat is a wisecracking cat on a hot tin roof. This feline platform game comes with heaps of comic visuals page 79

ALSO ■ *Brain Blasters* page 80 ■ *Chess Simulator* page 108 ■ *Chip's Challenge* page 104 ■ *Curse of Ra* page 90 ■ *Final Battle* page 111 ■ *Gremlins 2* page 95 ■ *Nitro* page 123 ■ *Omni-cron Conspiracy* page 125 ■ *Street Hockey* page 116 ■ *USS John Young* page 118 ■ *Z-Out* page 102 **PLUS** Screenplay extra: a bulging bagfull of games that never quite made it page 127

MELBOURNE HOUSE £29.99

Supremacy

POWER TO THE PEOPLE? NO, JUST YOU...

Everything you do in *Supremacy* is controlled using the sets of icons. These enable you to assign forces, buy goods and transport ships to other

planets. By frequently visiting the main screen you can keep up with messages on what's happening in the Universe and respond accordingly

■ **Buying screen** enables you to purchase new stations, battle cruisers and solar satellites

■ **Launch your stations and ships into space from here**

■ **Move your atmosphere processor to other planets so that you can format and then inhabit them**

■ **Government Screen** icon provides details of finances, population and planet status. Taxes can be raised or lowered from here

■ **Recruit civilians into your armed forces, train them and then equip them**

■ **Go to the cargo bay to crew and fuel your ships, readying them for blasting into orbit**

■ **Move planet stations out of the docking bay and install them on the planet**

■ **Set aggression levels for your forces and move people on or off your battle cruisers**

■ **Send out spies to obtain information about the enemy. This information costs money**

ALIEN ALERT! ALIEN ALERT!

The difficulty level of the game, which is set according to which opponent you choose to face, doesn't just determine the strength of your opponent's armies but also how quickly they advance and their intelligence rating. An intelligent enemy has the brains to attack your weakest planets.

■ **WOTOK** is the easiest of the opponents to defeat: he never uses spies, attacks randomly and takes time making important decisions

■ **SMINE** tends to attack several planets at once but this stretches his forces, making him easy to defeat. It's important to establish a strong garrison against Smine

■ **KRART** has excellent soldiers and uses his spies carefully.

He attacks the planets which are most useful to you, weeding out the ones which are particularly under-defended

When you get a decent God game – like *Populous*, *Millennium 2.2* or *Sim City* – it isn't just average, it's a bloody smash. Get the formula right and the game is easy to get into but still offers enough variation to keep you playing through the whole night. *Supremacy* has been in development for a staggering 18 months, but does it match the classics? Mark Higham plays it to death from his safe seat in the heavens

Who can pass up the opportunity to take control of the Universe? We've all watched as world leaders have made a complete mess of the planet, raping the forests, over-taxing the people and then taking the first steps towards other planets. *Supremacy* gives you the opportunity to stop

■ The main options screen of *Supremacy* looks daunting enough, but explore the rest of the game and you realise this is child's play. *Supremacy* is a God game in a similar vein to *Sim City*. Build up and equip planets, establish strong military forces, then charge through the Universe and take over all the planets you can lay your hands on. Prepare to be amazed!

■ RORN is the fiercest of opponents, very clever and very strong. He moves slowly at first, building up troops until he's able to attack even your strongest planets. Beat Rorn and you've won the game

playing follow-my-leader and start acting under your own initiative.

At the start of *Supremacy* you have a single planet with no way of supporting life. The objective is to establish a colony on the planet, watch as the people develop and then begin to build yourself an army. The game is played against a computer-controlled opponent – any of four alien life forms. With your armed force you can begin to colonise new planets and take over planets already controlled by the enemy.

As the game advances the enemy begin to attack your planets and you need to build up a strong enough army not only to fend them off but also to attack them. If you succeed in taking over all the alien planets you proceed to the next planetary system, where you take on another opponent.

Supremacy is played using a series of icons which guide you around the game. With these icons you can raise or lower taxes, to encourage people to breed on the planet, and buy horticulture and mining stations to equip your people with food and fuel. Each planet is only capable of supporting up to 30,000 people, so when you reach this limit it's time to move on.

EFFECTS

Strategy games in this vein don't have the scope for exciting visuals – that's a common view, proved ➤

● When you first play *Supremacy* you should begin by taking on Wotok. A useful hint on defeating him is to build up Starbase and perhaps colonise one or two other planets, making sure you raise some exceptional armies. Don't worry when Wotok invades the remaining planets, just concentrate on building up your armies. When you have enough money, equip six troops with the best armour and weaponry, then send them out to attack Wotok's home base.

LIVING IT UP IN LUXURY

■ To establish life on a new planet you first need to terraform the planet. Buy yourself an Atmosphere Processor, move it onto the new planet and begin formatting. This takes a while, but when the formatting has been completed you can begin to move people and supplies onto the planet.

Four different types of planet can be created after planet formatting. These support different types of activities. For example, if you establish a

mining station on a volcanic planet it produces four times the fuel and minerals of its equivalent back on Starbase. Other planet types are more efficient at processing food and energy. Atmosphere processors are extremely expensive so you'd only buy one during the entire game

■ Your next step should be to buy yourself a horticultural station which supplies your people with food. Fill it with fuel, crew it and then send it to your new planet. As your population increases you need more food stations.

Once in the docking bay, install the station on the planet's surface and switch it on

■ With food now in your stores, it's time to encourage people to breed. Reduce the tax rate to 10% and the population growth rating should increase. (Do you think we should tell the Prime Minister about this?)

■ Any planet with a mining station or horticultural station must have a solar satellite generator in orbit. Buy a solar satellite back at Starbase and send it off into orbit around your new planet. You should now notice that people are beginning to breed like rabbits, so put the tax rate up to around 20% to slow the growth slightly. You may need to install a second horticultural station on the planet as the population grows

■ You need fuel to be able to send stations and battleships off to different planets, so consider installing a mining station. Remember that they work best on volcanic planets. You can buy yourself a mining station back at Starbase and send it out to your new planet

■ Now that your people are expanding, it's time to put some of them into the army. Set up four divisions of 200 men and train them. With the tax rate set at 25% you should soon have enough money to buy some sophisticated weaponry and armour. Equip the men well: new planets are often the first to come under attack

Your planet is now suitably established and will grow slowly of its own accord. It's wise to drop the tax rate back to 12% for the time being so that people breed faster. In an emergency you're then in a position to raise the taxes through the roof to finance stronger armies. For now, put more men into training. There's no need to equip them with weaponry or armour, but they'll be fully trained up in the case of an attack later on. In time, more horticultural stations are going to be required to sustain the increasing population on your new planet, so consider buying another and sending it up now

SO REAL YOU CAN SMELL THE SMOKE

THE No. 1 BEST SELLING BOOK HAS NOW TURNED INTO THE No. 1 BEST SELLING GAME

TEAM YANKEE IS THE DEFINITIVE ACTION SIMULATION OF MODERN TANK WARFARE.

"TEAM YANKEE THE CRITIC'S CHOICE"

AMIGA FORMAT

- Team Yankee's a real challenge.
- A fascinating exercise in modern war.
- Team Yankee presents a game, in a sim's clothing, which when dealing with tanks has to be the perfect approach.

ACE

- The implementation of Team Yankee is superb.
- The blend of thought and reflexes required to play Team Yankee is exactly right.

Team Yankee is designed to test your leadership and tactical skills to the quick. You can display in either "quadrant mode" where all four platoons may be controlled at once

or Full-screen Mode where the display homes in on just one platoon.

You have the flexibility to display either an overhead map view of the surrounding area, a simulated 3-d view of the battlefield, or a status screen showing the performance of all vehicles in a platoon. Irrespective of which screen mode you choose during battle, there is a constant column of information to the right of the screen.

To the right of the compasses are five icons which represent the various types of weaponry available to the unit.

- MACHINE GUN** - which is always available to the player and has an 'infinite' number of rounds.
- SMOKE** - a smoke grenade which allows enemy vision to be obscured.
- HEAT** - a high explosive anti-tank round
- SABOT** - an armor-piercing tungsten shell
- TOW** - a high-range anti-tank missile

The major capability on the quadrant map screen is to alter the movement and formation of any platoon. The whole of the map may be viewed at once, or you may zoom into any portion of the battlefield using the icons to the right of the map.

M1 ABRAMS TANK

- 50 CALIBER ANTI-AIRCRAFT MACHINE GUN
- 7.62mm LOADERS MACHINE GUN
- 1800 HP GAS TURBINE ENGINE
- 105mm GUN
- BORE-SIGHTING MIRROR
- SMOKE DISCHARGES

Crew: Four Main Gun Ammo: 55 Rounds
Armor: Chobham (steel, ceramics, plastic)
Combat Weight: 54.5 metric tons

This is a game and a half! • The use of four screens in one is simply brilliant - at times its almost like playing on four computers at once. • I find it hard to fault this game - I quickly found myself hooked on a genre of game which previously held no interest.

AMIGA ACTION

- The tanks have been superbly animated, with great attention to detail!
- This has to be a must for anyone.....!

STRATEGY PLUS

- This is a game and a half! • The use of four screens in one is simply brilliant - at times its almost like playing on four computers at once. • I find it hard to fault this game - I quickly found myself hooked on a genre of game which previously held no interest.

ST FORMAT

- Hunting the Red Bear has never been so much fun!
- You just won't be able to tear yourself away from Team Yankee.

Engine smoke will prove very useful in controlling your enemy if you find yourself in a tight corner.

Rotation icon compass display

Infra red (or thermal) imaging This feature is very useful for identifying vehicles camouflaged on the edge of forests. Contrary to popular belief the thermal image is green and not red.

Zoom. When this icon is accessed the central portion of the screen is magnified by a factor of 10.

Laser range finder. The range finder will lock on to a reflection target if the firing cursor is placed directly over the ob-

Wide formation icon increases the spacing between vehicles in a platoon to 100 metres.

Narrow formation icon This reduces the inter vehicle spacing in your platoon to 50 metres.

Vee: a vee formation.

Echelon right - places your vehicles on a right diagonal relative to your direction.

Echelon left - places your vehicles on a left diagonal relative to your direction.

Wedge - places your vehicles in a wedge formation.

Scroll icon: The four arrows underneath the ETA display allow you to scroll your map in any of the four directions.

Dead Stop icon. This red icon, causes your platoon to come to a dead halt when clicked.

In line - places your vehicles in a line abreast relative to your direction.

Echelon right - places your vehicles on a right diagonal relative to your direction.

Column - places your vehicles in a line ahead relative to your direction.

completely untrue by *Supremacy*. Stunning visuals and heaps of useless but magnificently atmosphere-setting animation all contribute enormously to the excitement of the game.

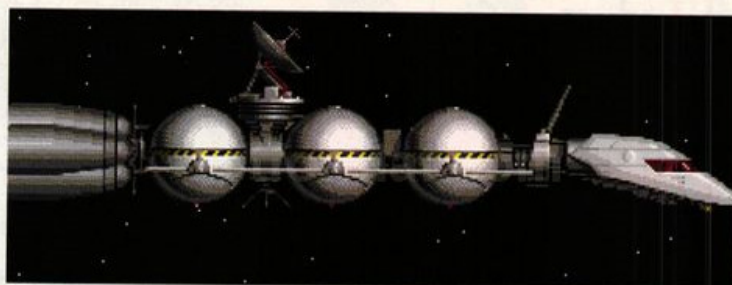

Icons showing the planet type are animated to show you whether the planet is best suited to generating food or minerals, and lively animated icons in the troops section show your troops in training and in battle. When you lose a game you're thrown into prison and then treated to a sequence in which your opponent bites your head off – all in the best possible taste!

Sound effects can be switched on or off from the main screen. Sparse sampled effects and speech keep you informed of alien attack and confirm your buying decisions.

VERDICT

Supremacy bears a very close resemblance to Activision's *Millennium 2.2*. The difference is that *Supremacy* wows you far more than *Millennium* could ever have done. Wonderful visuals and an impressive user interface make the game far more exciting to look at.

Millennium was, however, a much bigger game: instead of simply

■ To protect yourself against the possibility of a planet being ruined by nuclear devastation, wiping out all your hard work, buy yourself a personnel carrier – it can move up to 4,500 of your people in one go

colonising new planets, you had to face much bigger problems such as viruses or rebellious planets. This is where *Supremacy* fails. You have disasters to face such as nuclear explosions wiping out the entire inhabitants of a planet or storms knocking out your food or mining stations, but these problems just

aren't on the same scale as those in *Millennium*. When you've been playing the game for a long time you start wishing there was much more you could do to improve the state of your planet.

Perhaps more seriously still, moving people, food or mining stations from Starbase to one of your new planets is ridiculously complicated. First you must move the cargo into the docking bay, fuel and crew the station and then send it into orbit. You next need to send it on its way to your new planet and put it into the docking bay, only to remove it from the docking bay, install the cargo on the planet surface and activate it. So many different screens must be accessed to perform what

is essentially a simple task that you wish you had some sort of automatic system for carrying out the process.

In these respects *Supremacy* could have been much better – but that isn't to say it's not already a wonderful game. The momentum is ideal: it starts off slowly, giving you a chance to colonise Starbase and build yourself a strong military force, but once you begin to colonise new planets the action speeds up as more and more people make demands on your resources and the enemy gets ever closer.

It's the sort of challenge you pick up early one evening with the intention of playing for a quick hour and then suddenly you realise it's 4am, you've had nothing to eat and you've got to be up early for work... but instead of switching off your ST and going to bed you decide you might just as well carry on playing.

MARK HIGHAM

GRAPHICS	9
SOUNDTRACK	7
INTELLIGENCE	7
INSTANT APPEAL	7
LONG TERM INTEREST	9
OVERALL	90%

PROTECT AND SURVIVE, POSSIBLY

■ (above) These are the suits and weapons available. The type of suit and weapon you have determines your losses during attack

Troops are a vital element to *Supremacy*. If you want to dominate new planets and protect those you already govern, you're going to need to build yourself a sophisticated platoon.

To amass large armies you first need to recruit civilians into your force and train them. You have 24 divisions available and each one can hold up to 200 men. You cycle through the current divisions by clicking on the arrows (A) and increase the number of men in a division by clicking on B. The panel at C indicates how well trained your troops are. It takes a while but when a division is trained to 100% ability you can

equip them – or leave them fully trained and equip them only when you need them.

There are four types of armour (D) and three types of weapons (E) available, but these are all expensive to buy. To equip a division of 200 men with the lowest type of armour and weaponry would cost 20,000 credits. To equip them with the best would cost almost 110,000 credits.

To protect a planet or take over a planet already under enemy occupation, you need to move your troops. To achieve this you must invest in a battle cruiser. These can transfer up to four divisions at a time and carry up to 4,500 passengers (useful if you want to establish a new colony). When your troops are sufficiently trained and equipped, you can move them onto the battle cruiser and then send the cruiser out to the new planet

■ To use your troops to attack a planet, first transfer them from the docking bay (F) to the planet. Put them on maximum aggression (G) and examine how they fare against the enemy. Your troops (H) and those of the enemy (J) are indicated as slider bars, along with any losses (K)

Hard Drivin' II

DRIVE HARDER

A year ago, *Hard Drivin'* shook the world. Now buckle up and step on the gas as *Hard Drivin' II*, the sequel, streaks onto your screen.

Hold on tight as you roar round four thrilling new circuits, or build your own using the unique Track Editor. Once designed, a computer generated view of the new circuit will appear so that you can memorise your route and its hazards. Now you can test your skills on a really mind-blowing stunt track!

And there's more! Link your computer to a friend's Amiga, Atari ST or IBM PC for a head to head race to the finish. If you're lagging behind, go for gold and boost your speed with Nitro Injection – guaranteed to leave the opposition standing.

Hard Drivin' II is faster, meaner and even better looking than the award winning original.

Hard Drivin' II – Drive Harder!

lost patrol

OCEAN

£24.99

Picture this: you've been in the jungles of Vietnam for the last six months, you haven't heard from your girl the whole time and you've probably got footrot from the constant tramping. You're lucky to be alive, but you feel more like the Undead. Your only reprieve comes when you finally get R'n'R in Saigon, capital of South Vietnam and home to the myriad vices that Grunts and Fly-boys need for morale-boosting purposes.

However, fate deals you a nasty blow when the chopper returning you to the warzone gets shot down. You and six other Grunts are lost somewhere in the inhospitable highlands, with limited rations and several thousand Viet Cong looking to nail your ass. The nearest US base is at Du

'Lost Patrol provides an insight into the fear that must have been felt during the Vietnam War'

Hoc, roughly 60 miles away across booby-trapped, enemy-infested terrain. And to top it all, some of your platoon are badly wounded, all thanks to the crash.

For the most part, *Lost Patrol* centres on a large, two screens wide map of the surrounding countryside. On the far left is the crash site, while on the right you find Du Hoc, your eventual target. Below the map is an information window, where events are relayed to you as text, before animation sequences or sub-games are loaded.

Everyone's heard about the Vietnam War, but few people know what it was really like. Neil Jackson enlists in the *Lost Patrol* and finds out – the hard way

■ Your platoon contains seven tough hombres, but strength is useless when morale is low or wounds are many. You must ensure they have the will to survive or you won't last long in this hostile country

There's a compass indicator which you use to direct your team across the map, simply by clicking on the required direction. Clicking on the centre of the compass changes the patrol's walking speed, from Cautious to Double March. Each speed has a different effect on the patrol's morale, stamina and level of fatigue.

When you issue orders to march, a small marker on the map moves in the appropriate direction. Occasionally, a picture or short, cameo-style animation sequence loads, showing your team wading across a river or

"You're bound to stumble on the enemy in one form or another"

yomping down a hillside. These sequences can be switched off if you prefer to keep the action constant.

After a few moves, you're bound to stumble on the enemy in one form or another. The relevant sub-game loads and you must then choose the

most appropriate member of your team to deal with the problem. Some are better at certain skills than others and you need to use your best resource at all times – provided he's not dead already!

You may also come across minefields which require painstaking care and alertness to cross. Crawling on your hands and knees searching for detonators looks easy, but you can soon find yourself trapped, mid-field, with no obvious way of escape. It's a bit like a maze with explosive walls!

You may also meet indigenous peasants and have an opportunity to "interview" them. This can take the form of pleasant questioning, or the much-feared "bullet-through-the-head-loosens-the-jaw" method, depending on your lack of control at the time. Using a system of menus, it's possible to get villagers to warn you of patrols ahead, but more often than not they keep shtum and land you in deep – er, trouble.

You are well advised to search for food and ammo at every location, since your supplies are unlikely to see you through to the end. There's a system of sub-menus in the information window which you use to carry out this operation, as well as issuing orders to rest, sleep or lay traps for following VC patrols. If you're lucky and cautious, you might just make it to Du Hoc in one piece, but you are far more likely to get wasted before the half-way mark.

EFFECTS

Lost Patrol features a wealth of interesting and atmospheric graphics which enhance your journey without making the conflict seem cheap or

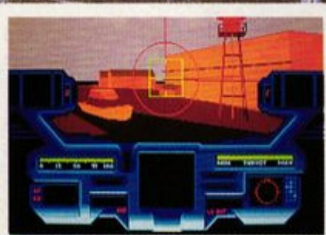

■ Your journey across the Vietnamese jungles takes you from the white cross on the left of this map to Du Hoc, an American airbase on the far right. In between lie many hazards, any of which can wipe out your whole patrol

THE KILLING CLOUD™

JOIN THE SAN FRANCISCO POLICE DEPARTMENT AND UNCOVER THE

■ As your men cross the various types of terrain, different illustrations pop up on screen, reflecting the harshness or relative safety of the surrounding area

"If you're lucky and cautious, you might just make it in one piece"

twee. Some are hand-drawn pictures which show the patrol moving around, others are digitised sequences, with smooth animation, showing real Vietnam action taken from authentic newsreels.

The music has a definite oriental flavour. It's surprisingly good and doesn't detract at all from the game. It can be switched off, but the game

is actually less atmospheric without it. During the sub-games, there are appropriate gunshots, explosions and fist-slaps which won't win any prizes for realism, but are reasonable nonetheless.

VERDICT

Unlike *Platoon* (which made war seem jolly good fun), *Lost Patrol*

approaches the subject with a certain amount of tact and provides an insight into the fear that must have been felt during the Vietnam War. It's not a shoot-'em-up by any stretch of the imagination, even though there can be a lot of shooting involved in any encounter with the Viet Cong. You actually become worried about engaging the enemy, especially when the team is tired or wounded, and strategy is far more important than fighting if you are to succeed.

If your drive to survive is greater than your will to kill, this game is for you. If you kill for thrill, you'll still love *Lost Patrol*, but you'll be dead or doo-lally before Day Three!

LOCK AND LOAD OR HIT THE ROAD!

Lost Patrol gives you a choice of tricks and tactics for engaging the enemy, without needing to use the yellow-belly's RETREAT option...

■ In the dugout you attempt to hide from the Vietnamese infantry who are very busy chucking all kinds of munitions at you

Encountering VC Patrols

Meeting enemy patrols is just about the least pleasant experience of them all. You are trapped in a ruined farmhouse and are hidden behind a wall. You can use the right mouse button to pop up and the left button to lob grenades or fire machine-guns at the enemy. Aim your weapons with the cross-hair sights and use sparingly. Don't stay up for too long (you get shot) and don't hide too long either (you get overrun).

■ Bob up to put your head above the wall, if you must, but keep shooting! Otherwise you may end up leaving in a body bag...

Pinned down by a sniper

Your best marksman is the guy for this job. Use Private Backman - he's the best marksman you have. Turn on the sights and examine every inch of barn, tree, hedgerow and haystack that could hide a sniper. You must look for a tell-tale muzzle-flash (which is only about a pixel big) and then thrash the hell out of that area, using the left mouse button to fire. If you get it right, you are told when the sniper has bitten the big one.

■ Somewhere in this serene landscape lurks a diehard Viet Cong with a rifle. The tell-tale signs are tiny flashes of light and numerous holes appearing in your body

Hand-to-hand combat

Pick your best man, usually Private Blom, because he's a 2nd Dan at Aikido. Use the joystick Fire button to punch, Fire and left to kick and down to duck. Retreat if you're getting whupped, but beware - this often causes a full-scale battle if your opponent isn't entirely dead.

■ Hand-to-hand combat is the quietest way to fight when there are VC nearby. Rouse them and you're in all kinds of trouble!

Trapped by machine-gun fire

The VC are entrenched in a hedgerow and are pelting you with AK-47 fire. Their cover is too good for you to retaliate with M-16s, so you must lob grenades into their foxholes. Click the mouse button to pull out the grenade pin, aim the crosshair and click again, holding the button down to increase the strength of the shot. Release to throw, but make sure you do this within five seconds of pulling the pin. If you don't, you risk going to pieces under the strain!

■ Just like English hedgerows, Vietnamese ones can contain all kinds of wildlife. Unfortunately, it's usually very wild, and tends to be armed with AK-47s

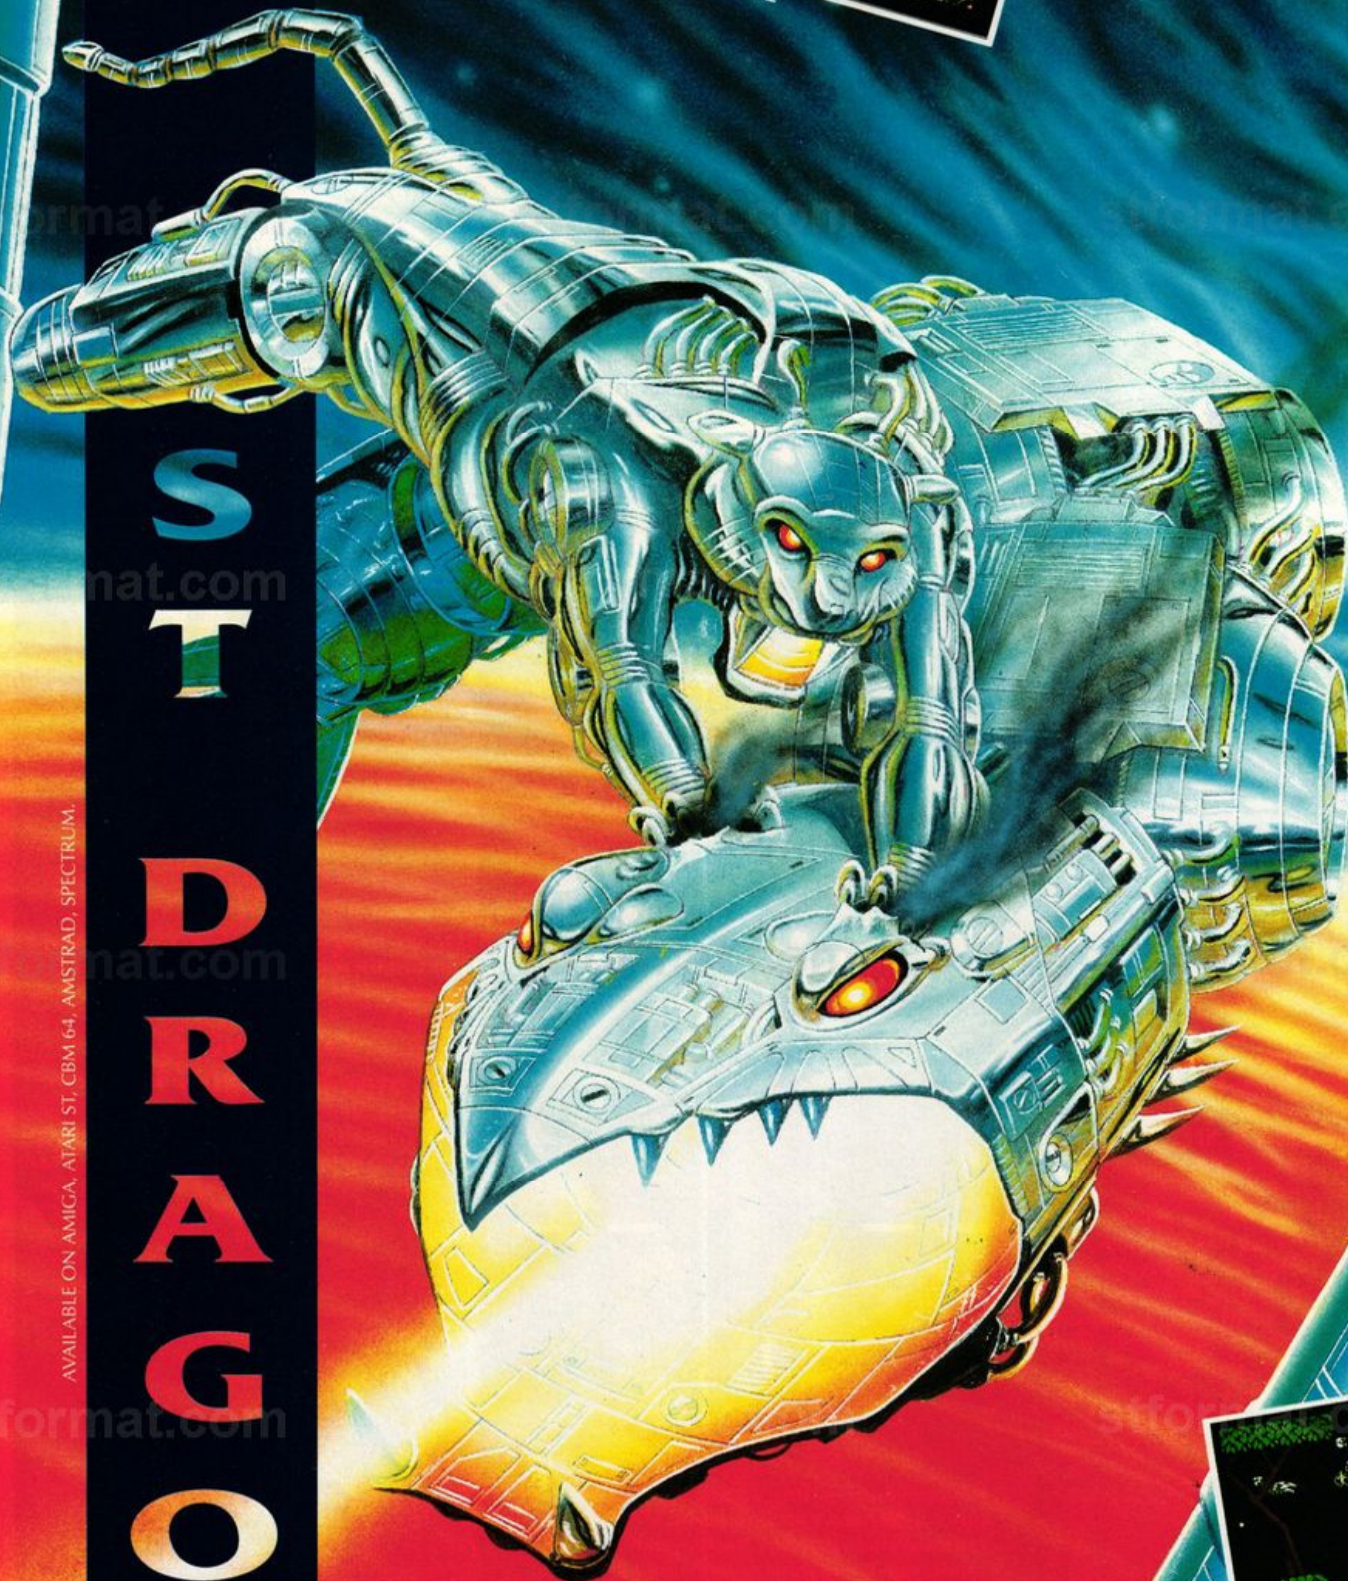

AMIGA

lotus esprit turbo challenge

GREMLIN
£19.99

■ If the idea of owning a high-power, police-beating sports car gets your motor running, then check out the brand new Lotus Esprit Turbo SE, from Gremlin. All you need to add is the fluffy dice and internal dipstick

■ The real McCoy. At rest, the SE looks like the kind of beast most mortal women would commit a dozen kinds of felony for... and young men would love to get picked up in. When pushed hard over hilly ground, it doubles as an aeroplane

■ Lotus Esprit Turbo Challenge combines a competent racing game with an excellent two player option. Now you can give your mate a test drive and trash his ass at the same time

and blocked lanes. Regardless of the overall difficulty level, the tracks get tougher as you progress through each season.

You start each race from the grid as usual, but unlike in other games the other cars accelerate away at similar speeds to you. Your opponents (there are 19 in all) race the circuit for real, rather than popping on and off screen simply to block and annoy you, as they do in *Out Run*. If

you overtake a car and then slow down, it fights to regain its position, keeping you on your toes throughout the race.

Lotus Esprit Turbo Challenge's most appealing feature is its two-player option. The screen is split into two horizontally, each driver having his own set of statistics and read-outs and the main track view ahead. You and your mate both have red Esprits, so you can distinguish yourselves from the rest of the cars. Plenty of scope for some real "ding-dong battles," as that Murray Walker commentator chappie loves to say.

EFFECTS

The game is impressively fast, smooth and eminently controllable. The graphics are clear, well-drawn representations of the things they purport to be, and even in the two-player mode the screen is clear and easy to read at speed.

The sound effects, though chip-based, are thankfully neither repul-

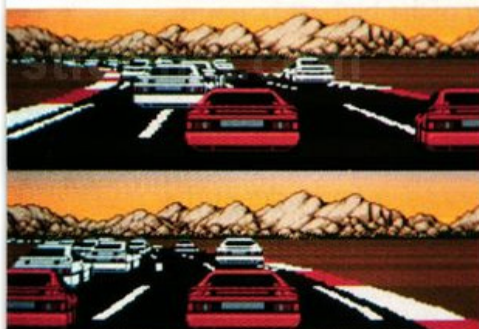

sive nor unbearable. The car sounds are actually quite reasonable, even if they aren't samples, or you can choose one of four in-car tunes.

VERDICT

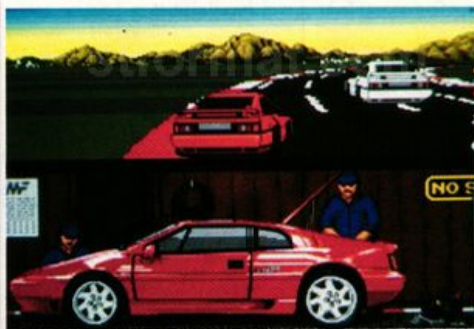

Against the pack or against a friend, Lotus Esprit Turbo Challenge pushes you further than most other race-games ever have, and it makes your joystick hand hurt like hell. While it might not be the most imaginative or original game ever, it's still well-written, beautifully presented and compelling to the very finish. If this ain't on your Christmas list, then you're a pedestrian!

■ Grid starts are crowded, tense and bloody scary! Just as in the real thing, there are too many nutters trying desperately to get to the front - including, in two-player mode, your friend in the other red Esprit

■ Hitting the kerb on those wide cornering manoeuvres makes the car jump up and down in a most worrying way. So don't drink-drive or you're bound to end up in the gutter. Didn't your mum teach you anything?

■ Gremlin's exemplary attention to detail on the technical specs of the Esprit Turbo SE certainly provides you with much more info than you're likely to get from the Arthur Daley character at your local used car lot

KICK OFF 2

A NEW D. SOCCER S

Amiga Screen Shots

- BLISTERING PACE
- PIXEL PERFECT PASSING
- SUPERB TACTICAL GAMEPLAY

KICK OFF 2 greatly enhances the gameplay of KICK OFF, winner of the THE GAME OF THE YEAR in the U.K., and similar awards right across Europe. A host of new features have been added to the ones that enthralled players the world over.

- * Full size multi-directional scrolling pitch with the players, markings etc. in correct proportion.
- * 1 to 4 players option. (Amiga and ST only)
- * 2 players TEAM option against the computer or 2 other players. Hundreds of players each with a unique combination of attributes (stamina, pace, etc.) and skills (passing, shooting, tackling, etc.)
- * Instinctive Kick Off joystick controls to dribble, pass, shoot, head or chip the ball and do sliding tackles.
- * Set piece. FREE KICKS including dummies and the ability to dip the ball or bend the ball round a defensive wall.
- * 9 types of corner kicks with full control of shot power. Long and short throw ins.
- * Team selection from a squad of 16 with substitution and a choice of tactics.
- * League and cup competitions with Extra Time, Injury Time and sudden death penalty shoot outs.
- * Facility to view, edit and save the Action Replays and create a Golden Shots disc. (Excl. IBM & CBM 64)
- * Facility to load Player Manager teams and tactics for a single or league game.
- * Red and yellow cards, 16 different referees, injury time and a host of features to create an atmosphere for a game which is real fun to play.

Nick NEVER got ANY chicks, until he bought those Infocom from MASTERTRONIC GAMES

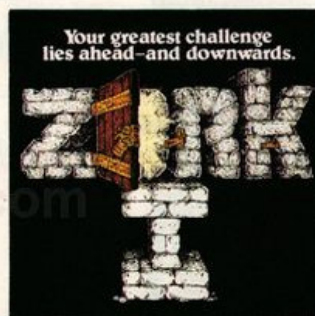

NOW THE ONLY LIMIT IS YOUR IMAGINATION

Classic Infocom Interactive fiction is back
— at an irresistible price.

HITCHHIKERS GUIDE TO THE GALAXY -

You play the role of hapless Arthur Dent in this mind-bogglingly hilarious story by the best-selling author Douglas Adams. You'll chortle while your planet is demolished, yelp with laughter when threatened by the Ravenous Bugblatter Beast of Traal and split your sides as you search the galaxy for a decent cup of tea.

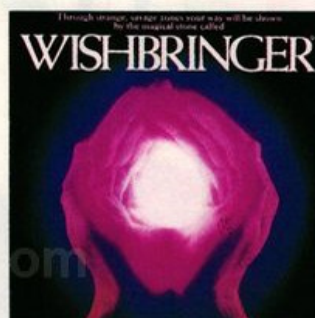

ZORK I -

This phenomenally popular story plunges you into the extraordinary environs of the Great Underground Empire in search of incomparable treasures. You'll come face to face with outlandish creatures as you make an amazing odyssey with so many twists it can offer new surprises every time you explore it.

PLANETFALL -

In this sci-fi comedy, you're a stellar Patrol Ensign 7th class - as low as you can go. Then your luck takes a turn for the better. Your patrol ship explodes. True, the mysterious, deserted world to which you're jettisoned is plagued by floods, pestilence and a mutant Wild Kingdom, but you'll have Floyd, a mischievous robot, to help you find the secret to saving it.

WISHBRINGER -

You begin as an ordinary mail clerk delivering a mysterious random note and end up - magic stone in hand - embarking on a remarkable series of whimsical adventures. You'll need all the wishes that the stone will grant you, because your final destination is somewhere beyond your wildest dreams.

LEATHER GODDESSES OF PHOBOS -

You've been kidnapped by minions of the fiendish Leather Goddesses of Phobos who are plotting to turn the earth into their private pleasure palace. Succeed in escaping their clutches and you'll begin a naughty, bawdy and very amusing romp across the solar system. Your mission is to collect the materials you'll need to defeat the Leather Goddess and save humanity from their dastardly plan.

LEVEL 4

2 - 1

TIME

0:01

■ The idea was right, but with just one second remaining it's time out... *Puzznic* might look easy, but it demands real strategic thinking

OCEAN £24.99

puzznic

Oh no! Not another of those blasted puzzle games! Games that look dull to the casual observer, but keep you glued to the keyboard for hours on end when you know damn well that you've got far more important things to do. Oh yes, that's exactly what kind of game *Puzznic* is.

It's all about matching blocks of the same type together. Put one next to another and they disappear; clear everything on the screen and you're through to the next problem. The difficulty lies in the nature of the puzzles. Often there are three blocks of a like type, and these need to be brought together simultaneously – or else you have a spare one left over and no way to get rid of it.

To complicate matters still further, unsupported blocks fall until they hit something. Then, as well as the blocks, there are stationary walls too, which cannot be manipulated, and other walls that do move – but not under your direct control. They're often the key to solving the puzzle – you have to drop blocks onto them – but in these circumstances, split second timing is vital.

You're pitted against four puzzles on each of the eight increasingly difficult levels – but when you advance a level, you get a further choice of routes, so where level one has one set of four puzzles, number two has two sets – you can choose which one to go for after completing level one. This goes on until you reach level eight, which offers eight lots of brain teasers to test you.

When you finally manage to work out exactly how you do complete the blasted brain teaser that's had you

stumped for the last fifteen minutes – well, it's a feeling of joy, love, well-being and general happiness with the world at large.

EFFECTS

Graphically the game won't set you shaking with excitement. Then again, there's not really that much that could be done with a set of square blocks. Most importantly, the blocks are clear and distinctive, so there's no danger of confusion or getting the blocks mixed up. The problems are much more cunning than that.

VERDICT

Puzznic may lose out on the cuteness that other puzzlers – like *Emotion* – have, but it has to be one of the most addictive since... well, since ST puzzle games began. Though the rules are the same for each level, the sheer number of puzzles gives it a variety unsurpassed by other games. What's more, the choice of different routes means that if you get stumped by one particular puzzle, there's always a way around it. When you finally do reach the last level, there are another 127 ways to complete the game.

Get hold of *Puzznic* and *Puzznic* gets hold of you. And it won't let go for a long time to come.

OVERALL	86%

Two years ago, Digital Integration released their flight-sim hit *F-16 Combat Pilot*. Now they're back again with *ATF 2*, but unlike its predecessor it's centred on a fictitious aircraft from the 21st century known as the Advanced Tactical Fighter.

You must fly your ATF through a collection of missions, attacking ground, sea and airborne targets until your opponent is vanquished. To make this difficult, the enemy is a dynamic force that grows in size as you progress. You may be winning great battles and destroying his

I think we could be in for a bit of trub if this is the crew we have standing by for Operation Deodorant Shield! Oi! You, boy, wash your face! Get yer 'air cut!

resources in one area, only to discover that he has been carving up your homelands in another.

Gameplay is simple. Don't expect *F-16 Combat Pilot's* precision and system-complexity in *ATF 2*. You have only the most basic functions available: weapons selection, a map, flight readouts and an automatic "Ariadne's Thread" that guides you to your next target. These systems are easy to use, leaving you to concentrate on the important job of engaging the enemy.

There are two distinct forms of the enemy. Fighter planes track in from the front or rear, and flak (ground-based artillery fire) blooms up into the sky as you approach the more strategic targets. Dealing with the planes requires you to use the RL (roll) button on the console to flip you up and over, and then VT (vectored-thrust) to jump back behind them. Danger is increased by the enemy's missiles and you must jam them using the Missile Alert button when it flashes. The flak, however, is not too much of a problem, since it's

They go up-tiddly-up-up, they go down-tiddly-down-down, but are they magnificent? Those men, those machines, that ATF 2, in full...

DIGITAL INTEGRATION £24.99

ATF 2

Arm the Advanced Tactical Fighter using the remote controlled sytems that pop up out of the floor. You're ready to roll!

unguided and you can generally dodge your way through it.

Locking on to targets is another simplification of old *F-16 Combat Pilot*. If you have the correct air-to-ground weapon armed, a small square box on the Heads-Up Display shows you the chances of a hit. When a diamond is overlaid on the box, the missile is locked on and can be released with a good chance of target destruction. Some targets are better off just damaged, because

Hit the afterburner and take a good swig out of the hip flask. And remember, kids: look left, look right, look right again, get confused and never, ever cross the road with your undercarriage hanging out

Dodging the enemy calls for hyper-quick reactions and a strong gut muscle. You need to hit the roll button fast to rotate up and behind the enemy and avoid taking hits

(À la Peter Snow) The statistics show a marginal ten-percent swing away from and then back to Labour negating the overall effect and can I play with those tanks now?

Tankbusting looks great from the pilot's point of view, but you'd think twice about being a tank commander if you knew just what it looked like from inside the tank!

Captain, I'm getting a reading now. It's Earth, probably during the 21st century, according to this book. OK, Spock, let's take her down, I need some fags...

your troops can then use that location to strengthen your resources, but you have little control over this element of the gameplay.

EFFECTS

ATF 2 uses 3D filled-vector graphic techniques (like those used in *Falcon*, *F29* and *F-16*) and standard bit-map sprites more common in road-race games. The overall effect is smooth, but not altogether convincing. You tend to feel constrained by the repetitive attack patterns and lack of ground detail.

Musically *ATF 2* offers very little, but you can deselect the annoying chip-based tune. Sound effects are marginally better, but do not convey the feeling of "being there."

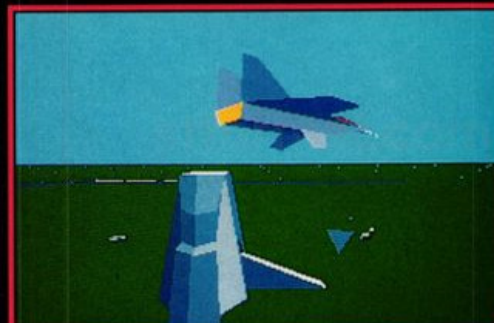

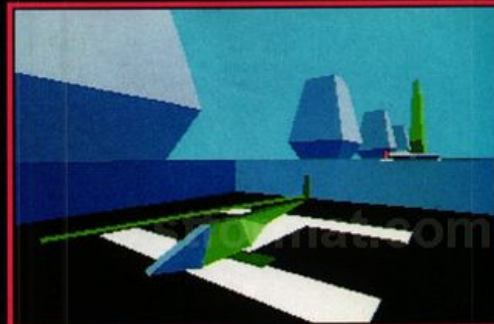

VERDICT

After the spectacular *F-16 Combat Pilot*, *ATF 2* is a bit of a let down. It's obviously not a flight-sim, but it would have been better if the flying were more realistic. Basically, it's an airborne version of *OutRun*, with a similar lack of gameplay. Though it's enjoyable for the first few games, interest in it soon wanes. Buy it if you enjoyed *Space Harrier* and other games of that genre, but don't expect it to be in the same league as its flight-sim stablemate.

£24.99

ultimate ride

MINDSCAPE £24.99

Super-fast, lunch-repeating racing games are in vogue at the moment. Ever since the days of the abysmal *Outrun*, they've grown ever faster and the graphics increasingly bigger and more detailed. *Ultimate Ride* is probably the most thoroughly researched racing game yet, with incredible attention paid to how the bike reacts in real situations. It's so detailed, in fact, that if you get the speed right you can even perform wheelies.

Before you get to all that, though, you first select one or two-player mode: in the latter, the screen is split vertically with each player's bike and road area shown in one half of the display. After this you're through to the bike select screen where you pick the type of bike you wish to ride, tyre types (you need different tyres for different roads), hills, bends and weather settings.

With these options selected you're then through to the main action with a choice of race track or street course. In track courses you first need to complete a two-lap qualifying race to determine your starting position. You then race against five other bikes. The street courses put you in a manic cannonball run, racing against the clock. There are six possible courses available for both Track and Street courses.

■ In two-player mode the screen is split in half, showing each player's position on the track. Here the speed of the game has been improved by switching off the roadside sprites and wing mirror views. Notice the effect this has on the tree in the distance, now reduced to a silhouette – a graphic sacrifice for better playability

EFFECTS

Wing mirror views of what's going on behind you have rarely made their way into a racing game and they lend a great deal of realism to the action. Top this with more than 70 roadside sprites – from daunting trees and rocks to bales of hay, cars and even a few sheep – and you have a game which looks damn near stunning. Seven animated sequences accompany the end of a race just to give some continuity to the action.

But sadly, these amazing visuals cannot conceal the fact that the

graphics move ridiculously slowly. Fortunately, the programmers must have realised what a problem this is, and there's an option from the main playing screen to turn the roadside sprites off. They're still there for you to crash into, but they're blacked out so all you see is a silhouette. Why, you might ask, should you want to play with the roadside sprites blacked out? The answer is simple: with sprites switched off the game manages to run at a playable speed.

There's a similar situation with the sound effects. You can choose

to play either with sampled sound effects or ST sound chip noises, and though the sampled engine noise is brilliant it has the effect of slowing the game down slightly. Personally, in those circumstances I can live without that throaty roar.

VERDICT

Complex and detailed research went into deciding how the bike should respond to your every movement, but this all seems to be at the expense of gameplay. With sprites and sampled effects switched on, *Ultimate Ride* looks and sounds brilliant but is just far too slow to be an absorbing challenge. The option to speed up the game by switching off the roadside sprites certainly makes it far more playable – but then the game looks and sounds like it's just free-wheeled its way out of the ark.

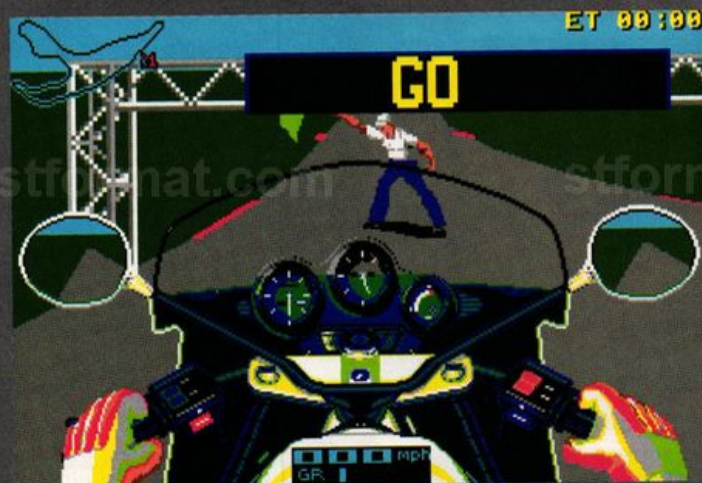

At the end of it all, *Ultimate Ride* makes a good simulation but a pretty average racing game.

REV FOR ACTION AND GO INTO FULL THROTTLE

When you play a full race you need to take two laps round a qualifying track to determine your starting position. If you can't be bothered with all that boring official stuff, pull down on the joystick and you're put without any effort into fifth place at the start of the full race – the heat is really on then!

■ Get those revs up, wait for the light to change to green, then charge the crazy man with the flag and watch the blood fly

■ (below) Avoid those trees and make sure you stay on the course. If you stray from the road for too long, your bike crashes and you die horribly

■ (left) Before you tackle the race proper, you get a choice of nine bikes, all carefully researched to respond accurately during the game. Besides picking the top of the range bike, make sure you pick the correct tyre type to improve your grip on the road surface

■ Whoops! Back to the road! You didn't do too well in the qualifying round, so it's into fifth place for the actual race

ENDORSED BY SUZUKI GRAND PRIX TEAM.

As anyone who's been woken up by a cacophony of whining firework noises at three o'clock in the morning can wearily testify, cats love to bonk. What's more, with nine lives to play around with, you get nine times as much fun as anyone else (or nine times as much trouble...).

Take Bob Cat, for example, hero of 9 Lives, Romeo from the wrong side of the tracks, and besotted suitor of Claudette Cat, who's been kidnapped by "The Mad Scientist." This tom's so testosterone-stoned that he's will-

tered with spikes which snatch away one of your nine lives whenever you land on them.

On the plus side you do have your ball of wool, which stuns the enemy for a second or two to let you by. Then there are the pick-ups: food to replace that lost energy, presents to shower your girlie with when you eventually reach her and various other fancy goods which enable you to fly, turn invisible and become immune to the baddies' malign touch.

EFFECTS

The only downer is the jerky fashion with which the screen jumps from room to room, but it's a small price to pay for the colour and animation. Not only are the mutated animals frenetically energetic, they also make for an army of very vivid characters. There's some nice humour as well,

■ Introducing Mr Bob Cat Puddycat. Bit of a randy old devil and a real glutton for punishment, he's got four incredibly difficult levels to cross before he gets his gal. (Hope he packed the Milk Tray!)

9 lives

ARC £24.99

■ Well, I've got my key in the left-hand bottom corner - now to release my poor old chum who's locked up there in the cage. Er, perhaps I'd better go in the right direction first...

■ Better watch out for those goolie-snapping piranhas, Bob!

ing to brave four labyrinthine levels of platform game to snatch her back. It sort of makes you wonder whose company she's going to be safest in.

Randy Bob has to jump around locating sufficient keys to release 24 other chums who are locked up in cages. Blocking your progress from the highest cliff-face to the deepest flooded tunnel are characters who munch away at your energy when you bump into them.

Be prepared as you encounter robotic stick insects, vampire owls, grumpy bulldogs and chomping piranha fish - with more than 100 rooms making up each level, the list seems endless. And as if that isn't bad enough, the whole place is lit-

■ Not only are the sprites in 9 Lives bright and colourful, but there's a real Loony-Tunes sense of humour to them. It's little touches like these that make the game such fun

■ If you find an angel wings icon you end up flying for about 20 seconds or so - handy for grabbing the odd highly-hidden key, eh?

like when Bob jumps off a ledge with nothing below and freezes in mid-air with an expression of comic terror before plummeting down - pure Loony Tunes. The sound however is no more than the usual cute-game jingle.

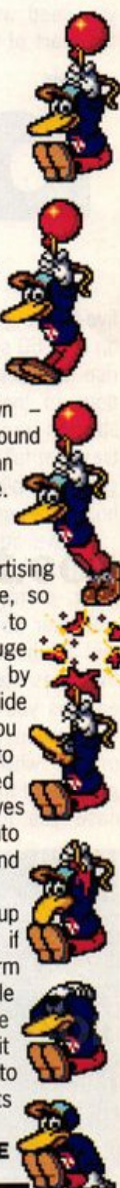

VERDICT

Arc aren't afraid of advertising 9 Lives as a hard game, so that's the level it ought to be judged at. You gauge the height of your jumps by how tall the tail at the side of the screen is but you need a lot of practice to master it. You also need to lose quite a few lives jumping off-screen onto spikes if you want to find your way around.

Beginners will give up on it very quickly, but if you're a veteran platform player with an insatiable appetite for a challenge then this is as tough as it gets - just be ready to cancel all engagements for the next four weeks.

Have you got a photographic memory? If you haven't, skip this straight away, 'cos *Brain Blasters* is aptly named, pulsing your little grey cells into a consommé with its infuriating blend of arcade action, vicious time limits, ultra-quick-thinking and horrible, horrible memory tests.

The plot is typically French – that is, almost entirely notional and extremely daft. You are leading a team of magician types and your aim, as you battle against either the computer or other players, is to amass enough gold to make it to a final challenge with arch-mystic Iozu – but whether you actually get that far is another matter...

The first stage of the game is the Memory Quest, 25 successively harder memory tests. Pass them all and you collect a magic ball, which you need when you tackle Iozu. At the start of each round, you face a

brain blasters

UBISOFT £19.99

five-by-five grid with a number of tiles on it. In 60 seconds you must memorise the colours, shapes and positions of these tiles, then use your little on-screen figure to collect the tiles that fall from the sky, run to the grid and plonk them down in (you hope!) the right place.

Other little bonuses fall from the sky to help you out. One acts as a joker, coming up with the right tile wherever you place it on the grid, and another lets you duplicate one of the tiles already there. A third enables you to use the full width of the screen (invaluable in two-player mode), while another gives you a glimpse of the correct pattern, just in case you forgot. The final one is

■ Two-player mode – and one of the two patterns must be wrong!

wrapped up as a parcel, and it either gives you a mystery goodie or blows you up!

There are several options. One enables you to choose the names of the wizards on your team from the list given and even substitute your

own names. Characters who accumulate large quantities of gold can be saved and used again. The Mad Mod option lets three humans play at once (absolute mayhem), while the "Contact God" option is seriously weird. Here you can pay varying amounts of gold for successively more useful bits of advice. This is where you finally hand over all your loot if you want to tackle Iozu.

Then there's two-player mode, which gets seriously frantic, and in many ways is the best bit of the game. After each round a graph displays your memory's performance both for that round and cumulatively.

EFFECTS

Although it's essentially a static-screen puzzle game, *Brain Blasters* is very good-looking. The backgrounds are nicely-drawn and atmospheric, and the shapes you have to manipulate colourful and detailed. Best of all are the little magicians, who whizz around at great speed and are very humorously animated. Watch out in particular for the musicians who play while you memorise each pattern – very, very funny. The sound is excellent. The jingles and tunes are original and rather catchy, and the sound effects are nicely done too.

VERDICT

The convoluted plot for *Brain Blasters* disguises the fact that it really is an extremely simple and

addictive game: once you know what you're doing, you're hooked. It really does combine a whole host of game-playing skills – you need fast reactions to grab pieces you want before the other player gets them, and strategic thinking as you work out which bonuses you want and which are quickest.

Most of all, though, you need an eidetic memory which can etch a complex arrangement of colours and shapes in your mind within the minute or so you've got to beat that wailing devil wagging furiously next to you. Playing against the computer, it's good. Playing against another human, it's brilliant.

ROD LAWTON

■ Total chaos is about to break loose in the three-player Mad Mode. That's the pattern you've got to reproduce – but with all three of you frantically dashing around the screen, who's going to make it first?

■ Remember these bonuses. Without them, the more complex advanced puzzles are impossible

Captive[®]

The quest for freedom!

When you can't remember who you are, where you are and even what year it is, then you know trouble cannot be too far away...

Held *Captive* for two hundred years in an orbiting space prison for a crime you didn't commit, you are desperate to escape from your electronic gaol.

Armed only with a briefcase computer found in the corner of your cell, you start sending out electronic SOS calls to the battling world outside.

Eventually you find a motley crew of four droids ready to help bring about your escape... so begins your quest for freedom!

We interrupt this magazine to bring you these newsflashes. The sky is pink with polkadots, Saddam Hussein has relocated to a business park just off the M25 and Mr Billy Zurkonian has just completed a record three weeks with a carnation up his left nostril. This has been Andrew Hutchinson, the Gaza strip, Clapham. Right, where were we? Oh yeah, the *Speedball 2* review... bung us that joystick

MIRRORSOFT £24.99

speed

■ Budding Len Faircloughs sign here. This is the management screen where you can buy, sell and train your team, Brutal Deluxe – so called for reasons which should be very obvious

There are 12 men in a team, three of whom are substitutes (so, err... that means there's nine on the pitch at a time, I think, possibly).

A game consists of two halves of 90 seconds. At the end of the first half the teams swap ends and play continues. The ball is shot out of a retractable machine in the centre of the pitch and two players from each side have to scramble to the ball to gain possession. There's no out-of-bounds, so the only time the ball shooter is used is after a goal or at the start of a half.

Absolutely anything goes in *Speedball 2*.

■ Science lesson number seven: what happens when a large, solid, metallic sphere impacts with a human cranium at great velocity? Well, class, it's pumpkins off multi-storey car-parks time, basically!

Players cannot be sent off, no matter how brutally they do someone over (bit like the Italian league really) – in fact you earn ten points for every player you send off the pitch on a stretcher! When a player has possession, a large red or blue letter (depending on your team colours) appears above his head – M for a midfielder, A for an attack and D for defence – and to get the ball off him you either perform a sliding tackle on him or hit him a few times.

The game relies very much on passing. You can bounce the ball off the walls, the objects on the pitch or other players. The ST controls your team-mates until you decide to take control of one of them. Even then, however, their intelligence tends to vary. You can either be supported on your mad run up the middle of the pitch or left with your bum hanging in the wind while the rest of the team takes time out to perform brain surgery on the opposition.

Some tasty features are placed around the perimeter wall of the pitch and actually on it. These include warp gates which send the ball to the opposite side of the pitch, pinball-like score multipliers and Electro-bounces which make the ball unstoppable by the opposition until you lose possession. In addition, money and power-ups –

which can give you extra stamina, lock your goal or even sap the other side's strength – appear sporadically on the pitch.

There are four game types available – knockout, league, cup and exhibition – as well as a practice option. The first three enable you to manage as well as play with the team. Players can be bought and sold and your team trained to your satisfaction.

From the management screen a gym option enables you to boost the eight attributes which make up the skills of each player: speed, stamina and even intelligence can be souped up, but it all costs money – and that you must earn by running over coins which appear on the pitch in the course of a game.

What's more, the team can be trained individually or en masse. If

Two years ago *Speedball* took the ST games world by storm. It featured dazzling gameplay, a league option and the kind of depth which meant the game had a very long shelf-life. A sequel was always on the cards and now the Bitmap Brothers have come up with the goods.

Speedball 2 is a futuristic ball game. Two teams battle it out on a large pitch and attempt to score goals by throwing a metal sphere into a goal.

Speedball 2

GRUNT, DELUXE	PLAY	VIOLENT DESIRE
PL 100 100 100 100	PL 100 100 100 100	PL 100 100 100 100
POINTS FOR 100	POINTS FOR 100	POINTS FOR 100
POINTS AGAINST 100	POINTS AGAINST 100	POINTS AGAINST 100
DEFENCE 100	DEFENCE 100	DEFENCE 100
WIDE FIELD 100	WIDE FIELD 100	WIDE FIELD 100

SUBSTITUTES 100	SUBSTITUTES 100	SUBSTITUTES 100

■ The fixtures screen not only shows you who you're up against in your next game but also displays the relative strengths and weaknesses of the opposing team's players, so you can "train" your team accordingly

■ Frog-march your team down to the gym for a good, sweaty, all-boys-together workout. Speed, stamina and power can all be tweaked – and you can also stick a large needle in a player's head for a handy brain boost

you choose the league or cup options, then the game can also be saved to disk.

EFFECTS

Where other sports simulations fail because they look weedy and indistinct, *Speedball 2* succeeds because it looks hard and clear. The metallic colours of both the pitch and the players' suits look excellent. What's more the players are all clearly visible, to the extent that you can actually see fists landing on heads. Animation and scrolling are both top notch, making movement about the pitch and interception of the ball a cinch. Sound is fairly average but this doesn't seriously detract from the game in any way.

VERDICT

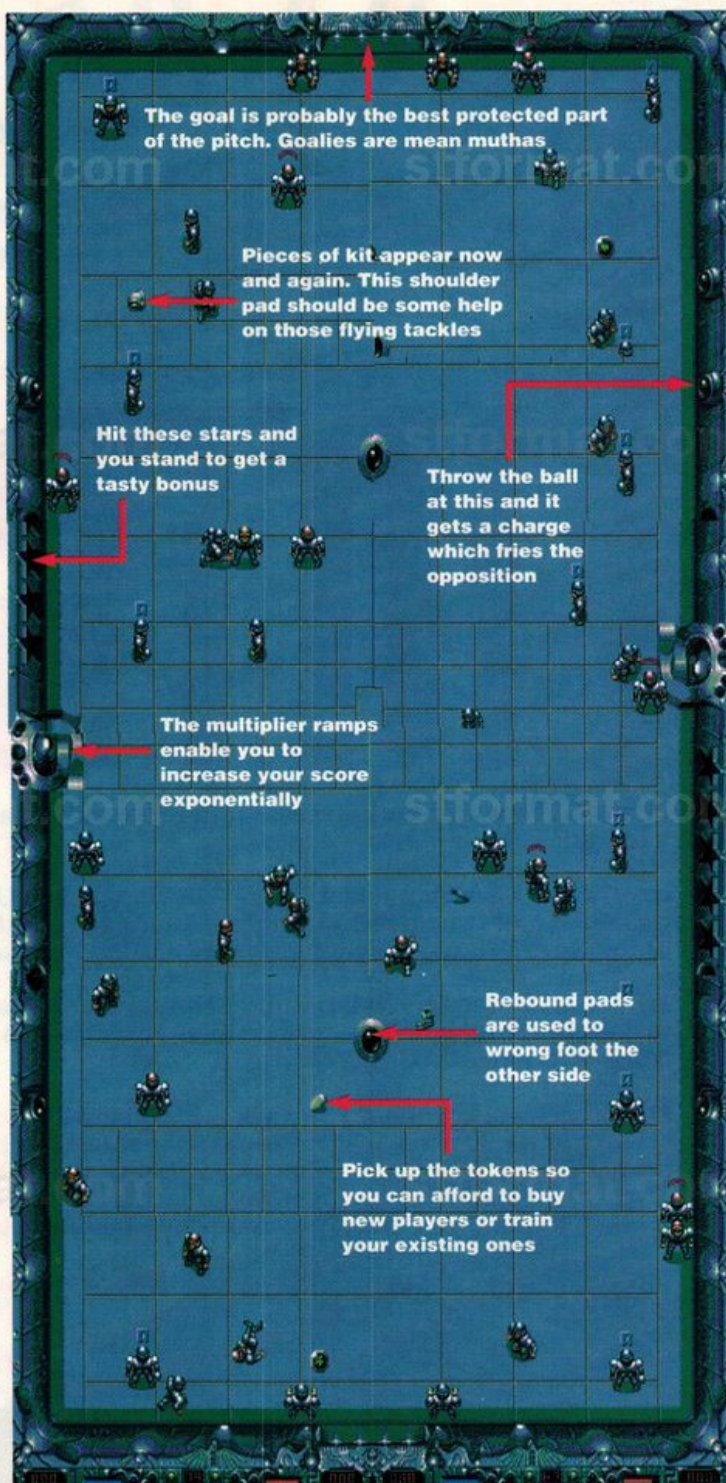

Wicked, basically. *Speedball 2* oozes quality from every screen. However, it is a sequel and therefore treading on its own feet to a great extent. Everything has been tweaked or

changed from the original: the pitch is now twice as big, the players have more animated movements and gameplay is even more fluid. The league and cup options enable you to spin a game out to a season, and there's the knockout or the exhibition options for someone who just wants a quick game.

One of the best things about *Speedball* was the ability to really rub someone's face in it when you scored a goal. This version goes one better by including slow motion replays of the goal. *Speedball 2* is more of the same but it's extremely well done and a superb game.

■ Like a cross between a hockey pitch and a pinball table, the playing area in *Speedball* gives you plenty of room for action plus some very tasty, sometimes violent bonuses to pick up along the way

GEEZER'S GUIDE TO SCORING A GOAL, THE SPEEDBALL WAY

■ Yeeaaaaaaahhhhh.... we've scored! What do you mean you missed it? Just watch the action replay...

■ Sultry Simon skilfully side-steps poor pouting Peter, the plodder, and gallops grimly for the glamorous goal...

■ He keeps his head (literally) and lobbs the ball into the goal in a debonair and every so slightly touching sort of way...

■ A quick victory celebration in the middle of the pitch is bound to annoy the other team (we hope! Hahaha)

FLIGHT OF THE

INTRUDERTM

Flight Of The Intruder takes you into the deadliest air combat environment the world has ever known - the skies above North Vietnam.

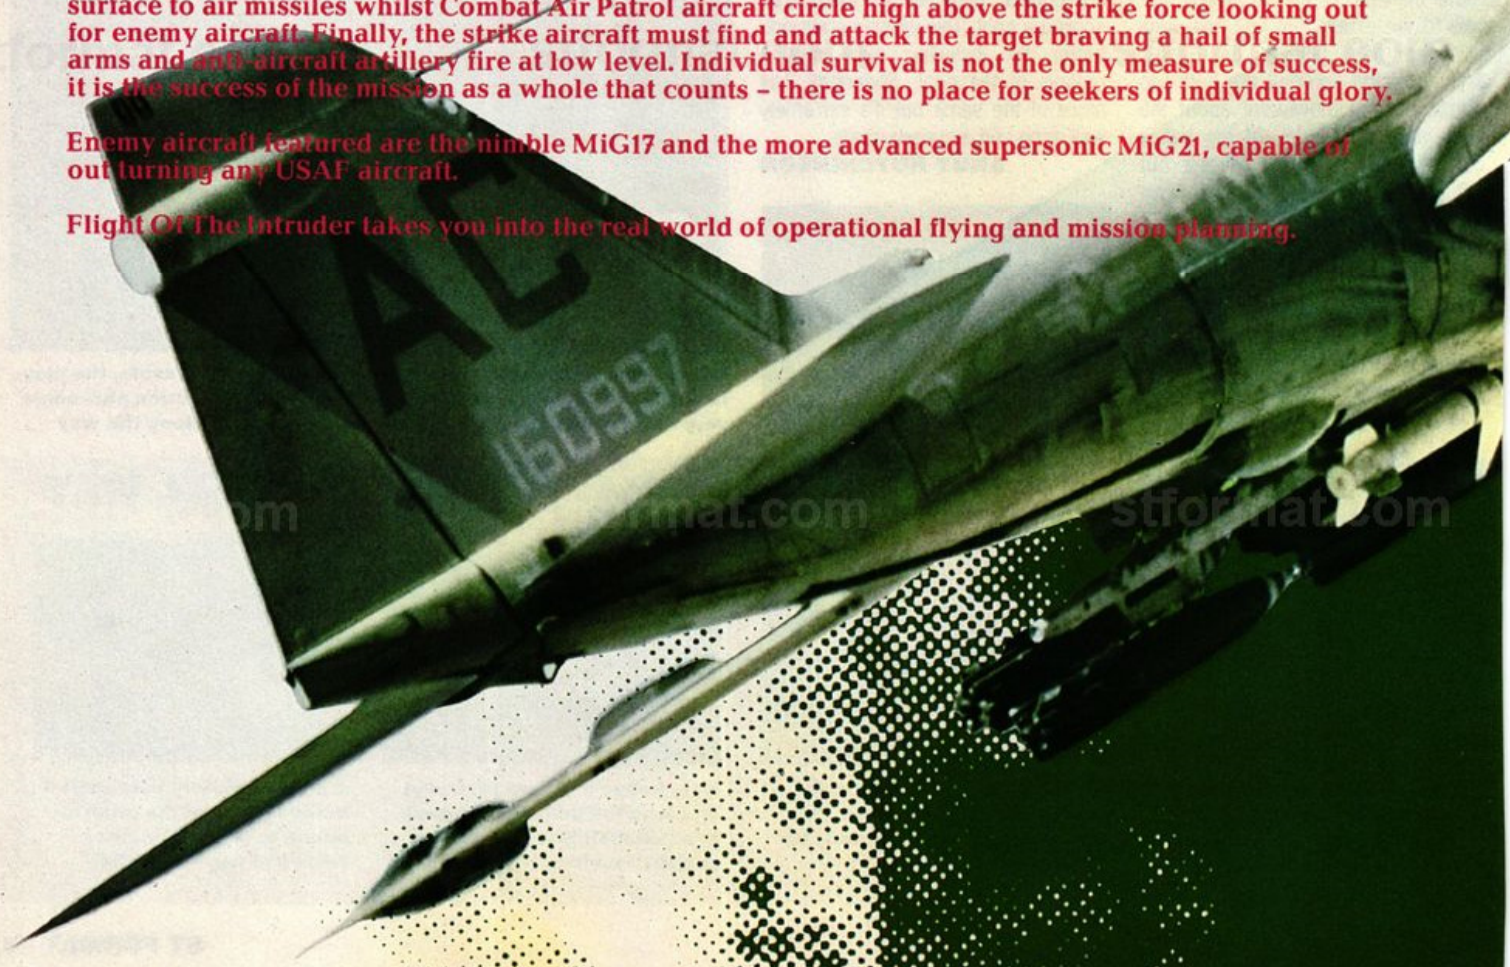

In 1972, the USAF launched Operation Linebacker. US forces and their South Vietnamese allies are locked in a life and death struggle with the fanatical North Vietnamese Army. You must stem the tide of the North Vietnamese offensive by cutting its vital lifeline to its front line troops.

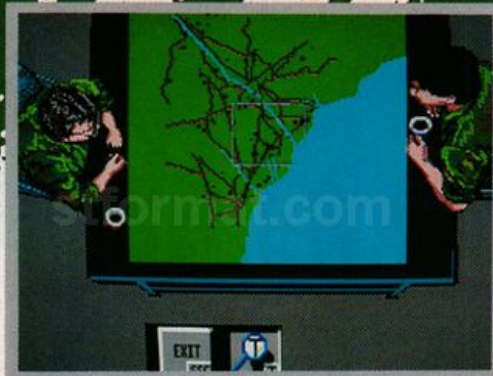

From the US Carriers in the Gulf of Tonkin on "Yankee Station", you must attack a variety of installations defended by surface to air missiles and the MiG fighters of the skillful and determined North Vietnamese Air Force.

Only team work will get you back alive. The "IRON HAND" flights must destroy or suppress the surface to air missiles whilst Combat Air Patrol aircraft circle high above the strike force looking out for enemy aircraft. Finally, the strike aircraft must find and attack the target braving a hail of small arms and anti-aircraft artillery fire at low level. Individual survival is not the only measure of success, it is the success of the mission as a whole that counts - there is no place for seekers of individual glory.

Enemy aircraft featured are the nimble MiG17 and the more advanced supersonic MiG21, capable of out turning any USAF aircraft.

Flight Of The Intruder takes you into the real world of operational flying and mission planning.

FEATURES

Choose between two of the best aircraft that ever flew. The F-4 Phantom is fast, powerful and equipped with highly advanced avionics. It is so flexible that it can perform any type of mission. The A-6 Intruder has the first all weather computer operated weapons guidance system (DIANE) and an outstanding weapons load, both have stood the test of time and are still in service.

- ⊗ Up to 8 friendly and 4 enemy aircraft on screen simultaneously.
- ⊗ 2 different aircraft accurately simulated. 3 different roles: MIGCAP, IRON HAND, or STRIKE.
- ⊗ Realistic mission environment with enemy artificial intelligence.
- ⊗ Switch between friendly aircraft in flight.
- ⊗ Carrier take-off and landing with "MEATBALL" landing aid.
- ⊗ In-flight radio messages with radio message queueing system.
- ⊗ View from all aspects and 14 in cockpit views.
- ⊗ Large numbers of mobile targets including trucks, trains and barges.
- ⊗ Realistic terrain taken from contemporary operations maps including Hanoi, Haiphong and Than Hoa.
- ⊗ Instant "Quickstart" option.

SYSTEM

the shoot 'em up of the nineties.

■ These castoffs from *Bedknobs and Broomsticks* appear if you don't move quickly enough

Big trouble in fantasy land. There's this 'orrible oik called Death-Adder who's squishing people and not even apologising for it. However one day he does the Shake 'n' Vac on your best mate Alex's head. Being a New-Age, caring kind of person, you swear to avenge him. Your quest covers lands peopled with more strange creatures than you'd find at a plastic tie-wrap convention.

Golden Axe is a pure beat-'em-up. You control one of three characters: Axe Battler the Barbarian, Tyrus Flare the Amazon or Gilus Thunderhead the Dwarf. Each warrior has his or her own way of fighting and a special weapon. The Barbarian has a large broadsword, the Amazon a ninja type sword and the Dwarf a large axe. Speeds vary, so that while the Barbarian is very strong he is not as quick as the Amazon.

The game is played over a series of landscapes on the road to Death-Adder's castle, consisting of towns, knackered bridges and chasms. Set battles occur every few yards and there are fantasy motorway cafes for some magical or physical sustenance (like some enchanted sausage rolls).

You can choose simultaneous two player games from the title screen, enabling you to combine two different character types or two of the same. This is recommended because your hit strength is doubled but not the number of your enemies. Occasionally, kicking shifty little goblins up the bum persuades them to drop a magic potion, which you can use on particularly

■ Mind the edge! That chap in the skirt wasn't impressed when I asked him if he had any underwear on

VIRGIN

£24.99

golden axe

vicious opponents; the greater the number of potions, the more powerful the spell you can cast.

Each assailant has his or her own brand of fighting. Tactics range from simple rushing to such subtleties as clumping you with a heavy implement. Some are as thick as Siberian yoghurt, others as hard as Siberian cheese.

EFFECTS

Animation is well executed, with good colour. Each character has a set repertoire of movements, with the

result that fights are fluid encounters rather than static affairs. Sound is well up to par and includes some tasty sampled thuds and screams.

VERDICT

Golden Axe is a tremendously sophisticated game but this sophistication is used to improve gameplay rather than slow it down. The set moves each character carries out look excellent, although they become a bit repetitive eventually. The weighting of the game is well thought out, with the action getting progressively harder the nearer you get to

Death-Adder. Jumping is the main problem with the game: it's just too difficult when you need it most. *Golden Axe* is a fluid beat-'em-up and one of the most playable games of this genre to emerge since *Strider*.

■ On your marks, get set, go! As the starter's flag rises, slam it into first and burn rubber

Racing at insane speeds through inhospitable country has always had the drawback of being extremely dangerous. Now you can risk life and limb from the comfort of your own home with Gremlin's new race-'em-up.

Toyota Celica GT Rally puts you into the driving seat of a high-powered and very expensive rally car. It's a race against the clock: although you compete against other drivers, it's only to beat their time. There's just you, your co-driver and your car on the road.

At first you may not feel up to the full competition, so there's an option to practise in any of three countries, each offering very different driving conditions. As you're racing through the English course, it may well start to rain – but the programmers have very kindly fitted your car with windscreen wipers to clear the appalling downpour.

If you think the weather is bad enough in this country, just wait till you race abroad. In Norway it always snows, and your wipers need to be on overdrive. Take the corners at anything approaching dangerous speeds, and you slide right off the track. You encounter no such road-holding problems in Mexico, but the sandstorms that frequently blow up there render your wipers useless. Driving virtually blind at 140 mph is an experience you won't forget.

Up to four players can take part in the rally proper. You're up against very stiff competition in the guise of 30 computer drivers and at first you're relegated to the bottom of the table, but with practice you soon rise to respectable rankings.

There's a variety of control options. You can drive with joystick

■ As you race through the desert, sandstorms frequently blow up and reduce your vision drastically – but don't let that stop you!

toyota celica GT rally

GREMLIN £24.99

■ Toyota Celica GT Rally boasts realistic touches like the option to switch on your windscreen wipers to clear rain and snow

or mouse, and adjust the sensitivity to suit your own tastes. The clinically insane can even set the steering to reverse, so that whenever you turn left, the car goes right...

EFFECTS

The view is through the windscreen of the car. You also see the steering wheel, which turns as you do, to show how tight the steering is. Being in a rally car, you're the only one on the track, but there's plenty of roadside scenery to keep up the sense of movement, and the outside world lurches convincingly as you sweep round corners. The update isn't at breakneck speed, but it is fast enough to keep your buttocks firmly clenched.

Graphics change with the climes: the English countryside has lots of greenery, the harsh desert of Mexico is strewn with wind-swept rocks, and in chilly Sweden the evergreens are covered with a thick blanket of snow.

The car's engine sounds like an ageing Datsun Violet on a bad day, but it changes pitch convincingly with gear shifts and acceleration. The best use of sound is the digitised voice of your co-driver: "Hard left, then right," he calls out far too calmly as you slide round the bends at high speed.

VERDICT

Toyota Celica GT Rally is a deeply atmospheric game. While it's not superfast, the feel is excellent, and you can't help holding on for dear life as you thunder round the track. Touches like the windscreen wipers and the co-driver reinforce the impression of being there. If you can't afford the 80 grand or so it costs for a rally car, this is the next best thing, possibly.

MORE TROUBLES THAN YOU CAN SHAKE A STICK AT

■ Study the course before racing and tell your co-driver what to say when you approach those 90° bends

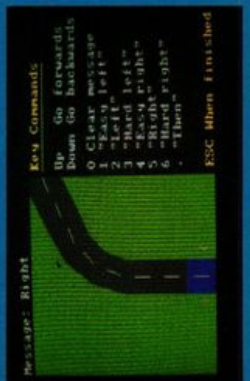

■ Disaster! Straight into a brick wall and bang goes your windscreen. Where's the AA when you need them?

■ Hardly past the starting flag and the rain starts up! Switch on the wipers and keep an eye on the road ahead

■ At last! The finishing posts are in view. Just don't lose it now!

■ Not blocking yourself into the void as you move the blocks, that's the problem with this level – that and the fact that most of those squares don't budge

■ Those blocks with the wavy lines on them are one way only. Solving this particular screen requires a good deal more thought than you'd... er, think

Being an ancient Egyptian is never a barrel of laughs – all that lugging great big blocks of stone around for the Pharaoh's new rockery, I don't know. However, if an irate god decides you've committed one blasphemy too many and turns you into a scarab beetle, then it's safe to say you're not having a very good eon. In *The Curse of Ra* you are said beetle, and the god in question sets you a series of puzzles to complete before being changed back into a human.

Your objective is to solve 60 riddle ridden screens. The puzzles take the form of a series of blocks arranged in set patterns. These blocks may either have an Egyptian hieroglyphic on them or be plain stone. To complete a screen you must eliminate all the matching blocks by moving them into a horizontal or a vertical line somewhere on the screen.

You beetle around on the blocks. You can't step onto the background, but you do have a Ra stone at your disposal on which you can travel around the screen. Some other blocks can also be moved around, but the only way of finding out which is a process of trial and error.

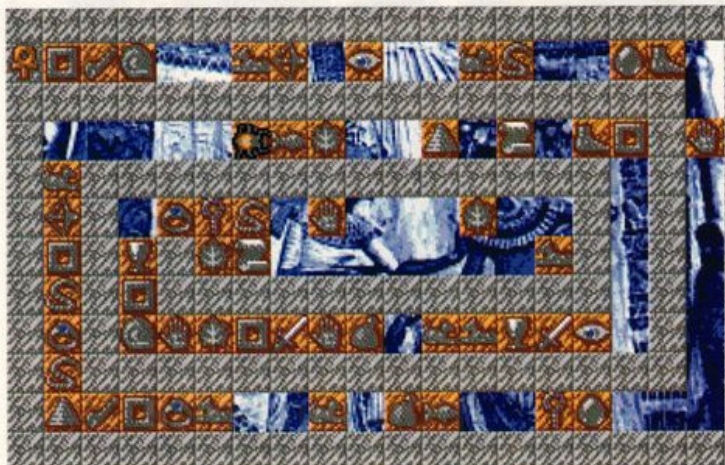

■ The arcade game includes some nasty pitfalls for the unwary – not least of which is the clock ticking away in the corner

RAINBOW ARTS

the curse of ra

£19.99

■ This spiral screen presents quite a few problems, not least of which is the sheer amount of time involved in matching the blocks

Screens may also contain transporter, dissolving and one way blocks. Remove all the key blocks and you must still return to the Ra square for a password for that level.

There are two game modes, a logic game and an arcade game: in the latter there's a countdown and you can fall off the edge of the blocks into the void. *Ra* also includes an editor, enabling you to create your own mindbending puzzles.

EFFECTS

Graphically *Curse of Ra* is detailed and attractive. The blocks are clear (an essential requirement, this: if you can't see the blocks, how do you move them?) and they're sufficiently different to make spotting the right one easy. The excellent backdrops seem to be digitised images of

authentic Egyptian stonework. Spot effects are kept to a minimum so as not to intrude on gameplay, and all the sound effects are sampled.

VERDICT

Puzzle fans will thoroughly enjoy *The Curse of Ra*. Attention to detail is excellent and there are no niggling faults to interrupt gameplay. Long term interest is assured, thanks to the level editor and the password system. If you want a game that demands something more from you than good reflexes, then *Ra* should easily do the job.

DON'T CURSE RA

■ You've got to whittle away all those blocks by lining up the pairs. Those two egg shaped ones are already in a line, so...

Move over to one, press Fire, then move the cursor down to the other and...

They're gone! Those cats are next, so the problem is how do you line them up?

Easy really. Move the top cat (Hey, Officer Dibble) up and the one at bottom left along. Two are now in line, so we can eliminate them...

That leaves just two cats to deal with. Move one icon up, zap the cursor across and they're Kattomeat!

Back to the Ra square and that's the level completed!

■ Platforms, colourful graphics, childish enemies and heaps of bonuses: yet another cutesy game wheels its way onto the ST. This is like a day out with the Dukes of Hazzard!

0000050

5-1.02

CORE DESIGN £19.99

car-vup

Borgus the Grim has gone and transformed cartoon land into a bad place. It seems he didn't much like the idea of peace, tranquillity and merry melodies. He especially didn't go a bundle on Carl, a jolly little car with more than a passing resemblance to that classic movie star Beetle, Herbie. In an attempt to make cartoon land a more normal place to live, he's gone and trapped all your best mates and turned all the healthy

■ More extra bonuses than you could shake a stick at. Follow them round the level and pick them up to convert little Carl into a seriously souped-up car

good areas bad. Your job is to rescue your friends and turn cartoon land back to sickly sweetness and light (surprise, surprise).

Each of the eight levels is arranged as a series of platforms, and in a bid to restore good to the land you must direct Carl over every platform in sight. As you move over the platforms they change colour to indicate that you've been that way before. Only when all the platforms have changed colour can you advance onto the next level.

Unfortunately, Carl has this nervous affliction which means he can't simply fall off the end of a platform. Instead, you need to jump either

across to the next platform or down to the ground. This makes it tricky gaining access to some of the platforms just out of reach.

EFFECTS

Throw a smart bomb and Carl grins like he's burning acid not petrol. Turn wildly and his expression changes so he looks like he's had a potato rammed up his exhaust pipe. Reach the end of a level and he looks like someone's tickling his big end. Bright colours and a range of animated sprites combine to make the game enormous fun to watch. In addition, comic animated sequences introduce each level.

Complementing the visuals are simple spot effects and sound chip music. The spot effects comprise a droning car rattle and the occasional sound of a helicopter which carries your car from one level to another.

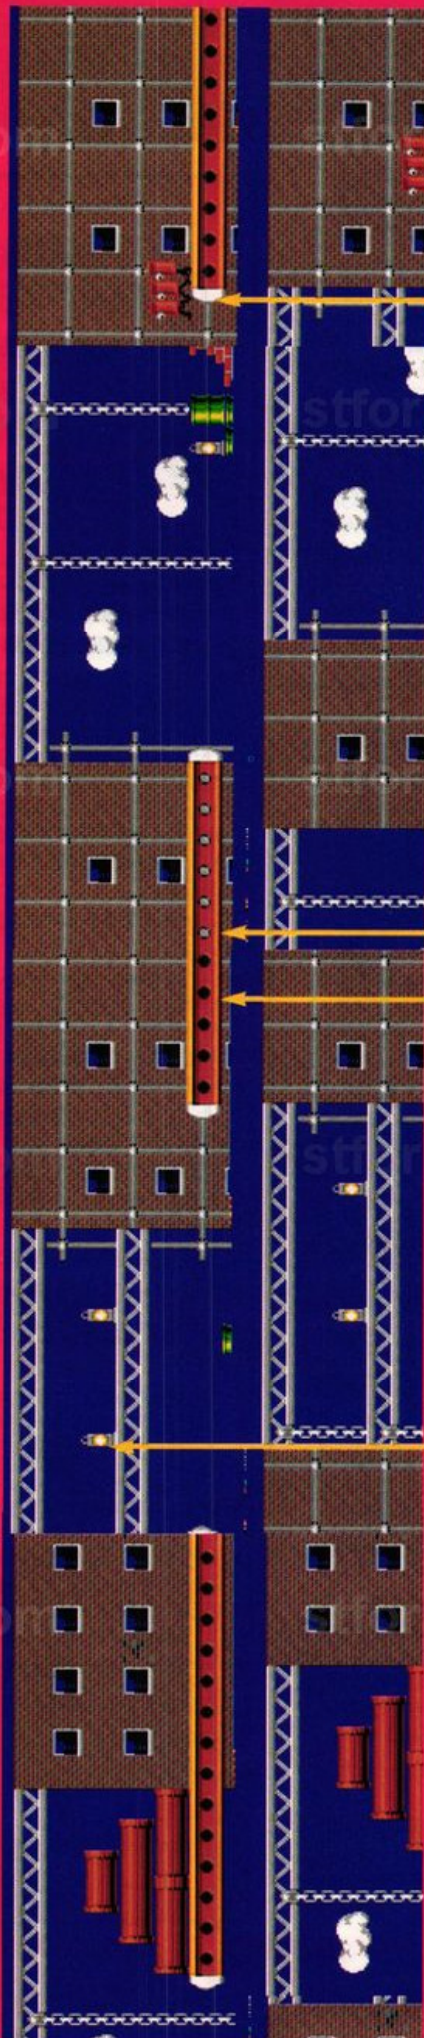

VERDICT

Yes, it's a cutesy platform game. Yes, they've been done to death recently. And yes, there's really nothing about Car-Vup which makes it any better than something like *Rainbow Islands*. But if you're a cutesy game convert, you're going to fall for this one in a pretty big way. The game style may be hackneyed but Car-Vup is still eminently playable and outstandingly absorbing.

POOLSWINNER II

THE ULTIMATE POOLS PREDICTION PROGRAM

- **MASSIVE DATABASE** Poolswinner is a sophisticated Pools prediction aid. It comes complete with the largest database available - 22000 matches over 10 years.
- **PREDICTS** Not just SCOREDRAWS, but NO-SCORES, AWAYS and HOMES too. Predictions are based on many factors ... recent form, the massive database, current league standing, goal scoring rates, and draw averages (each factor is independently switchable by the user).
- **SUCCESSFUL** Selec guarantee that Poolswinner performs significantly better than chance.
- **LEAGUE AND NON-LEAGUE** matches are covered.
- **FULL LEAGUE TABLES** are automatically generated as results are entered.
- **FULL PRINTER SUPPORT**
- **AUTOMATIC FIXTURE GENERATION** : Fixtures for English and Scottish League matches are generated automatically by Poolswinner's sister program FIXGEN.

FIXGEN 1990/91

- No need to struggle for hours to get the fixture list into the computer - just type in the date, Fixgen contains the complete fixture list for the whole year's league soccer. (Published under licence from the Football League, and the Scottish Football League).

£26.50
Poolswinner
with Fixgen.

COURSEWINNER v3

THE PUNTERS COMPUTER PROGRAM

- The ORIGINAL, and still the BEST computer punter's aid.
- Coursewinner V3 uses all the most important form pointers (past form, speed ratings, prize money, course statistics, jockey form, trainer form etc) to give a detailed assessment of every runner's chances, not just a tip.
- Vital statistics of all British courses (Draw advantage, Top Trainers and Jockeys etc) are included in the database.
- Includes both FLAT and NATIONAL HUNT versions.
- Full Printer support

gremlins 2

ELITE £19.99

■ So you think Gizmo (left) is cute? Bwah-ha-ha! (etc)

■ In the lab there's a large blue and yellow surprise waiting for you behind the filing cabinets – and it's not a gruyere cheese

■ One hopelessly untrendy Gremlin has discovered the joys of the pogo stick. Next thing you know it'll be space hoppers!

■ This greengrocer Gremlin has a never-ending supply of really disgustingly over-ripe fruit to lob at you, fresh off his barrah

■ If you get into trouble, Gizmo might be on hand to rescue you – with a flash-light. Gremlins hate 'em

■ Sexygirl and Gruyere team up. Watch out for those deadly kisses she's blowing your way – they won't just make you blush!

■ The Gremlins are back. This time the little buggers have got their claws on some genetic liquids and they're mutating into some very strange creatures. It's enough to put you off teddy bears for life! Can you defeat the mayhem-makers or will Gizmo's sprouting back prove to be more than you can handle?

Once upon a time, director Joe Dante made an unassuming little film called *Gremlins*. The extreme black humour which pervaded the film made it a runaway success, appealing to all ages. Unsurprisingly, Hollywood cash registers started quivering with anticipation of a sequel. *Gremlins 2* takes off where *Gizmo* and the crew left off and the game of the film closely follows the film's plot.

The main action takes place in a huge skyscraper which contains shops, restaurants, apartments, a cable TV network and all manner of companies. Near the top of the building is a genetic laboratory called "Splice of Life." *Gizmo* is taken here when his old Chinese owner snuffs it under velly suspicious circumstances. The human stars of *Gremlins* work in the same skyscraper and thus the old team is fortuitously reassembled for a little collective mayhem.

Gremlins 2 is a simple flip-screen beat-'em-up. You control Billy, the human star of the film, who must destroy all the smelly, rotten Gremlins who've taken over the skyscraper. You do this by assembling a nifty piece of apparatus which shines sunlight on all the Gremlins at once (and Gremlins hate light). Initially your

"George drops cigar ash on you and Sexygirl blows deadly kisses"

weapon is a torch but along the way you can pick up fruit, frisbees and three-way torches. Occasionally *Gizmo* appears and gives you a power-up, though sometimes these weapons are more of a hindrance than a help.

Each of the main Gremlins from the film appears in the game. These include Daffy, Mohawk, Electric, George, Sexygirl, Lenny, Pogo and Skateboard. Each has its own way of attacking you. For example Daffy rolls up into a

ball and hurls himself along the floor, George drops cigar ash on you and Sexygirl blows deadly kisses.

EFFECTS

Initially *Gremlins 2* looks promising. A well-drawn piccy of *Gizmo* peering out of a drawer on the title screen is certainly an attention-grabber. When you get into the game itself the sprites are colourful, well drawn and smoothly animated. The backdrops are bright, and smooth scrolling isn't a problem because of the flip-screen gameplay. Sound includes some clear spot samples.

VERDICT

While *Gremlins 2* won't win any prizes for originality, children will love the theme and it won't get completed in two days. The game is hard; to complete a level you need to know where and when one of the Gremlins is going to pop up out of the scenery. It's nothing special but quite appealing nonetheless.

■ Cute? Lovable? Furry? I suspect the Trading Standards Office may want to look into this

For a marriage of two "sure things" you'll never get a better bride and groom than a car chase in a post-apocalyptic landscape. Mad Max sealed the future over ten years ago and it's been pretty much gospel ever since. *Badlands* is Grand Prix Mad Max watched from a vulture's-eye view.

Or should that be *Super Sprint* on acid? Domark's latest racetrack coin-op conversion is programmed by the same gents at Teque and it shows – the aerial view, the bridges you scoot over and under – but now that civilisation is 50 years past its sell-by date the potential for anarchic tomfoolery is limitless.

What we've got here are eight courses built on a barren plot called

■ This is The Oil Refinery, you're the red car, and over there is one of the golden spanners you're meant to pick up. Watch out for the slippery bits!

badlands

DOMARK £24.99

the Badlands (oil refineries, prisons, volcanoes). Rubble litters the track, as do fallen power lines and oil slicks, and grates in the walls slide open and shut, tempting you to test your metal and slip through them before they lock their jaws on your automotive trunk.

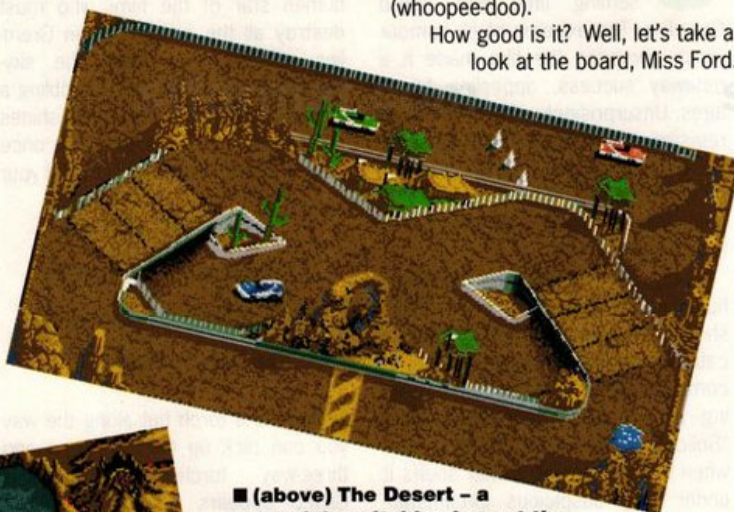

Oh yes, and you'd better not forget your two driving opponents, of course: even as we speak, they have their on-board missiles homed in on your exhaust pipe and are just about to pull the trigger.

The name of the game is to win each two-lap race in the meanest possible manner and pick up any spanners you see lying about the track. In this way you progress to the next contest and get to pop into "le shop" where you can stock up on armaments (to shoot back

with), wheels, shields, you name it. Some pretty substantial artillery can be also found if you blast away merrily at the scenery (although you probably knew that already).

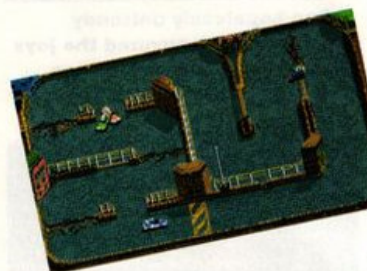

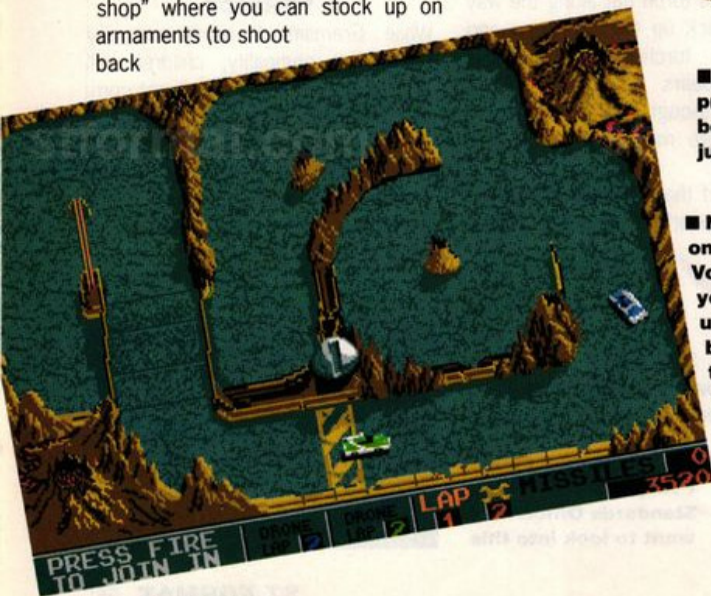

The tracks get progressively harder (of course), you can play against your chum (of course) and we've rather kindly been given two methods of joystick control (whoopee-doo).

How good is it? Well, let's take a look at the board, Miss Ford.

■ (above) The Desert – a pretty inhospitable place at the best of times, you might suppose, but just look at those spikes in the road!

■ Now we're on top of The Volcano and you're hiding under that bridge in the bottom left-hand corner

■ By all means pass through the gaps in the walls – but don't be surprised if they squash in on you (though at least a helicopter comes to replace your car)

VERDICT

I much prefer looking down on a track to sitting behind some steering wheel, somersaulting towards some ubiquitous mountain range that never greets me – it's the difference between a 2D game and a 3D one. *Badlands* may not be trying to be real, but because of this it's far less constricted in game terms. You know how far through the race you are, what position you're in and exactly what you need to do to win. A few more tracks would be nice, and the difficulty level does whizz up a bit disproportionately when you get into it, but I'm a bit partial to Scalextric with knobs on and this'll do me fine.

ANDY IDI

EFFECTS

This type of game doesn't lend itself to amazing FX innovation, so it would be easy to knock Domark for being primitive. But what they've done they've done well. Though the sprites are pretty small, the overhead view makes for some nice "Matchbox car" graphics, the courses are just the right size and your car grips and glides its way round corners pretty realistically. Oh, and the sound effects do their job too.

The latest epic from Infogrames has you doing a lot of bouncing, directing your little craft around a multi-room 3D environment where the only way to get from one room to the next is via doorways in the wall. Unfortunately, these doors are seldom at floor level, so you have to head for the coloured tiles. These tiles act like trampolines, bouncing you high into the air – and giving you enough altitude to head for the next, higher tile and eventually the doorway.

Altitude is the key. This means you need to hone your jumping skills to perfection. Leaping from tile to tile needs good timing and steady

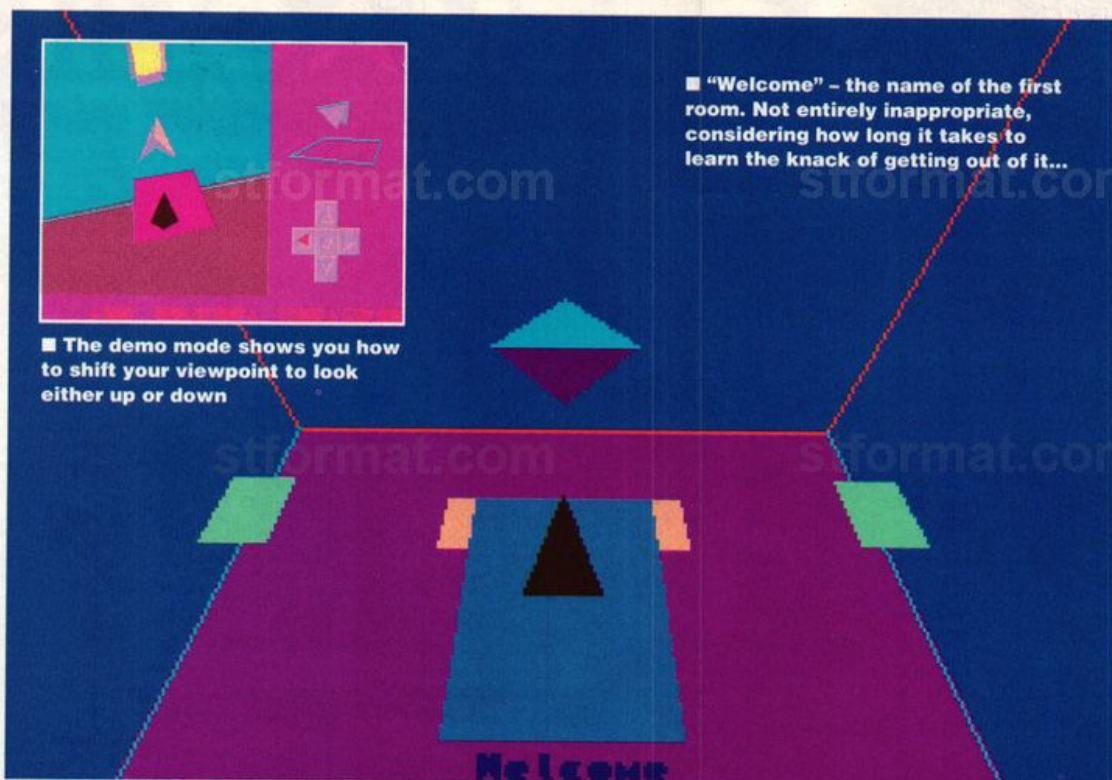

■ The map of the Alpha Waves complex clearly shows you the colour-coded "mood" areas

nerves. Miss a tile, and a stomach-churning plunge to the floor below ensues, followed by the long plod in search of another tile to get you started again. When you do at last reach an exit, there's a nice little Jean-Michel-Jarre-style jingle as a rewarding pat on the back.

All the rooms in the game are different. Some contain irritating little beasties that knock you off course, others contain crackling laser bolts that can fling you high into the air. One room has a hurricane which completely knackers your control. I don't like that one.

Other rooms have rather clever little puzzles. One in particular is called "Seven Chances," and the only exit is high in the opposite wall – with no tiles to bounce you up there. However, there are seven balloons. Bounce onto one of the balloons, burst it and you are carried high into the air. For a few seconds you have enough altitude to aim for the exit.

■ The demo mode shows you how to shift your viewpoint to look either up or down

■ "Welcome" – the name of the first room. Not entirely inappropriate, considering how long it takes to learn the knack of getting out of it...

INFOGRAMES £24.99

alpha waves

Miss, and you plunge to the floor to try again. This time, of course, there are only six balloons left. See?

Infogrames describe Alpha Waves as "a completely New Age experience where the pleasure of play blends with feeling and dream." When you choose to play it as a game, it's a simple case of collecting every single light crystal in the complex – 256 rooms in all. As if that's not enough there's also a time limit which is extended by one minute each time you exit a room and a further minute with every 10,000 points.

Alternatively, you can play Alpha Waves purely to generate a particular state of mind. In this ("Emotion")

■ The simultaneous two-player mode – it's entertaining, but the graphics slow to a snail's pace

mode, the scoring goes out the window, and you can take all the time you want exploring Infogrames' "virtual" universe. At the start of play you select the mood you wish to generate in yourself and you're then plonked down in a particular zone of the complex, which is colour-coded for that mood. The zones are the same in the game option, but adrenaline-soaked arcade nutters are going to be less receptive to subtleties like that.

EFFECTS

The 3D graphics don't impress particularly: the overall effect's reminiscent of an anorexic Driller. They do move quite fast, however, and their speed makes the game very, very playable. And the 3D effect works well enough so that the higher you go, the more worrying the drop – don't play this game if you suffer from vertigo!

The version of the game we saw was an early one with no soundtrack. In-game effects are limited to wall-bumping *thuds*, tile-bouncing *boings* and that synthesised jingle when you leave a room. Let's face it, what else do you need?

VERDICT

Alpha Waves is weird enough to have you reading the manual three times over, but once you get past all the guff about "New Age experiences" you find yourself playing a rather excellent 3D arcade/exploration game with puzzles requiring both physical and mental dexterity. You have a huge world to explore, and one that can be navigated either as an arcade game or, according to Infogrames, an exercise in mind-alteration. Alpha Waves is more than good enough without the hocus pocus. Huge and mesmerising, it'll have you hooked within minutes.

INFOGRAMMES

murders in space

£24.99

There's a crim on board the orbital space station Pegasus – what's more, a crim with a penchant for murder. Someone tries to knock off the station commander and he isn't too chuffed about it. He makes a secret transmission to earth, and as a result you are sent to sort out the mess, under the cover of Dick Anderson. However, you've got only 24 hours to find out who the murderer is before your shuttle returns to earth. Can you catch the villain or is there going to be a severe bout of stiffs in space?

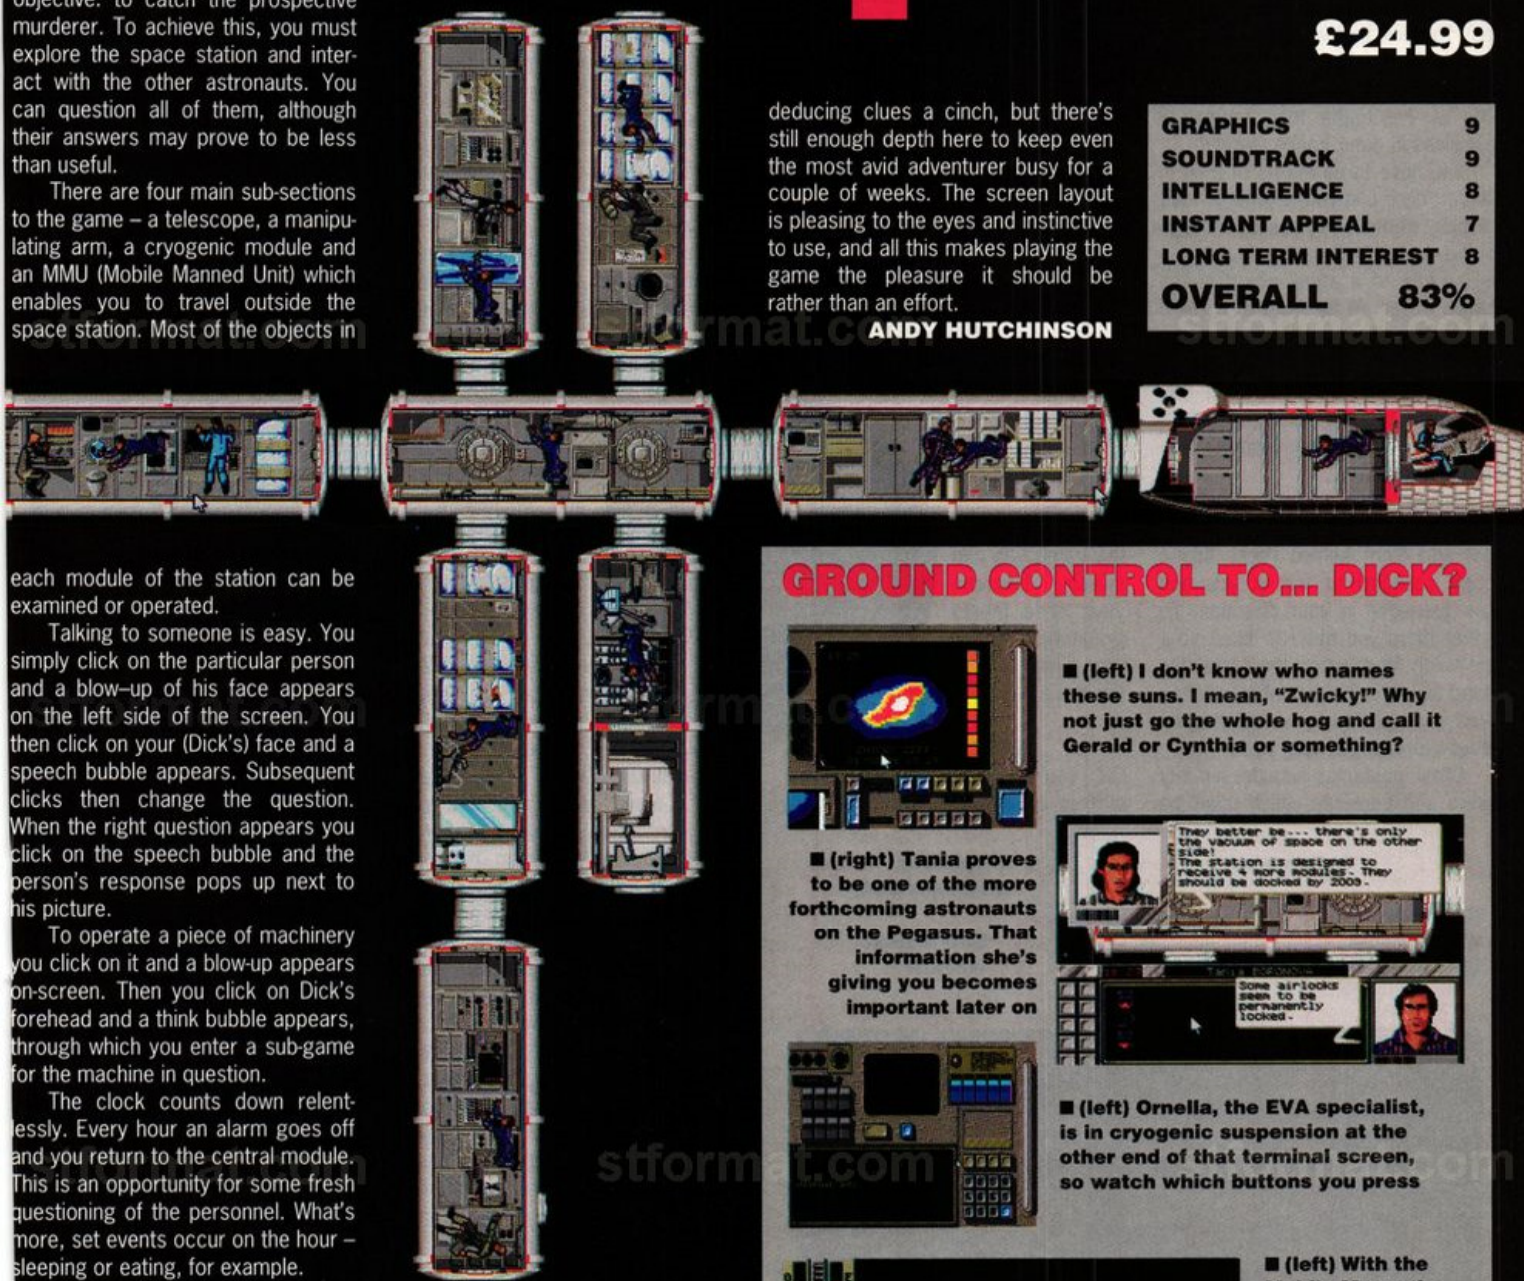

Murders in Space is a graphic adventure cum whodunnit. Your objective: to catch the prospective murderer. To achieve this, you must explore the space station and interact with the other astronauts. You can question all of them, although their answers may prove to be less than useful.

There are four main sub-sections to the game – a telescope, a manipulating arm, a cryogenic module and an MMU (Mobile Manned Unit) which enables you to travel outside the space station. Most of the objects in

deducing clues a cinch, but there's still enough depth here to keep even the most avid adventurer busy for a couple of weeks. The screen layout is pleasing to the eyes and instinctive to use, and all this makes playing the game the pleasure it should be rather than an effort.

each module of the station can be examined or operated.

Talking to someone is easy. You simply click on the particular person and a blow-up of his face appears on the left side of the screen. You then click on your (Dick's) face and a speech bubble appears. Subsequent clicks then change the question. When the right question appears you click on the speech bubble and the person's response pops up next to his picture.

To operate a piece of machinery you click on it and a blow-up appears on-screen. Then you click on Dick's forehead and a think bubble appears, through which you enter a sub-game for the machine in question.

The clock counts down relentlessly. Every hour an alarm goes off and you return to the central module. This is an opportunity for some fresh questioning of the personnel. What's more, set events occur on the hour – sleeping or eating, for example.

EFFECTS

The graphics in *Murders in Space* are excellent. They are all very bright and the attention to detail is superb. The animation of Dick is smooth and seamless, but then he's the only one you ever see moving so it's not such a great feat. Sound is well up to Infogrames' high standard. The title

music and in-game sampled effects are clear and functional.

VERDICT

The acid test of any graphic adventure is whether you want to solve it or not. The answer in *Murders in Space* is yes. The simple organisation of icons and instruments makes

GROUND CONTROL TO... DICK?

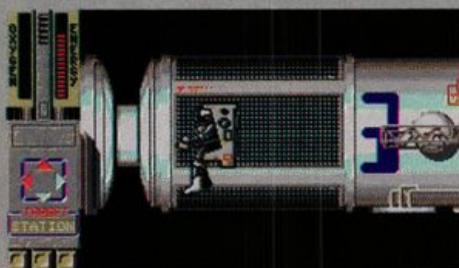

■ (right) Tania proves to be one of the more forthcoming astronauts on the Pegasus. That information she's giving you becomes important later on

■ (left) I don't know who names these suns. I mean, "Zwicky!" Why not just go the whole hog and call it Gerald or Cynthia or something?

■ (left) Ornella, the EVA specialist, is in cryogenic suspension at the other end of that terminal screen, so watch which buttons you press

■ (left) With the Mobile Manned Unit you can travel outside the station – and even take things out with you, which proves very useful at about six o'clock. (Wonder what happens then...?)

DINAMIC £24.99

narco police

Yes, it's a Dinamic game; yes, it's a shoot-'em-up; no, it's not another platform game. Up until now Dinamic's reputation has rested on their two Moves games – *Army* and *Navy Moves* – and a couple of other easily forgettable shoot-'em-ups. Take a glance at the screenshots on this page and it's easy to think they've turned the corner. Massive sprites, loads of bullets and a human face to point your missiles at. Far better than zapping a few aliens in outer space, surely?

You have three teams of men in *Narco Police* and your task is to lead as many of them as possible through to the operations centre located in the middle of a small island in the Pacific ocean. At the start of a game you decide the weaponry to carry and the point at which your troops land on the island. After that, you then need to race through endless ribbons of corridors towards the operations centre.

As you race through the corridors, legions of men leap out of the roof and from behind rocks (it's a rough corridor) to fire at you and toss grenades in your direction. To defeat them you need to blast your gun wildly and watch the blood fly. Stand still, fire the gun while rotating it left and right and you can get just about everything in your path.

Other obstacles include security lasers and cameras which must be

■ Before the game begins you visit the shop to decide the weaponry you want to take with each of your three teams. The parachute isn't needed until much later in the game, so you needn't bother buying it until you're more experienced

blasted using pointed ammo. During your travels you also come up against protective steel doors or men behind sandbags hurling bombs at you. In both instances, a missile comes in handy – but did you remember to bring one with you?

At any point in the game you can switch between your three teams, gradually working your men through the maze of corridors.

EFFECTS

OK, you'd love to rip off all your clothes, pour baby oil over your puny

arms and race round Milton Keynes in *Rambo-cum-Who's Talking?* style. Sadly you're still going to be disappointed with *Narco Police*.

The animation in the game is virtually non-existent. True, the action sprites are huge and expertly drawn, but there's where the problem begins. Because they're so big you expect them to be properly animated, but with only three frames of animation used in the walking, the characters limp along unconvincingly. Detailed sprites show the character firing his gun but again there's no animation in between the separate frames.

Sound effects are extremely effective, though very repetitive. The rat-tat-tat of sampled gunfire makes you feel like you're taking part in Vietnam – though after a while it begins to sound like you're in a medieval dungeon undergoing some fiendish Spanish Inquisition sort of torture or brainwashing.

VERDICT

Granted, the plot is likely to give the indomitable(?) Mrs Whitehouse a heart attack – praise indeed – but the action doesn't keep up with what the game's trying to do. Make a move left or right and you need to endure a ridiculously frustrating delay before the action responds to your movements. This makes a game almost unbearable to play and I vote it should be made a capital offence for games programmers, punishable by guillotine. The prods in the graphics department don't aid this situation much, making the game look very jerky and drawing still more attention to the poor response. If you just can't resist human torture on a genocide scale then *Narco Police* satifies. If you like some playability in your games then there's plenty of other titles to choose from.

NEXT STOP, THE GULF

■ You're quietly wandering through the corridors when a gang of guerillas tumbles out of the roof. Could it be...? Yes, it's the Heseltine brigade storming No. 10!

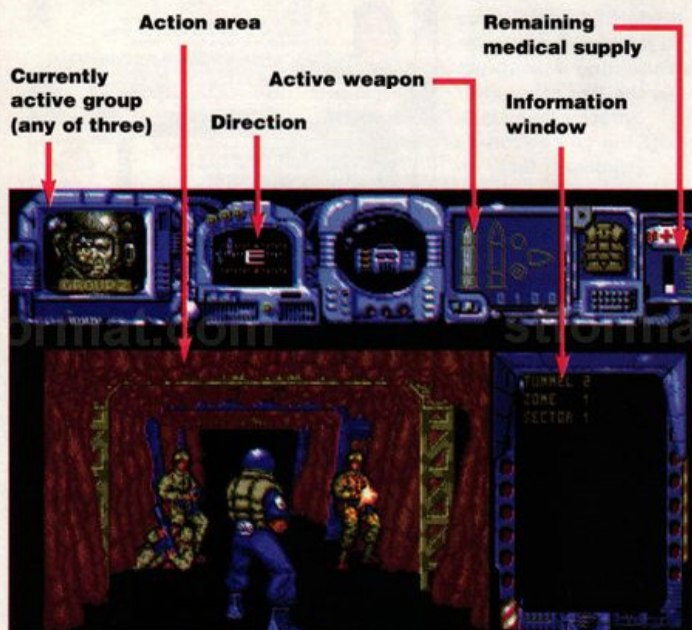

■ Give 'em hell! Just try to imagine you're up to your armpits in swampwater and grip the Fire button, rotating left and right to dish out some mega mayhem

■ Got 'im straight in the gut. Just look at that blood fly! Now give the others some grief before they get you

■ Whoops, too late! You should have moved to the left and taken shelter in the rocks. Guerilla warfare has its inevitable casualties

■ The Territorial army showing off their new range of body-hugging, environment-friendly Gulf-wear. You got it – *Narco Police* is yet another shoot-'em-up out of the Dinamic stable

Chip's collecting chips – microchips, that is. So what's the challenge? The challenge is, he's got to find his way through 150 levels of mazes, puzzles and traps to do it. Neil Jackson asks whether *Chip's* has got what it takes

chip's

■ Don't be fooled by the unexciting console-style graphics in *Chip's Challenge*: it's gameplay that makes games and that's exactly what this one's got, in abundance! It's a real chip off the old block

Chip's Challenge is a puzzle game featuring a young lad (named Chip – hence, I suppose, the title) with a quest on his hands. To prevent himself being labelled a dweeb, he must complete 150 levels of night-marish brainteasers designed for him by the girl of his dreams. If he does it, she'll reward him beyond his wildest dreams: she'll get him in the computer club and he can go glory-basking. (Then again, if those are the wildest dreams he can manage, maybe he is a dweeb...)

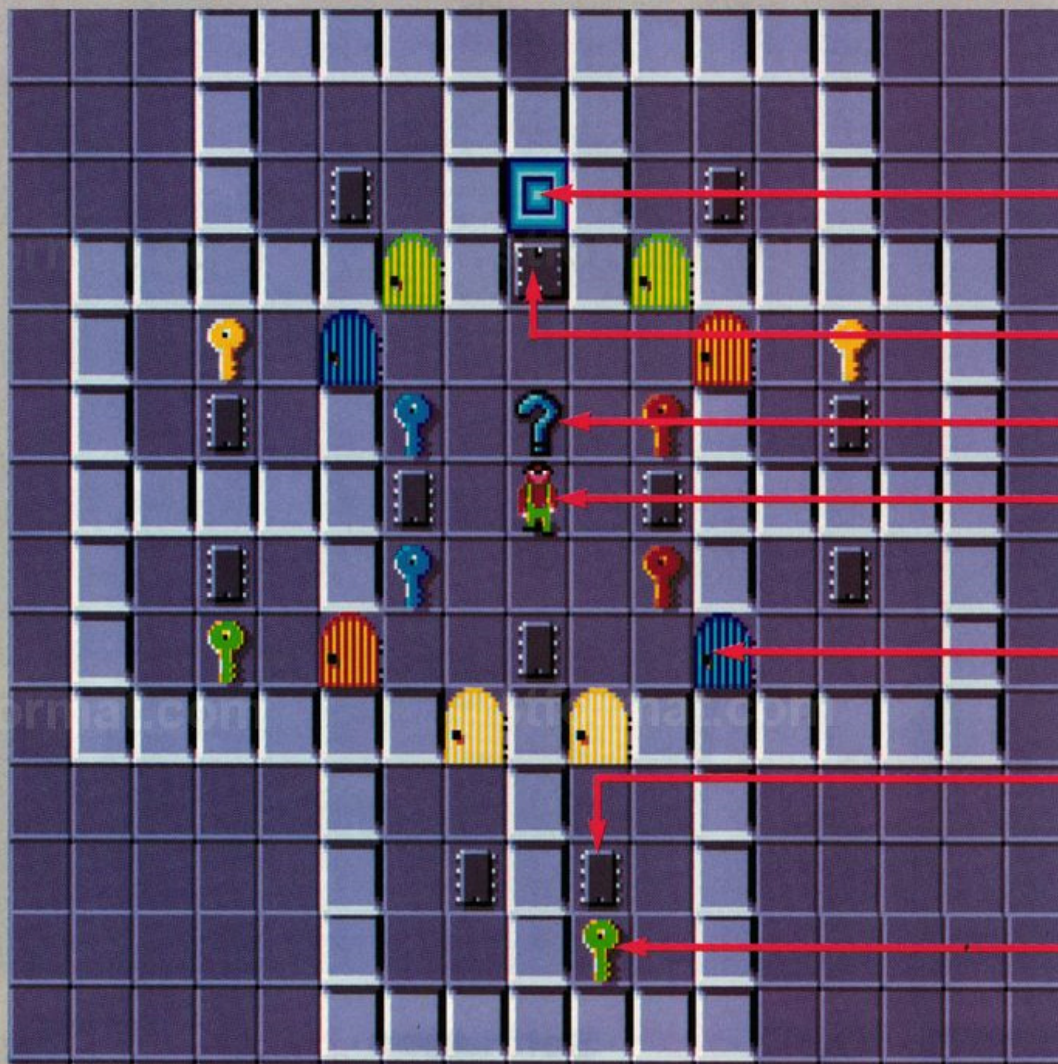

You control Chip by joystick and must guide him through the mazes, puzzles and traps, collecting micro-

chips on the way. Each level has the same basic rules: you must collect all available chips (which ones they are is indicated at the beginning); you must tackle tricks in the right order to avoid getting trapped; and at the end of the countdown you've had your chips (groan!).

There are plenty of distractions to make life difficult. All kinds of monsters inhabit the levels – some dozy, some dynamic, but all deadly. They all have predictable patterns and there's a straightforward (but not necessarily easy) way of defeating them all. Some require the use of tools that you find on the way, others

"Incredibly addictive – and it takes lots of brainpower to beat"

THE KEY TO THE PROBLEM, OR A PROBLEM WITH KEYS (AND DOORS)?

■ The start level gets you acquainted with the basic concepts you use all the way through the next 149 levels

Exit: Enter this to get to the next level – but remember to check your access code

Exit Door: You can't get through here until all the chips are down

Help: Stand on this square for some useful info or cryptic hints

Chip: Our hero, your protégé. If you think he looks a little forlorn now, just wait till you try getting him to level two!

Doors: You can't get through without the correct key

Chips: The main objective. Collect all of these and you can get through the exit door

Keys: They're colour coded to the doors they open – and they disappear after one use

challenge

US GOLD £19.99

"All kinds of monsters inhabit the game's 150 levels – some dozy, some dynamic, but all deadly"

need a murder-by-proxy method and some can be guided to their own suicide if you're smart enough.

Complete each level by grabbing all the chips and heading for the exit and you're given a score increase and maybe a time bonus. On the next level you get a four-letter code you can use to bypass earlier levels if you reboot. Then there's more of the same – but put together in a totally different, more difficult way.

EFFECTS

Chip's Challenge is not going to win any prizes for classy graphics, rip-roaring sound or stunning programming. It looks like an 8-bit game or something you'd find on a console. But though the lack of ST-style graphics is a sad omission, it doesn't detract from the game too much except when there are huge num-

bers of baddies to update. Then the screen scroll and Chip's movement noticeably chug along.

VERDICT

Despite its dated look, *Chip's Challenge* is a success. It's incredibly addictive, requires lots of brainpower to beat, and is extremely difficult to put down. Every defeat is a major personal disaster, but you always think you have the solution – and in this way *Chip's Challenge* sucks you in to endless playing sessions. Dinners mount up outside your door, Christmas comes and goes, and your New Year's Resolution is to finish level 150 or die in the attempt. A fantastic, fun-for-all-the-family game which no serious puzzle addict can afford to miss.

SLIP, SPLASH, SIZZLE AND SLIDE WITH CHIP

■ Level two introduces you to some of the fun elements that help or hinder your progress through future levels

Ice boots: Collect these to enable you to walk on the ice without slipping

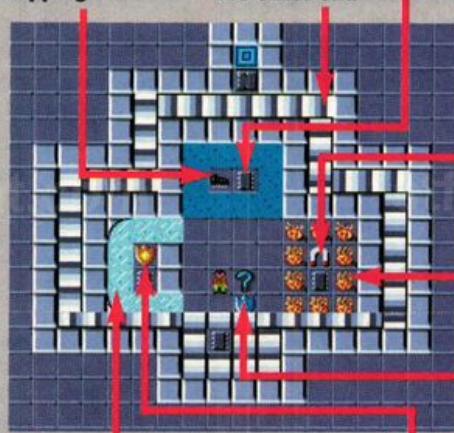

Conveyor: Stand on this moving floor and you get shuffled along effortlessly to the other end

Water: Unlike Paul Gascoigne, Chip can't walk on water. Don't go near it!

Magnet: Pick this up so you can stick to the floor of the conveyor without getting dragged

Fire: Obvious, this! Don't touch unless you have asbestos fingers

Water Shield: Use this to give Chip protection against rising damp and wet patches

Ice: Stand on here and you skate all the way along the path to the normal square at the end

Fire Shield: The equivalent of oven gloves. Use this to fool the fire

TIMEBOMBS, TELEPORTERS, TANKS, TERRORS, TOOLS AND THIEVES

■ All of the levels feature some (or all!) of these monsters and often a generous helping of useful gadgets to make life interesting. All the nasties that move usually follow some kind of pattern, so it's good strategy to

observe them for a while before you endanger your life by getting in their way. Beware of the tools too – some may help in the short term but in the long run actually make life harder by freeing more enemies.

Shark: Follows a straight path across the floor, but turns left when the way ahead is blocked. Deadly!

Mouth: Tries to get to you by the shortest route possible. You can trap him with a wall if you get around it fast enough. Deadly!

X-monster: Travels along narrow corridors after you. Outrun him and double back behind a wall to trap him. Deadly!

Clone: Like the Shark, you can block him and he diverts. You can send him to his death if you use water wisely. Deadly!

Thief: Stand on his square and you lose all the tools you've collected, so don't enter until you've used them all. Annoying, but harmless!

Blue Ball: Travels backwards and forwards in straight lines, bouncing off the walls. Use it to set off switches. Deadly!

Chip Bug: Runs around the outside of microchip piles. Collect the chips behind him and leg it fast after the last one. Deadly!

Tank: Can't shoot, but can crush you. Moves forward and backward from wall to wall, under the control of a nearby switch. Deadly!

Bug: Runs around randomly on normal squares, but can't cross rough ground. Often useful as a switch trigger. Deadly!

Blob: Disgusting green slimy lump that heaves itself from square to square. Can't cross rough ground, but... deadly!

Cherry Bomb: This one's obvious, surely. Don't touch! Just push something else onto its square to set it off and go past. Deadly!

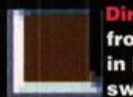

Teleporter: Stand here to get transported to another part of the maze. The four ways in each lead somewhere different. Helpful!

Blue Wall: Sometimes ordinary walls, sometimes gaps. Push yourself against them to find out. Helpful or harmlessly hampering!

Switch: Stand on switches to trigger something. Could be a door, a monster or something hidden. Helpful or harmful!

Dirt Block: Push these along in front of you to stop monsters, fill in lakes, make bridges or trigger switches. Helpful!

pang

OCEAN £24.99

■ The mystic Far East, one of about 20 places to visit. Our harpoon-holding heroes must deal with a lot of irritatingly small bubbles

bubbles for a few vital seconds, giving you time to select your targets; and a shield that gives you temporary invulnerability. Best of all is the Vulcan Gun, which blasts out pellets at a furious rate, shredding the bubbles before they can descend.

You might also knock out some of the platforms and release bubbles which previously weren't able to get you. And there'll be frenetic, panicsome activity until you pop every last one of them.

EFFECTS

The graphics are great. The scenic backdrops look very good, and lend a curious other-worldly feel to the game. (But then, you might say it's already pretty other-worldly to be splitting huge coloured balloons with a harpoon.) The bubbles

look excellent, too, and they move quickly, smoothly and realistically. There's no slowing down when the screen is crowded, either.

Sound takes the form of weird

sound-chip tunes, changing in each location. These are insidious and not too intrusive, and they complement the game beautifully.

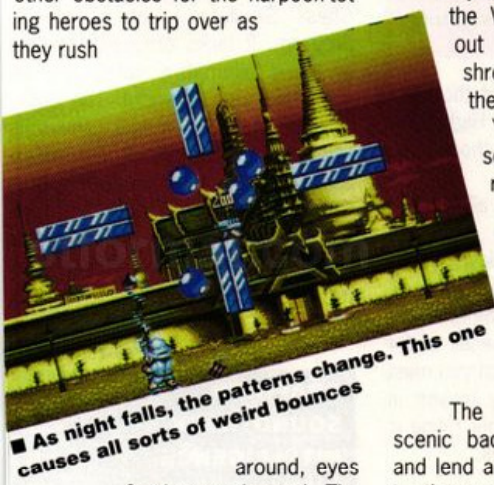

VERDICT

Pang is novel, simple to understand, and harmfully addictive. You start playing, only to continue, and continue, while the seasons gradually change outside, unnoticed. Its uncomplicated format makes it look easy, but it isn't. It gets very tricky, especially in one-player mode and when the screen's full of the tiniest deadly bubbles.

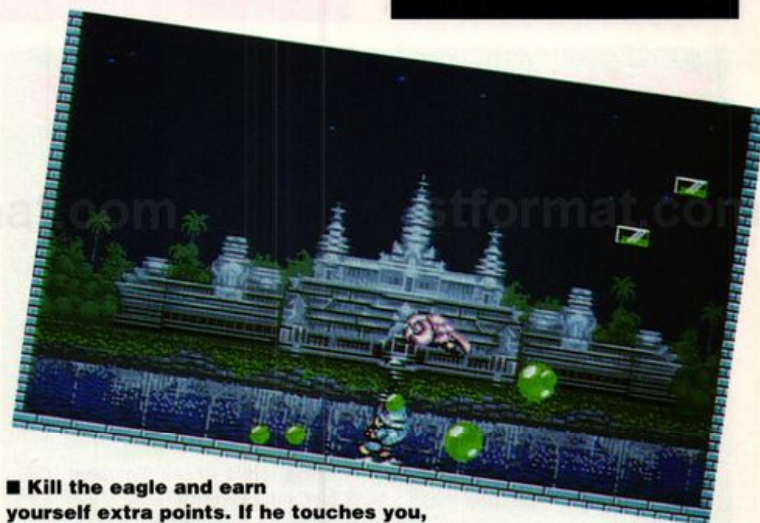

It's annoying that you can't jump to dodge balls as they bounce around the screen, but this is a minor complaint in what is otherwise an unbeatable puzzle game. You play it much, much more than is good for you, just to get better at it. There's a whole world-full of screens waiting, and you'll spend many happy hours trying to get to see them.

■ Kill the eagle and earn yourself extra points. If he touches you, you're weaponless for several seconds

DOUBLE THE TROUBLE

Switch the game into simultaneous two-player mode and you can play with a friend. With both of you blasting those balls in half it's a hell of a lot easier and quicker to clear a level. Watch out for those falling bonuses, though – the first one to reach them has a clear advantage

■ The guy on the left is about to collect a magic hourglass which slows down all the balloons. Both players benefit if you collect this bonus but there's a race on to pick up others such as invincibility or the gun

■ In one player mode, the problems are harder to solve. Blocks trap the big bubbles, but once they're split up they fall like hailstones and they're a veritable devil to collect

■ Weapons and useful devices abound... but the poor old blue guy still managed to snuff it

chess simulator

INFOGRAMES £24.99

B it of a strange name, *Chess Simulator*; this program doesn't just simulate playing chess, it really plays it. And of course, there are many superb chess programs around, so a new one has to be a bit special to get noticed. Has this got what it takes?

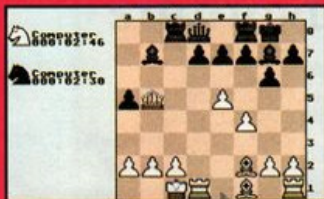

Firstly, you can view the time-honoured two-dimensional board from all the standard positions, with the option of watching the game from the sides as well as front and back. The crystal clear pieces are similar to those seen on large display boards all over the world.

You can select 3D mode and view the board from varying angles, but the 3D display is much less understandable, and the pieces get in the way of each other so it's not always possible to discern them.

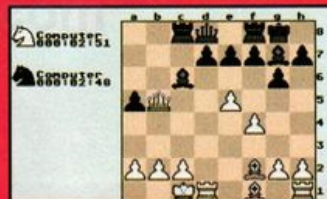

Movement is easy: the mouse picks up a piece and positions it wherever you aim. The levels of play available range from Beginner to Club Player. Beginner level is just

UNDER PRESSURE

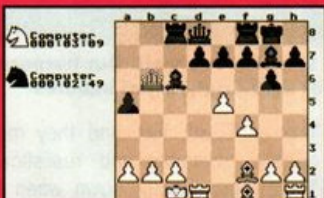

■ Infogrames' strangely named but powerful *Chess Simulator* usually goes for a fluid middle-game with much exchanging

1 White riskily sends his Queen out foraging early on

2 The Bishop sees a chance and leaps to the attack

3 White's Queen takes up the matter with Black's Queen

4 But Black is having none of it. The Bish advances further

■ The standard two-dimensional display of *Chess Simulator* shows a typical opening gambit

This last set is rather surreal, and very minimalist. You can't play a proper game with it, but it does look nifty, as do the others. You can change the colours of the pieces and board, if you really want to, as well as the 3D perspective view.

The only sound effect is a speech function that merely tells you it's your move – quite useful if you've been dozing.

VERDICT

Chess Simulator is an easy-to-use program. It lacks originality (except in those alternative sets), but it's solid, fast and powerful. The ability to match up to *Colossus* proves its strength. It also has all the necessary functions, and also gives you an ELO rating (great if you're into '70s Birmingham hippies). Still, there's really nothing new or special here. It's just a good chess program, that's all.

JAMES LEACH

TOURNAMENT OF THE CHESS CHAMPIONS

To see just how good *Chess Simulator* really is, we pitted it against *Colossus Chess X*, billed (by its makers, CDS) as "the ultimate chess program." Both programs ran on Tournament level, with no time limits set.

Colossus Chess X played white and quickly gained a tactical advantage over *Chess Simulator*. By the middle-game, however, both Queens and all four Rooks had been exchanged and the game was evenly balanced once more. A protracted end-game ensued, with *Colossus* taking much of the fight to *Chess Simulator*. Eventually the sides were whittled down to Kings and Pawns. The Pawns were picked off one by one and the game ended in a draw.

Colossus took 1 hour 20 minutes thinking, while *Chess Simulator* took only 26 minutes, indicating that it's both fast and powerful.

that; it is possible to beat the computer soundly every time. Higher levels are taxing even to those with many years' experience.

Chess Simulator has all the features you expect: save and load games, learning, self play, advice option, play-back and study a game. It even provides an ELO rating function: you're presented with a series of 24 positions, for each of which you must provide up to four likely moves in about two minutes, and your rating is calculated from the choices.

EFFECTS

You get the option to redefine the pieces as African figures, Indian, Fighting Fantasy or Nuts And Bolts.

the final battle

PSS £24.99

of fantasy bods successfully around the castles. As well as battling the nasties of this enchanted land, you must also battle with the ST mouse of doom, trying to avoid the sarcastic comments that appear when you haven't clicked perfectly on something.

EFFECTS

The different screens for each location keep you pushing your gang further into the game. You must dispatch indigenous creatures with fists, swords and lumps of timber. The combat occurs in real time, so if you haven't sussed the icon controls, you get wasted.

The graphics aren't stunning, and many screens look the same. The atmosphere is sustained well, though – partly because the text is of the traditional "here be dragons" style, which, if you like the genre, will probably have you writhing in goosebumps. There's no sound, predictably, so midnight wizards won't keep others awake when they play.

VERDICT

The game is complex, with difficult puzzles, but you'll be swearing at the finicky control system rather than the old, shy troll under the drawbridge. If you can master it, however, you can explore the hundreds of locations packed with slippery objects, all with lateral uses. The fate of the Kingdom of Anar is in your hands. Whether you can be bothered with saving it depends on your frustration threshold.

Every location has its own picture displaying the characters and objects you can find there. The view is from a 45 degree corner, which takes a little getting used to. The movement never really seems to flow, and the strange angle makes it difficult to keep an accurate mental map of the surroundings.

To utilise, throw or pick up objects you must click or sometimes double-click on the mouse. This is the quirkiest part of the program. The manual doesn't give a very clear introduction to the mechanics of getting your crew

holes for six mislaid power crystals, with puzzles, traps and false turns at every corner.

When you've completed all these and collected the gems, you progress to level two. Now you're plonked in the Fortress of Anar (ooh, isn't it frightening?). *The Final Battle* is about to begin and there can only be one victor. Or possibly a couple. It's hard to tell.

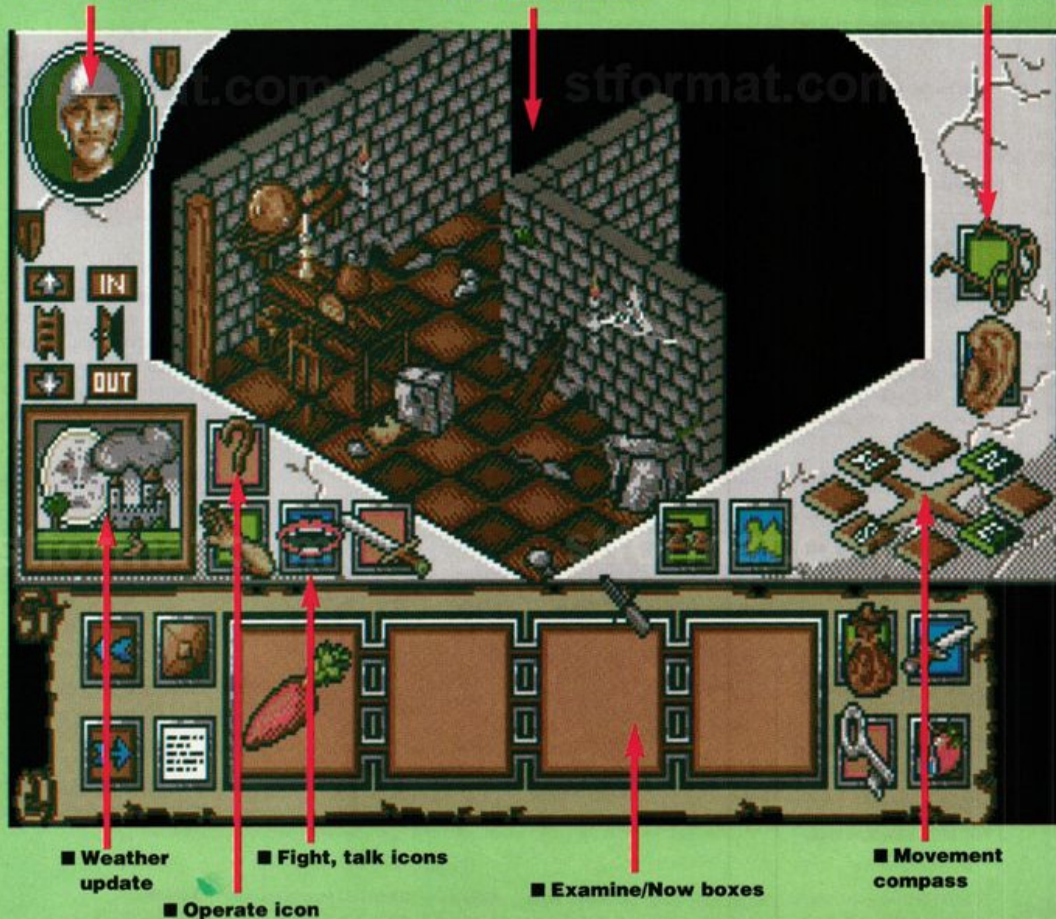

No text-inputting is required – all is achieved by clicking to within a pixel of the desired object. If you can master the meaning of the icons, you should progress much more quickly.

Here lie the bleached bones of tragic people who just couldn't move their mice properly

On the steps of the courtyard, the companions pause. Silence. Nothing moves. An owl hoots...

Sit ye by the fireside, me fine young lad. I'll spin ye a yarn that ye'll not be believing. It came to be that many moons ago there were kings who... Hey! Come back! Don't you want to hear this?

Sadly, there are many folk who would rather undergo severe physical trauma than play a game about misty warlords and dreaming mountains. And *The Final Battle* is definitely one of those. You play a small but determined group of travellers who must wander the lands of Anar, looking in castles and down man-

CORE DESIGN £24.99

Corporation

After the cute graphics and simple gameplay of *Rick Dangerous*, Core now bring you full 3D perspective, hideous monsters and plenty of chilling plot in their new release, *Corporation*.

The title refers to the Universal Cybernetics Corporation, who built all kinds of useful household droids and servant systems, grew large on the profits, and now seem to be working on something less wholesome and a lot more dangerous: several innocent people are discovered half-eaten outside their London HQ, and illegal experiments with genetically manufactured life-forms are suspected.

This is where you come in. You're an agent of ZODIAC (a highly secret espionage agency), and your task is to enter UCC's office, then locate and capture an experimental embryo. At the start of the game you kit yourself out with a range of medical supplies, electronics and armaments. Then it's inside UCC's HQ, where you begin your search.

Inside, you find a labyrinthine 3D world, similar to that of *Infestation*. You travel around each floor using an ingenious mouse-control system that takes a bit of getting used to. With

■ At the start of the game, you can choose your agent from a selection of humans or androids. Androids are more reliable, tougher and can carry more, but look about as attractive as a road accident

■ Whenever you get stifled in *Corporation*, this is the last guy you meet. So, as a public service for those of you who enjoy the idea of revenge before the fact, here's how Freddy finally meets his maker

practice it's possible to turn on the spot, walk diagonally across rooms or back-track while facing forwards.

In due course you meet all kinds of hazards, the most regular being the intruder-detection system – a network of cameras. If you happen to be in the line-of-sight of a camera when it turns toward you, alarm bells sound and you are thrown in the UCC strongroom.

Escaping from there is easy, providing you have the right equipment – a handy, pocket-sized time-bomb. Use this to take out a wall or two and make good your exit. All you

have to contend with then are the remaining nasties – robot spiders, crab-guards and ED209-style robots, to name but a few.

EFFECTS

Corporation has some incredibly classy graphics which really enhance the atmosphere. At times the 3D world can get a little flat and boring, but often you find something odd and exciting just around the next corner.

Movement can be a little slow and occasionally this can be annoying, especially when compounded by the unusual control mechanism. The

■ Lifts can make useful resting areas if you want to step out of the action and get your head together. They also enable you to access all of *Corporation* HQ – though the security system does its best to lock you out or dump you in serious trouble

last thing you need when under fire is a fiddly means of escape!

The sound effects are clear and crisp, but a little sparse. Often things happen out of sight, so you hear an effect but don't know what caused it. However authentic and atmospheric this may be, it is also very confusing.

VERDICT

Good fun, after you've mastered the frustrating control method, which is *Corporation*'s only major drawback. UCCHQ is a confusing place and you need your wits about you if you hope to finish the game. Even then it could still take you several weeks of play.

More playable than *Infestation*, with more to offer in the way of interesting enemies, objects and happenings, *Corporation* is a winner. Miss it if you enjoy a boring life!

NEIL JACKSON

■ Use the on-screen map to guide you around *Corporation*'s maze-like levels, but beware of the TV cameras which blow the whistle on you. A swift bullet in the iris usually does the trick

■ A selection of the many weapons, tools and computers you get to play with. Many of them require some serious thought before use; others just need you to run away very quickly before they explode

CAN'T PLACE THE NAME, BUT THE FACE IS REVOLTING

■ Some of the freaks you meet face to face when you least expect to. Most can be terminated with a well-aimed shot or two, but others are not what they seem and should be approached carefully

chase HQ 2

special criminal investigation

OCEAN £24.99

A CRASH COURSE DRIVING LESSON

Damage to target. When this reaches 100 you've busted them. It goes up in increments of five, with rockets and collisions causing greatest damage

Time remaining. You never have very long to catch the crims

Rev counter. Luckily you're at the wheel of an automatic, so no nasty gear changes are necessary

Speedometer. Your car is capable of some pretty nifty speeds

Distance to target. When the two dots meet, you're not far behind

Ammunition. You have a limited number of rockets

Turbo Boosts. At the moment they're engaged. You have five at the start of each mission

■ The bad guy's in range. Now all you need to do is pump 'im full of lead and force 'im off the road

There's a hostage's life at stake! The Mayor's daughter has been abducted, and is currently being driven away at high speed by a gang of ruthless terrorists. They're highly volatile and musn't be antagonised – it's a difficult diplomatic situation.

So the *Special Criminal Investigation* team are called in. They know just how to handle this sort of delicate situation. Diplomacy is the key. A softly-softly approach is called for. Their plan is appropriately simple but effective: run them off the road, bombard them with rockets and pin them down with gunfire.

If the plot sounds familiar, then you've been playing *Chase HQ*. The prime difference between *SCI* and *Chase* is that you're not just limited to smashing the kidnappers off the road. No, this time you're armed, and therefore twice as dangerous.

You have 75 seconds to find and apprehend the getaway cars. Hunting them down isn't too hard. They have a head start on you, but your vehicle is equipped with five turbo boosts which help make up the ground easily. In addition, the roads have no turn-offs, and you can easily distinguish their car from the others

on account of the huge flashing arrow and the word "criminal" that hovers above them.

Stopping them is a different matter. You must inflict a certain amount of damage before the escaping car finally breaks down, and this takes some doing. For most of the game your only option is a combination of shooting and ramming – till, halfway through the chase, a friendly helicopter drops a power-up weapon by parachute to help finish the job.

The other vehicles on the road aren't quite so resistant to damage.

Hit them by mistake and more often than not they burst into a satisfying ball of flame. This slaughter of innocent civilians doesn't seem to have any adverse consequences (!), and is a good way to clear the road.

By contrast, the *Chase* mobile seems remarkably impervious to any form of harm. Head-on collisions with other cars merely slow you down. Driving into the side of a house causes a slight loss of momentum. The worst that's likely to happen is that the car may go into a spin, losing a little time.

■ You can always tell a bad guy. Not because his eyes are too close together – it's that bleeding great arrow that hovers above him

EFFECTS

The scrolling is fast and smooth. It's the usual mock-3D born from the old racing games, but is very effective. All the sprites are large and well drawn – not that you have time to admire them as they thunder past. A funky soundtrack plays as you tear along the highway. Plenty of explosions and similar effects keep the sound-chip occupied too.

VERDICT

The difficulty level of *SCI* is pitched just right. It's not an easy task bringing the escaping terrorists to a halt, but it is possible. There are, however, no major improvements over *Chase HQ*. Sure, you can shoot now, but it makes very little difference to the gameplay. While *Special Criminal Investigation* is fast and fun, if you already have *Chase* in your collection you'd do well to think twice before splashing out.

ADAM WARING

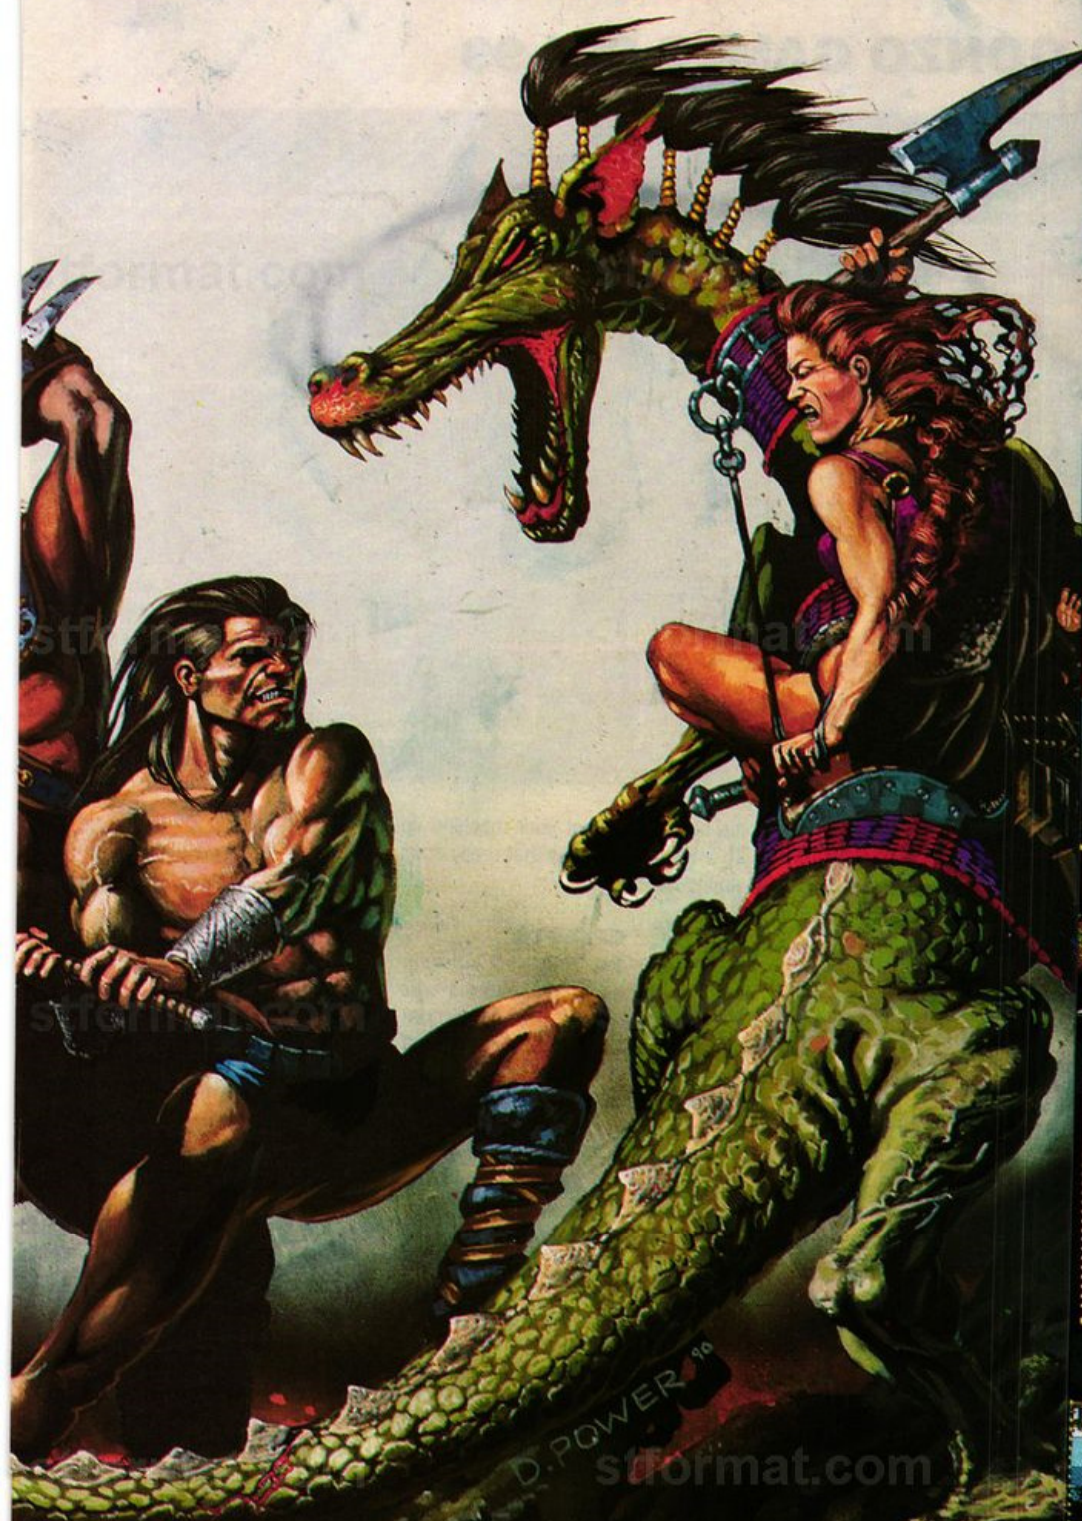

■ You receive your instructions over the airwaves. There's no time to lose, so get going – fast!

■ The helicopter drops a subtle rocket launcher to help you in those delicate negotiations

street hockey

GONZO GAMES £24.99

Street Hockey is ice hockey on roller skates. It's been taken off the rinks and out into the ballparks, and now it's on your ST too, thanks to Gonzo Games. As with ice hockey, two opposing teams made up of improbably large neanderthals whizz up and down the play area smashing all hell out of the goals, the walls, each other and a small puck. The idea is primarily to score more goals than the opposing team.

The main screen shows the currently-selected player's view (and a helpful arrow showing which direction you need to go, in order to intercept the puck). Below, you see an overhead view of the pitch; flanking it, the views of the other four players in your five-man team. Players can either be selected automatically (as with most footie games, the player nearest the ball falls under your control) or manually, by means of the function keys.

Manual player selection sounds tough and it is. The alternative is to let the computer select your players.

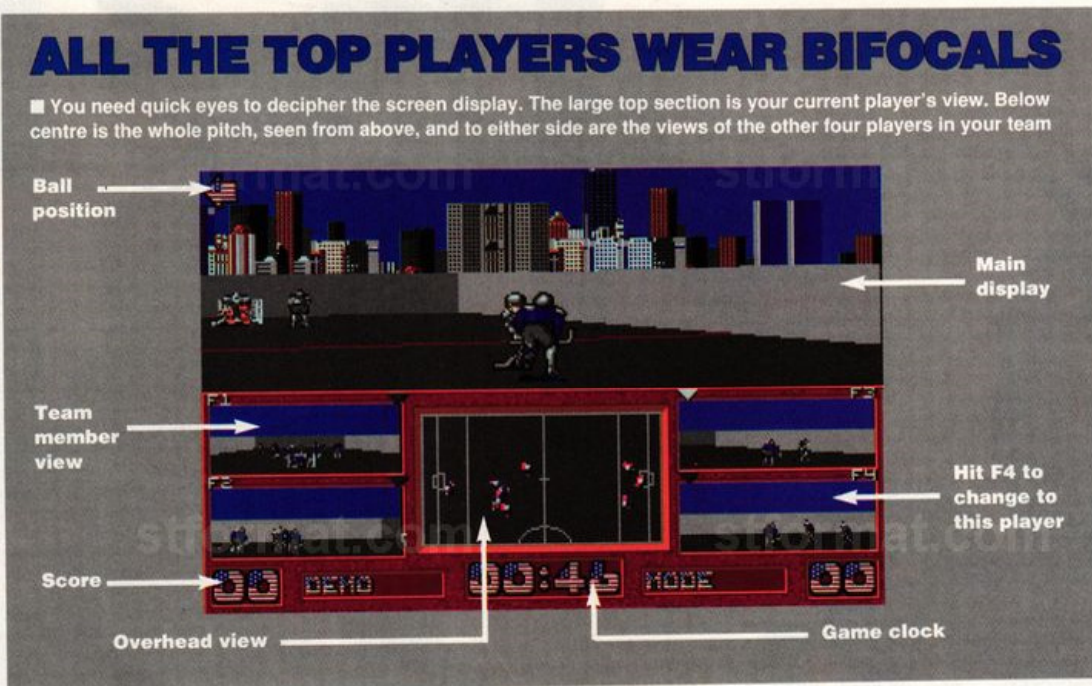

■ Frantic goalmouth action. The puck changes possession about as fast as the screen updates...

Only now your viewpoint is switched with lightning speed and with no warning – seriously disorientating. This is where the practice mode comes in. You can work at those skating, shooting and passing skills in private, only emerging into the public glare of a full league competition when you're sure you can hold your own.

When starting your league campaign, you need a blank disk, on which your league position can be stored. The results of each match are then added automatically. You need the master disk only when you want to reload.

It's a tough sport, so it's appropriate you should be playing it in a tough town – New York. Starting in one of the low-cred parks, you have to win your league to advance to

another, better venue. There are 16 parks between you and Central Park and the Undisputed Champions Tournament, so there's plenty here to keep you going for some time. Oh, and while you're travelling between parks, there's a little arcade section where you have to guide your team through the city streets and get to the next park before time runs out. Collisions with the traffic cost you street cred and affect your players' subsequent performance.

The traffic-dodging stages of the game are really only light relief from the serious business of goal scoring. One final point, however, is that if you get sick of playing the computer all the time, and you have an RS232 lead, the manual gives instructions

on how to connect your machine up to a friend's ST. Now that really does sound like fun.

EFFECTS

Except for the simplistic between-parks scenes, the graphics are extremely ambitious. You can't complain at a lack of on-screen information, but you need about five sets of contra-rotating eyeballs to take it all in. Perhaps because there's so much happening on the screen, the animation is often extremely jerky, and the update rate is really too slow to lend any sort of fluency to the game.

Sound effects are workmanlike but unmemorable, while the quirky title jingle doesn't last long enough to become annoying.

■ You get a nice graphics demo before things get going, but sadly the game's another story

VERDICT

It's easily said, admittedly, but fans will love it. On the other hand, only ardent Street Hockey fans will spend the time on it, frankly. The display is a formidable achievement, and the player-selection control is extremely versatile, but that's the game's flaw – there is simply too much to do and too little time to do it in. At times you wonder whether it's humanly possible. If the programmers had been content to let the game run at half the speed and put in twice as many screen updates, it could have been a completely different story.

SEQUENCER CONTROL PANEL

NEW STE CONTROL PANEL

MAIN EDITOR SCREEN
WITH OSCILLOSCOPE

WHAT IS MASTER SOUND?

Master Sound is a low cost, high quality sound sampler for the Atari ST & STE range of computers. The sampler cartridge enclosed in this package plugs into your ROM port on the side of your computer and allows you to record sounds from devices such as Personal Cassette players, Compact Disc Players etc. Once in the computer MASTER SOUNDS unique editor will enable you to edit the sound in practically any way you can imagine. Once you have the sound sample how you want it, you may incorporate it into your own Demo's or programs or use MASTER SOUNDS own built in sample sequencer to play back the sample in sequence with other samples!

THE MASTER SOUND EDITOR

Incorporates the following facilities:

- | | | | |
|--------------|-------------------------------------|----------------|------------------|
| * SAMPLE | * PLAY | * LISTEN | * LOOP |
| * CUT | * COPY | * OVERLAY | * WIPE |
| * FADE IN | * FADE OUT | * VOLUME | * REVERSE |
| * SHRINK | * FILTER | * MAGNIFY | * TRIGGER |
| * LOAD | * SAVE | * SCOPE | * REAL TIME FFT |
| * VU METER | * SEQUENCER | * MIDI TRIGGER | * 3D FFT DISPLAY |
| * AVR FORMAT | * STE VOLUME, BASS & TREBLE CONTROL | | |

An impressive Spectrum Analyzer, Oscilloscope and 3D FFT display enable the user to monitor frequency content and volume with ease, and help you to ensure that the sample quality is at its best.

THE MASTER SOUND SEQUENCER

Allows you to play back samples in a sequence. Up to 18 samples can be held in memory at once and sequences are as simple to record as tapping keys on the computers keyboard. Once recorded the sequencer can save the samples and sequence file out onto disc so that the files can be used in the sequence player provided.

THE MASTER SOUND DEMO

Allows you to play back your own sequenced sounds created by the editor while displaying picture files. This is great for creating your own public domain demo discs without having to be a computer programmer.

ADVANTAGES OVER MASTER SOUND 1

- * Midi compatibility allows you to playback samples at different frequencies from an external midi keyboard with a midi-out socket.
- * Additional STE options include Volume, Bass, & treble controls Playback via the STE's built in sound sockets.
- * New 3D Fast Fourier Transform display allows you to see the samples frequency composition in a 3D display.
- * Volume down option
- * Choice of filters
- * Choice of compression ratios
- * Enhanced sample frequencies up to 30 KHZ
- * Sequencer can now handle variable frequencies from 3 to 16KHZ

Making simulations accurate is difficult. Getting anything close to reality takes vast amounts of research – which is costly, time-consuming and possibly even a little boring. Magic Bytes seem to get around the problem entirely by setting *USS John Young*, their Naval Warship Simulation, seven years in the future, predicting a few predictable enemies and basing the whole lot on a semi-real, half-baked, good ol' American ship (Yecch!).

You can tell within the first minute and a half that *USS John Young* is not in the same league as *Silent Service*, *Red Storm Rising*, or even *Hunt for Red October*. All those sims featured elements of realism both in strategy and visuals, whereas *USS John Young* contains neither.

Your objective is to attack and destroy convoys of tankers, submarines or oil platforms in the Middle East region. Your opponent is Iran (whoops!), who's reached flashpoint and is now endangering the free world (yawn, yawn).

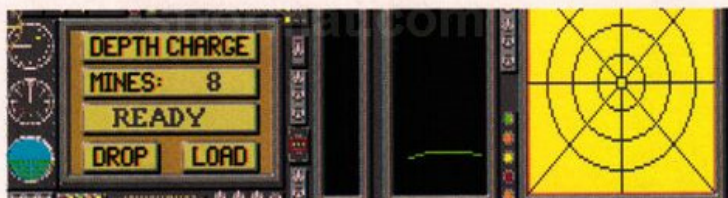

OK, forget the plot. What's the game like to play? Not good. The control systems are simple enough to operate, but bear about as much resemblance to Naval Warship controls as *Pong* did to real tennis. The emphasis is on fitting the controls on screen with the sea still visible, but they're all flat and dull, total guesswork surrounded by the kind of space-filling knobs and switches you see in Saturday morning cartoon spaceships.

About half the gauges and dials on each screen do absolutely nothing. The other half give you basic control of the ship, with a speed controller, a rudder and a list of sub-systems on the first screen, operated by mouse or keyboard.

The sub-menus enable you to

USS John Young

MAGIC BYTES £24.99

■ Here in the Depth Charge "room" is where you control the explosive barrels you bung overboard on top of unsuspecting subs. How low can you get when you drop your load?

■ Take a hit during the action (using the term loosely) and you can patch yourself back together while you're fighting using the damage control screen. Personally, I'd rather turn round and limp home

■ The main display has all the sophisticated technology you'd expect to find on a bridge... like the *Tay Bridge*, maybe

enter the other so-called "rooms" on the ship, with the operating systems for torpedoes, the main gun, navigation radar, damage control, engine room and depth charges. Great, you think. Lots of systems, lots to play with. But what you actually get is another lower-half screen display with different knobs and switches, and there's nothing to see. All the time the forward sea view contains either empty water or a cardboard cutout ship or platform, and maybe a few explosion sprites from any old shoot-'em-up (if you're lucky enough to get a hit). Not thrilling, even with the best imagination in the world.

EFFECTS

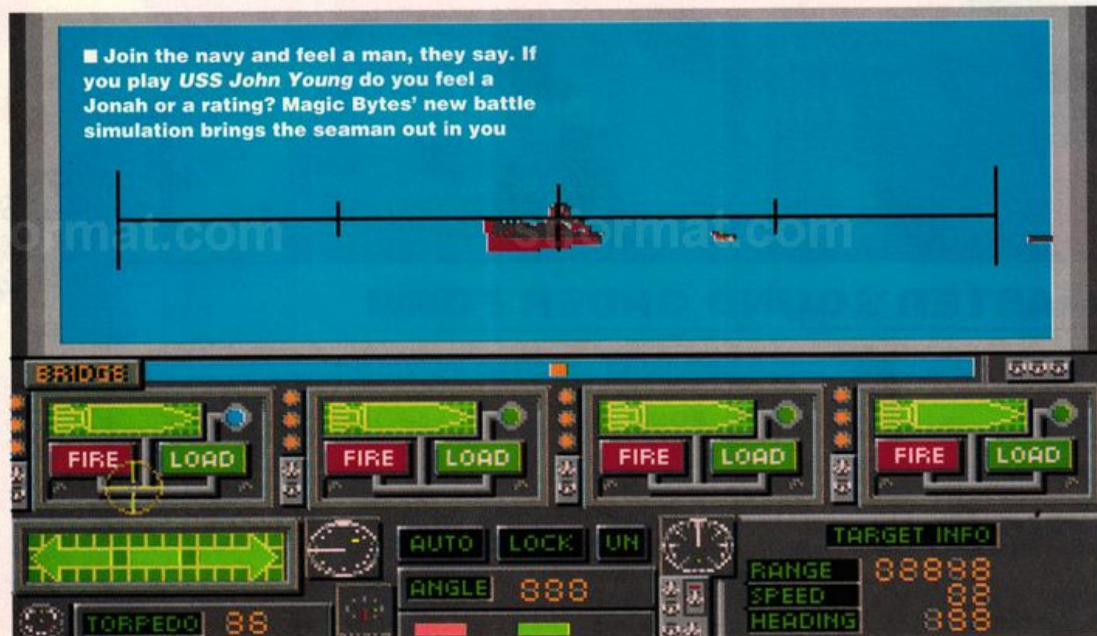

But, I hear you say, it's a simulation. Sims are supposed to concentrate on the strategy rather than on pretty effects, aren't they? Well yes, but *USS John Young* doesn't concentrate on either. It makes a half-hearted attempt to look like it has depth, as well as detail and effects, but fails to deliver either. The maps aren't clear enough to do any real planning and the animation for torpedoes, shells and the ships themselves is all very comically low-grade.

Sounds and music are sad, sad examples of what not to do with an ST. The front-end music in particular is an absolute dirge.

VERDICT

Magic Bytes have plastered the words "A Naval Warship Simulation" on every side of the box, obviously hoping to sell *John Young* to the vast market of simulations players – but the only naval in question is the one on your belly and you'd probably have more fun contemplating that for a while. Don't part with your cash expecting to become Captain of a large and powerful military vessel. You won't. You'll be Steamboat Willie on a Mickey Mouse boat.

Easy To Install

Upgrading the memory of your Atari ST has never been easier using Third Coast's range of memory upgrade boards. We have plug in upgrade boards to take your machine up to a realistic 4 Megabytes so you get no more out of memory headaches. Third Coast's range of memory expansion boards take around 1/2 an hour to install and come supplied with full fitting instructions for all revisions of Atari's. If you should get into any difficulty fitting any of our memory upgrade boards are technical staff will give you any assistance you need over the telephone. Third Coast's memory upgrade boards are fitted by plugging a socket over the MMU chip and the Video shifter chip and require no soldering whatsoever.

Expansion Policy To 4MB

With Third Coast's 1/2 megabyte plug in board for Atari's with and without surface mount MMU chips we offer an expansion policy to 4MB. What this entails is, if you purchase a 1/2 megabyte expansion board from us and you decide you need either 2.5 megabytes or 4 megabytes. Return the board to us and we will discount you the price you paid for the 1/2 megabyte board off the current price of the 2.5 megabyte or the 4 megabyte board. You are not left with 16 useless chips like the solution offered by others but merely a cost effective simple way of upgrading your machine to 1 megabyte, 2.5 megabytes and eventually to a full 4 megabytes.

Expansion Options

If you have a 520STM, 520STFM or even a 520STFM with surface mount MMU chip we have the solution to take your machine up to 1 megabyte with the expansion policy to 4 megabytes as described above. Third Coast also offer expansion to 2.5 and 4 megabytes for 520ST owners. For 1040ST and Mega 1 owners we have an expansion board to take your machine up to 2 megabytes, 2.5 megabytes and 4 megabytes. For Mega 2 owners we offer a plug in board to take your machine to 4 megabytes.

Fully Compatible

Third Coast's range of expansion boards are all auto configuring and compatible with all software for the Atari ST.

Warranty

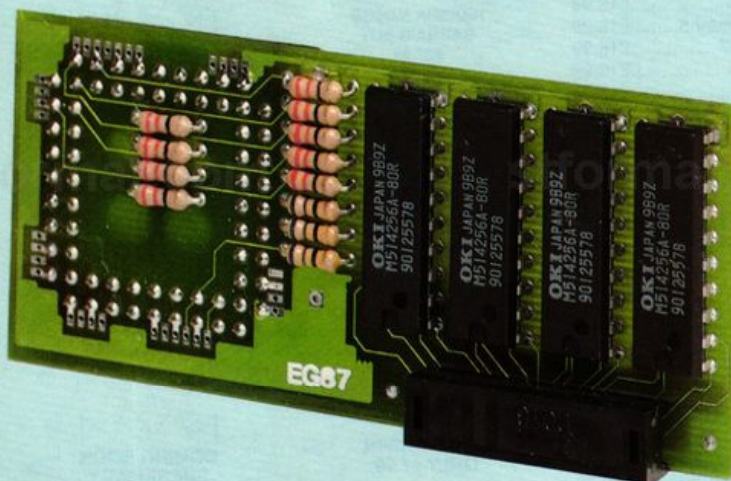

All memory expansion boards carry a full 12 months warranty and free 12 months telephone support.

Software

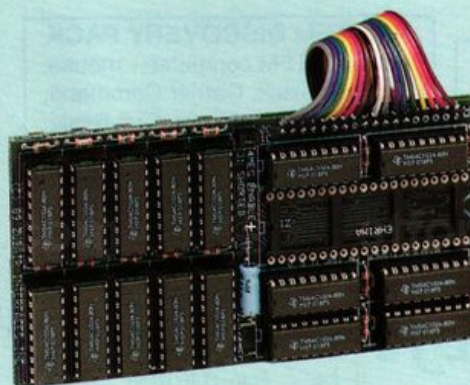

All Third Coast ram upgrades come supplied with a ram checker which checks every chip on the upgrade so you know if you have fitted the upgrade correctly. Also included is a ram disk, print spooler and several other useful public domain utilities.

1MB Internal Floppy And Upgrade

For those Atari owners who have a machine with 1/2MB drive and memory we offer a 1MB internal drive and a 1/2MB soldering upgrade kit for the special price of £99.99

nitro

£19.99

Racing is supposed to be a sport so be a good sport and go kill yourself on a racing track. That, at least, seems to be the message with *Nitro*, a three-player simultaneous racing game.

Unlike most racing games we've seen recently, the action isn't viewed through the windscreen of your vehicle. Instead, you get an overhead shot of the track with all four competing cars represented by simple sprites. The objective is simple (and predictable): race up the scrolling screen to the finish line before your opponents. There are special pickups you need to collect en route such as nitro boosters, headlamps and cash, to buy goodies from the shop at the end of each race.

After just watching *Mad Max 2*, you could charge along the track and enjoy splattering every pedestrian in sight. This, however, tends to slow you down and rob you of points, so if you're looking to progress it isn't an advisable way to play.

There are 32 tracks in all, played out over four different types of terrain in both day and night-time situations. With night-time tracks you need to have collected light bulbs which give you headlamp power. You can then see a short area of road in front of your car. Without knowing the direction of the track you must follow the computer-controlled car and then sprint to the finish post.

You have a choice of three cars to play with. The Formula 1 car (on the right) has high fuel consumption, is good on the road but dire on those cross-country tracks. The sports car (middle) is low on fuel consumption and average on road and cross-country routes. The Turbo Buggy (left) has average fuel consumption, is appalling on ordinary road but very good on cross-country routes. Just build your own customised car and you've got it made!

TAKE A TRIP WITH NITRO BOOSTERS, A GALLON OF FUEL AND A POUND OF MUSHROOMS

Weeow! Jesus Ace, where ya going? Charge into a barrier and you spin round so fast you feel like you've overdosed on hallucinogenic mushrooms

Collecting the extra fuel barrels is vital if you're driving the thirsty sports car

Pedestrians don't take too kindly to being squashed

The Nitro boosters speed up your powers of acceleration. Collect some of these and you think you've just acquired bionic limbs

A collision with opponents slows you both down

You're at the starting posts. Wait for the light to go green, then slam your foot to the floor

■ Meet Ace One. He's had so many body parts replaced he needs an annual MOT. "Well, Ace, how d'ya

think you're gonna do today?" "I'll be happy if I can get through without killing more than six

pedestrians, John." "Well, good luck, Ace. You're one mean sonofabitch"

EFFECTS

The game is disappointing because it doesn't have a 16-bit feel to it. Overhead views of the race track have long since been abandoned in favour of presenting a more realistic front-on view. As you can see from the screenshots, small sprites and ineffective collision graphics are the final nail in *Nitro*'s coffin.

Complementing the visuals are some simple ST sound chip tunes which send you mental if you're dumb enough not to turn the volume down. Spot effects are few and far between, thankfully!

VERDICT

The visuals make you laugh; the sound effects make you want to chuck, but there's nothing about *Nitro* which you could say is truly awful. It's simply an old 8-bit concept with no original or exciting 16-bit elements. If you were a fan of *Major Motion* and you're looking for the chance to compete in a three-player simultaneous race then *Nitro* satisfies – just. If you want something that exploits the full potential of your ST, however, then this sadly just doesn't deliver.

HOW TO GET FED UP IN OMNICON

■ All contact with the outside world is through the small playing window in the centre of the screen. The character is moved with the joystick, and when you walk up to a named object you have the opportunity to interact with it. Here you've found a hamburger machine. Yum yum.

The rest bar tells you when you need to go bye-byes

Down the sides of the screens are your pockets. You can store various items you find lying around

The bar hidden beneath the menu tells you when you need feeding

This bar tells you what object you're looking at

More pockets - but this time they're empty. You can choose which one to use with the appropriate function key

The menu box gives you your choices. Now, what do you do?

■ The controls at the bridge of the starship. You're locked on course for the planet Cron

plays at. Moving from one side of a room to another seems to take absolutely ages, and moving from room to room requires a disk access, as does attempting to examine anything. Making any sort of progress is annoyingly slow.

Sound is conspicuous by its absence: there isn't the slightest whimper. It's true to say that traditional adventures could get away without any sound (or graphics for that matter), but with a game of this type there's no excuse.

The game doesn't stun pixel-wise, but the graphics are passable and everything is clear enough. The "action" takes place in a small window in the centre of the screen. The rest is filled up with information about what you're carrying, how tired and hungry you are, and where you are and what you can do about it.

VERDICT

A potentially good game is encumbered here by scandalously slow response and an unfriendly user interface. The menu systems are very clumsy indeed: it takes such a long time for a menu to appear that it's easy to think you haven't selected it properly and click again. Do that, however, and you merely succeed in switching it off as soon as it eventually does appear. Why couldn't we have got a nice friendly mouse driven control system instead? It would have been ideal for this style of game.

Buried beneath the poorly implemented exterior, there could well be a very respectable game waiting to get out. It's sad then that only the most patient and determined players are likely to find it.

ADAM WARING

LONG TERM INTEREST	4
OVERALL	42%

MIRRORSOFT £24.99

omnicron conspiracy

Omnicon Conspiracy is best described as a graphical adventure. It's a whodunnit-in-space type of game - you need to visit a series of locations, search for objects and solve problems in an attempt to break an intergalactic drugs ring. All this is controlled from the joystick - there's none of this typing in long passages of text only to be told "I don't understand that!"

The game is set in deepest space. The character under your control goes by the unlikely name of Ace Powers. You start out in the sleeping quarters of your spacecraft,

and almost immediately your robotic pal enters and tells you the Chief of Police wants to see you. After grabbing a couple of useful objects, you walk through the spacecraft to the bridge, tap in the star course the robot gave you, and you're off.

Ace walks in the direction you point the joystick in. Walk up to anything and its name is highlighted in a panel at the top of the screen. From here, pressing Fire brings up a small menu. The choices offered depend on the ways you're allowed to manipulate that particular item. Typically you can examine, search, and maybe

■ Ah, that's lucky - for a moment there I wasn't sure whether I was still breathing...

even use it. Find anything useful and you have six pockets, each capable of storing an object.

There are many other characters in the game, and bumping into one gives you the opportunity to converse. Actually it's more of a monologue: you can't tap in questions, or influence the answers they give. If they have anything to say they'll tell you about it; if they don't, they won't.

EFFECTS

One thing you can't help but notice is the sluggish pace that the game

■ When Ace Powers, top space detective, reports for duty, you're off on the whodunnit of a lifetime... and if it ain't, it'll seem like it. Slow would be a good word to use at this point

■ There are several characters you can get information from, but your conversations are all limited to reading what they have to tell you - if they actually have anything to say, that is

Good lord, don't tell me, surely it's not *that* part of the magazine. Well, yes it is, thanks for asking, missus. Late arrivals, also rans, re-releases, might-have-made-its and mountain climbers called Derek, all jostling for a little bit of attention, recognition and a pair of crampons

VECTOR CHAMPIONSHIP RUN

Impulze - £24.99

"Each one of the world's top race-tracks has been painstakingly reproduced..." Yeah, right. Since when did Silverstone have a bloody great multi-coloured wall around the edge of the track? I mean, come on, these racetracks look more like something you'd find at Blackpool pleasure beach, with a few go-carts whizzing around.

Oh, and another thing. Racing cars are meant to be solid objects.

In this game they can come flying straight through you, with the real danger that it's your speed which gets knocked down. However, when you try the same manoeuvre you find yourself eating tarmac.

The graphics aren't bad. There are no circles on screen, but it's not bad. Update is rapid and the colours are attractive. Steering the car takes a lot of getting used to, and it's nigh on impossible to wreck your car - but all that apart, it's a great game.

STF Rating - 40%

screen

■ And here comes the automatic Ferrari of Alain Prost. He's gaining on Nigel Mansell... and oh, disaster! Mansell has spun off the track just three feet from the finishing line! What kind of championship run do you call that, Victor?

SHADOW WARRIORS

Ocean - £24.95

A couple of weeks back we got a letter from a Jason Saunders of Corsham in Wiltshire, who was wondering why we never reviewed this game. The answer, Jason, is that Ocean (despite repeated badgering) never sent us a copy. Three months after the fact we've secured one and we now know why they were reticent to send it to us.

Shadow Warriors - currently number 4 in the charts (see page 17) - is a beat-'em-up. Using your

■ Listen, let's be civilised about this. All I said was that I think Geoffrey Howe wouldn't make a bad Prime Minister. Besides, he's got such an exciting manner about him... oooh... ouch!

ninja skills you've got to slash, hit and duff your way across a New York background on your way to a confrontation with Mr Large. You have seven fighting moves at your disposal and four jumping movements.

The problem with Shadow Warriors is that it's too slow. What's more, there are far too many bad-dies on screen at once, making progression through the game a real problem. Animation is only average and the colours are gaudy.

STF Rating - 58%

HELTER SKELTER

Audiogenic - £19.99

Bouncing balls, wiggly monsters and a clock counting down. Hmmm, sounds like a puzzley platform game to me...

Yep. You control a small red ball with the ballish quality of bouncability, on a game screen consist-

■ "I like bouncing, boing boing boing. Up and down until I get a pain in me groin. Don't it make you happy that when it really counts. You can turn into a rubber ball and bounce bounce bounce" (Gerard Manley Hopkins, author of the terrible sonnets, the atrocious odes and a filthy limerick)

playextra

TEN GAMES WITH QUESTIONABLE TITLES

- | | |
|-------------------------------------|---------------------------------------|
| 1. Hot Rod - Activision | 6. Fire and Forget - Titus |
| 2. Puffy's Saga - UBI Soft | 7. Skidz - Gremlin |
| 3. Sonic Boom - Activision | 8. Navy Moves - Dinamic/Electric Arts |
| 4. Rorke's Drift - Impressions | 9. E-Motion - Accolade |
| 5. Hammerfist - Vivid Images Design | 10. Buffalo Bill's Games - Tynesoft |

ing of a series of floating platforms. Strolling up and down these are a number of creatures. Snakes, eyeballs and walking potatoes - they're all in there. Your job is to bounce on these monsters in the correct order. You know which creature to bounce on next because a large arrow appears above its head.

Helter Skelter is a very jolly game. It's quite difficult, but certain masochists thrive on that sort of thing. Graphics and sound are both neat and attractive. What's more, when (!) you complete the game you can design your own levels with the built-in editor.

STF Rating - 75%

MIG 29 - SOVIET FIGHTER

Codemasters - £6.99

All right, I know it's only seven quid, but I mean. Computer games have got to be playable. It doesn't matter if the graphics are tasty or the sound sexy, you've got to be able to bear the game for more than five minutes.

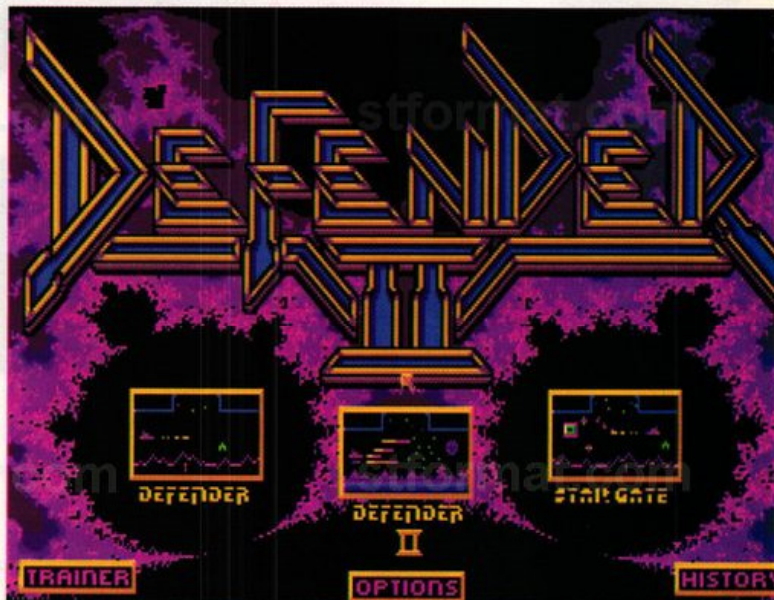

Mig-29 is a flight simulator of sorts. Problems arise because your aircraft is extremely uncon-

■ That's you, top right, in your Mig-29. Those chaps down there are the enemy. Waggle your joystick and press the Fire button repeatedly. Think you can handle all that?

trollable and zips between one side of the screen and the other in the blink of an eye. This makes it almost impossible to see what's happening, or to have any control over what you shoot.

The graphics are well designed and the sound adequate. Gameplay, however, is a case of wagging your joystick about hopelessly while repeatedly pressing the Fire button. It's impossible to shoot anything deliberately. Avoid.

STF Rating - 30%

■ Defender gets resurrected and brought into the '90s by programmer Jeff Minter and his trained yaks. Shoot every alien in sight and save the humanoids from certain death

DEFENDER 2

Arc - £19.99

Once upon a time arcade games were boring and predictable. A machine from a company called Williams changed all that with a wicked blasting game called Defender. It had wickedly tasty graphics, booming sound and superb gameplay.

Defender 2 is Jeff Minter's homage to the arcade game. The disk actually includes three games: Defender, Defender 2 and Stargate. Each game has the sort of gameplay a reviewer can usually only dream of.

What's more, they've all been brilliantly recreated. Each game is

"GEORGE, THERE'S SOMETHING WRONG WITH THE MONITOR"

1. In a fit of anger your little brother has tipped his goldfish Kylie, complete with liquid home, down the grilles in the back of the monitor
2. You've plugged the monitor socket into the MIDI port by mistake
3. Your mum, in one of her funny tidying moods, rearranges your bedroom and places your 300 watt speakers on either side of the monitor. But, hey, those psychedelic patterns add a certain something to your Desktop

4. It's not switched on
5. The local electricity substation just got invaded by a forward party of mutant rats from the planet Bühmhöle and the resultant power surge embedded your monitor in the roof of next door's potting shed
6. No, GEM Desktop really is that - er, remarkable shade of green
7. "Yes, it is very decorative indeed, as you say. But even if it does go with your curtains,

madam, I'm afraid you can't watch that nice Mr Wogan on it"

8. Next door's cat had a jolly, cat-like game of rough and tumble with the power lead and now both it and the monitor look very surprised and smell funny

9. No, it's meant to have that bloody great border around the screen

10. It's not actually a monitor, it's a window. Couldn't you tell by the stunning graphics?

A NEW WORLD OF POWER

THE ANSWER
TO YOUR
DISK
DUPLICATION
PROBLEMS

FOR ONLY
£34.99

THE **SYNCR0 EXPRESS II** IS HERE!

● SYNCRO EXPRESS IS A HIGH SPEED DISK DUPLICATION SYSTEM THAT WILL PRODUCE COPIES OF YOUR DISK IN AROUND 50 SECONDS!!

● Syncro Express requires a second drive & works by controlling it as a slave device & ignoring the ST or Amiga disk drive controller chip whereby high speeds & great data accuracy are achieved.

● Menu driven selection for Start Track/End Track - up to 80 tracks. 1 side, 2 sides.

● Very simple to use, requires no user knowledge.

● Also duplicates other formats such as IBM, MAC etc.

● Ideal for clubs, user groups or just for your own disks.

● No more waiting around for your disks to copy.

● Probably the only duplication system you will ever need!

THE LATEST CUSTOM LSI CHIP TECHNOLOGY

By using an on-board Custom LSI Chip, Syncro Express has the power to transfer an MFM image of the original disk directly to your blank disk - quickly, simply and without any user knowledge. One external disk drive is required*.

SYNCRO EXPRESS IS AVAILABLE FOR BOTH THE ST AND AMIGA SYSTEMS - PLEASE STATE WHICH REQUIRED WHEN ORDERING

THE INFOCOM RANGE

Mastertronic - £9.99 each

One of the most famous software houses is Infocom, who've been binging out their tricky and addictive adventures since the year dot. Infocom adventures are all text based, relying on atmospheric scene setting rather than posy graphics.

Mastertronic have just released five Infocom games at half price and they represent an excellent opportunity to either get into adventuring or stock up your collection.

● **The Hitchhiker's Guide To The Galaxy** is my all-time favourite adventure. Douglas Adams collaborated with Infocom in the writing of the game and there's stuff in here that isn't in the book. You're Arthur Dent, the hapless chap who's just about to have his house bulldozed. With the help of Ford Prefect you teleport up to a passing Vogan cruiser and watch the destruction of earth. All you've got to do is survive... and try to get the hang of Thursdays.

STF Rating - 89%

● **Zork 1** was one of the very first home computer adventure games. It was initially released way back in 1981 and it's sold over a million copies. Zork is a story of underground mis-adventures. All you've got to do is explore a labyrinth, find the treasure, defeat the monsters and then get yourself back to the surface in one piece.

STF Rating - 75%

● **Wishbringer** is touted as being an excellent introduction to computer adventure games. The game world is manageably small and the challenges (initially at least) are quite easily overcome. The storyline is that some geezer calling himself The Evil One has done a runner with your cat. You've got to defeat the horrible chap and see that Tiddles is returned to his window-sill in one piece.

STF Rating - 70%

● **Planetfall** is a futuristic game set on a strange world. You've been shipwrecked along with your robot companion Floyd on a very weird planet. Exploring the landscape and surviving its dangers are your job. Floyd, like many another plastic pal, has a character all his own and can be just as much of a hindrance as a help.

STF Rating - 78%

● **Leather Goddesses of Phobos** is a parody of 1930's pulp fiction. It's notable mainly for the fact that it contains some lewd scenarios and language that can be set at three levels. You're kidnapped by these kinky conquerors who want to turn the earth into their private pleasure palace. Escape from the Goddesses and assemble all the materials you need to destroy them forever. (Bit of a waste, surely...)

STF Rating - 79%

```

Bedroom
It is pitch black.

>turn on lamp
Good start to the day. Pity it's going to be the worst one of your life. The
light is now on.

Bedroom, in the bed
The bedroom is a mess.
It is a small bedroom with a faded carpet and old wallpaper. There is a
washbasin, a chair with a tatty dressing gown slung over it, and a window with
the curtains drawn. Near the exit leading south is a phone.
There is a flathead screwdriver here. (outside the bed)
There is a toothbrush here. (outside the bed)

>get up
Very difficult, but you manage it. The room is still spinning. It dips and sways
a little.

>inventory
You have:
a splitting headache
no tea
  
```

■ Don't panic. That's all there is to it, basically. Oh yes, and don't forget to consult the *Hitchhiker's Guide to the Galaxy* occasionally. It could just possibly save your pocket fluff

➤ quite simply a blast. You've got to zap all the alien ships while protecting the humanoids on the planet surface, and that's it. Fun, fast and completely frantic. This one's taking up residence in my disk drive permanently.

STF Rating - 88%

CONFLICT

Mastertronic - £4.99

Diplomacy is the name of the game. You've been appointed President of Israel and your job is to lead your country to supremacy. You've got control over everything: armaments, spying and food supplies. The game is set in the year 1997. The political situation worldwide has deteriorated to the extent that war might very soon be in the offing.

You control everything by means of pop-up menus. The situation can be appraised by looking at newspaper reports and a political map. If you want to spy on someone or stock up on nuclear weapons you simply click on the appropriate box.

The game itself is essentially boring. If you're terribly into strategic games which have very little in the way of action, then it might appeal to you. Then again, snail breeding appeals to some people.

STF Rating - 60%

TEN "WACKY" ALTERNATIVE USES FOR YOUR ST

1. Play a thrilling game of carpet footy with the mouse ball
2. Leave it on overnight and then sit on it to warm your bottom on those cold winter mornings
3. Mindless solitaire: pull all the keys off and then try and get them on again in the right order
4. Use it to swat a few of those really large bluebottles that wade around in dog poo and then take the lid off and cook them on the heatsink inside
5. Rest it on end, balance a pea on the reset switch and see how far you can fire it across the room with the little spring inside
6. Invite a whoop of ants over and teach them to play *Kick Off 2*
7. Join a skiffle band and use it as a washboard by running your fingers along the ventilation slot
8. Use the floppy disk slot as a money box or as a hiding place for your credit cards
9. Get a fine-point pen and draw little faces on each individual key so that they've all got a different personality
10. Add a pair of trucks, some Kryps and a few stickers and use it as a really expensive skateboard

THE ST FORMAT PERSONAL FAVOURITES OF 1990

- 1 **Steve Carey**
(Editor and raconteur)
Supremacy Melbourne House
- 2 **Mark Higham**
(Deputy Editor and professional rabbit stroker)
Sim City Infogrames
- 3 **Neil Jackson**
(Technical Editor and rubber band specialist)
Captive Mindscape
- 4 **Andy Hutchinson**
(News Editor and bottom fetishist)
Operation Stealth
US Gold/Delphine
- 5 **Julie Stuckes**
(Art Editor and chief crayon wielder)
Deluxe Paint Electronic Arts
- 6 **Martin Parfitt**
(Designer and fashion god)
Leisure Suit Larry 3
Sierra/Online
- 7 **Alex Soboslay**
(Production Editor and thespian to the gentry)
Australian Rules Football Simulator Somemistakesurely-soft
- 8 **Dan Goodleff**
(Production Assistant and very very very quiet person)
Damocles Novagen
- 9 **Margaret Clarke**
(Advertising Manager and part time hip hop dancer)
Last Word Plus
Noreallyyouareonstop-soft
- 10 **Shaun Lancaster**
(Ad Sales Executive and interrupter at really busy moments)
Oriental Games Microprose
- 11 **Greg Ingham**
(Publisher and incredibly super person - honestly!)
Personal Finance Manager Plus Microdeal
- 12 **Jane Richardson**
(Assistant Publisher and recently a lot slimmer person)
The Joys of Motherhood
Breathbreathpushpush-soft

■ **Supremacy** (reviewed this very issue on page 60) is Number One's number one

MAIL - CENTA

17 Campbell Street, Belper, Derby DE5 1AP. Tel: 0773 826830

All prices include VAT and Delivery unless stated otherwise. However, for orders under £10.00 please add a 50p handling charge.

Personal callers welcome at our retail shop but please bring this advert as prices may vary. Closed Wednesdays.

All items despatched same day whenever possible. Cheques may require a seven day clearance.

Proprietor Martin Bridges

gamebusters

Lost in a wet tunnel? Unsure whether to marry Passionate Patti or take a trip to Eris? Can't get past that maintenance man? Let the ST FORMAT crew lead you on the rocky road to ruin

INTERPHASE

■ It's a corker, **FORMAT'S** fantastic Cover Disk bonus, and no mistake... but if you're having a tough time getting to grips with this enormous game – or just feeling a little lazy – here's some tips to help you through

- 1** Always clear the level you're working on of fighters and alien generators before tackling the puzzles.
- 2** When attempting to take out specific objects, use a locked missile. Firing the cannons around wildly does more harm than good.
- 3** When placing tractorated objects into their wireframes, check the alignment from two sides to get the proper 3D positioning.
- 4** If you spot a red arch, remember its level number for future reference.
- 5** Always attempt to get all your energy back before finishing a level and entering a tunnel.
- 6** Save the game when entering a tunnel and again at the end if you navigate the tunnel successfully.
- 7** On the blueprint, you may have to set robots off deliberately, to clear them from an area the girl has to cross later.
- 8** When attempting to destroy fighters which home in on you, either fly fast and shoot them using REAR VIEW, or fly backwards very fast.
- 9** Take a good look at the overall blueprint before starting, since some puzzles are chained to each other.
- 10** When playing a level for the first time, make a note of which items trigger which robots and build up a picture of how the level is constructed. There are no random elements in the robot control aspect of the program.
- 11** If you have to cross an electrified floor, use a handy robot to deactivate it first.
- 12** Use the TURNTABLES to redirect problem robots to other areas of the building which will benefit you.
- 13** Don't be afraid to get the girl to back-track: it's essential for some puzzles.
- 14** Some cameras and pressure pads are red herrings. Learn the ones that are relevant to the route you need.
- 15** Set up areas of the blueprint before you need to. This will save time flying from one component to another when time becomes short.
- 16** Many levels are simpler than they appear. Try the obvious first.
- 17** Beware of loose robots doubling back if you wait too long.
- 18** Map out the level if it appears complicated and mark the relationships between objects.
- 19** When you are experienced, don't waste too much time reading KAF-E's messages: these are generally standard for each item.
- 20** On the top floor, neutralise all risks (robots in the building and fighters in the 3D world) before examining any of the various vaults.
- 21** Some of the fighters on later levels are very intelligent: learn their strategies and develop methods to counteract them. For example, the blue flying ray knows which component you are interested in by checking its NAVCOM status. Either destroy it (carefully) with a missile, or when you have found the component you need, NAVCOM onto something else to distract it.
- 22** The "bird fighter" always circles ahead of you and can outrun your missiles. If it proves to be a problem, LOCK and FIRE a missile at it, then "catch" it with a tractor beam, enabling the missile to catch it up and destroy it.

■ Make a note of the position of security doors so that you can return to them later on

CONQUEROR

Rainbow Arts

The very first time you play the Strategy sub-game after loading the program you can get some extra cash by using these methods:

- 1** Sell all the tanks by pointing at them and clicking the left mouse button.
- 2** Buy the cheapest tank available (ie Chaffee, Panzer III or KV-1S for the American, German and Russian forces respectively).
- 3** Sell this tank again by left-clicking on the grey "tarmac" area between the left hand line of trees and the left hand edge of the white-outlined parking squares.

You should now have about 15,000 extra credits – the actual amount you get depends on the price of the tank.

This nifty cheat also works on the **FORMAT** Cover Disk demo (STF 9).

■ Go hunt the red bear with any of an arsenal of tanks. Get the right combination of light and heavy tank units and you can win in an instant

THE PAWN

Rainbird

When you meet Kronos, greet him and then take the note. Be sure to ask him about the wristband. Then take the chest, but don't open it.

You need the wooden key from under the mat to open the shed. Don't bother about the wheelbarrow. If your path is blocked by rocks simply climb over them! If you're stuck in the maze, simply type "Exit maze."

Snowman in the way? Melt him with the red.

Stuck for a light? Mix red, blue and green.

Can't get the lumps? Use the trowel.

Can't find the ballot paper? Open the safe with the blue key.

Can't open the tomes? Cast a spell on them.

magic fly

Electronic Arts

Last month we brought you exclusive tips for getting the best out of the FORMAT Gold winning Magic Fly. Now here's some more maps exclusively provided by the game's programmer, Jeff Lawson

THE SUPER CUBE

DAMOCLES

Novagen

This is a seriously enormous game and we're still receiving Gamebusters mail for it by the sackload. If you're still delving blindly around the Universe, try out some of these locations provided by the amazingly assiduous **Alistair Webb** of Hants.

THE POSITIONS OF SOME OF THE OBJECTS IN DAMOCLES

(In no particular order!)

£50 WINNER
STF PRIZE

VOYAGER

Ocean

To supplement the cheat in STF 13 (typing "WHEN THE SWEET SHOWERS OF APRIL FALL" on the options screen), you can press the Delete key during play to decrease the number of enemies to destroy by ten. The language switches F3 and F4 can be used during play (how terribly useful), not just on the options screen. Also, in the object viewer, accessed by pressing Enter at any time, the following keys have the following effects:

Caps Lock	Ground on/off
Right Shift	Increment object number by 10
Up/Down Cursor	Roll object about horizontal axis
Left/Right Cursor	Roll object about vertical axis
Enter	Select object no 0000 and initialise zoom & axes

BLOODWYCH

Mirrorsoft

Steve Towler from Torry in Aberdeen waved his magic wand at *Bloodwych* and pulled these tips out of a rabbit (some mistake, surely?):

The four wands are: Dragon Wand (red), Moon Wand (blue), Serpent Wand (green) and Chaos Wand (yellow).

Make sure you give wands to party members of a different colour: give wands to similar coloured members and spell power is halved.

ALTERNATE REALITY

Grandslam

When rolling for stats, try to make sure your strength is as high as possible, preferably in the 20s, since many menial jobs will then be open to you. Similarly, try to ensure that none of your stats is less than ten – it takes ages to reach manageable levels (if it ever does). If you can manage to get the right qualifications, the bank is an excellent place to work, because the wages are the highest around.

After every save, back up your complete save disk from the desktop. Killed adventurers are wiped from the save disk, so you need to be able to copy your backup to your main save disk if you don't want to lose that excellent character for ever. (Simply copying the save file doesn't seem to work.)

Always bargain for weapons. You can generally start the bidding at around 80% of the asking price without being rebuffed. Then you

■ No, this isn't your new local Girobank, this is Alternate Reality. Weird, innit?

Evesham Micros

ATARI DEALER OF THE YEAR 1989

Buy with confidence from one of the longest established companies in their field, with a reputation for good service and prices. We have invested heavily in a computer system to enable our Telesales staff to provide up-to-the-minute stock information, coupled with highly efficient order processing. Our fully equipped Workshop enables us to carry out almost any repair on our premises. We feel sure that you won't be disappointed if you choose Evesham Micros.

NEW

SOLDERLESS RAM UPGRADES FOR ST's

Upgrade the memory of your ST quickly and easily with our new, fully software compatible RAM upgrade board. Designed for pre-STE machines, the unit accepts SIMMS slot-in memory modules, making RAM fitting simplicity itself. No electronics knowledge needed! Available with or without RAM modules. Allows upgrade in stages of 1Mb, 2.5Mb and 4Mb, as and when necessary. Straightforward installation - full instructions provided.

- ✓ Fits Any STF, STFM or MEGA series machine in Minutes!
- ✓ Uses SIMMS RAM Modules for Effortless Upgradeability
- ✓ Probably the Neatest ST RAM Upgrade available!

RAM Upgrade Kit with board unpopulated £59.95

RAM Upgrade Kit With 512K RAM installed:

upgrades a 520 ST to total of 1Mb RAM £89.95

RAM Upgrade Kit With 2Mb RAM installed:

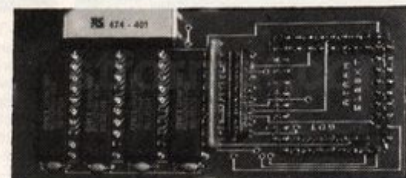

upgrades a 520 1040 Mega ST1 to 2.5Mb £174.95

RAM Upgrade Kit With 4Mb RAM installed:

upgrades a 520 1040 Mega ST1 to 4Mb £284.95

N.B. Due to the large variance in design of the Atari ST, there is a small minority of boards in existence which may require a little soldering.

NEW! PLUG-IN, SOLDERLESS 512K RAM UPGRADE FOR ANY ATARI 520ST

Now there is a simpler, faster and more effective method of upgrading your humble 520 ST to 1Mb RAM! Our new plug-in 512K memory upgrade unit offers excellent value for money, requiring no soldering or special technical know-how. (Not suitable for STE machines.)

ONLY £69.95 including VAT and delivery

Our Atari ST prices include mouse, user guide, etc., PLUS 5 disks of Public Domain software including 'Neochrome' graphics utility, 'First Word' wordprocessor, games, graphics and utilities.

Full Featured, Top Quality External 2nd Floppy Drive

"... a very smart looking drive indeed ... a very slim and quiet device ... it is very keenly priced too."

- ST WORLD, September 1989

An external 2nd drive for the Atari ST at an ultra low price - complete with its own plug-in external power supply (beware of other makes of drive that take their power from the joystick port!) Based around a Teac/Citizen drive mechanism, this drive gives the full 720K formatted capacity. Quiet in operation, neat slimline design, colour matched to the ST, with a long connection cable for location left or right of the computer.

SUPER LOW PRICE!

£64.95

including VAT and delivery - Why pay more?

KRAFT TRACKBALL

Very high quality trackball, directly compatible to any ST, Amiga or IBM/PC, plus many others. Operates from the mouse or joystick port, and features selectable drag / autofire button for versatility and better action. Left or right hand use, with total one handed control. Top quality construction and opto-mechanical design, delivering high speed and accuracy every time. No driver software required!
EXCELLENT VALUE at only £44.95

TRUEMOUSE

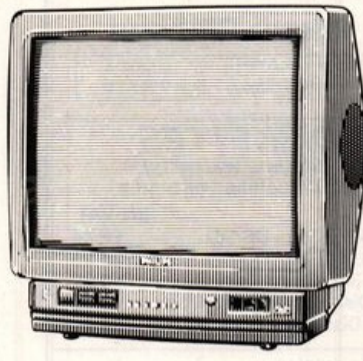

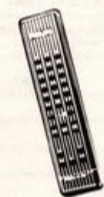

WE GUARANTEE that this is the smoothest, most responsive and accurate replacement mouse you can buy for the ST. Excellent performance, amazing low price!

£17.95 SATISFACTION GUARANTEED

PHILIPS 15" FST TV/MONITOR (MODEL 2530)

With its dedicated monitor input, this model combines the advantages of a high quality medium resolution monitor with the convenience of remote control teletext TV - at an excellent low price!

ONLY £269.00

ATARI ST REPAIRS BY THE EXPERTS

Our fully equipped service department is ready to handle almost any Atari ST repair.

We can now offer fixed price repairs on any ST computer. Our price is inclusive of return postage, and covers any fault occurring in normal usage, including disk drive problems. We reserve the right to refuse any machine that we consider to have been damaged other than in normal use, eg. substandard repair work, lightning and physical damage - these will be quoted for separately.

ST Fixed Rate Repair £65.00

If you are in any doubt, please telephone us on 0386 446441

Service Exchange on

Atari ST power supplies £45.00

can simply increase your offer by one copper each time until it's accepted.

If you get work in the tavern, check the menu before leaving, then go straight back in and check again – it will have changed.

Try to keep a stock of around ten units each of food and water whenever you're exploring distant parts. It won't help you find your way through the level, but at least you'll have sustenance if you get hopelessly lost!

LEISURE SUIT LARRY 2

Sierra

After last month's *Leisure Suit Larry 3* tip, here comes some selected advice from the complete *Leisure Suit Larry 2* solution provided by Martin Rodgers of Glasgow.

Take the flower from the jungle.

■ Larry goes looking for lurve in the wild

Give the flower to the KGB man on the right in front of the airport but don't get too close. Put your suit back on quickly once you've managed to negotiate the cliffs near the airport. Don't eat the airport food (as if you *could* eat airport food!) but search it for a bobby pin. Pick the plane door's lock with the pin. Open your parachute while falling. (After you land is a just a wee bit late.) Take the stick found in the first jungle location. When near the killer bees type CRAWL to get under the bush. Use the stick on the snake while he's putting the squeeze on you.

INGRID'S BACK

Level 9

To cross the broken bridge, drive from the top of the hill. The hermit won't sign in your presence. The short ladder helps you into Tack's farm. Can't get the plans? Ask Flopsy to do it for you. To stop the steamroller, think about Arthur Dent (and don't forget where your towel is). To get rid of Amble, try trapping him in the lower warren. Sweet-talk Bane to remove him. Chugg can be dealt with by getting him drunker.

LEISURE SUIT LARRY 2

Sierra

Use the knife if you're tangled in the parachute. If the bees cause problems, think low. The snake's a bit of a sticky situation. Want to cross the river? Swing from vine to vine, but rudely interrupt the program in mid-swing. Also grab a vine before leaving: it comes in handy in a cold and slippery situation. ➤

SOME USEFUL INFORMATION

Some Bases and Buildings are hidden from you. To find these you must be carrying the Red and Blue Beacon Detectors. These are found at the following locations:

Red Beacon: Found on Vesta at Loc-ref 4:04
Blue Beacon: Found on Mentor price 100,000 ECU's at Loc-ref 2:01

KEY

Any items referred to as "Furniture" are objects such as tables, chairs, beds etc.

Some objects I have not mentioned are Black Beacons, found on most planets. The term "Objects" is used to describe anything that can be picked up in the game.

This is a list of just *some* of the objects in the game, and you should always remember that! But many of these are important and interesting – not to mention weird!

ProShare-ST

The critically acclaimed Stock Market analysis program for your Atari-ST, with an ST Format rating of 91%.

ProShare-ST uses powerful techniques previously only available to technical analysts, to bring the highly profitable world of Stocks and Shares to anyone with an Atari-ST computer.

ProShare-ST's many features include a massive transactions database, extensive chart production including stock, hi-lo, point & figure and moving average charts. ProShare-ST is completely suitable for the home investor, with no previous city experience required. Anyone can use ProShare-ST.

ProShare-ST fully supports the Microtext teletext adaptor, enabling you to automatically download share prices from Oracle or Ceefax saving you the job of entering prices from the newspaper!

ProShare-ST is available for £49.95 inc. VAT and P&P.

Write or 'phone for a free information sheet to: TC
Developments, PO Box 15, Wetherby, West Yorkshire,
LS22 4ZE.

Telephone 0937-61145

■ If this looks familiar, that's because it's *Deja vu 2*. Seen it all before, again...

DEJA VU 2

Mindscape

It's worth your while picking up one of the cigar rings dropped by the thug.

Show addresses to the cabbie, since he can't hear you.

To make time pass, double-click on objects.

TRINITY

Infocom

Wind blowing the wrong way? Feed the birds.

Grass being unfriendly? Ride over it.

Can't open the doors? Transfer the movable part of the sundial.

Dying in space? Climb into the bubble blower's dish for a while.

Can't cross the river? Make a thorough search of the corpse.

Dropping sensation over Japan? Use a parachute and a bird.

Can't cross the chasm? Chop the tree down.

Can't catch the lizard? Try trapping it between two light places.

Can't catch the lemming? Use the cage.

POLICE QUEST 2

Sierra

Can't shoot straight? Take your gun to the range and sort it out.

Not allowed to drive? You'll need the certificate from your wallet.

Need a phone number? Try ringing Directory Enquiries on "0."

Need Colby's number? Try the motel room sink.

Can't stop the mugger? Try calling Keith for assistance.

SORCEROR

Origin

To master the glass maze: sleep before entering, then memorize Fweep several times, casting at yourself and renewing as required. Then proceed as follows: e, n, e, s, s, w, d, e, e, n, u, u, s, e. You should now be at the hollow, but don't get too confident: the maze changes now and the return journey is totally different.

LURKING HORROR

Infocom

Can't get past the maintenance man? Cut the cord with the axe, then throw wax at the man.

Can't enter the lab? Show the suicide note to the professor.

Need a bolt cutter? Show the resuscitated hand to the urchin.

Lost in the wet tunnel maze? Have the hand wear the ring.

CHRONOQUEST

Psygnosis

Need a light source? Have a look in the safe.

Need a longer lasting light? Look on the mantelpiece in the chapel.

KINGS QUEST 4

Sierra

Can't get the fisherman's pole? He's after something valuable.

Don't know what to do with the frog? Throw him the ball and then kiss him.

Can't escape from the whale? Tickle it with the feather.

Can't pass the ogre's dog? Toss him a bone.

What does the baby want? Try digging around at his grave.

Can't deal with Lolotte? Kill her with love.

What do I do with Pandora's box? Lock it away.

SCAPEGHOST

Level 9

Your primary difficulty with this game is lack of strength, so an early objective is to find someone or something else to give you a helping hand. Making friends with the dog is the first step, because he then mimics your actions in certain situations. Thus, you may be unable to pick up the wreath, but if you try

in the presence of the dog he does it for you. How to make friends with the dog? Stroke him, of course!

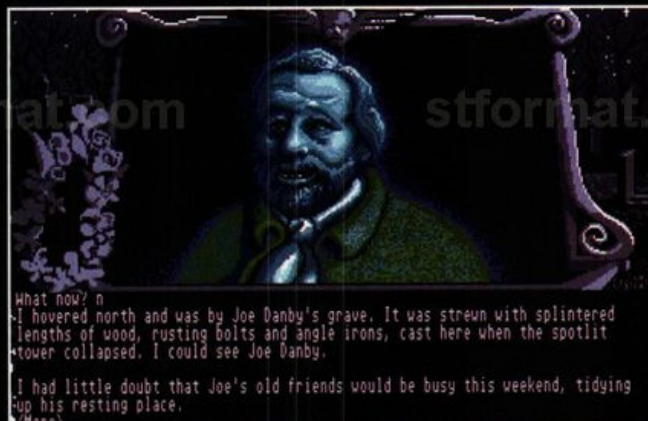

The water needs to be frozen before you can get the map, but don't worry about bad luck if you break the mirror. You need to cut the power before entering the house. How can

you manage that? Well, how about touching the connectors with something?

Another tricky problem is unlocking the shed door. Here you need the co-operation of four of the characters around you. Each of them needs to be instructed, then told to wait until all the others are ready.

■ Try picking up the wreath and a dog bites your hand off

■ Who's that ugly mug? Ooer it's Joe Danby, may he rest in peace

DUNGEON MASTER

Mirrorsoft

In the dart room on level 11, rapidly swap the sword for a falchion to fool the program. After a moment, the darts and poison clouds stop, enabling you to leave safely.

■ The new Channel Tunnel connection promises high-speed links between the British isles and continental Hades

STARCROSS

Electronic Arts

Can't open the red dock door? Think of the fourth planet.

What can you do with the spider? Try giving it something to read.

Can't fix the computer? Try the ceramic square.

Can't find the pink rod? You could do worse than float east from the yellow dock.

Where is the clear rod? Try the observatory.

LANCELOT

Mindscape

Can't escape the Castle Chariot? Give the wine to the maiden and see what develops.

Can't defeat the magical knight? Forget all that chivalry rubbish: just don't let him recover.

Can't enter the marsh? Give the horn to someone else, then tell him to go south and blow it.

No points for rescuing Edgar? Did you leave someone behind?

Getting attacked in Guenever's room? Tell her to close the door. (Obvious, really.)

Want to help the thirsty pilgrim? Give him the chalice.

Want to help the fishermen? Get the dragons together.

Can't get the key? Use sand, water and horn.

SHADOWGATE

Mindscape

Can't deal with the wraith? Light the torch with two rings, then operate it on the wraith.

Can't use the rope? Say "EPOR."

Getting burnt at the bridge? Use the cold sphere on the fire.

Can't kill the girl? Use the silver arrow.

Can't find the wand? Try putting the pole in the balcony mount.

Stuck in the throne room? Operate the right panel, put the ring in the hole and then put the sceptre in the king's right hand.

BARD'S TALE

Electronic Arts

To avoid having your whole party wiped out when you are killed, make up a spare character disk, then use it instead of your normal disk if a member of your party has died. By judicious disk swapping you can reform your party with

DRAGON'S BREATH

Palace

Those of you still struggling to boil a Dragon's egg can relax. Derek Griffiths from Faversham has some advice to help you out.

The first thing to do is bung an egg on full heat, but remember it costs to incubate eggs.

Keep a regular check on your library books. The accounts book not only records your finances but also details the whereabouts of your dragons and whether or not any are carrying part of the talisman.

Conquering villages provides income. Begin on those with smaller populations and low industry rating. Wherever possible, conquer and keep villages to produce taxes. Too high a tax and the villagers revolt, unless you have a dragon there to keep an eye on them. A high tax and a dragon to quell potential rebellion is a good way to make some quick readies.

Avoid villages that harbour barbarians – they're apt to kill dragons.

Also avoid the arcade option when attacking villages. Set to automatic with low or medium zeal to conserve energy.

Regularly check your dragons' health. "Unwell" dragons may recuperate in their lairs. Don't send young dragons out too soon; leave them a while to build up their strength.

Derek adds that once all opponents are dead, *Dragon's Breath* becomes mind-numbingly tedious as

you attempt to locate all three parts of the talisman: there are over 300 possible locations to check out.

■ Who said the property market was in a slump? When you can't find any more villages, just return home to this mini Taj Mahal and put a dragon's egg on to hatch

the (hopefully) stronger characters from your "dead" disk while adding the "dead" characters from your main disk.

To build up money, objects and so on, simply create characters, add them to your party, rob them blind, then kill them off again. Combine this with the trick above and you can even duplicate some of the weapons and useful items gained during the game.

HITCHHIKER'S GUIDE TO THE GALAXY

Infocom

For the Babel Fish, hang your gown on the hook, cover the drain with the towel, put the satchel near the panel, put the junk mail on the satchel, press the dispenser button. Now you can have the pleasure of a poetry recitation!

BERMUDA PROJECT

Mirrorsoft

How do you put out the fire? First follow the footsteps to the jeep, get the jeep and then to enter it find the bucket. Leave (drop) the jeep and go to the sea. Use the bucket on the sea, then use the bucket on the flames to put out the fire. Simple!

FORMAT NEEDS YOUR CHEATS & TIPS

Everybody reads *FORMAT's* Gamebusters pages, so if you crave fame – or even fortune – why not send in a tip, a cheat, an infinite lives poke, a short cut, an undocumented feature, a bug, a password – anything you've found that helps you get more from your ST? If you're stuck at a particular point in a game, or find a problem with a piece of software, we want to hear about that, too.

That way you can share your information with over 50,000 fellow ST enthusiasts, and be in the running for our monthly £50 prize. Fame! Fortune! The answer to your problem! (Well, possibly...)

Which computer(s), do you own?

midwinter 2: flames of freedom

When Christmas is over and the avalanche of big games is out of the way, what are you left with? The usual mediocre Spring releases? Not this year! Mark Higham previews one likely gem

Write one great film, book or computer game, and in today's culture it's almost obligatory to go away and write a sequel a few months later. The original *MidWinter* was such a critical and commercial success that a follow-up was simply inevitable.

Producing a successful follow-up involves isolating what it was that made the original a hit and pinpointing the problems. Programming team Maelstrom decided their main concern was to come up with a game with an exciting strategy element to it. It took between nine and ten hours to complete a game of *MidWinter*, and Maelstrom head honcho Mike Singleton wanted to come up with some way of making *MidWinter 2* more complex for those who love lengthy games while at the same time including some option whereby less patient gamers could play and complete the game in as little as half an hour.

The solution to this problem wasn't as onerous as it might sound. *MidWinter* was set on a single island but *Flames of Freedom* has been spread out

across several. Each island has a specific objective to be solved but at the same time they're all part of a much more challenging overall objective. "MidWinter took too long for one mission to be completed," explains Mike; "this time round it's more like a serial with islands taken either individually or as part of a bigger theme."

There are 41 islands altogether in *Flames of Freedom*. Some take just half an hour to solve while others may demand as much as two hours of gruelling gameplay. It should take an exhausting 20 hours, Mike estimates, to complete an entire game.

*"It should take
an exhausting 20 hours
to complete an entire game
of Flames of Freedom"*

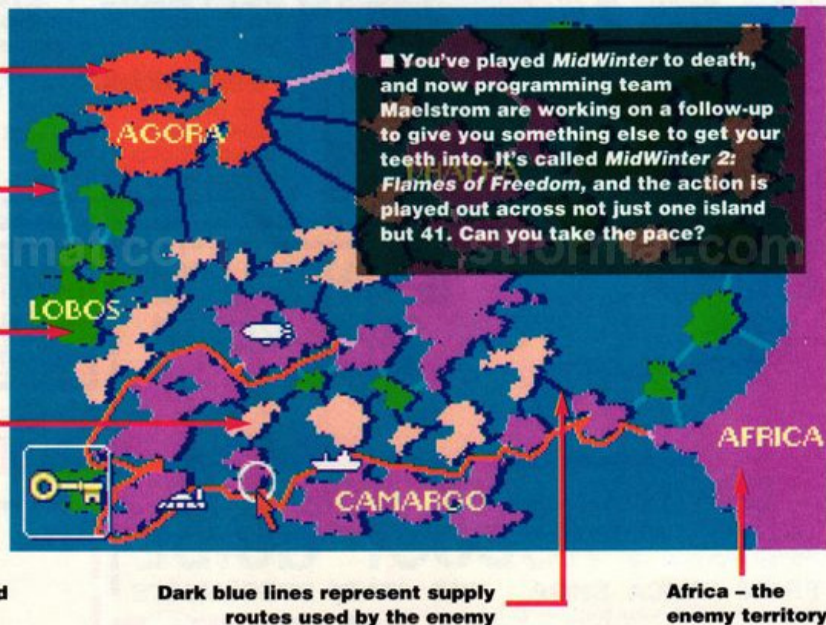

■ The Maelstrom team, usually behind the scenes, step out from the background for a change and stand in front of a gigantic map of the *Flames of Freedom* playing area. (From left to right) Val Franco (programmer), Dave Gautrey (programmer), Hugh "The Boss" Batterbury, Andy Elkerton (artist), Mike Singleton (head programmer and games designer), Dave Ollman (senior programmer), Bruce "Gofer" Butterfield (general assistant) and Stuart Flint (work experience)

Agora -
your home
territory

Light blue

routes used
by yourself

Enemy
occupied
land

Land liberated
by you

■ This is the main options screen. By clicking the mouse on the different doors you select what you want to do

RAIDS - Enables you to play missions individually without having to make any plans to complete a full campaign

TRAINING - Test your strategies or try out different methods of transport to improve your ability at controlling them. There are 22 methods of travel in *MidWinter 2*, as opposed to just four in the original *MidWinter*, ranging from tanks and jeeps to jet-skis, a biplane and even a zeppelin

WAR ROOM - Enables you to format a disk and create your own campaign disk

Back in March, when it was conceived, it was called simply *Wildfire*. Now *Flames of Freedom* is set a few decades on from *MidWinter*. A thaw has set in, causing the sea levels to rise, and new volcanic land masses have been formed. These land masses make up the different islands, around which the game action is concentrated. Your home base is the island of Agora, while the enemy occupies another land mass called Dakar on the opposite end of the map. All the islands which are not

CODENAME: OPERATION SQUIRREL

Call up mission map

Mission Objectives
What you must do to succeed at the island

Study your status

Transport
Shows the method of transport you start off with

Contacts

The people you're already in contact with before the game

Weapons
Indicates the weaponry you take with you - mostly hand weapons

Knowledge
The knowledge you start off with about the island. This ranges from the position of enemy units to spare vehicles and weapons available

"Now listen carefully. The Reverend Green, one of our top spies, is waiting for you at the Agoran border. He's carrying forged documents to help you past the border guards. We need you to go and collect these documents then go on to the enemy headquarters. Will you take the mission, James?" "Take it, M? I'll take two!"

"In Flames of Freedom you have an amazing 20 vehicles, ranging from flying zeppelins and jet-skis to hovercraft and parachute"

■ The landscape is one of the few things in the sequel which bear a close resemblance to the original *MidWinter*. Since *Flames of Freedom* is set after the thaw, however, more colourful and lively landscapes are possible - like this idyllic view of cliffs, beaches, palm trees and the sea

your own form part of the alien Sharan Empire which became prosperous after global warming. Acting for the Atlantic Federation, your task is to liberate the intervening islands.

You know that an armada is to set sail from Dakar sometime after six months have elapsed, moving through the Sharan Empire's middle ground and taking the quickest route to Agora. With each island connected to others by supply routes, you can decide which islands have the greatest strategic value and opt to seize them. The supply routes are used in the game to move from one island to another. If several islands are connected to Dakar by a single supply route then when you liberate the first island in the chain, the others automatically fall under your command. The objective is to defeat the enemy by taking crucial islands and then beating him back.

There's a special section of the game that helps you plan the route you want to take. "We felt you shouldn't need to work out a strategy using pen and paper," Mike Singleton points out, "so there's a part to the game where you can test out suggested routes to see how the enemy might respond before tackling him for real."

Although the strategy side of *MidWinter* has undergone a rather dramatic overhaul, there are still many familiar elements to *Flames of Freedom*. In *MidWinter* you had six possible forms of transport by which to move around the island, and in *Flames of Freedom* you get a similar choice - though instead of six vehicles to worry about, you have a staggering 20 at your disposal, from flying

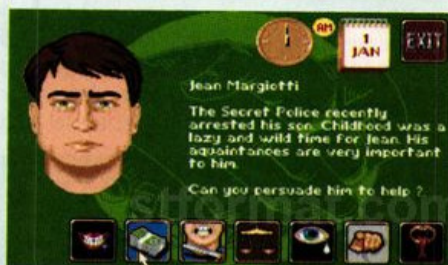

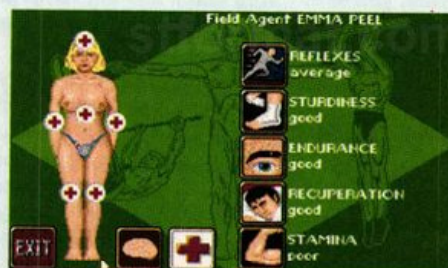

WHAT'S IN A NAME?

Unlike *MidWinter* you don't play *Flames of Freedom* with a team but with a single character. This character is specially designed at the start of a game with selected psychology and physique levels. You can even change the appearance of your character and give him any name you choose.

The psychology levels are divided into seven categories: charm, sex appeal, bribery, threats, deception, pleading and reason. The categories are often linked to each other so that if you bump up your character's sex appeal, for instance, his reason is decreased, or you can increase his bribery skills but his deception rating suffers.

The attributes you select are carried across to the game. As you come up against problems, the method you choose to overcome them is recorded and the ratings for the different categories are adjusted. So, for example, if you're locked in prison and you regularly choose to seduce your captor then your sex appeal rating goes up but down comes your reason. When you later opt to reason your way out of trouble, you find you have a hard job succeeding. To build yourself a truly useful character you ideally need to spread your skills.

The physique levels are divided into reflex, sturdiness, endurance, determination and stamina. Sturdiness determines your rate of recovery from injury; endurance determines the rate at which you lose energy (so high ratings are imperative here) and stamina sets your muscle power.

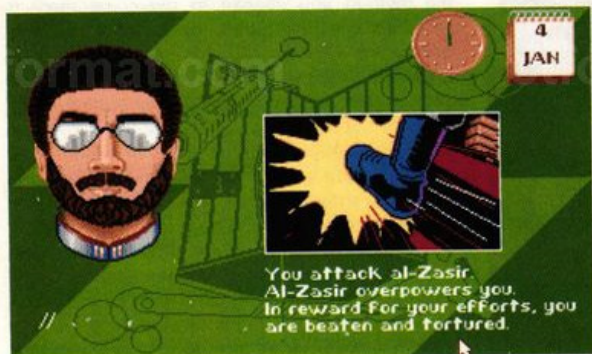

■ Small cameos of your character, designed during the character creation section, appear throughout the game. If you've ever had a chance to play with *Fun Face* (a demo appeared on *FORMAT* Cover Disk 2) then this section is going to stir some familiar memories. Using slider controls you decide the colour of the character's eyes and skin, different eye, nose and mouth types and even the shape of his face. In no time you can come up with a replica of Scott of the Antarctic or, if you like, a doubting Inspector Clouseau

zeppelins and jet-skis to a hovercraft and parachute. In *MidWinter* you could never see vehicles; to pick them up you visited a room and the transport would be inside. Thankfully the situation is far more realistic in *Flames of Freedom*: vehicles are represented as true 3D objects which can be spotted during your travels.

With these routines now available, other additions have made it into *Flames of Freedom*. For example, people are also represented as true 3D shapes, and land features such as palm trees and beaches have been made possible.

MidWinter, played properly, was very much a team effort: the bigger the team you managed to

"But Flames of Freedom isn't just MidWinter with melted snow. The game has undergone such a drastic overhaul that it may as well be completely unrelated to its predecessor"

■ Cartoon sequences add continuity to the action. Here, you're battered black and blue by a prison guard who doubles as a football hooligan on Saturdays

accumulate, the faster you could move round the island. In *Flames of Freedom* it's a completely different situation. Here, you carry out the missions using a single character – though you can find other characters in the game and ask them to wander off and carry out a mission for you. On some missions you must find people specifically for this purpose.

There are six mission types available, and these make up the action side of the game. You may need to rescue people, assassinate enemies, blow up buildings, enlist help from other characters, ambush an enemy unit or seize vital docu-

EIGHT DISKS TO FREEDOM

It's official: so few of you now own an ST with single-sided drive that games publishers are abandoning the idea of producing single-sided games. *Flames of Freedom* will come on three double-sided disks – a main program disk, a mission disk and a graphics disk (which stays in the drive throughout the action). Microprose intend to offer single-sided versions of the game to anyone who specially needs them, but double-sided versions are the only ones to make it into the shops.

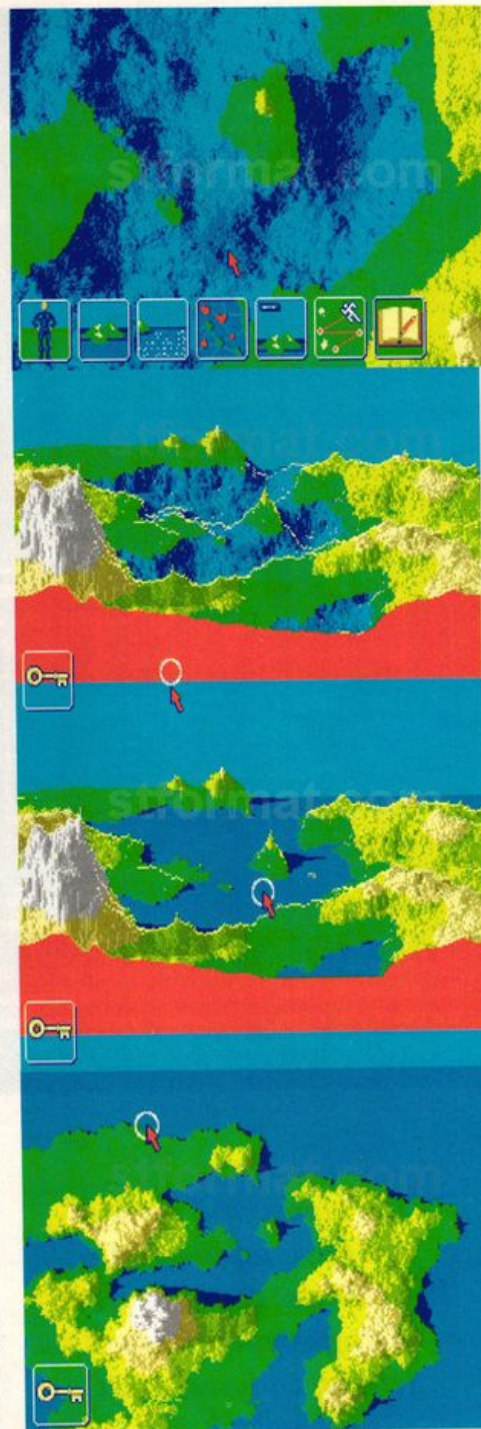

If you intend playing an entire campaign, you need a fourth disk just to save your position. So much space is used to store the data relating to the campaign that owners of single-sided STs need a fifth disk.

The good news is that you can take back-ups of the main game disks so there's no need to play with the main game disks (and risk corrupting them). The bad news is that, like *MidWinter*, *Flames of Freedom* is going to be selling for the staggering but increasingly common sum of £30.

ments. As with *MidWinter*, when you meet characters in the game they don't always want to join you and often need to be persuaded. There are some key individuals in the game who are able to carry out some of these missions for you but they help you only if you first carry out a task for them. Other characters, by contrast, may be keen to join you but they turn out to be spies and you end up in jail.

The character side of the game has undergone some pretty sweeping changes since the original *MidWinter*. Small animated cartoon strip style sequences accompany most of the interaction between people. For example, if you choose to bribe your way out of prison and your captor refuses to accept money then an animated sequence shows you having your head kicked in – lots of fun, that is.

Flames of Freedom isn't just *MidWinter* with melted snow. The game has undergone such a drastic overhaul that it might as well be completely unrelated to its predecessor. With animated sequences, a brand new strategy element, fractal generated maps, character creation routines and hosts of lively intermediary graphics, *Flames* makes you start to wonder whether *MidWinter* was really as great as you thought it was. **stf**

■ A new fractal landscape generating routine has made it into *Flames of Freedom* so you can see effective representations of the hills and valleys confronting you

THE ROCKY ROAD TO SUCCESS

When *MidWinter* was written, the strategy side of the game caused some frustrating and time-consuming problems. The routines controlling the movement of the enemy units had to be completely re-written. At first they'd all advance to a certain point and then refuse to progress any further. When this was resolved, they moved too fast and hurtled across the island like bionic ants. The companion mode also delayed the release of the game: deciding when characters should go with you and when they shouldn't didn't always run according to plan.

Although these difficulties have been resolved, no one's pretending that others won't be encoun-

tered. When *FORMAT* went to see *Flames of Freedom* you could fly straight through cliffs and an early warning radar system refused to work properly.

It was delays like these which held up the release of the original *MidWinter* until Spring 1990. *Flames of Freedom* was originally supposed to come out before Christmas but is now delayed until March/April 1991. According to Hugh "Main Man" Batterbury, however, this delay has nothing to do with programming difficulties; instead, he says, it's because "after Christmas people have bought their computers and they're looking for a quality game. *MidWinter 2* is it." Ahem! Yes, Hugh.

■ Hugh Batterbury, in between making suggestions on improving *MidWinter 2*

POWERPLAN

A powerful analysis package featuring a large spreadsheet, built-in calculator, on-line notepad and integrated graphics. Data from your spreadsheet can be graphically summarized into any of seven different chart types. Up to 7 windows can be displayed simultaneously showing different graphics or various areas of the spreadsheet.

SPECIAL OFFER PRICE: £24.95

CHARTPAK-ST

Produces professional quality charts and graphs quickly and easily from data entered directly or imported from spreadsheet programs such as Powerplan. Artwork can be imported from or exported to Degas or Paintpro to enhance the charts. There are 11 different chart types and up to 4 charts can be drawn on a page. Hardcopy to most printers and plotters. Statistical curve fitting routines are included.

That's Pixel^(TM) Makes images happen

Whether creating or editing images using
That's Pixel you will appreciate its unique three
window editing system.

See an overall preview of your complete
image, a pixel level view and a regular normal
size view on screen at the same time. Because
changes can be made in any window and
automatically updated in the other two That's
Pixel allows anyone, no matter what their
artistic skills, to work quickly and accurately on
an image.

That's Pixel supports the ST's high resolution
mode and is ideal for users of DTP software,
scanners and word processors that import
images.

Write ON^(TM)

A new word processing standard for the ST

Write ON is Compo's new word processor.
Affordable, easy to use and extremely powerful, it
fulfils the needs of all but the most sophisticated user.
Write ON uses paragraph styles which make
formatting a document faster and more flexible than
with a conventional word processor; a feature
normally found only in DTP programs.

Exceptionally powerful printing capabilities are a
major plus for Write ON. Now you can access all
the fonts built into your printer for fast, high quality
output. And, for ultimate flexibility, you can use one
of the many additional fonts included in Write ON.

That's Write, Write ON and That's Pixel are
trademarks of Compo Software Ltd
PC Speed and AT Speed are trademarks of Sack
Electronics GmbH
All other trademarks are acknowledged
All new products subject to availability. E&OE.
Dealers please note:-
All Compo products are available either from SDL or
directly from Compo.

That's Write^(TM)

The perfect ST word processor

When your word processing needs include powerful functions like footnotes, endnotes, automatic generation of index and table of contents, a powerful dictionary with at least 110,000 words and more, you need That's Write.

But with all its power, That's Write is still extremely easy to use. On screen you have the familiar GEM user interface and a WYSIWYG display, even with proportionally spaced fonts.

The latest release of That's Write, V1.51, includes support for additional dictionaries. Languages currently available include French, German, Dutch, Swedish, Spanish, Italian and American English.

AT-Speed^(TM)

The power of two

AT-Speed is the latest PC emulator board from Sack Electronics, the originators of the ST's best selling emulator, PC-Speed.

Based on the 80286 micro processor and with a Norton factor of 6.7 AT-Speed runs PC programs including Autocad, Microsoft Windows V3 and Microsoft Flight Simulator.

The new UK version of AT-Speed includes support for EGA and VGA graphics emulation on the Atari monochrome monitor — the ultimate in screen resolution — with no need to scroll.

Compo Software is one of the leading software houses for the Atari ST in Germany where the number one selling word processor is Compo's That's Write.

Compo is committed to the ST market with a continuous program of enhancements for its existing programs and a number of new products due for release over the next twelve months. An example of this development activity can be seen in That's Write where the latest version is already optimised for the forthcoming Atari TT.

Now with its new office, Compo can offer full support for ST users in the UK. If you are currently using a Compo product then you can officially register it either by writing to, or calling, Compo Software Limited.

AFFORDABLE professionalism with NETWORK

NETWORK NEWS SERVICES, now the UK's ONLY professional printer and publisher handling
desk top publishing packages AND taking you on into the realms of 'at-home' professional print-
ing and publishing, is adding to its range all the time.....

AFFORDABLE POSTSCRIPT: PostScript quality printout from ANY printer-- EVEN A 9-PIN
DOT MATRIX!-might seem an impossible dream. It isn't. For £175 + VAT you can buy our PS
emulator from the USA which enables YOUR printer to match the quality of a high-cost, dedicated
PostScript printer. Our much-praised dtp package, Proxima, is ideal for PS, as is PageStream and
Timeworks. (Unfortunately Calamus, the program for advanced amateurs, is not yet capable of
handling PostScript files). Proxima, now acknowledged throughout Europe as the only REAL
alternative to Ventura and Pagemaker, is still only £135 + VAT. We handle Fleet St Publisher v 3,
too, for £180 INC VAT.

AFFORDABLE PRINTING & PUBLISHING....we'll set you up with a complete PROFESS-
IONAL print-shop (working from home, if you like), for under £3000. Let us put you in touch with
people we've set up during the past eighteen months....

**NNS in the
USA**

Network has a sister
company in the USA,
where all computer
products are at least half
the UK cost. We are now
shipping-in hard and
software. Ask us about it

FORTHCOMING ATTRACTION

Watch out for
PROXIMA 2, our
completely NEW dtp
program for ALL o/s.

win every Ocean game for five years!

“Other Ministers bring me problems,” Mrs T said; “ST FORMAT bring me bloody good competitions.” How right she is, in a real sense

What's wrong with your ST? I'll tell you what's wrong with your ST: what's wrong with your ST is the enormous great pile of amazingly good games available for it. You've read all about the year's 50 greatest (on page 34 – do pay attention!), and no doubt you're wondering how you could possibly afford to buy as many of them as you'd like.

And the answer is, of course, you can't. But what you can do instead is enter the great ST FORMAT/Ocean software giveaway.

HERE'S THAT OCEAN QUESTION

How many games do you reckon Ocean published for the ST in 1990?

Was it,

- 1) Er, about seven?
- 2) Um, six? Four? Eight? Three?
- Or was it, by any chance,
- 3) As many as 22?

Take a good look at the amazing collection of Ocean games illustrated on this page. Pick the ten you'd most like to win.

Then another ten. Then another ten. Then pick the rest. Because one lucky sonofabitch out there is on the brink of winning every single one of these games – well over £600's worth! What You See, as we computer people are fond of saying from time to time, is indeed in every sense of the phrase What You Get.

Er, up to a point. For, in a fit of festive generosity unheard of since the Three Wise Men and that business with the shepherds, Ocean are also offering that same lucky winner every ST game they produce for the next five years!

Yes, as Ben Elton would no doubt put it were he alive and here today, indeed ladies and gentlemen: you could win every Ocean game from now (well, when we publish the winner's name in our April issue) until 1996. And when you bear in mind that, by the last day of 1990, Ocean plan to have produced no less than 22 games for the ST, you can see what a good thing you're onto.

There's no way we can know for definite how many that might total, of course, but even if Ocean produce just one ST game a month, that's still something well over £1,000's worth of software – on top of the aforementioned already released titles, of course.

To win, all you have to do is a) answer the traditionally non-brain-taxing ST FORMAT-type question, b) put down the answer on a postcard or the back of an envelope, c) send it to That Humungous Ocean Competition, ST FORMAT, 30 Monmouth St, Bath BA1 2BW and, last but not first, d) be lucky. **stf**

THE RULES BOX

1. Neither whomever and notwithstanding as hereinafter, employees of Future Publishing and Ocean Software and their relatives are not eligible, nor are they permitted to enter.
2. If you win, Future Publishing and Ocean Software totally and utterly reject and repudiate any responsibility, howsoever consequent, when your work and love-life go down the tubes because you spend all day and all night playing these games.
3. This competition closes at the end of January 1991.
4. The Judge's decision is final, irrevocable, and incontestable.
5. Another pompous bit of pseudo-legalese jargon intended to make this sound like a really serious competition, hereinbefore.

the kandy coloured tangerine flake streamlined picture show

Each month, the ST FORMAT graphic guys and design dolls go on strike. What's left is the two pages of white space that you have to fill. Searching through a mailbag that's larger than Pavarotti's vest (what did he paint, then? – Ed), we pull out the best of your scribbles and paste them up here for all the world to see.

Because we're glad to have you working your art out, we're even prepared to come up with some dosh for the best bits. There's a prize of £25 each and every month for the ST artist who can make our designers say "OK yah! That's like, tootally amaaazing!" more than once in three minutes. Reckon you can out-draw the rest? Fancy yourself as the Clint Eastwood of the mousers? Then get your

favourite art-ware loaded up and pour on the paint for *FORMAT*.

Just for the record, we can't send back any of your entries – but rest assured that we do look at each and every picture, animation or printout you send us, before we pass them on to the British Academy of Arts and Radical Fellows (BAARF). If you want to make us sit up and take notice of your masterpiece, then include lots of mind-blowing details on how you made the picture, specify what package you used and give us all your top secret tips. And remember to put your name and address on the disk itself, just in case we lo... er, misplace the paperwork. Then send it all off to The Gallery, ST FORMAT, 30 Monmouth St, Bath, Avon BA1 2BW, and wait for international stardom. **stf**

Stippling? Where's the point? Aquatints? Don't talk wet! Renaissance? Seen it all before! Our critic Neil Jackson sorts the pseuds from the dudes in this month's art attack

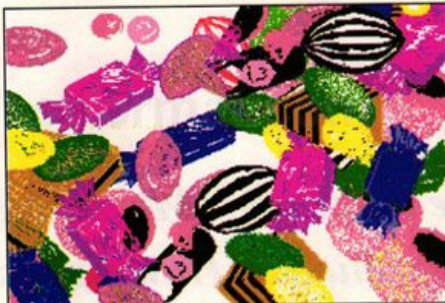

■ Steve Beach from Birmingham uses HyperPaint for freehand drawings like this one of the Monolith from 2010. Steve didn't include any details of how he did it (tsk), but it is Christmas!

■ **HyperPaint is £24.99 from Silica Shop**
☎ 081 309 1111

■ This mouthwatering montage is the work of the mysteriously Christian-nameless **M Richardson** from Chelmsford and it's another *Degas Elite* creation. He drew a few toffees to begin with, using the freehand draw mode.

More toffees and allsorts are added using the Copy Block function, occasionally rotating, stretching and skewing the copies to give them perspective and add variety.

In the finished picture, some of the original

sweets are totally obscured by later copies. But Mr Richardson says it was still fun, and that's prob'ly the most important part of any drawing!

■ **Degas Elite is £24.95 from Electronic Arts** ☎ 0753 49442

■ **Darren Mably** from Redruth used two separate art packages to create this alien moonscape. His favourite is *NeoChrome* because it's so simple to use. The second is *Spectrum 512*, which enables you to have up to 512 colours on screen at once, but with the drawback that it's a little confusing to operate.

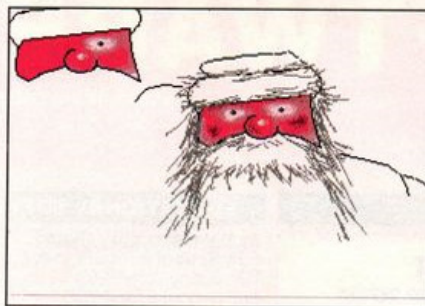

The alien and the background are created individually on *NeoChrome* using different palettes and are merged together in *Spectrum* to produce the finished picture.

Any alterations to colour or detail are done using the Edit Colour function, and the smoothing of lines and edges is done with Anti-Alias.

The end result uses more than the standard 16 colours and (when viewed from *Spectrum*) has a much softer feel than ordinary images.

■ **NeoChrome**, a PD program, is part of the **ST FORMAT Graphics Collection** – see mail order pages. **Spectrum 512** is £29.95 from Silica Shop ☎ 081 309 1111

■ **James Drury** from Abingdon uses *Paintworks* to help him make his masterpieces. He begins by using the connected line function to create the basic outline and starts working on the face and eyes.

Still using the continuous line, James sketches the entire outline for the remainder of his appropriately seasonal figure.

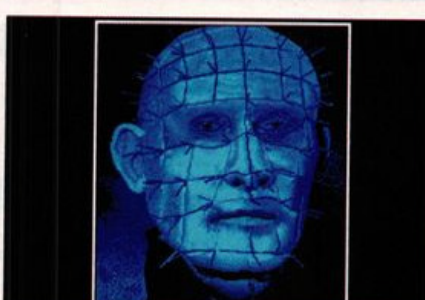

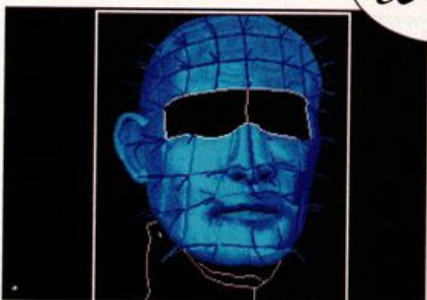

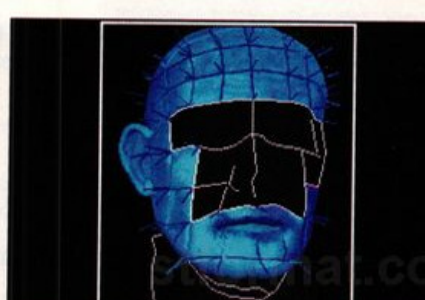

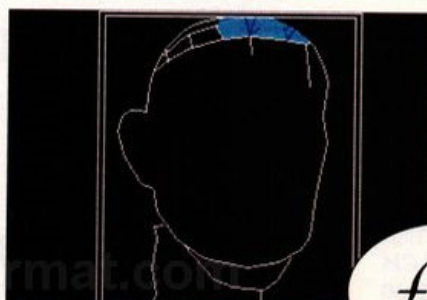

Next he adds basic colour in the gaps using the fill function and works on some of the shading around the bag and hands.

Detail is added to the buckles, bag and belt using the magnification window. This is followed by touching-up the shading around the top of the flask poking out of the bag, to give it the right texture and gloss.

The beard and jacket cuffs get the fluff treatment in standard draw mode, using short strokes to give the impression of fibres and hairs.

To finish off, the image is placed on top of a background prepared on another screen.

■ **Paintworks** is £24.95 from **Activision** ☎ 0734 311666

■ **Peter Halloran** from Weymouth produced Pinhead out of *Hellraiser* (that well-known Christmas family favourite) using nothing but *Degas Elite* and a good deal of skill. His first move is to choose a palette that gives him enough blue shades for what he wants.

After working on the basic outline using the K-Line function and determining the gen-

eral shape of the head, he starts adding detail to the wires that cross Pinhead's face.

The mouth comes next, using factor five magnification to really get in close and sort out the highlights and shades.

Next is the nose, where the highlights converge around the cheeks. This takes several attempts to get right, so backing up his

previous efforts saves Peter a good deal of time and frustration.

The last parts of the face to get drawn are the eyes. Peter does it this way so he can judge the size more accurately.

Finally, Pinhead is given a second ear and his collar. The last touches are the highlight details on the backlit background. **stf**

TOP TEN TOUCH-UPS: OUR CHOICE OF ST ART PACKAGES

1. *Degas Elite* – Tried and true, still slogging away despite its new big brother *DPaint* (£24.95 Electronic Arts ☎ 0753 49442)
2. *NeoChrome* – PD superno, loved by many for its simplicity (part of the **ST FORMAT** Graphics Collection – see mail order pages)
3. *DeluxePaint* – from the *Degas* stable, winning friends daily (£59.99 Electronic Arts)

4. *CyberPaint* – Animation and effects in one bundle (£49.95 Silica Shop ☎ 081 309 1111)
5. *Spectrum 512* – More colours than most, but difficult to use (£29.95 Silica Shop)
6. *HyperPaint* – Atari's own art package, still used by the diehards! (£24.99 Silica Shop)
7. *Quantum Paint* – Powerful; 4096 colours on screen at once (£24.95 Silica Shop)

8. *Canvas* – Excellent; created by an artist, for artists (£14.95 Microdeal ☎ 0726 68020)
9. *Art Director* – Mirrorsoft's old art package still has many useful features (£49.95 Mirrorsoft ☎ 071 928 1454)
10. *Paintworks* – Activision's paint package produces .NEO format files (£24.95 Activision ☎ 0734 311666)

Prop M. J. Cooper

*After last issue's
brief introduction to
CompuServe, intrepid
Andrew Hutchinson
explores its AtariNet*

CompuServe is the largest personal computer network in the world. After our preliminary stroll around its various sections or "forums" last issue, we now examine those that are of particular interest to an ST owner.

There are three forums on the AtariNet, containing a vast number of files for your ST. All tastes are catered for: games, utilities, news and views. Typically the forums get updated every day; there are so many ST users in the States that new software is always appearing.

The Productivity Forum deals with the more serious side of ST computing. Practically every public domain utility is in there, along with a few exclusive to CompuServe. One of the most interesting libraries is the applications section, with many utilities worthy of the Cover Disk.

The Arts Forum deals with recreational ST uses. Games, pictures, animations and MIDI software are covered. The pictures are of a very high quality, with a good number being digitised. If your tastes are fairly broad you can check out the R-rated section... The news and reviews library contains two on-line newsletters, Z-Net and ST Report, packed with interesting news snippets.

Probably the best forum is the Vendors' Forum. Here 17 of the largest American companies – including names like Michtron, Precision Software, Practical Solutions and Supra Corp – have their own libraries into which they place updated software, utilities and news about new products. Gadgets by Small, for example, upload utilities for their Spectre GCR.

None of these forums costs you a penny more than you already pay for subscribing to CompuServe. There are so many sections waiting to be explored that the high cost is more than outweighed by the usefulness of the network. CompuServe costs \$12.50 an hour and the British gateway which connects you to the network \$9.50 an hour (both of these are billed in dollars) and there's a one-time fee of £19.95 to join. For more info, call CompuServe free on 0800 289458. **stf**

■ Interested in CompuServe's Atari forums? On this page are details of the sub-sections available on two of them, with access numbers

Calling all Sysops!

Are you a Sysop with a large caller base? If so, we want to hear from you. We'd like to increase the number of bulletin boards carrying ST FORMAT news, views and files. If you'd like to set up a special interest group or a conference on your board, get in touch with Andrew Hutchinson now by writing (we're old-fashioned at heart) to:
Line Noise, ST FORMAT, 30 Monmouth Street, Bath BA1 2BW

PUBLIC SECTOR

A naked lady walks into a bar with a poodle under one arm and a salami under the other. The barman asks the lady what she wants. She fixes her eye on him and says, "I want a beach house in Malibu, a Testarossa convertible and software at three quid a disk. Oh yeah, and I found this poodle outside mauling this salami." Andrew Hutchinson is our man with the poodles, the salami, the booze and the cheapie disks

UTILITIES

ST-ARRY EYES

Elmsoft PDS - Disk Misc 45

If your favourite section of the daily paper is the horoscopes then this compilation disk might provide a heavenly insight into things horoscopey. Biorhythms, astrological charts, calendars and Aztec charts are all featured. None of the programs is too brilliant but they always have a certain appeal. Me, I don't believe a word of the rubbish. (Us Librans are sceptical like that, you know...)

STF Rating - 51%

A CLEAN SHEET

Sphinx Software - Disk UTI 67

The cost of business software being what it is, you need a small business loan just to buy the stuff. Sheet is a very professional spreadsheet program which has just been updated to version 2. All the features you find on the expensive packages are here and at about a fiftieth of the cost. Raving Runderful.

STF Rating - 85%

BUSINESS SOLUTIONS

East Midlands PD library - Disk UTIL 55

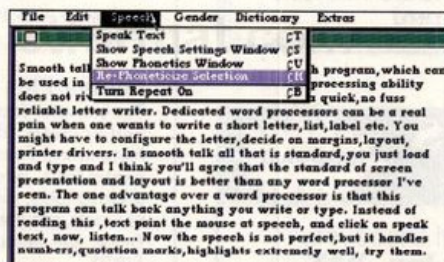

There are several handy business aids on this disk. Two database programs, an STD code listing and a reminder pad are included. The databases are basic but more than adequate for most people's needs. The reminder program is a tasty little accessory which tells you your duties for the next couple of days on boot up.

STF Rating - 74%

A REAL SMOOTH TALKER

Alpha Computing - Disk 22

Basically a disk of demos of professional software. Smooth Talker is a demo of a speech program which looks full featured and sounds

■ If you want to make your ST sound like a Tibetan monk trying to learn English while simultaneously gargling hydrochloric acid with a bucket on his head and a spike up his bottom, check out Smooth Talker (contradiction of the year)

half passable. Hotwire is a demo of a product from the States which enables you to play back macros from within any application. MIDI max is a MIDI sequencer demo which seems tastier than many of the current crop of MIDI programs. Check out Smooth Talker for a giggle.

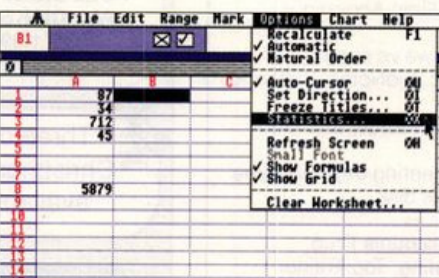

STF Rating - 78%

ANOTHER CLEAN SHEET

Trust PD - Disk UTL 43

Another spreadsheet, this time shareware. This is extremely well featured and very professional looking. In fact Opus 2.2 puts most high priced packages in the shade. Complex mathematical functions and graphs are all possible. Well worth a look.

STF Rating - 93%

■ Me, I always thought that Opus was a penguin. But no, it turns out he's actually a really well-featured spreadsheet from Dagenham, of all places (well, someone's got to come from there...)

CEEFAQX ST

Sphinx Software - Disk UTI 74

It's all very well hearing people rabbit on about the wonders of a Ceefax television set, newspaper updated three squillion times a day blah blah blah, but they're a tad on the pricey side, aren't they. Well, now there's a quick and easy

solution, sort of. This disk explains how to design your own teletext hardware to enable you to view the pages broadcast by BBC and ITV. Both circuit diagrams and software are included. Also on the disk is the wonderful reset-proof ramdisk, Maxidisk. Great disk if you're handy with a soldering iron, Brian.

STF Rating - 76%

LOVELY LABELS

Paradise Computers - Disk BUDPRO 85E

New titles roll out of the Budgie offices with a regularity which is alarming. This program enables you to knock up tasty looking cassette box covers, with a minimum of hassle. Three fonts and various special icons are included which help to tart up what are essentially boring boxes. Easy to use, functional and productive.

STF Rating - 84%

GET WIRED

Paradise Computers - UTIL 615E

When it comes to on-line PD software there are two contenders, Vanterm and Uniterm. The latter isn't as popular because it's not very ST user friendly. However, if you know your stop bits from your parities then Uniterm is packed full of features. It's just been updated to version 2.0E. Well worth a look.

STF Rating - 87%

ART & MUSIC

CUE THE CLIP

Public Dominator - Disk CLIP IT, Vol 3

Some word processors and all DTP packages enable you to include graphics with text. However, unless you're a skilled computer artist, your efforts might look a bit on the crap side. One answer is to follow the tips each month in ST FORMAT's GALLERY section; another is to import clip art, already prepared by someone else. PDOM have about thirty disks full of the stuff. Crappy artists queue here.

STF Rating - 76%

IT'S SHOWTIME

Trust PD - Disk UTL 42

Bit of a twee disk this. In fact duff is probably a better word. The STOS Slideshow Creator enables you to bung a few pictures on a disk and look at them each in turn (bloody amazing, huh). The Games Idea Creator comes up with some bizarre games ideas for the seriously brain dead programmer. Sort of useless really.

STF Rating - 15%

PUBLIC PACKERS

Public Dominator - Disk A186

Not a very amazing disk, this one. A couple of packers, a copy program and a couple of disk analyzers. The packers are good (but slow) at crunching data down to about three quarters of their original size. The copier is F_Copy 3, a competent copier and virus killer. The disk analyzers check that your drive is functioning to the best of its abilities. Not terribly exciting at all, missus.

STF Rating - 52%

The ST Club

49 Stoney Street - Nottingham - NG1 1LX - (0602) 410241

ST Applications.

Over two years ago New Computer Express described our newsletter: "To call it a newsletter shows a terrific amount of modesty on their part... It really is packed with information, with more concentration on the serious side of the ST." ST Applications is a complete re-design of The ST Club Newsletter that has grown to 3,500 subscribers since we started it four years ago. Each monthly issue runs to at least 60 A4-pages. If you would like to subscribe or receive an evaluation copy please complete the form below.

UIS III.

Powerful replacement for the Atari Item Selector. Universal Item Selector III incorporates a host of utility functions: format disks, copy, move and rename files and folders, create folders, find files, set file paths, etc. "You'll wonder how you ever lived without it", ST Format, December 1990. Price: £19.95.

The Catalogue.

Our collection of PD and Shareware disks runs to over 2,000 disks and we guarantee same day dispatch on all orders. Our Free Catalogue - (46-pages A4) details these disks and all of our products and services: Books, Budgie Disks and Laser Printing. We also publish: Astronomy Lab (£19.95), Key Master (£6.95), Oxford Chess (£9.95), Molgraph (£12.95), Guides to Timeworks DTP (£9.95) and 1st Word (£6.95). Details of these are in our current catalogue. Write or telephone for your copy today.

Fontkit Plus 3.

The essential font utility for the ST. Edit or create GEM fonts, Signum fonts, screen fonts and downloadable printer fonts. Incorporates a suite of drawing tools, plus block manipulation tools, and it will import Calamus, Degas and Macintosh fonts. Price: £19.95.

Please send me:

■ Yes, lovely, and this cheeky little storm – Hurricane Hilda – is sweeping out of Westminster in a huff, leaving behind an enormous depression... and with Slide-show Creator, all you can do is watch

JANET AND THE ST

The SW Software Library –
Disk 1163

Fancy yourself as the next demon re-mix artist? Get a bit of practice in with this fun program. The numeric keypad has a sample attached to each key (ooer, sounds a bit rude), all lifted from *Rhythm Nation* by Janet Jackson, so by pressing the keys in the appropriate order you can make your own mix. It's a right Charlie Chortle.

STF Rating – 82%

SILLY SAMPLES

The SW Software Library –
Disks 1165, 1166, 1167

If you enjoyed playing around with the TCB Tracker demo on *FORMAT*'s November Cover Disk, then you'll enjoy these three disks. Each one is packed full of samples, some of which are most amusing (teehee chortle fnarr). Everything from *Star Trek* to *Forbidden Planet* and a few music sounds thrown in for good measure. Its sampley wonderful.

STF Rating – 88%

AN OLD MASTER

Riverdene PDL –
Disk Neochrome Master V2.1

There can't be very many ST owners who don't own a copy of *Neochrome*. If it's your preferred illustration tool, you'll be interested in this new version. Such things as animation and improved colour and image handling are included, and very good it is too. Especially for just three squids... what a barg.

STF Rating – 92%

■ Now updated for the 1990s and boasting a host of exciting new features, like an improved cut-out facility, animation and rasters (no, not the dreadlocked kind) – it's *Neochrome Master*

SILLY SAMPLE PLAYERS

The South West Software Library –
Disk 1010

All this talk about samples and players is enough to have Terry Venables reaching for the transfer book. This disk contains four sample players and a few bonus noises. Included is a boot-up sound player to make your ST seem like it's alive. Right, where were we, Rachel... ? (Well, what do you call yours?)

STF Rating – 80%

DEMOS

TEENAGE MUTANT NINJA TURTLES

Trust PD – Disk MEG 27

Yet another sample tune. This time it's those over-hyped green blobs with the large knives and the California accents. If you've got a fetish for the Turtles then you might enjoy this, but it's not brilliant. No animation either. Cowaboring.

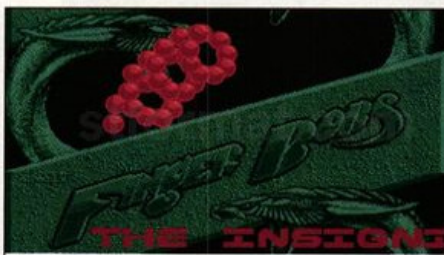

STF Rating – 71%

INNER CIRCLE DECADE DEMO

Riverdene PDL

Another multi-loader demo reaches the *ST FORMAT* offices. But hey, this one is half reasonable. Loads of tasty graphics (although boring balls get in again... yawn). Best of the demos by far is the quartet music section which features over 90 minutes of sampled tracker music. An attractive demo, well put together.

STF Rating – 86%

■ Lots of wibbly, funky, groovy, gnarly and ultimately spaced sounds are what you encounter in the Decade Demo

ROBOCOP

MPH – Disk G25

Looking a lot like the *Snowman* demo reviewed last month, this animated disk of *Robocop* footage covers most of the film. The screen is split into four, sampled sound effects are included and the whole thing seems to go on forever. Tasty, even if it is in black and white.

STF Rating – 90%

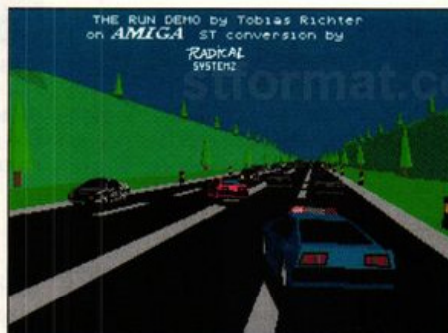

■ What are your prime directives? "What? Oh, right... ermm, drink loads and loads of beer, eat fast food a lot and spend Saturdays vegging out in front of the footy... whoops, slipped into party program!"

THE RUN

MPH – Disk DEM238

Radical Systemz do it again. Basically this is the best animation I've ever seen on an ST. Two cars chase each other through a busy motorway. The scrolling is flawless, and the attention to detail even goes so far as the brake lights coming on. Makes you wish there was a game out there with animation this smooth. Phew.

STF Rating – 95%

■ "Sierra Oscar Five, from Sierra Oscar Two. Am in pursuit of the villain what is on our manor. Things are getting distinctly pear-shaped down here, Sarge. Over." "Roger, Oscar Two, he's got previous. I don't care what it takes, you go out there and nick him."

7UP MUSIC DISK

Paradise Computers –
Disk MUS28DE

A sampled music player of a couple of songs. Madonna's *Prayer* and the Pet Shop Boys' *Domino Dancing* are remixed and played back. Not too brilliant, but for a first effort 7UP show promise. Beefier tunes and something happening on screen would help. OK if you're collecting everything with Madonna on it, I suppose...

STF Rating – 65%

HARRY MET SALLY

Paradise – DEM 540E

Wow. This one certainly grabbed the attention in the office. Basically it's Meg Ryan pretending to orgasm. If you've seen the film you'll know what I'm talking about – and if you haven't, go rent it immediately because it's really funny. Demo includes a couple of digitised shots of Miss Ryan in mid-moan. Fun.

STF Rating – 75%

■ Oooo... ohhhhhhh... ahhhhhh... oohh-hhoo o.. o... ahhh... oo... yess... yeess... ohhh... yeah! yeah! ohhh!
(Somebody get a bucket of cold water and a video camera... quickly)

GAMES

BOUNTY HUNTER

Paradise - Disk GAM 425E

Budgie gameware strikes again. In this game you take on the role of a Wild West bounty chap. You've got to bring a little bit of order to some towns, but with monetary gain in mind. Quite dodgy graphics but there's a lot of depth in there.

STF Rating - 67%

MIX 'N' MATCH

The Other PD Library

Wicked little game, this. You've got a screen full of windows with piccies behind them. The idea is that you take on someone else and try to match each window up with its pair. Get it right and you get another turn. Wasn't there a card game like this once? Suprisingly addictive and very colourful.

STF Rating - 85%

Find the matching squares before your opponent does and clean up the board. However, be careful you don't give away what's behind too many squares... this isn't Bob's Full House, you know

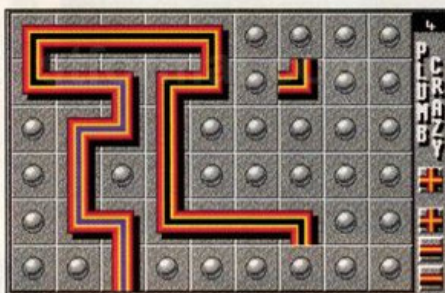

AMERICAN FOOTBALL

Paradise - Disk GAM 45E

"42, 36, 37. Hut hut." No, it's not Bella Emberg's vital statistics but a bit of play-calling in American Football. This is very much a strategy game, with very little in the way of graphic accompaniment, and certainly none of that padding your shoulders and running into people business. You call the plays and the computer

tells you how you did. If you're really into the sport it might be worth a look.

STF Rating - 63%

Right, I've just finished the screen and the water's flowing down that there tube. As long as the counter runs out before the pipe does, I get another go. Plumb Crazy, you say? Totally tubular, dude!

PLUMB CRAZY

The Other PD Library

Really Pipe Mania at a tenth of the price. You have to place a series of randomly-generated pipe segments on the screen before the water starts gushing down. Gameplay is fluid (groa-a-n!) and the whole thing is graphically attractive. Quite hard and very frustrating.

STF Rating - 76%

PD PERSONAL CHOICE

Each month we ask a Public Domain library boss to nominate his top ten. This month, it's Mr Bryan Bellis of B-Soft. Ah, thankyouverymuch, Bryan...

1. ST Writer Elite
2. Spell Checker & Word Counter - Disk HO2
3. Spread Sheet 2 - HO6
4. F-Copy 3
5. Chess, Draughts, Backgammon & Monopoly
6. Kid Publisher
7. More Kiddies Arcade Games
8. General Games: ST Vegas, Roulette
9. Neochrome
10. Ani-ST

NOW IT'S YOUR TURN...

It's all very well us sitting here reviewing PD programs, but only a fraction of what's available can possibly cross our desks. So if you've come across a particularly noteworthy PD program that you think the world should know about, why not review it for us? It could be your first step into the glamorous world of journalism, a world of wealth, high octane excitement - (oh do give it a rest - Everyone else).

Your review should be no more than 200 words long (201 and it goes straight in the bin), and explain what the program does and what's so special about it. Remember to include full details of where you got it as well.

Now here's the important bit. We need your review on disk as an ASCII file, without hard carriage returns at the end of each line. Include a copy of the program itself, and a printout of your review as well. Send the lot (non-returnable), not forgetting your name and address and stating which library you got your program from, to PD Reviews, ST FORMAT, 30 Monmouth Street, Bath BA1 2BW.

What's that you say? Mere fame and adulation not enough for you? Oh, all right then. We'll pay a whacking great £25 for any of your reviews we publish. So let's hear from you! Stf

TEN TO WATCH

These should all be available from your favourite PD libraries

1. The Run - Radical Systemz
2. Delirious Demo 3
3. Sound Tracker
4. Audio Sculpture
5. Mix 'n' Match
6. Riverdene's STE Demo Disk
7. Batman the Movie 3
8. Opus 2.2 Spreadsheet
9. Snowman - Half Megabyte version
10. Sky Map

Pdom PD Atari ST/STE Public Domain & Shareware Software

Suppliers of Public Domain and Shareware software for nearly 5 years, watch out for imitations!
Pdom PD Atari STF, PO Box 801, Bishops Stortford, Hertfordshire, CM23 3TZ. Tel: 0279 757 692

APPLICATION

- **MP7 - Home Business Pack:** DSD, Datahandler and First Base 2 databases, Personal Database a 10 address book, STSheet and Sheet 2 excellent spreadsheets that include graphics and Lotus 123 compatibility, STWriter Elite the word processor and Double Sentry the accounts package. All fully working and full featured. A 3 disk pack for £75.0!
- **A48 - UNITERM V2.08 full.** The Comms package for the ST.
- **BPRO1 - CSR.** THE ELECTRONIC BANK STATEMENT fully featured personal accounts.
- **A96 - DSD. SHEET v2.0.** powerful all features spreadsheet.
- **A108 - DSD. 1MB. B/STAT.** a sophisticated graphing and statistical analysis program.
- **A121 - POOLS - Expert Results Predictor v2.5.**
- **W2 - STWRITER ELITE V3.6** the word processor.
- **W5 - MICRO-EMACS v3.925** text editor.
- **A125 - DSD. 1MB. OPUS V2.10** very powerful spreadsheet and charting program. Requires GDOS which is on disk A163.
- **A138 - DOUBLE SENTRY V0.5** the accounting program.
- **A166 - PERSONAL DATABASE** an excellent address database system. The PD version only allows 10 records but the Shareware version is unlimited, details on the disks. VANTERM V3.71 excellent all features communications program does every thing except split baud rate. RELATIVE TREE the geneology program.

FONT

- **A45 - STAR NL10/LC10 FONT DESIGNER v1.1** with 21 fonts.
- **A110 - CALAMUS** Fonts disk. 9 PD fonts for use with the DTP package Calamus: Facade, Fura, Greeny2, Hebrewy, Manvilly, Math, Peignoy, Silicy and Steely.
- **A135 - GEM FONT MASTER** by J.Millar the GEM font Editor.
- **A137 - Over 40 GEM GDOS** fonts.
- **A175 - Over 70 GEM GDOS** fonts.

EDUCATION

- **A47 - CSR. KIDSGRAPH, KIDSGRID2, KIDSMUSIC, KIDSPIANO, KIDSONOTES** - graphics and music/sound programs for children.
- **A100 - CSR. KIDPOTATOE, KIDABC, KIDSKETCH, KIDSTORY.**
- **A101 - CSR. KIDSONG, NUMERICAL GO ROUND** - excellent animated maths program, NUMBER MAZE.
- **A177 - CSR. KIDSHAPES PLUS** a graphic program for the older child. KIDPUZZLE features 12 pictures.
- **A178 - CSR. NOTSTE. CAN YOU SPELL.** Talking spelling trainer.

UTILITY

- **MP1: STARTER PACK** for the new STer STWRITER the word processor/DATAHANDLER and FIRSTBASE the databases and NEOCHROME the drawing package. Also utilities: RAM disks, spooler, picture converters, desktop accessories, monochrome screen emulator, colour screen emulator, Auto loader GEM, extended disks formatters and loads more. 3 disk pack for £75.0!
- **A10 - KERMIT** kit.
- **A31 - 3 dozen IST WORD** printer drivers.
- **A41 - MONOCHROME** monitor emulator v5. NOTSTE. CMFONTS converts Macintosh fonts to ST GDOS format. DEFORMATTOR - this program deformats your disks!
- **A88 - DCFORMAT v3.03** THE ST disk formatter. DISKMOD - writes MSDOS boot sector. MEG A MINUTE Elite v2.1 HD backup.
- **A90 - SUPERBOOT v6.0** THE ST Boot program.
- **A91 - FILE SELECTOR v6.0** replacement file selector. VIRUS KILLER v2.01 excellent virus detector and killer.
- **A97 - MMR. STICKER II.** The disk label program.
- **STW 41 - FSELECT v3/1989** replacement file selector. ICONIC ACC allows you to design icons and assign them to a file.
- **A109 - QUICK DISK, QUICKFIND v1.5, QUICKINDEX v1.5, QUICKST v1.2, QUICKVIEW v1.3, QUICKINF v1.3, QUICK LABEL v1.1, QUICKPRINT.**
- **A111 - HEADSTART v1.1** excellent program that allows you to auto-boot ANY type of program from your AUTO folder.
- **A119 - FLYING START v1.04** 1200/75 comms Prestel.
- **A128 - RECOVER** is a program that copies any number of specified sectors on a disk to a named file on another disk.
- **A134 - BOOT DRIVE SELECT** select a drive to boot from when you reset your ST. GOACC select Desktop Accessories.
- **A156 - DSD. MMR. PLANETARIUM.** The star planets package.
- **A157 - CUSTOM FORMATTOR** multi featured disk formatter. BOOT SECTOR STORAGE system allows you to store boot sectors from many disks as a file on 1 disk.
- **A158 - CSR. Complete Amateur Astronomy Guide.**
- **A159 - Address Book.** Database. First Base. Datahandler.
- **A163 - GEMINI V1.1** desktop replacement.
- **A167 - BIG COLOUR EMULATOR** for Monochrome monitors.

- **A168 - ARCSH V2.1** a shell for any program is already setup for ARC, ZOO, SHAR, UUD and UUE excellent. BYTEFREE v3.3 displays how many bytes are free on all drives. DISKINIT activates a 2nd drive without reset. DISK MECHANIC v1.0 disk analyser, copier, formatter, sector editor etc all in one very powerful.
- **A171 - RECOVERABLE TRASHCAN** retrieve deleted files.
- **A173 - ARCHIVER DISK.** ARC V6.02 archiver, ARC shell V1.98, LHARC V1.13, TURBOARC, ARCIT archive entire disks.
- **A174 - DCCOPY v3.12** excellent disk utility features include: copy, move, erase, lock, hide, display, ARC and unARC. BIGSCREEN allows you to use GEM windows larger than the actual screen. FILESPY V1.2 file browser with search.
- **A176 - STARTERM V1.11** the brilliant comms package, features: VT52, VT100, ViewData, XMODEM.
- **A186 - DOCDISP** the best document displayer on the ST features load picture and a non case sensitive search facility! FCOPY 3 the excellent disk copier, formatter and virus checker.

GAMES

All require a colour screen.

- **MP2 - Games Pack 1:** DSD. Monopoly, Fruit Machine, Cribbage, Poker, Solitaire, Tunnel Vision, Reflex, Checkers, Devils Tomb, Death Star, Battle Ships, Zephyr and others. A 3 disk pack for £75.0!
- **MP3 - Games Pack 2:** DSD. Star Trek, Tennis, Patience, Fire Storm, Laser Chess, Mile Stone, Azarian, Barn Yard, Space Invaders, Space War, Lunar Lander, Bridge It!, Race Cars, Monkeys and Balloons, Spectral Sorcery and Give Us A Break. A 3 disk pack for £75.0!
- **G23 - 1MB. BOLO!** Absolutely brilliant game with excellent graphics in the Arknoid mould only better.
- **G86 - DSD. Tennis!**
- **G95 - CHANCE** a good shoot 'em up with lots of action.
- **G96 - MUTANT** excellent platform game.
- **G97 - DSD. The Star Trek** game by Eric Tronics A full graphics game with sampled sounds!
- **G107 - PATIENCE** by Eric Chapman an excellent card playing game includes Golf, Little Spider, Calculation, Siege, Raglans.
- **B5 - PRO DARTS** 501 down.
- **B7 - BALL ZONE** an incredible Arkanoid type game, only better.
- **B12 - ACE INVADERS** the DEFINITIVE Space Invader!
- **B13 - ZENITH** a space combat for two players.
- **B11 - MAELSTROM** excellent space shoot-out.
- **B14 - GOLDRUSH** a multi-level platform pursuit.
- **B17 - MAKE A BREAK** trivia quizz.
- **B18 - PARABELLUM** excellent platform game.
- **B22 - BANDIT** slot machine with nudges up and down etc.
- **B27 - PSICOTIC** a space shoot 'em up.
- **B23 - SPACE BLOB** an immensely enjoyable platform game.
- **B30 - A QUEST FOR GALAXIA** an excellent Galaxians clone!
- **B37 - MR DIG** dig tunnels to collect the cherries.
- **B35 - HOSTILE RECEPTION** a Xenon-type shoot-em up.
- **B39 - Onyx** an excellent shoot 'em up with many varied and excellent sprites! All in 68000 machine code.
- **B40 - Dizzy Lizzy** across between Pacman & Boulderdash.
- **B41 - Exodus** awesome shoot 'em up with fantastic graphics!
- **B44 - Exterminate** if it moves KILL IT! A shoot'em up.

GRAPHICS

- **MP4 - Graphics Pack 1:** DSD. CSR. ANI ST the excellent animation package, fully working allows you to create your own animations! Pearle the ray tracing package with full examples, Mini Paint the excellent fully featured painting package, NEOchrome the excellent painting program, and picture converters. A 3 disk pack for £75.0!
- **MP5 - Graphics Pack 2:** DSD. CSR. Master Painter the excellent fully featured paint package that includes multiple screens, Colour Burst II the 800/3200 shades on screen at once paint package, Fine Line the drawing program, Fractal Zoom the most comprehensive fractal generator on the ST, the Atari iImage Processor, MegaBlt the paint package, Studio and VanGogo 2 excellent paint packages. A 3 disk pack for £75.0!
- **GR6 - Degas Support Disk:** 155 fills, 10 brushes, 7 fonts & 24 printer drivers.
- **GR11 - Disk full of picture utilities:** TINY STUFF v3.4 and TINY VIEW v4.21, PICSWITCH v0.7 and more.
- **GR14 - MMR. PUBLIC PAINTER v0.1** Degas & IMG compatible.
- **GR17 - Picture converters.** To & from Print Master, Degas, NEO, Tiny, IFF, SPEC512, IMG, AIM, Postscript, Spectrum512 & GIF.
- **GR20 - IMG utilities.** Convert Degas, Tiny, NEO, MACPaint, Spectrum to a mono IMG file. Also an IMG viewer & slideshow.
- **BPRO3 - CSR. SPRITE MASTER** a professional sprite editing package tailored to suit most programming languages.

- **BPRO5 - CSR. DSD. Sprite Portfolio** 600+ top quality sprites.

LANGUAGE

- **L1 - 68000 ASSEMBLER, XLISP, STLOGO, TINY BASIC.**
- **L3 - ADVSYS** Adventure writer language.
- **L7 - XLISP v1.7** includes manuals.
- **L8 - FORTH** from Bradley Firmware.
- **L9 - ST ICON v6.3**, based on SNOBOL4.
- **L10 - LITTLE SMALLTALK.**
- **L13 & L14 - MODULA-2 DEVELOPMENT SYSTEM v1.0.**
- **L15 - DSD. SOZOBON C** Compiler.
- **L17 - DSD. AGT V1.19.** Excellent adventure writer.
- **BPRO2 - DSD. Budge UK 68000** Programmers Library V4.2.

MUSIC

- **M9 - MUSIC WRITER** create music on screen.
- **M15 - THE ACCOMPANIST V2.3** a 16 Voice MIDI Sequencer. A fully working MIDI sequencer by Henry Cosh.
- **M18 - SOUNDTRACKER** player and SoundTracker modules.
- **M19 - SOUNDTRACKER** player and SoundTracker modules.
- **M20 - SOUNDTRACKER** player and SoundTracker modules. Also documentation and some source code in 68000 and GFA basic on SoundTracker formats and different frequencies.
- **M21 - NoizTracker** fully working with Modules.

DEMOS

- All require a colour screen and a double sided disk drive.
- **D77 - Exceptions** 4 BIG demo.
 - **D91 - AMIGA DEMO!**
 - **D108 - 1MB. Calamus** product demo.
 - **D122 - NOTSTE.** The Union demo!
 - **D123 - The Snowman** demo. 1MB.
 - **D125 - NOTSTE.** The CareBears Cuddly demos.
 - **D128 - The Wattaheck** demo.
 - **D129 - The Swedish** demo including SYNC and The CareBears.
 - **D138 - 1MB. Startrek** Animation with digitised speech.
 - **BD1 - Mind Bomb.**
 - **D176 - The Care Bears 'So What Demo'.**
 - **D189 - Swedish New Year** Demo 2.
 - **D197 - NOTSTE.** Space Ace.
 - **D202 - NOTSTE.** Predator demo by The Islander.
 - **D207 - THE SNOWMAN** demo the 1/2 MB RAM version.
 - **D210 - 1MB. The Star Wars** Walker I demo. Excellent Animation and sampled sounds.
 - **D211 - 1MB. The BatMan** demo by RAM KILLER.
 - **D213 - 1MB. The Star Wars** Walker II demo. Excellent Animation and sampled sounds.
 - **D217 - THE DELERIOUS DEMO** II by the Overlanders.
 - **D221 & D222 - NOTSTE. 1MB. DRAGONS LAIR** DEMO by IRS.

STE DEMOS.

- All require a colour screen and an Atari STE.
- **D144 - The Official Atari France** STE demo!
 - **D214 - Sound OFF.**
 - **D228 - AN COOL** from The Care Bears STE demo.
 - **D229 - 1MB. The Jungle** demo!
 - **D230 - MovieSTE.**
 - **D231 - 1MB. BOING** STE.
 - **D232 - 1MB. Fantasia.**
 - **D233 - 1MB. 3D Scroller.**
 - **D234 - 1MB. Psychedelic House II** By The Overlander. Aciiid!!!

PDOM CLIPIT

- **VOL1 - 3MB** of clip art images: sports, flags, animals, cartoons, humorous, Jewish, borders, all occasions, horses, eyes, etc. etc. All in Degas format compatible with ALL DTP packages. A 5 disk pack only £12.50

TELETEXT

A world of information at your fingertips

You can keep it informed with the very latest world news, share prices, weather, sports results and much more from Ceefax or Oracle. But unlike a Teletext TV all this free information isn't trapped behind glass. Now you can....

Save or Print. Pages may be saved to disc or printed out.

Programmable. The system can be programmed to get a series of pages and print or save them for your own programs to access. It could print out the days TV times!

Multiple display. Works with any kind of monitor and can display and update two pages simultaneously! Page selection from the keyboard or just by clicking with the mouse.

FastText. FastText reduces the waiting time for pages and the Review facility provides instant access to the last 16 pages received.

Digital Tuning. Tunes itself in automatically! While the prime purpose is for Teletext, if you have a CM8833 monitor you can use it as a colour TV.

Only a Microtext adaptor is as easy to use and can provide all these facilities and more! Everything is supplied, all you need is any type of ST and a normal TV aerial.

At just **£129.50 + VAT** (=£148.93) for an advanced Teletext TV its excellent value for money. International VHF/UHF version for use outside of the UK **£169.50**.

Make sure you're always up to date and get yours from Microtext.

XMAS SPECIAL OFFER!

Microtext Adaptor + Market Breaker stock market analysis software for just **£190.00 inc.**
(normal price of combined items £218.88)

neodesk 3

Neodesk 3

MACHINE: ALL STs

PRICE: £39.95

FROM: GST SOFTWARE

CONTACT: ☎ 0480 496666

GEM Desktop isn't very good. Understatement of the year it may be, but there is hope. A wonderful software company in America have been slaving over a program which they reckon is a complete replacement for GEM. The company is Gribnif and the program is Neodesk 3.

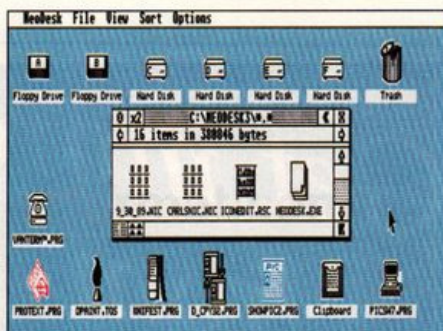

Neodesk 3 comes with a paperback style 134 page manual and two disks: a Master disk containing the program and an extra disk containing fonts and utility programs.

Installation of Neodesk varies depending on whether you're floppy disk or hard drive based and on which version of TOS is inside your ST. Owners of TOS versions 1.4 and above can simply install Neodesk as an .EXE file and it boots on startup. TOS versions below that have to run a STARTGEM program which kicks in the program. Hard drive owners place the files on their boot partition drive and floppy disk owners place it on their usual disk.

Once Neodesk is up and running you can start configuring it to the way you like. You can modify practically everything within Neodesk from the icons to the background. Programs are run from within Neodesk just as you would from GEM, and when a program terminates it reloads itself.

Background

GEM's pukey green is replaced by Neodesk's nicer blue, although you're not stuck with this. Any colour or pattern can be used and these are all configurable from the "Edit Icons" bar on the main menu.

■ With the new Neodesk, you can place icons directly on the Desktop and arrange drives and icons the way you want them

If the background still doesn't meet with your satisfaction then just place a picture in the AUTO folder with the name NEOPIC_L or _M or _H depending on your resolution. This can then be used as the background.

One of the nicest touches is that by double clicking on the Desktop you can write directly onto it. This feature is very useful for journalists who want their STs left alone.

Icons

You can modify all the icons used by Neodesk. The disk comes with some very attractive icons, but you can simply enter the icon editor and design your own. What's more, you can acquire whole icon sets on bulletin boards and networks, so that, for example, MAC icons can be configured. Each program you use regularly can have its own icon, so tracking down a program is much easier.

Once you've got your icons looking the way you want, you can place these directly onto the desktop and then save the configuration. This means that whenever you boot up, your most used programs are there ready to be double-clicked on.

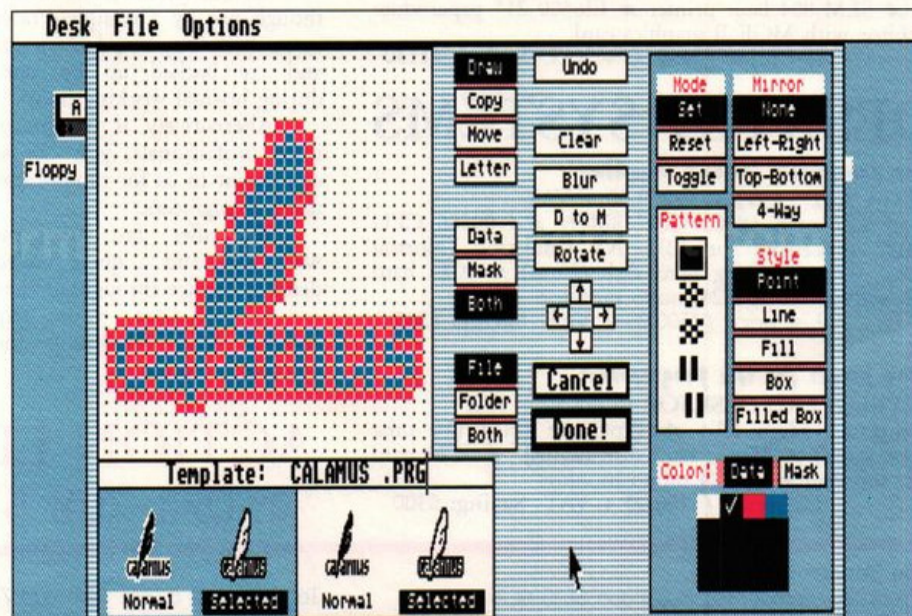

■ Set your preferences and then save the configuration. Everything is very easily changed from the main menu bar

Utilities

Neodesk 3 comes with a whole batch of useful utilities available from the main menu bar. Every standard aspect of the Desktop such as formatting disks is updated and revamped. A number of completely new features have also been added:

- The formatter includes a twister, making disk access times far superior to GEM's.
- Holding down [Shift] while scrolling a GEM window keeps items selected.
- Files can be either copied or moved. This can be set to default or selected manually.
- Windows need not be all text or all icons. You simply specify which you'd like for each particular window. Furthermore, you can split these windows by pulling down a bar (very useful for disks with a lot on them).
- Keyboard shortcuts for all the major Neodesk functions are available.

Neodesk 3 is truly invaluable for the ST owner. Everyone in the office now has it on his ST and we all wonder how we survived before it came along. If you buy one program this new year, Neodesk 3 has got to be it. **stf**

■ Create or edit an icon so that each program has its own distinctive look

New from The Atari Workshop

Performance packed special offers to make your ST more efficient, more powerful and easier to use!

The facts about these new Tower Systems

Our Tower Systems are a simple and convenient method of storing your computer and peripherals. Your ST, hard disk and drives are housed within a strong yet attractive tower. This tucks within a cable's reach of where you work, under your desk for instance. As the Tower measures just 6"x10.2"x15.5", your work space is immediately freed and your desk becomes less cluttered.

The Tower Systems featured in this ad come to you with all hardware already installed, and ready to go.

You can also buy our Towers separately for installation, either DIY or by our engineers, around your existing system. Prices range from £139.50 - £219.50. Please ring for details.

FASTER PROCESSORS

More speed at your fingertips

An accelerator board fits inside your ST, replacing the old processor (CPU), a 8MHz 68000 chip. The speed increase varies according to the application being run but it is at least four times faster. Often many times more!

Accelerator boards come in a variety of types (shown on this page). One is sure to meet your speed requirements.

PROCACHE ST+ £170.00 + VAT

16 MHz 68000 CPU, 16kb cache memory, on board clock, Mega ST only.

MACH 16 £208.26 + VAT

16 MHz 68000 CPU, 16kb cache memory, Co-processor socket. Mega ST & STFM

MACH 20 £565.21 + VAT

16MHz 68020 CPU, 32kb cache - 32 bits wide. TOS 1.6 performance index 3.6. Mega ST only

PROCACHE 030 £738.69 + VAT

25MHZ 68030 CPU and 8MHZ 68000 CPU. Speed factor: more than 5. As fast as the new TT? And more compatible.

TOWER SYSTEMS

3 new ways to clear your desk and e-x-p-a-n-d your system

More power for your business

ATARI BUSINESS TOWER £869.00 + VAT
Includes: Atari STFM ★ Memory upgrade to 2.5 Mb ★ 720k floppy disk ★ 45Mb hard disk (25ms seek rate)
List price: £1100.00 + VAT Saving: £181

More power for your desk top publishing

DTP SYSTEM TOWER £2999.50 + VAT
Includes: Mega ST4 ★ 45Mb hard disk (25ms) ★ 21" EI6500 paperwhite monitor + MGE II graphics card

List price: £1700.00 + VAT Saving: £300

NEW High Density Floppy Drives

More disk space from just £25

Gives 1.44Mb on HD disks ★ Works with all ST's ★ Works with IBM emulators ★ Also reads/writes single or double density disks ★ Auto-recognition feature ★ DIY or workshop* installation

HD Module + software	£24.95
3.5" kit for Tower Systems	£99.95
3.5" FDD cased inc. PSU	£129.95
5.25" kit for Tower Systems	£129.95

*Please ring for estimate

"Auto-Switch OverScan"

Lots more monitor for just £44.50

New OverScan boosts mono or colour monitor size by between 15%-65% ★ Turns all of monitor border into working screen ★ Works with Multi-Sync Monitors and compatible with almost all known software ★ DIY or workshop* installation.

NEW "Auto-Mouse" Switcher

More convenience - £25

Two or more devices automatically selected on mouse port ★ No more swapping of mouse and joystick ★ Ideal for professional users needing mouse & track ball ★ Works on all ST's

What is The Atari Workshop?

We are an independent company specialising in boosting, modifying and customising computers. Our products are mostly state-of-the-art solutions to system problems or limitations.

We keep constantly abreast with the latest developments in the USA and Europe in order to offer the newest and best in Atari technology.

All our products can be DIY fitted, though not by a complete novice. They come with easy step-by-step instructions and are backed up by our helpline during normal working hours.

Alternatively, if you prefer to leave it to professionals, you can send your equipment to us for modification by our team of engineers.

We offer fast turnaround, full warranties, and a quick collection and delivery service throughout the UK.

So whatever your requirement, contact Atari Workshop for a fast workable solution.

Golden Image Scanner**MACHINE:** 1MBYTE STs**PRICE:** £149**FROM:** EVESHAM MICROS**CONTACT:** (0386) 765500

Scanners are fun to use and enable you to produce professional illustrations very easily, but until recently scanners for the ST have been too expensive for the average user. The good news is that prices are falling – and the really good news is the recent launch of a brand new make of scanner from Golden Image.

The Golden Image Scanner looks much the same as most of the other makes available, though it is equipped with a sturdier than usual interface which plugs into the ST's cartridge port. It has a generously long cable connecting it to the interface, enabling you to use it comfortably on either side of your desk, and a power supply unit complete with a 13 amp plug is also provided.

Scans can be made in four resolutions, 100, 200, 300 and 400 dots per inch (dpi). The greater the resolution you select, the better

"Results are just as good as the top scanners produce, at a fraction of the price"

the image detail you get, but the trade-off for high resolution is that huge chunks of memory get used up, and the resulting pictures get very big and unmanageable. In practice, scans made at 200 dpi are fine for most purposes, but the extra power is there if you need it.

As well as being able to select different resolutions, you can pick four types of scanning mode. One of these is called Text, and is suitable for scanning not just text but any black and white images. The other three settings are for scanning photos or coloured pictures, and produce "dithered" images with patterns of dots in different densities and patterns to represent the various shades.

A handy contrast control is provided on the scanner to give the exact degree of sensitivity required for this operation, though trial and error is necessary to select the best settings for any given picture to be scanned, depending on the effect you want to create.

The Golden Image Scanner produces monochrome (black and white) pictures ➤

gold standard

■ With the easy-to-use Golden Image scanner you can import pictures into your ST and use them in WP or DTP programs

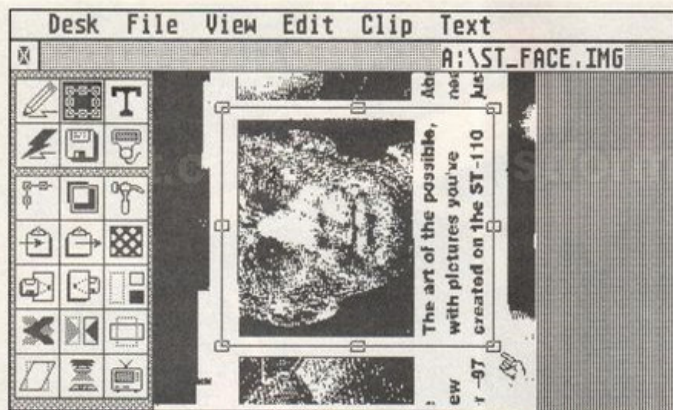

Rob Cowan goes for gold with a brand new scanner package that doesn't cost too much brass, and brazenly reports, "Yes, scan do"

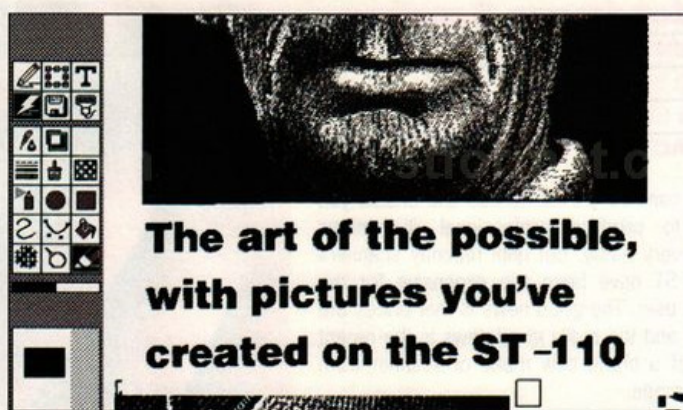

■ Part of STF 15's contents page scanned at 200 dpi, viewed at "Normal." To move around the image, you drag the black oblong (lower left of screen) or use the scroll bars of the GEM window

■ The Clip Box is rotated through 90° here, but any angle can be chosen. Then, viewing the picture at 2x magnification, you can perform a spot of pixel editing using the mouse pointer

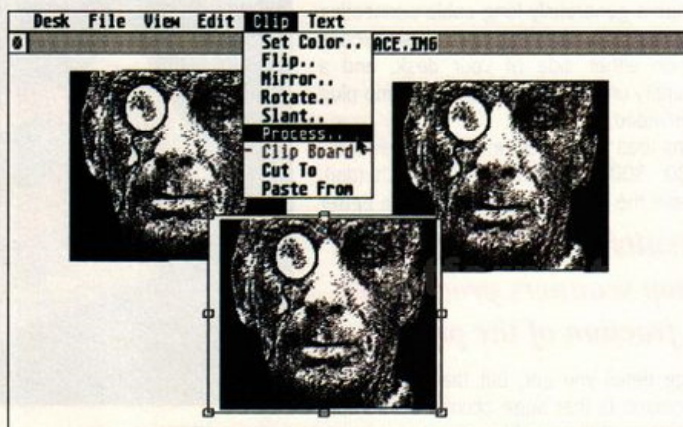

■ You can also view the scan at "Full" (not full size, but with the full image in the window) and define a rubber banded Clip Box around the section of interest so you can then process it

■ The scan needs tidying up, so in "Lightening Mode" (note the icon highlighted - and the awful pun!) there's a user-definable eraser you can employ to rub out unwanted bits of the picture

■ Using the drawing tools the picture can be ruined to taste. Note the artistic toning down of the monocle using the little spraycan (the tiny icon floating on the bridge of the nose)

■ Remove the Tools to make more room and the Clip Box image can be re-sized - or even used as a brush to paint multiple copies of itself, which can be either opaque or transparent

only, and works best with the Atari SM124 or SM125 monitor. It can be used with a colour monitor or TV screen, but the images are still only in monochrome. You need 1Mbyte of memory and a double sided disk drive, and the maximum width of scan is just over four inches, but the maximum length of a scan is limited only by your ST's available memory.

A scanner is, however, no use without suitable software to control it, and this is where the Golden

"Where the Golden Image package really scores is the software: the widely-acclaimed Touch-Up has all the features you could ever want"

Image Scanner really scores: the package supplied with it is the famous *Touch-Up*, widely acclaimed as the best around. The program's processing power is amazing, and it has all the features you could ever want. It is able to import and save images in virtually

every format, including those used on the PC Contemptible and the Apple Macintosh, and it can even be used as a self-contained mono drawing program.

Touch-Up originates from Migraph, the US software house specializing in serious applications, and has been on sale at around the £150 mark. When you consider that the whole Golden Image package (scanner plus *Touch-Up*) is available from Evesham Micros (☎ 0386 765500), who supplied the review copy, for

a mere £149 including VAT and postage, you realise what excellent value this is.

The makers of other ST scanners had better pull their socks up! A mere three months ago (*ST FORMAT* 15) the £199 Kempston Daatascan Professional Scanner received a

FORMAT Value rating of 93%, but now the Golden Image Scanner tops this in terms of quality of software and price. If you seriously shop around, you can pick up a PC scanner for as little as £99, but not with software as good as *Touch-Up*. Migraph's own scanner complete with *Touch-Up* was originally £399, but the Golden Image version produces results just as good and for a fraction of the price. **stf**

WHAT CAN A SCANNER DO FOR ME?

One picture is worth a thousand words, they say - certainly, even a single picture can live on up any printed work you're producing. Using one of the many ST drawing programs to produce one, however, can take too long - assuming you have the artistic skill anyway - so the thing to do is use a scanner!

A scanner is an optical device that enables you to take any suitable drawing or photo and "scan" the image, translating it into

electrical impulses (much like a TV camera, in fact) so that it appears almost instantly on your ST screen.

From there you can process the picture in many ways - like enlarging or reducing it, or touching up even fine details - before saving it onto disk just like any ordinary data. Then you can import it into your Wordprocessor or Desktop Publishing program, and insert it wherever you want it in your document.

NEO DESK 3

Puts You in the Driving Seat

High performance desktop enables you to:

-  Organise your desktop for greater convenience
-  Automate operations for speed
-  Design your own personal desktop
-  Make intelligent use of disks and memory

THE
COMPLETE
REPLACEMENT
DESKTOP
FOR THE
ATARI ST, STE,
MEGA AND TT

NeoDesk 3 is the complete replacement desktop for your Atari ST, STE, Mega and TT, with a host of powerful features that will leave your existing desktop standing. You'll be up to speed in no time and you'll quickly find your desktop organisation will become faster, more efficient and a pleasure to use.

- Accelerate into the fast lane with an automated series of operations executed at the touch of a button and smart file copying that saves time by efficient use of memory.
- Cruise through your desktop with extended drop down menus, a recoverable trash can and split windows to show two views of a single folder.
- Motor more efficiently by using file templates and sorting for totally flexible file access, including searching for missing files.
- Customise your desktop by designing your own icons, specifying colours and fill patterns and importing Neochrome or Degas graphics as backdrops.

NeoDesk 3 is quite simply the ultimate desktop and is available now for under £40. If you'd like more details on NeoDesk 3, just fill out the coupon, or contact your local Atari software dealer.

Put your foot down — move up to NeoDesk 3.

CAUGHT IN THE GEM TRAP TOO?

Graham Membery from Salisbury has a few problems operating the ST's Graphics Environment Manager (GEM) by machine code in his own programs. The GEM system can be called using the assembly language TRAP #2 functions, but it is notoriously confusing and generally badly documented. The TRAP #2 call is known as the Extended Basic Disk Operating System (XBDOS) and to work it, you load the DO.W register with your chosen function number, place an address pointer in D1.L and then call TRAP #2.

The XBDOS consists of two main facilities: the GEM Virtual Device Interface (VDI) which handles the ST's internal drawing functions; and the GEM Application Environment Services

(AES) which handle the GEM window system and coordinate all the user inputs.

Operating these systems is a lengthy process because each system has a massive list of possible functions. It's beyond Desktop's scope to list them all here, but there is a book which does, as well as showing you how to use them: *The Concise Atari ST 68000 Programmer's Reference Guide* is by Katherine Peel, published by GLENTOP and costs £17.50.

Another problem of Graham's is finding out where the mouse's current coordinates are returned when he uses the XBIOS. Well, this one's a little more straightforward. The coordinates are stashed away in an area of memory known as the mouse packet-handler. To find out where this is you need to call the XBIOS function 34, kbdvbase, which returns pointers to the packet-handlers on the stack.

LANGUAGE BARRIERS

My heart goes out to David Stanworth from Penmaenmawr, Gwynedd, who's studying for his City and Guilds Applications Programming. David's home-study course covers such scintillating languages as Pascal and (Aaagh! No, don't say it!) COBOL. He wants to know if he can get hold of PD versions of either of these so he can use them on his ST.

Sadly, on the COBOL front, there seems to be little or nothing out there – but if you know otherwise, perhaps you'd like to let me know. As for Pascal, things are a little better: Softville PD Library have four disks (LAN15, 16, 19 and 32) containing Pascal compilers, sample programs and helpfiles. Just give them a buzz on ☎ 0705 266509 and tell 'em we sent you.

IFF ONLY IT WAS EASY!

Messing with Commodore Amiga games machines is sure to give you headaches, as Jonathon Langham from Cheltenham and Jay Lee from Capelle, Holland, know to their cost. They both want to convert Interchangeable File Format (IFF) pictures from Amiga (GM) to Atari ST. Jay wants to avoid the use of null-modem cables while Jonathon finds he can't read Amiga disks with his ST (that's 'cos they're crap, Jon). "What can we do?" they both cry.

Well, the first step is to use a program called DOS2DOS. This runs on the Amiga games machine and can write an Amiga file to an IBM-PC disk. It even formats the PC disks for you; all you need is a standard 3.5 inch ST or Amiga disk to start with. "But why write to a PC disk?" everyone asks. Because the ST can read PC disks with no trouble at all.

You take the PC disk, which now has the IFF file on, and bung it in the ST. Now you can load it up into *DeluxePaint*, or a file-converter, as easily as a P11 picture. For a range of conversion programs which can handle IFF files (plus loads of others), check out the *ST FORMAT Graphics Collection* on page 207.

INACCESSIBLE ACCESSORIES

Andrew Buckley from Belfast is getting into difficulties with STOS, the programming language from Mandarin. He's got the main part of the program working, but can't suss out how to work the accessories which come supplied. The STOS manual is not very helpful in that department, since it doesn't explain that all the

DESK TOP TEN QUESTIONS

■ The terrific *Tracker Demo* from *FORMAT Cover Disk 16*: undoubtedly the finest four-track sample player that's available... but it helps if you can load it

Here's the ten most asked questions that fall out of the *Desktop 100lb-a-day* postbag. Can you spot your favourite here? Keep reading and your question might just be answered...

- | | |
|---|---|
| 1 Why does my disk drive light never go off when I'm playing games? | 7 What's the "Install Application" menu for? |
| 2 What's a root directory? | 8 How can I change the name of a file? |
| 3 What does ST stand for? | 9 What's a sample? |
| 4 Why can't I get the Cover Disk <i>Tracker Demo</i> to load? | 10 Why can't I run high resolution programs on my colour monitor? |
| 5 Is there any way I can turn my ST into an STE? | |
| 6 What's machine code? | |

Turn to page 182 for all the answers!

accessories are archived. An archived file (which should have a .ARC extension) is one that is compressed and cannot be run from the desktop in the normal way: you need to un-archive it first.

To do this, copy the file to a blank disk along with the program ARC.TTP, which handles the decompression. Then double-click on ARC.TTP to bring up a dialogue box. In this box, type "xh FILENAME.ARC *.*", where FILENAME.ARC is the name of the file you wish to un-archive. The x stands for extract and the h holds the screen after the decompression instead of returning straight to the desktop. On-screen messages show you if the un-archiving is successful.

The next step with the STOS accessories is to load them into the main program. First run the language program and then enter "acload filename.acb". This loads the accessory into STOS memory space and you can then call it by hitting the [Help] key followed by the indicated function key.

DIRTY RODENTS WITH STICKY BALLS?

Is your mouse giving you gyp? Does it judder its way across the table, making the cursor jump like a thing possessed? Yes? Well, before you rush out and buy a brand new mouse, take the time to check this out.

Open the trapdoor in the belly of the mouse and grab hold of the ball inside (ooer missus, etc). If it's dirty, give it a wipe with a damp, lint-free cloth and leave it to dry. Making sure that the mouse is unplugged from your ST, undo the two small screws near the tail and carefully lift off the cover. Inside you find three metal rollers and (more than likely) there's a ring of black gunge around the centre of each one. Scrape this off with a non-metallic spatula or a stiff bit of plastic and blow out the muck as you free it.

When everything is looking clean and shiny again, replace the cover and screw it back into place. Pop the ball back in its socket and replace the trapdoor. You should find your mouse is now in fine fettle and moves smoothly across your desktop like it used to, back in the

```
ARC - Archive utility, 5.12 - Atari ST
Usage: ARC (a|u|d|x|e|l|v|t|c|b|s|w) [(b|s|u|n|h)] [(g|p|a|s|s|w|o|r|d)] [(a|c|h|i|v|e)] [(f|i|l|e|n|a|m|e)] [, , .]

Where: a = add files to archive
       m = move files to archive
       u = update files in archive
       f = freshen files in archive
       d = delete files from archive
       x,e = extract files from archive
       r = run one file with arguments from archive
       p = copy files from archive to standard output
       l = list files in archive
       v = verbose listing of files in archive
       t = test archive integrity
       c = convert entry to new packing method
       b = retain backup copy of archive
       s = suppress compression (store only)
       w = suppress warning messages
       n = suppress notes and comments
       h = hold screen before returning to Desktop
       g = Encrypt/decrypt archive entry

Atari ST version developed by Harvey Johnson
press any key to continue
```

■ **ARC**, the famous ST file archiver and compressor, has many functions you don't often hear about (like "verbose listing"!). Here's that list of features in full

SHORT CUT ANTI-VIRUS CON-NECTION

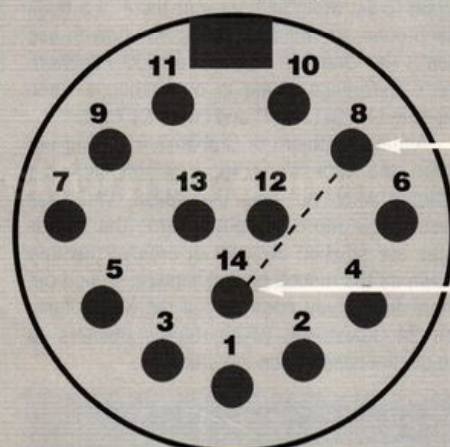

Virus-fever is (belatedly) sweeping the ST world. More and more people are realising that the Sun's original stories of infectious computers, dangerous hardware-and-human-killing diseases are... let's face it, complete bollocks. Now most ST users are aware that it's data that's in danger, and that some form of preventative measure is a worthwhile investment. But as with all scary diseases, there's always some charlatan opportunist waiting in the wings with a cure-all, medicine-show bottle of Mr Fixit's Patent Disinfectant and Profit-Enhancer.

In the case of the ST, there's a number of Hardware Virus Protectors appearing. These stubby-looking devices fit into the disk drive

port and short out the Motor On signal to the Write Protect signal, making the ST think that all disks are write-protected. There's no doubt that this does stop viruses, but if you do want to write to a disk, you must break the connection by flicking the switch on the protector. This then leaves your disk open to attack, in exactly the same way as it would be normally. So what's the point?

You could just as easily, and much more cheaply, use the correct method of Virus- and Write-protection - the Write-Enable tab on the disk itself. With the tab in the closed position, the ST can write to the disk, while the open position prevents any writing occurring. Total cost? Absolutely nothing!

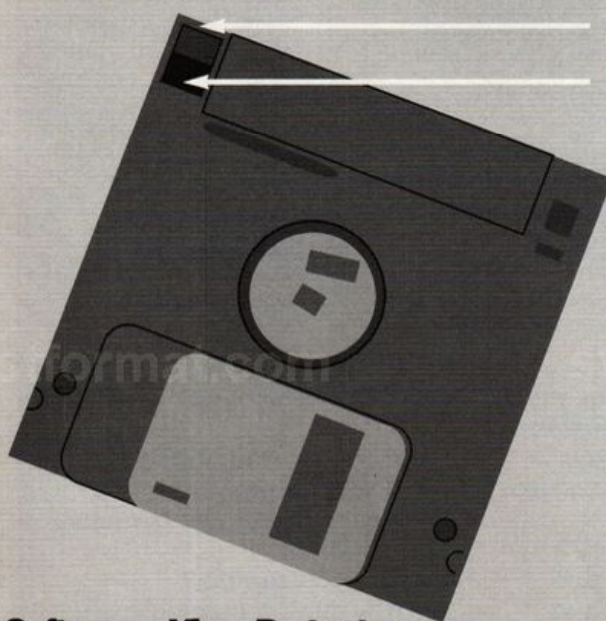

The St's Floppy Disk Port

connect switch to these two pins

Hardware - Virus Protector

The Floppy Disk

Write Protect
Write Enable

Software - Virus Protector

■ **Virus protection**, the expensive way and the cheap way. Both require you to do the real work, so why bother wasting your time and money on pointless gimmicks?

NEW IMPROVED P.F.M. PLUS £\$££

PERSONAL FINANCE MANAGER

£39.95

If you run a personal bank account and have an Atari ST then you need "PFM PLUS"

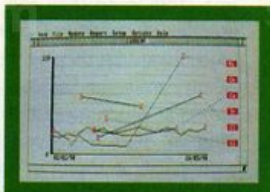

AS EASY TO USE AS A CALCULATOR
PFM PLUS makes full use of ST's Gem interface, if you need to amend or update an entry or Standing order simply click on it. Your screen looks just like a bank statement!

STANDING ORDERS & DIRECT DEBITS EATEN ALIVE
PFM PLUS handles Credit and Debit - Weekly, 4 Weekly Monthly, Quarterly, Yearly and even complicated regular payments like 12 payments of £52.99 followed by one of £12.50, PFM will check the date and automatically insert standing orders as they become due.

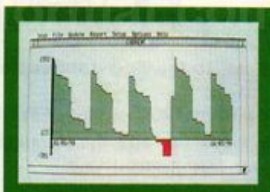

BUDGET WITH EASE, AT A CLICK OF A MOUSE.
If you're the type that likes to look ahead then PFM allows you to set budgets for both expenditure and income. Up to 28 budgets can be set over a year, a quarter or a month and then displayed either in figures or as a bar graph for a given period. Income/Expenditure for these budgets can also be shown as a pie chart so you can tell at a glance where your money's gone. PFM also allows you to display or print your budget groups selectively so you can see your expenditure quickly and easily.

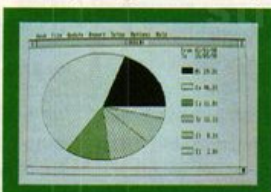

MAIN ACCOUNT SCREEN

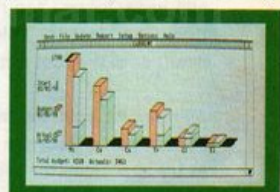

TREND GRAPH

BALANCE PLOT GRAPH

BUDGET PIE CHART

BUDGET COMPARISON BAR GRAPH

PERSONAL FINANCE PROGRAM BY PETER VEALE
Based on the original highly successful Personal Finance Manager, PFM Plus from Michtron is packed with additional features, improvements and enhancements all designed to give you better control over your money. Take a look at this comprehensive specification.

Multiple Accounts
Each file can hold up to ten accounts, each with its own entries and standing orders. Automatic posting of entries between accounts is under full control of the user.

Automatic Standing Orders
Standing orders can be set up for each separate account. Start and end dates can be specified, with payment periods of weekly, 4 weekly, monthly, quarterly, 6 monthly, yearly, or just a single payment.

Entry Posting
Transactions made on one account can be automatically 'posted' to a second account. PFM Plus displays full details of entry sources and destinations. This feature also applies to standing orders.

Selectable Columns
Up to eight different fields available for account displays. The choice of columns and the order in which they appear can be set by the user. A separate choice is available for statement printouts.

Multiple Views
Up to 5 views of any one window can be displayed at the same time. This allows different parts of the account to be visible through independent scrolling, or copies of graphs to be displayed covering different time periods. A total of 67 windows are defined.

Account Files
Each file contains accounts and standing order entries, budget details and full information on the sizes and positions of all account windows.

GEM
Full GEM interface operating in medium resolution colour and high resolution monochrome.

Auto Balance
Automatic account balancing against statement. Facility to continue search for further balance matches.

Upgrading from PFM
PFM Plus includes a utility to convert original PFM files to the new format, so you need not lose valuable data by upgrading.

Printouts
On-screen displays and printouts for budget comparison tables and account summaries, in addition to the normal statement and standing order printouts.

Printer Formatting
Extensive control over the format of printing statements allowing alternative character pitches, bold underlined and italics printing. Printer control codes defined in separate configuration file.

User Options
Many configuration options can be controlled by the user. Examples include entry defaults, display column order, initial path and data file names. All options including desktop icon positions may be saved to disk.

Desktop
PFM Plus uses its own desktop from which accounts may be selected. The desktop also includes an analog clock and a four function calculator. The calculator can be used even if it is not in the top window. Desktop icons can be re-arranged as required.

Graphs
Four different types of graph plot are available. A balance plot, a pie chart showing selected budget categories, a budget comparison bar chart and a trend graph. The trend graph can be used to show long term increases or decreases in your bills. All graphs auto-scale to fit window size.

Search
Account search facility using search mask with wildcards.

Key Short-Cuts
Most mouse and menu operations can also be selected by a key stroke.

Help
On-line help dialogs cover a range of key topics.

BALANCING WITH YOUR BANK ACCOUNT IS NO LONGER A JUGGLING ACT

When you get your bank account statement or a balance from an autobank machine you can confirm it with PFM quickly and easily. Simply select PFM's unique "Auto Balance" option and type in the balance as given by the bank and PFM will attempt to balance and highlight entries that have not yet been processed through the bank.

- OTHER FEATURES**
- * The number of entries is limited only by memory size
 - * You define the file size
 - * Old entries are automatically deleted
 - * Automatically places entries in date order
 - * European or U.S.A. date formats
 - * Balance of account graph
 - * Moveable and re-sizeable windows
 - * Run multiple bank accounts by simply using different file names. Multi-Tasking allows Multi-Account access.
 - * Facility to check off items against statements
 - * Locates cheques written months ago in seconds
 - * Selective print features for dates/statements/standing orders and budgets.

UPGRADE FOR £12
If you already own Personal Finance Manager and want to Upgrade to PFM PLUS simply return your original disk with £12 for a full Copy of PFM PLUS

IMPROVED FEATURES INCLUDE

- ★ Handles multiple account with Auto transfer
- ★ Full printer report formatting
- ★ Graph of Trend Plotting
- ★ Desktop Calculator
- ★ Increased Budget handling
- ★ Extensive user configurable options

DESK TOP TEN - THE ANSWERS

Still troubled by those techie-traumas on page 179? Here's those answers in full...

1 Some versions of TOS were more difficult than others to operate. The most visible of these differences was the operation of the drive. As a result, some commercial programs don't turn the drive or the drive light off correctly. There's not a lot you can do about this one, sadly, except learn to live with it.

2 The directory system is like a tree, with each successive folder branching off from the main directory. As this main directory is the anchor point for all folders it's known as the root. Obvious really, innit?

3 ST could stand for Something Terrible, but doesn't. It doesn't stand for System TOS, Slimy Toad, or Special Terminal either. As far as we know, it actually stands for Sam Tramiel, son of Jack, the man who's the root directory of Atari (sort of).

4 Aha! Confession time. The *Tracker Demo* on *STF Cover Disk 16* won't work properly if it's still in its folder. You need to copy everything from the *Tracker* folder (except the folder itself) onto the root directory of a blank disk.

5 Er, no. At least not yet. But rumour has it that certain companies are slavishly working away to try and make the ultimate add-on which will do the job. John Russell Innovations from the USA have already come up with a 4096 colour board which works in all STs. Watch out for an *STF* review soon...

6 Machine code is the special, secret language which the 68000 processor inside your ST talks. A humanised version of machine code has been developed and this is known as assembly language. Some programmers can speak this fluently, even after several pints of lager and a dubious fag or two. But for the majority, even assembly language is a total mindwarp. BASIC and C languages are preferable, as the compiler or interpreter takes the legible human input and turns it into machine code at runtime.

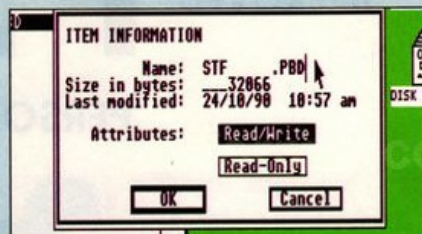

7 Installing applications? Sorry, but it is! Using this menu you can tell the ST that every time you double-click on a certain type of data file, it must load the correct program file first. You could, for example, install *First Word* with a document type DOC. Then every time you click

■ The short cut to loading applications

on a text file with the DOC ending, *First Word* automatically loads up, and the document is there waiting for you. Brilliant, eh?

8 The easiest way is to highlight your chosen file by clicking on it once, then nip up to the File menu on the Desktop and select Show Info

■ The first step to changing a filename

from the list. You can then edit the name directly using the keyboard and cursor keys. Hit OK to make the changes permanent.

9 A sample is a small jar filled with a yellow foul-smelling liquid, often found in doctors' surgeries. It's also a digital representation of a sound, stored as a block of data. A device, known as an Analogue to Digital Converter examines an input sound, calculating the sound level thousands of times a second. It's this level information which is stored, and then replayed through a Digital to Analogue Converter when you want to hear the sound again.

10 Atari high resolution monitors run at a different frequency to normal teletext and monitors. This is so they can cope with the larger number of pixels and scan lines required for a high resolution display. You can get high resolution emulator programs (from most PD libraries) which make the ST think that it's running in high res, even though you have a colour TV or monitor connected. Sadly, you don't get something for nothing - if you use an emulator program the display is noticeably scruffier, since many scan lines have to be missed to make the screen visible.

good ol' days. Thanks to Arthur Vest from County Durham for that money-saving DIY tip.

ANY OLD TOS?

John Wright from Wokingham has clocked Ladbroke Computing's ad in *ST FORMAT* and wants to know about the TOS 1.4 ROMs that are advertised. He's got TOS version 1.02 in his 520STFM and he'd like to upgrade. "What are the pros and cons?" he asks.

Well, in its favour, TOS 1.4 has four major enhancements over the old 1.02 version. Firstly, it has a much better file-selector which gives you much more control over the directory searching you need to do when loading up data files from within a GEM program. Secondly, it loads programs from disk a lot more quickly than 1.02, especially if you have more than a megabyte of memory on board your ST.

Thirdly, it has no upper limit on the size of any hard disk partitions you wish to use, unlike 1.02 which could only handle 16MByte partition sizes. And lastly, the infamous 40 folder bug no longer exists on TOS 1.4: you can now create as many folders as you wish without fear of crashing the system.

And the down side? Not as bad as it might have been! The new ROMs won't work on STEs (but you'd hardly need them if you had an STE anyway!) or some of the very early STMs which had to load their operating system from disk each time. For more info contact Ladbroke Computing ☎ 0772 203166.

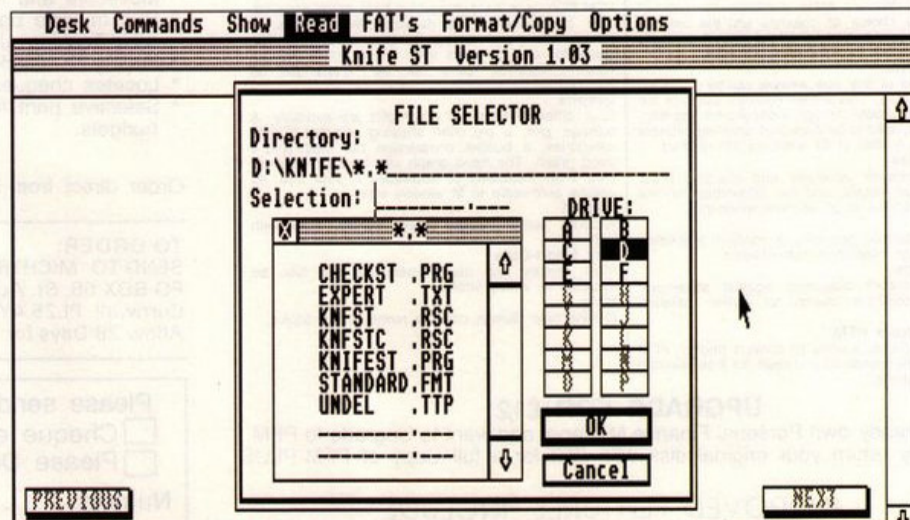

STE... STE... STEREO

The great fanfare that heralded the launch of the all-singing, all-sampling STE was followed by a deafening silence, especially as far as music editing packages were concerned. Geoff Howlett is one of the many new STE owners who want to grab the machine by the crotchets and make beautiful music, but the music package supplied with the machine, *Music Maker*, produces three channels of plinkety-plonk and a fourth which sounds like deflating inner tubes.

Geoff wants to know how this is supposed to make the STE the musical melody-maker it was reported as being.

Well, Geoff, it's not that the STE isn't as good as it proclaims, but it is only as good as the software that drives it, and at the moment there are not very many music packages specifically written for the STE. But surely (I hear you ask) someone, somewhere, is writing lots of funky sound editor systems for it?

After a long search, Desktop managed to trace one excellent piece of software that

■ TOS 1.4 lets you get around your filing system more easily than earlier versions - just what you need when the Christmas sherry is making life difficult too

Being Star registered dealers we only sell official UK machines which come with a full 1 year guarantee. Beware of inferior imported products.

WHY CHOOSE DOWLING?

- ★ **ESTABLISHED OVER 4 YEARS**
With a growing reputation for 'putting the customer first'. We intend to satisfy many more customers for years to come
- ★ **TECHNICAL SUPPORT/ON-SITE ENGINEERS**
Employing over 20 specialist staff, we are equipped to deal with the majority of queries
- ★ **FULL TESTING PROCEDURE**
All computer hardware is tested prior to despatch, proving Dowlings commitment to customer care

So choose Dowling and put our reputation to the test!

DOWLING

enables you to experiment with the DMA sound systems, modify the 8-bit PCM waveforms and generally do the kind of things you don't stand a hope of doing on an old ST. And, even better,

this rare little bundle of treasure is public domain! It's called the **STE DMA Sound Editor** and it's available from Riverdene PDL ☎ 0734 452416. Meanwhile, if you happen to know of

any radical STE software that enables you to push the machine to its limits (but not games, please), why not drop us a line at Desktop and tell us all about it? **stf**

FOUR OLD ACQUAINTANCES NOT TO BE FORGOT

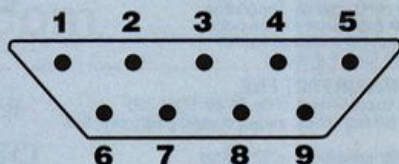

Christmas is coming and the wallet's getting flat, so how do you fancy saving a few bob and having a party atmosphere on your ST at the same time? You can do it with this four-player joystick adaptor created by Ben King from Gloucester. Now you and three of your mates (mates always come in threes) can get

together for a massive bash at those great four-player games like *Gauntlet 2*, *Leathernecks* and *Kick Off 2*.

You need two 9-pin joystick sockets and hoods, half a metre of multi-core cable (with at least six wires inside) and a 25-way printer plug and hood. (You can get all these bits

from Maplins Electronics, PO Box 3, Rayleigh, Essex SS6 8LR, ☎ 0702 554161 (Sales) or ☎ 0702 552911 (Enquiries).)

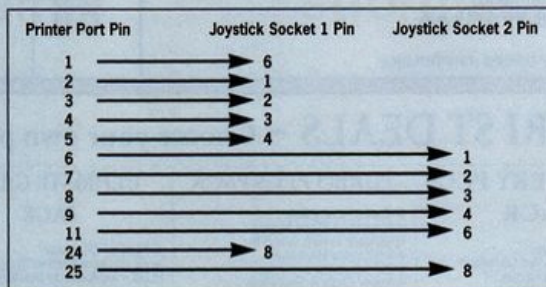

The whole lot should cost less than £4.50. When you've got it all, solder the wires to the sockets and plugs as shown below, plug it all in – and invite your pals around!

Looking into the 9 - Pin joystick socket

Looking into the 25 - Pin D plug (printer plug)

■ Switch to party program, Brad, with the build-it-yourself, four-player joystick adapter. It's as easy as pie to put together, dirt cheap, and it's bound to make you the envy of all your mates (well, prob'ly)

COURSEMASTER

The Computer Horseracing Program

- RATES ANY RACE IN SECONDS - ANY DAILY NEWSPAPER IS ALL YOU NEED
- NEVER OUT OF DATE - Both N. Hunt & Flat - Fast Data Entry
- AMAZING ACCURACY!! - Now you CAN BEAT THE BOOKIE!!
- Working on the simple principle that FAST HORSES BEAT SLOW ONES!!
- Clearly identifies best selection in every race plus these AMAZING features:-
- First, Second and Third choice shown for Forecasts & Tricasts, etc.
- Recommends most suitable type of bet.
- Actually works out your WINNINGS on most popular bets including SINGLES & DOUBLES, win and each way. PATENTS, YANKEES, CANADIANS, HEINZ etc.
- GOOD EACH WAY and LONG ODDS bets clearly shown.
- Will PRINT out your BETTING SLIP for you.
- Maintains a BANK ACCOUNT - BET like PROFESSIONALS do! Records all your bets in any number of accounts. Keep a complete record of your betting or compare COURSEMASTER against your favourite tipster.
- PLUS!!!! - The AMAZING COURSEMASTER SYSTEM. This superb betting system is included in the program. A system which regularly produces huge wins from small stakes. Try it! It can pay for itself many times over on the first day!
- Supplied with 20 Page BETTING GUIDE and MANUAL.

© £17.95 tapes, £19.95 discs, inc P&P + VAT

PERM-MASTER

If you are one of those pools punters who regularly uses the perm plans for entering your weekly coupon, (as we at Intraset recommend). Then it is often difficult to assess whether or not you have actually won. PERM-MASTER puts an end to that. With it you simply enter the number of points obtained for each of your selections, and PERM-MASTER does the rest. The program is supplied already with some of the top plans built in, but if your favourite is not there, then you can simply create your own, using the unique perm editor.

- FAST and SIMPLE to use.
- UNIQUE PERM EDITOR allows you to add plans not supplied (Simply edit the X's)
- For most BLOCK PERMS and SINGLE LINE plans. (Up to 25 selections)

Available as for POOLSMaster @ £17.95 inc P&P + VAT

£ PROFIT FROM YOUR MICRO

- WHATEVER your MICRO is you can use it to make a good income!
- Even if you only have a couple of hours to spare each week.
- We have put together a package of easy, sensible and practical business ideas which can easily be used by anyone with any micro.
- No computer experience required!!
- Earn £££'s from home doing what you enjoy doing - using your COMPUTER!! It doesn't matter which model.
- You probably already have all you need to start earning.
- THOUSANDS of potential customers in your area who will GLADLY pay for your services. We will show you how to find them!
- Full step by step guide to EARNING MONEY FROM YOUR MICRO. FREE BUSINESS IDEAS CASSETTE TAPE WITH EVERY COPY

£12.95 inclusive

All progs available for all PCs, all IBM PCs + compatibles, Amstrad PCs, Atari + Amiga + CPC 6128.
Coursemaster + Poolsmaster also available for Spectrum, Commodore 64+128, C64+6464.

POOLSMaster

(Formerly 'Pools Predictor' by Camm Computer Systems)
The Computer Football Pools Predictor

The amazing POOLSMaster program is by far the best Pools Predictor we have ever seen. In just 10 weeks of trying this program ourselves, we won no less than 12 dividends, the largest being nearly £300. Mr F. C. Hammond from Essex won nearly £10,000.00 in just 16 weeks. In his own words 'It's a licence to print money.' POOLSMaster is simple to use and requires only that you keep the league tables up to date using your usual newspaper.

The result of many years research into the Football Pools by the programmer Martin Evans of C.C.S., the program is a masterpiece of expertise, and is simplicity itself to use.

- Predicts Homes, Aways and Draws
- No fiddly typing in of teams names etc and no redundant databases.
- Instant read-out or Hardcopy if you have a printer.
- Uses scientific formula based on recent form home and away, league position, goals scored etc. It has long been realised that certain combinations of these factors return a much higher than average of draws than the laws of average would expect. POOLSMaster looks for these factors and analyses their significance to give you the best possible chance of a win.
- Also has a 'Sequence Predictor' option. Many people believe that certain numbers on the coupon come up more often than others, and over a season patterns do seem to develop. The program analyses these patterns and predicts the numbers most likely to come up next. Certainly more scientific than sticking a pin in, or family birthdays etc.

If you do the POOLS then this is the program for you.

THE GRAPHOLOGIST

This program is a must for anyone interested in analysing their handwriting, or analysing other peoples. It is also very useful for analysing prospective employees handwriting. To use the program, a sample of handwriting is obtained, preferably in ink. From the main menu of the program you will be prompted and guided to examine each detail of the sample. You will then be taken through deeper and deeper sets of sub menus, all prompting you for relevant details of the writing, and the points to watch for, and add to the file if applicable.

Upon completion you are left with a disk file up to 15 pages long (depending on the depth of detail you choose), this file can then be edited within your word processor to produce a full report for the writer.

Fully experienced Graphologists can charge almost what they like for a full analysis, so this could prove a very lucrative business venture for you. We must however stress, that unless you are experienced in graphology, then we can in no way guarantee the accuracy of the information that the program provides. If you are an enthusiastic amateur or just curious, then this program could provide hours of entertainment, whilst teaching you the finer art of this fascinating subject.

The text within THE GRAPHOLOGIST was researched and written by a top London graphologist/criminologist James Woodward. The software was written by Martin Evans our consultant software writer.

CASHMASTER

Master your own finances. There is now no need to be frightened by accountancy software. CASHMASTER provides you with the easiest method yet invented to keep track of all your finances. Be you a business or professional individual, you are sure to need to know where your money is going. CASHMASTER will allow you to input all the necessary information per transaction in one simple operation, whilst allowing you to extract the absolute maximum from it all again with an array of statements and reports.

- Features VAT analysis
- Easy, natural data entry - Just like a handwritten ledger
- Any amount of ledger files
- Ledgers can span any time period, there is no one year limit
- Reports can be produced over any time span (1 day to 100 years)
- 90/99 Class Codes (User definable) per ledger file
- 30/99 Accounts per ledger file
- Detailed statements showing balances (Selected accounts & classes)
- Profit & Loss Statements (Selected accounts & class totals)
- Tagging of entries for extra report selectivity
- Items can be Inclusive, Exclusive or Zero VAT or VAT can be just ignored
- VAT element automatically calculated and displayed
- Pop up running total calculator
- Entries can be repeated with just one key press (Standing Orders etc) Weekly, Fortnightly, Monthly, Quarterly, Half Yearly or Yearly
- Entries can be edited or deleted at any time
- Insert entries anywhere, CASHMASTER puts them in chronological order for you.
- Reports directable to Screen, Printer or Disk file
- Detailed selectivity for reports
- Reference field for each entry (Invoice No, Desp Note No etc)
- 10,000 entries PC version, 2,000 PCs
- No need for sorts, always in correct order
- All functions and operations available from main program screen
- Most functions operate from a single key press
- Scan through the ledger a line, or page at a time if required
- Split and merge file
- Class and Account code descriptions visible at all times. Scroll through pages of codes with one key press
- FREE separate running total calculator for adding up those cheques, useful for those quick sums

WE APOLOGISE TO ALL OTHER SOFTWARE WRITERS AND TO ANYONE ELSE WHO HAS BOUGHT THE OTHER SO CALLED 'EASY TO USE' PROGRAMS. CASHMASTER REALLY DOES BLOW THE LID OFF COMPUTERISED ACCOUNTING.

THIS IS HOW IT SHOULD BE DONE

Not only superior to the competition, it's far cheaper too!

Tunemaker

Activity 2

Taking a Tune for a Walk

This little song demonstrates a good way to begin composing. By taking a tune for a walk. Notice that the tune just moves by steps up and down. It's not very adventurous but it works!

For the Atari ST Tunemaker Rhythm Kit

**£31 each or £52 for a
double pack**

**A Composer's Guide to
C-LAB Notator**
for beginners and the more
experienced

- 3 double-sided disks
- 100 photocopyable pages of exercises, worksheets & composing guides
- a musical guide - not a software manual

Only £52 (inc VAT)

Music Resources for the Classroom or Home Study

Rhythm Kit

Activity 14

Heavy Metal Kit

There are two standard heavy metal patterns in this lesson for you to experiment with. Drummers who play this kind of music are kept pretty busy making the rhythm drive and usually play as loud as they can!

If you hear these heavy rock guitar chords in TUNEMAKER'S ACTIVITY 10 this is the place to try them out again. Alternatively find a recording record on your keyboard and play these chords made of two notes, a fifth apart.

Activities

1

LOAD BEAT (HARDY) Listen to it in FULL BEAT.

Complete the missing beat half note.

2

When this computer rhythm is ready and running get your keyboard or voice and experiment around the four notes of the chromatic scale you have heard.

- Covers addition, subtraction, multiplication, division, fractions, decimals and percentages.
- 5 game-style learning activities.
- Editing facility to customise programs.
- Printed 'Certificates of Excellence'.
- Score keeping and other features.

what dragons can teach you

1990 has seen a bumper crop of new ST-dedicated educational software houses. David Jones talks to the man from Coombe Valley and examines their releases

Maths Dragons, Cave Maze, Tidy the House

AGE RANGE: 6 - 12+ (SEE REVIEW)

MACHINE: COLOUR STs

SKILLS: LINGUISTIC, LOGIC, KEYBOARD

PRICE: £12

FROM: COOMBE VALLEY SOFTWARE

CONTACT: (0626) 779695

Coombe Valley's first three offerings are educational adventures, presented in the familiar text and picture format common to adventure games. As with their less educational counterparts, the adventures each present pictures and descriptions of each location. Responses are all entered from the keyboard. The programs have limited but adequate vocabularies, which include take, drop, examine, open, and look. You move from one location by entering the directions N, S, E and W.

This is all pretty familiar stuff. What is unfamiliar is the way the programs are written with children in mind. Settings are instantly appealing: a dragon's castle, a holiday island and even an untidy house. Storylines are amusingly written using simple (but never boring) vocabularies. Pictures are colourful and attractive, complementing the text excellently. Each adventure is large enough to keep children interested for a good period without overwhelming them with complex mazes or puzzles.

The first, *Maths Dragons*, combines logic, reading and keyboard skills with a generous helping of arithmetic questions. After the program loads you are prompted to choose which type, or combination of types, of maths questions you wish to answer. These range from addition only to a combination of addition, subtraction, multiplication and division. So that the "level" can be set to match any child's mathematical ability, you are next prompted to set the maximum numerical value of the answers.

"Educational adventure games seem the natural way forward for edsoft: they develop keyboard skills and encourage children to read, rather than just watch pretty pictures"

Once you answer these initial questions the adventure starts. You enter the lair of a cunning group of fire-breathing reptiles, friendly, playful creatures – playful to the point of being mischievous. Your quest starts in the playroom in the centre of the lair. Apparently, you were playing with your favourite train set and left the room for a few minutes. When you returned to the playroom you found that the baby dragons had decided to play a totally different game, hiding the pieces of the train set. Your job is to search the lair, return the 15 pieces to the playroom and reconstruct the set.

Finding each piece involves searching a maze of 21 locations, which is fairly simple. Once you find an item you can pick it up, but as you can only carry a few pieces at a time you have to return frequently to the playroom to drop items. The quest could be fairly straightforward but for one ingredient: *Maths Dragons*.

As you move between locations you may bump into one. If you do, he asks a maths question. Type in the right answer and the numerical dragon disappears. When the answer is wrong, the dragon takes a piece of the train set from you and hides it again.

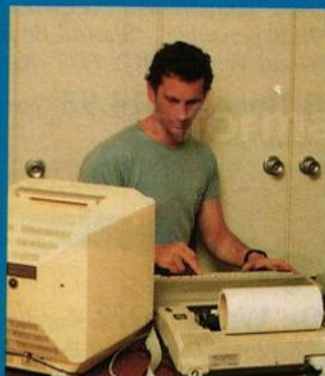

You have met a Multiply Dragon.
What is 6×1 ?

■ **Maths Dragons:** answer the question... then you can play. Not quite as threatening as the usual adventure game dragon!

WHY THIS MAN BELIEVES THERE IS ROOM FOR HIM

Coombe Valley Software operates out of the Teignmouth home of Ian Lycett-King, who has recently parted company with the blackboard jungle. As such it typifies the growing number of small, often family-run, concerns whose initiators risk all on their ideas, their programming skills and their marketing abilities.

This month the company release three educational adventure games for the ST (reviewed above) that fill a gap in the ST's edsoft market. There is widespread agreement that such programs can complement various areas of the curriculum as well as stimulate children to progress to topics that might otherwise be ignored. To date, however, there

■ **A man with a mission:** ex-teacher Ian Lycett-King, boss of Coombe Valley Software, knows what kids need and is out to give it to 'em

has been only one such program available for the ST, School Software's *Three Bears* – a rather odd package of highly limited use.

Coombe Valley's offerings return to the text/still picture type adventures, and Ian sees such programs as the natural way forward in educational programming. "They encourage children to read," he says, "rather than watch pretty pictures move around the screen in front of them. It also gets away from using just one or two keys to do everything. This in turn develops keyboard skills, a necessity for all school children nowadays. It's also a requirement of the National Curriculum."

Ian avoids placing time limits within his programs, since such

limits often fluster children when they cannot meet them – especially if they have poor keyboard skills. And the software is flexible, with numerous levels of difficulty and the option of choosing increasingly difficult routes through the programs.

1990 has seen a greater number of new ST edsoft houses open their doors for business than ever before. But good programming and marketing alone cannot ensure their survival in an increasingly critical and competitive market. An understanding of the modern educational system – and those it claims to serve (the children!) is essential in the production of any form of edsoft. Time will tell whether Ian's got it right.

Maths Dragons encourages the development of several skills. Because of the adaptability of the maths problems it should appeal to a wide age range, from 6 possibly up to 12.

Cave Maze is a far more complex adventure. Unlike Maths Dragons, however, it doesn't test any additional skills.

The game is set on a holiday island, and initially, you are presented with a map of the various locations you will encounter. You get a brief opportunity to examine the map, and then in short order the adventure starts.

Exploring the island, you come across a baby dragon, apparently separated from his family, and your task is to reunite him with his worried parents. First job: find his lunchbox. This has a map of the island in it. Having achieved this reasonably easy task, you can call up the map at any time during the game.

River bank Score 47 Turns 4

The river Grondas. There is a bridge to the north. Paths lead into the forest and along the river bank. Exits are: - North, East, South, West. You are carrying nothing. You can also see sausage. What now?

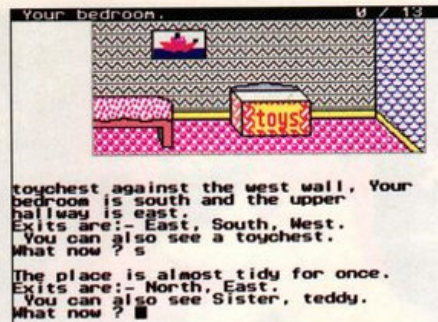

■ Cave Maze develops reading, keyboard and logic skills - but with baby dragon in tow can you find the way to his parents?

The journey through the game is in two distinct parts. The first involves tramping around the island and finding a maze of caves. In this part various useful objects are scattered around the locations. Because the places in which objects are found change each time the game is played, children must search the island on every occasion.

The second part of the game is more difficult. Here, you encounter a maze of caves peppered with more objects and obstacles. Each obstacle represents a puzzle, the solution to which requires some logical and often devious thought.

Cave Maze is a really fun adventure, pitched at a level that doesn't prove to be impossible for any child in the latter years of primary education. The complex puzzles will also keep some younger secondary school children guessing. It both requires and encourages logical thought to enable young adventurers to work through the story and eventually reunite the happy family.

Tidy The House, set in the much more familiar territory of an untidy house, is the easiest of this trilogy, and is therefore well-suited to children from six to ten. Mum nips out for a few minutes, and you (as the oldest in a family of three children) must get your younger brother and sister dressed and tidy those toys away! The problem, however, is that their clothes and toys are scattered just about anywhere (and everywhere). The game progresses as you locate toys, clothes and other objects and

■ Tidy the House makes it fun for all the little ones to tidy up after themselves - talk about your hidden curriculum!

dress brother and sister in the correct order. Tidy The House is an easy-to-play but highly effective adventure which I recommend for children at the lower end of the target age range.

Educational adventure games can work on two levels. Firstly, they encourage reading, keyboard, logical and other skills. Secondly, they combine and consolidate material covered in class or possibly form the basis of new projects. Coombe Valley's first three programs have the depth, complexity and potential appeal to be used on either of these levels. They are all well written and sympathetic to the abilities and interests of their target audiences. **stf**

Public Education

There's hardly anything worth bothering with in the Public Domain as far as educational software goes. Everyone knows that. The only thing is, it simply isn't true – as David Jones proves in the first part of a four part trawl through the range of PD edsoft offerings

Such is the supposed shortage of decent education software in the Public Domain that I expected to find, at best, a few rather jaded and tedious programs. I was in for a rather pleasant surprise.

There are over 150 dedicated-educational programs, ranging from the appalling to the brilliant. In addition to these, there are many more disks that PD libraries are reluctant to see as educational but can be of use in GCSEs and A-levels in subjects as diverse as Physics, Art, Geography and History.

Over the next few months *ST FORMAT* examines the contribution that PD software can make to the ST as an educational tool. We begin with programs for children under five, and in later articles we'll look at material for primary, secondary and post-GCSE courses.

To accompany these round-ups, each month *ST FORMAT* presents one of the better examples of the available software for you to sample on the Cover Disk.

With the commercial market clearly weighted towards primary and pre-school education, you'd expect the same discrepancy in the PD market. Quite the opposite is true: the majority of the available software is directed at specialist areas of the secondary and post-sec-

ondary areas of education. But more of that in later issues. For now, let's look at the toddlers.

UNDER 5s

After taking away the games which claim to be educational but are not, and most of the terrible commercial demos, we're left with 27 programs of educational value to pre-school kids.

Some are horrible. In *Baby Ball*, for instance, a circular sprite moves around the screen: its colour and direction can be changed randomly by pressing virtually anything on the keyboard. *Katie* is an example of totally pointless programming: type in a letter and a large version of it appears on the screen... wow!

If we further ignore *Kids ABC* (in which the alphabet is entered from the keyboard – in order – to play *Baa Baa Black Sheep*) and two rather dubious introductory spelling programs (*Word Pic* and *Spell Pic*), we're down to a list of reasonable material.

Simple art programs make up the lion's share of the Under 5s PD software. The majority are the work of the ever-prolific DA Brumleve and, as a result, many give you a distinct sense of déjà-vu.

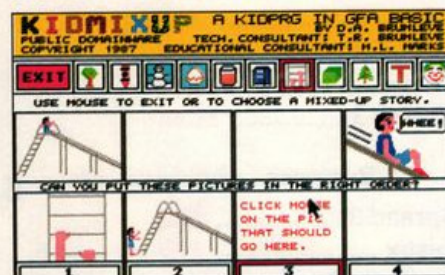

Kid Graph, the most basic, works on the principle of filling a grid of squares with colours

to make a picture. In *Kid Grid*, the squares are replaced by triangles, and in the updated version, *Kid Grid 2*, the triangles become much smaller so the final pictures can be more complex. *Kid Puzzle* is an extension of the *Kid Grid* idea where children have to click around the empty grid until they locate "magic squares" which prompt part of a picture to be drawn on the screen.

Similarly, *Kid Shapes* and *Kid Shapes 2* extend the painting and design ideas of *Kid Grid* and enable a variety of shapes as well as colours to be positioned within the squares on the screen. These work with varying degrees of success: some children are fascinated by them, others may be less enthusiastic.

Moving away from the idea of a grid is *Kid Sketch*, simulating one of those hand-held plastic drawing machines where you twiddle the knobs to get a rather angular picture.

Brumleve's best "art" program (and also one of the best of the Under 5s PD inclusions), *Dot To Dot*, taxes a number of skills: see Cover Disk pages and, indeed, the Cover Disk itself. First, children have to count and click on each of a series of numbered dots in order to create

■ Re-organise the 11 stories in *Kid Mixup* – preschool job training for Art Directors

■ Fill the grid with colour and make a pic. *Kid Grid* is one of many similar programs

a picture (the numerical sequence can be replaced by an alphabetic one). Having achieved this, they have the opportunity to colour their pictures.

A second program, *Dot Maker*, enables parents and teachers to generate their own puzzles for children to use. The final colouring and drawing program, Richard Farrell's *ST Colouring Book*, is also excellent. This again allows children to colour pictures to their hearts' content. Five outline pics are provided with the program and can be added to using the program's simple drawing facility.

All the music programs for under 5s come out of the Brumleve stable. In *Kid Music*, you click with the mouse on one of eight pictures and you then hear the relevant tune. The results can best be described as tacky and at worst as totally unrecognisable.

Kid Notes goes a stage beyond this. This time there are ten pictures to choose from, positioned above a large keyboard. Select a

■ *ST Colouring Book* offers a set of pics to colour as you wish. What could be easier?

tune and one of the keys turns red. The idea is to click on the red key, hear the note, then click on the next red key and so on until you have played the tune. This program would be fine if, apart from the pitch of each note, it also took the note's duration into account. In *Kid Piano*, there are no pictures, just the keyboard for children to drag the mouse over. Eat your heart out, Wolfgang Amadeus!

The final main group of PD edsoft can broadly be described as "story programs." In *Kid Mix-Up*, you're presented with a jumbled sequence of four pictures which you have to sort into a simple storyboard. This is an effective little program that comes with eleven examples. Despite this, interest wanes fairly rapidly because of the brevity of each sequence.

In *Kid Song* (or *Makin' Aikin'* depending upon where you buy it) a simple song develops in response to children's selections of eyes, noses and so on. The program is rather crude

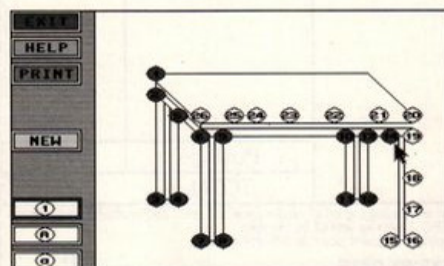

■ Use your ST to learn to play music? No, in *Kid Notes* you learn to drag a mouse!

but the results can be hilarious. *Kid Story* also acts in response to what you choose in the program, but the final result is just a silly rendering of Little Red Riding Hood.

This leaves seven programs which do not readily fall into any of the above categories. *Spelling* presents words on the screen which have to be re-entered from the keyboard. The results are rather good, since each correct spelling is rewarded with a digitised picture. *ABCD* is a poorly presented but effective alphabet tutor with numerous options including matching letters, finding missing letters and typing in the next letter of a sequence. *Kid Colour*, which helps children to match words to colours, is OK despite the rather odd selection of words (like "tan" for brown).

Kid Potato enables children to dress a spud. (Remember Mr Potato Head? At least this one will save on the grocery bill.) *Barnyard* (or *Tiffany's Barnyard*), although designed and sold as a pre-school game, is beyond most under 5s. In this, children have to click on pairs of doors to match the hidden names of animals. Get it right and the door stays open. With 28 doors (and therefore 14 pairs) to choose from, prepare for frustration and tears!

The *Fun School 2* demo is rather frustrating

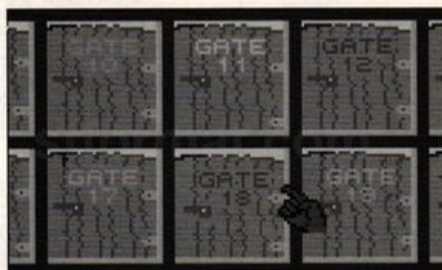

■ In *Dot to Dot* (see Cover Disk), join the dots then paint the pic. Simple but clever

KEY

- * Avoid at all costs!
- .. Of little educational value
- ... Might be worth a look
- **** A good program, educationally sound
- ***** An excellent piece of edsoft: a steal at the price!

■ Click on the gates in *Barnyard* and then search for pairs of animals: pretty tough!

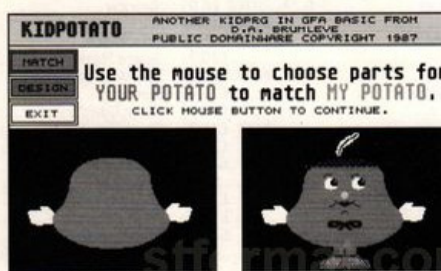

to watch. I feel sure that any child who sees this will want to dive into the programs.

Finally, there's *Kid Publisher V2.1*. Although not really aimed at the Under 5s, it can be used to generate pictures along with words which can be used to encourage reading skills. This is very much the poor relation of *Kid Publisher Professional* (fully reviewed in *ST FORMAT* 11).

So, you pay your money and you take your chance. But, at around £2.50 for disk containing several of these programs, the risk is minimal and the rewards could be high. **stf**

■ Yes, you too can make complex pics at the click of a mouse with *Kid Shapes*

■ *Kid Potato*: spuds never looked as smart! Mr Potato Head for the silicon set

We might've guessed that STs are being used to produce fanzines. In fact, we did. But unless we provoked you, how were we ever going to find out about them? So provoke you we did, and sure enough you came up with the goods.

First out of the *ST FORMAT* old Gold Blend catering pack cardboard box we like to call the *ST FORMAT* old Gold Blend catering pack cardboard box is one of the apparently infinite number of footie fanzines. This one, *Attack* (60p; Editor: Tony Hedges), is dedicated to the achievements (few) and shortcomings (frequent) of Norwich City. Put together on an ST using *Timeworks DTP* and a Star LC10, it's a 36 page A5 publication that owes more than a little to *When Saturday Comes* and *Viz* (Billy the Turd).

One obvious problem is the magazine's inability to make top lines of columns bear any connection with the bottom lines of previous ones — Editor Tony Hedges has bought *First Word Plus* to cope with that problem. If we could presume to make one simple suggestion: wider columns. Any text that has fewer than 20 characters to a column width is simply not going to be read, especially on the windy, rainy terraces of Carrow Park.

But *Attack* has genuine flashes of wit ("Remove nine of these ten matches to make a

how to get into print

In STF 16, you may recall, we suggested some ideas for getting started in DTP on your ST. But why were there no ST-based fanzines, we wondered? You soon let us know there were. Steve Carey surveys the scene

carbon copy of Ian Ormondroyd") and, despite a certain predictable whinginess of tone (headline: "If Norwich are an ambitious club, as they like to claim, why do they sell their best players?"), it's good enough to pass those boring

few minutes from 2.30 to 2.50 when nothing much happens except some git spilling Bovril on your trousers.

Another sports-based magazine is *Play Ball* (no price stated; Editor: Keith Graham), "the fanzine for Scottish baseball and softball." At 16 pages, A5, it's created with *Script* files imported into *Calamus*, with some titles made up in *O-line Art*, and IMGs done in *Megapaint 2*. The end result is output on a Star laserprinter — and it shows, creating a much cleaner and, one assumes, more easily photocopied magazine.

Editor Keith Graham makes the observation that your local computer shop is very likely to help you out, in exchange for an advert; he used his to scan images using a borrowed Canon scanner.

Training for Ministry 1990/1991 (no price; Editor: Tim Anderson) hardly qualifies as a fanzine in the usual sense, being a publication aimed exclusively at students training for the Anglican priesthood. As a magazine, however, it's excellent: literate, cleanly designed, well illustrated and including no less than 20 advertisements.

Why don't fanzine staff spend more time selling advertising and thereby raising funds? Several letters accompanying magazines insisted that no money was being made from the venture, almost as if this was a badge of

sionally for the first time, we hope you appreciate the improvement. It is a case of GIGO though. Whats GIGO? Garbage in garbage out. We are using a Star LC10 mono printer (9

[illegible]

Many thanks for the most recent issue. The Folklore Trail, which I enjoyed immensely. I felt the visual quality of the fanzine was a tremendous improvement. Keep up the good work as I really enjoy the Welsh press snippets on the bar which I wouldn't get to see normally. I'd also like to say a word about the club which is still very much in force, and I feel that Pauline and Michelle, who keep going, deserve a huge pat on the back. Both have demanding full time jobs and usually spend their weekends and holidays

■ Ideal column width makes this block of text from *The Folklore Trail* quite easily readable despite the very fuzzy printing

grims Post, the "official journal of RAP – free to members of the Real Ale Pilgrims" (Editor: Don Markwick). It's a five page A4 stapled publication which has a grand circulation of three guys who are interested in real ale (or, as Don insists on putting it, Real Ale) and travel to places far and away ("well, London actually") on their quest for the perfect pint. *TPP* is produced on an ST with a Star LC10 printer.

Despite the kind of title that would presumably have readers of *Training for Ministry* (see above) issuing earnest condemnations from the pulpit, *Pagan News* actually has an intimate tone and a cosy, family-and-friends atmosphere that belies popular superstitions about paganism.

This A4 magazine claims a circulation of over 1,000 and is yet another created using *Timeworks DTP*, together with *WordWriter ST*, *Hyperpaint* and *Degas Elite*. Editor Phil Hine gets the ST Club to laser-set his pages for him, and recommends their "cheap, efficient service (not like some bureaux I could mention!)"

Phil has been using *Timeworks DTP* for over two years now and has been very impressed with its abilities. He is, however, now exploring alternative systems for improving the look of his magazine, and says he'll probably opt for either *Proxima* or *Calamus*. It will be very interesting to see how *Pagan News* develops over the next year.

The prize for "Most Incomprehensible Publication Produced on an ST" (which is not the insult it sounds) goes without doubt to *The Pil-*

The *Folklore Trail* is presumably the one and only Alarm fanzine (£1; Editor: Scott Glen), a 20 page A4 stapled item that is predictably obsessive about its subject, though it does also include reviews of *The Icicle Works* and internal power struggles within *The Mission*. The highlight of issue seven is undoubtedly the exclusive "Alarm Dollies Wardrobe" feature, a page of inspired self-parody.

Still, *The Folklore Trail* does show what can be achieved with a single-drive ST, Timeworks computer shop DTP and Scott's trusty old 9-pin Epson FX-80. Text is entered with *First Word* and artwork prepared in *Canvas*. "The introduction of the ST," Scott says, "has upheld the original spirit of the magazine, if not added

to it. Certainly it saves a tremendous amount of time with scissors, paperclips, glue, sticky tape and sticky fingers...!

"If anyone has an artistic/productive urge, I would wholeheartedly recommend getting involved in something like this. You don't need a

tise (and you'll never know if you don't try), get some classified ads going. If you're publishing a fanzine dedicated to a single artist, readers will want to swap rarities or buy collectable items

5. Get someone who can spell to check your text for mistakes

– The majority of small magazines are let down by atrocious spelling, punctuation and grammar. God knows we're not perfect, but at least we try to get these things right!

6. Advertise prominently in your magazine for contributions

– Come up with four good ideas for articles and ask readers to help you with it. That's what we did with this one! (Example: If you're writing a David Bowie fanzine – which no-one seems to be doing – ask readers to help you with major articles on Bowie in the 60s, Bowie in the cinema, Bowie's discography, the ever-changing haircuts of David Bowie – and so on)

7. Don't use very narrow columns
 - Aim for columns between about 35 and 65 characters – too wide is just as bad
8. Don't be afraid to take risks
 - Write a whole issue around a single aspect of your subject. Try to stir up some controversy among your readers. (Example: if you're writing a school fanzine, you should aim to get banned about once a term. If you're writing a magazine about pagan beliefs, interview a Christian bishop to show how closed his mind is, or a police chief to show how you're being persecuted by the ignorant)
9. Work hard to get subscribers
 - If necessary by making a loss on subscriptions. Then you have a solid reader base, as well as a growing database
10. Make 'em laugh
 - If your magazine isn't fun to read, no-one is going to read it. Your own enjoyment in your subject should shine through

lived with her three sons on the edge of a forest. The house was old and rickety and was made only of wood. Indeed, it only just about kept rain out.

"Fancy being afraid of a stone and tree!" laughed the second son. "I wouldn't have been afraid!"

The next morning, the second son went out to get some wood. He picked up a bigger axe and entered the forest. Once inside he found a large tree and started chopping. BANG BANG BANG went the axe as he cut down the tree. The sound echoed through the forest. But before he got half way through, the tree appeared.

Now, as trolls aren't the most intelligent of creatures, he fell

brothers if he could go. His mother said to ask his mother and after much laughing they followed him in.

To their surprise, their mother had let him go and he was already making his way to the forest with an axe and a heap of cheese.

In the forest, he went to the biggest tree he could find and started chopping (the youngest son's name was Cyril). Just then there was a pounding on the forest floor and the troll appeared.

"Oh, no. Not another one. If you chop once more I will break you into a thousand pieces!"

The oldest boy was called Tim and he didn't like hard work but he finally set off for the forest carrying the smallest axe he could find and when he got there he went to the most rotten tree he could find.

"This shouldn't be too hard" he thought to himself and he

I'd also like to say a work about the far club is still very much in force, and I feel that Pauline and Michelle, who keep it going, deserve a huge pat on the back. Both have demanding full time jobs and usually spend their weekends and holidays

By comparison, this page full of text from The Folklore Trail is very uninviting, despite the huge type and ideal columns

Student Offers

Sally Theakston gives a guide to concessions for students

Opportunities for Study

AOCM annually offers the opportunity for two candidates to take part in the Graduate School at Bossey, and for two ordinands (this seems unlikely to include female ordinands) to spend a semester at the Venerable English College in Rome.

Applicants are expected to have both a good grounding in theology and be able to contribute to, and to learn from, an ecumenical experience. They are expected to have an interest in, and an awareness of, the world Council of Churches for Bossey, and the Roman Catholic Church for Rome. In addition an aptitude for language is asked for: French or German for Bossey, Italian for Rome.

These programmes count as part of training, and applicants need to be ahead in their studies as training cannot be prolonged. Details are available from college principals.

Course Books

Travel

All full-time students are eligible for a British Rail "Railcard". This costs £15 for a year and entitles you to various fare reductions, such as 1/3 reduction on most tickets. There are restrictions on the use of Railcards on certain trains. Look out for special offers on Railcards, often later in the academic year.

National Express have a similar Student Coachcard which gives reductions on their services, Scottish Citylink, and some others.

The International Student Identity Card is

The sketch, sub-headings in the text and the title across the top make this page from Training for Ministry attractive

Tell me more

Thanks to those who answered the call and sent issues of their ST-produced magazines. If you didn't submit yours, why not? Write to ST Fanzines, ST FORMAT, 30 Monmouth St, Bath BA1 2BW. Be sure to let us know how you did it, what you learned from your first issue and what advice you'd pass on to anyone attempting something similar.

page) that sells for a quid, concentrates on 16-bit computers – and comes with a free Cover Disk. Blimey, we thought, serious competition at last! Time to look to our laurels, tighten our belts, etc etc...

Sector 16 is mostly game reviews, and though it's a bit short on accuracy (the spelling "embarrassing" in a headline, where everybody can see it?) and in places skimpy on information (why no address on the subscriptions page?), it more than makes up for such shortcomings with its enthusiasm – and above all that remarkable cover price. It's had the excellent good sense to nick ideas left, right and FORMAT.

If you're not working out how other magazines work, and then stealing their best ideas, you're simply not doing your job as a fanzine/magazine editor! Judging by what you've sent us, there are already plenty of good ideas out there to steal... so get to it! Your readers will love you for it! **stf**

fancy system (or a vast amount of talent!), and it certainly doesn't cost the earth to get yourself up and running."

In a similar, if even more obsessive, vein is Nameless Wildness, an A5 tribute to Marc Bolan – "but also a tribute to all the fans who have kept Marc's legend alive" (£1.30; Editor: John Kay). Software: First Word and Fleet St Publisher. Hardware: 520ST and Epson LX86 9-pin

printer, one tube UHU glue, one staple gun and the local photocopying shop. As fanzines go this is rather good, dividing information into little gobbets under the banner "Do you know the real Marc?" and featuring the kind of quiz that helps to give the readership its self-identity ("Who performed the song 'Standing Next to You' with Marc and T Rex on the final Marc show in 1977?").

And, as Victor Gilmore points out in a patient postscript, Marc Bolan wouldn't make such an appropriate reviewer for Stunt Car Racer as we suggested (STF 16): he couldn't drive – and neither, judging by the results, could the woman behind the steering wheel, Gloria Jones.

Another similarly... er, specialised item is Destination Jarre (75p; Editors: Graham Needham and Wayne Davis), a fanzine dedicated to the work of the French electro-warbling bleeder lucky enough to be married to Charlotte Rampling, the world's most desirable woman, possi-

bly. Using First Word and the Star LC-10, Editors Needham and Davis have created a world dedicated to the Gallic one's electric wibblings. And when letter writers sign off with, "As Jean Michel Jarre said in Docklands, 'Thankyou for your support,'" you just know there has to be a market out there for it.

The only school magazine produced on the ST (to our knowledge – go on, prove us wrong!) is Us (25p; Editors: James Humphreys (4P) and Matthew Paine (4H)), the work of Pembroke Comprehensive. Despite the occasional lapse (Irish jokes? I thought only University and Polytechnic students were that witless!), Us suggests a happy, active school. Still, the ban on grievances against teachers (why, for heaven's sakes?) and the invitation for "Teacher of the Month" nominations (yuk!) do suggest something of a goodie-goodie attitude that strikes me as very unhealthy indeed. I don't know, the youth of today!

Sidelights, the magazine of Bexleyheath Photographic Society (Editor: Tom Burns), is yet another Timeworks DTP production, printed on a Star LC24-10 – Editor Tom Burns's first attempt, and a very creditable one too.

Finally there is Sector 16, a 31 page magazine (eh? Well, they don't count the cover as a

AND NOW, THAT £100 FORMAT PRIZE

When we asked you to submit your magazines, we offered £100 for the best, which as we said doesn't necessarily make the most expensively produced.

It goes without saying that it's a difficult thing to pick a single magazine above all others. From the roughest to the most professional, each has much to commend it in terms of enthusiasm, dedication and sheer willpower – all essential items in any publication's continued existence, let alone success.

Still, two publications stand out, for very different reasons. *Training for Ministry* is an excellent publication. It is very short on mistakes, has made a special effort to pick up advertising and is well designed and nicely illustrated throughout. In comparison *Pagan News*, while not nearly so precisely done, has a more obvious function in drawing together people sharing a common interest who would otherwise have little chance of staying in touch – hardly a problem with an institution magazine.

Secondly, and in a way less fairly, every publication needs a strong element of luck, and that *Pagan News* certainly has (though they might not see it quite that way!). The activities of its readers have come under attack recently from an unlikely alliance of fundamental-

ist Christians, social workers and tabloid media, all seeking to link paganism with ritual child abuse.

Any magazine that keeps going two years and suddenly – or, as they would no doubt insist, gradually – finds itself at the centre of national concerns deserves congratulations and support. So we hereby award the *ST FORMAT* £100 to *Pagan News*, and wish them all the best. (And before the mail starts pouring in, this award does not imply that anyone in the *ST FORMAT* office is a satanist, paganist or any other -ist. All we're doing is recognising the magazine's achievements.)

BACK ISSUE SERVICE

"They're very good, in fact they're stonkers; if you don't buy 'em you must be bonkers" (John Betjeman).
Each issue just £3.45*, Cover Disk and full postage included

SORRY ISSUES 1-8 SOLD OUT!

ISSUE 9

Disk: Conqueror, Pipemania and Canvas - three fully playable demos! Plus Turbo ST!
Inside: guide to ST scanners; cheap ST networking; secrets of game creation

ISSUE 10

Disk: Wipe Out playable demo; plus full version of GFA Raytrace!
Inside: 30 ST classic games; education round-up; complete survey of ST art packages

ISSUE 11

Disk: Resolution 101 playable demo; mouse tools; plus great comms software!
Inside: piracy special; how to "do" comms; how your ST can spy on satellites

ISSUE 12

Disk: Mega music special, MIDI sequencer, Starblade space-trading demo
Inside: Mad about Music; Harlekin; beginner's guide to brilliant graphics
Plus! Free tape!

ISSUE 13

Disk: Battlemaster playable demo; GFA Draft useable demo; reset proof RAM disk
Inside: 15 pages of gamebusters and technical tips; Magic Fly preview; Proxima, the DTP newcomer

ISSUE 14

Disk: Together for the first time: fully useable demos of Yolanda and Rick Dangerous
Inside: Why do games cost so much? Megapaint 2 - an instant ST art classic?

ISSUE 15

Disk: DPaint, Manix and Days of Thunder, - not one but three fully useable demos!
Inside: Full, definitive review of DPaint 2, plus tutorial on getting the most from the Cover Disk demo

ISSUE 16

Disk: Atomic Robokid and TCB Tracker - two fully useable demos
Inside: Ten pages of ideas on getting more from your ST - making money or just having fun!

■ Replay 8: you saw the demo version on the Cover Disk of *ST FORMAT 6*; now you can make music with the real thing

Replay revisited

Replay Professional's baby brother, Replay 8, is finally ready to unleash on a waiting world. Neil Jackson checks how well the toddler walks

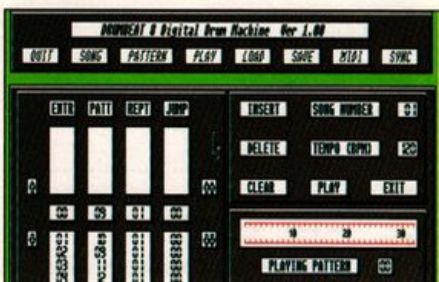

■ The clear, uncluttered layout of Replay 8's main display makes it remarkably easy to use and speeds up editing time

■ In the special effects section you can add Echo, Reverberation or Flanging effects (for that melancholy Cure-sound)

■ The pattern editor (part of the Drum-Beat section of Replay 8) enables you to sequence samples as part of a song

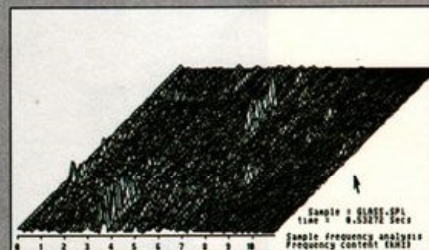

■ The whole song (sequenced patterns joined together) is then played out via the Hi-Fi socket on the Replay 8 cartridge

BRING FORTH THE GUILLOTINE!

Replay 8's Digital Filtering functions are powerful tools you can use to clean up samples that aren't perfect to start with. There are four main filters (which cut out a certain range of frequencies), three boosters (to amplify bass, treble or user-definable frequencies) and a DC Bias remover (to reduce muffling and centralise samples on the 0dB line).

To check the effects of the filters and boosters you use the RESPONSE and Fast Fourier Transform (FFT) functions. In this example, we want to crop the highest and lowest frequencies in a glass-smashing sample and retain the peaks alone.

1. The FFT screen shows the volume levels for the whole frequency spectrum (left to right), modulating over time (front to back). The peak sound levels are around 3kHz, early on, and in the 6kHz region near the end of the sample

Replay 8 Sound Sampler

MACHINE: ALL STs

PRICE: £79.95

FROM: MICRODEAL LTD

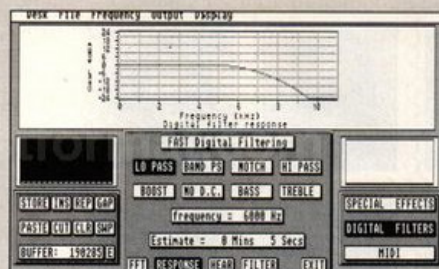

CONTACT: 0726 68020

Nearly four years after the appearance of Replay, the first commercially available sound sampling system, it's now had a complete software facelift and provides a wealth of new features previously unavailable at this price. The hardware part of the new Replay 8 system is unchanged and comprises an Analogue-to-Digital converter (for digitising) and a Digital-to-Analogue converter (for playing back). Extras include a full MIDI-connectable drum editor and conversion utilities to handle a variety of other sampler file-formats.

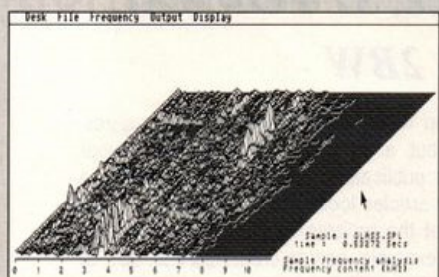

Setting up the system is child's play. You insert the Replay 8 cartridge into the ST's cartridge port and load up the editing software, then connect a sound source like a portable tape player to the input socket and finally connect the output to your hi-fi system. If you wish, you can forget about the hi-fi option and play samples back through the ST's monitor, but you sacrifice the ability to sample at 44 or 48 kHz.

To help you set up your sound source for a perfect input, there's an on line spectrum analyser and oscilloscope. The spectrum analyser shows the distribution of frequencies coming in to Replay 8, so you can use your graphic equaliser to boost muffled sounds before they are sampled, and the oscilloscope shows the peak sound levels so you can set the overall input volume to avoid clipped or quiet samples.

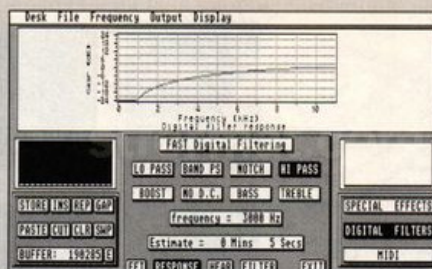

Once you've taken your sample, there are loads of special effects and digital filters you can use to modify it still further. Editing the

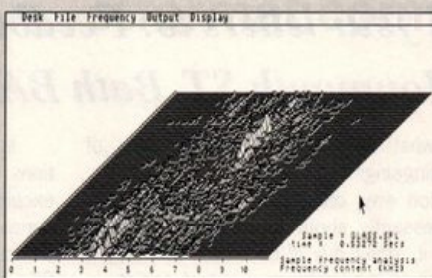

2. The first step is to use a Low-Pass filter set to cut off at 6000Hz. This will allow all frequencies below 6kHz to pass through untouched, but attenuate all the frequencies above that level

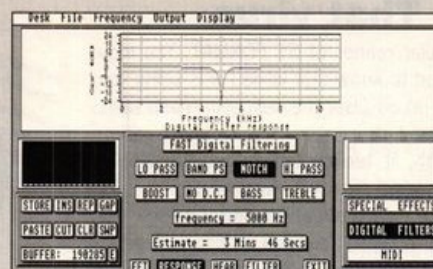

3. After filtering with the Low-Pass filter, the sample looks like this. The top-end, with all its unwanted peaks, has virtually disappeared, but the rest of the sample has been left intact. Now we must clip the frequencies below 3kHz

4. This time, use a High-Pass filter with a cutoff frequency of 3kHz. The response chart shows that the part of the sample below this frequency will be reduced

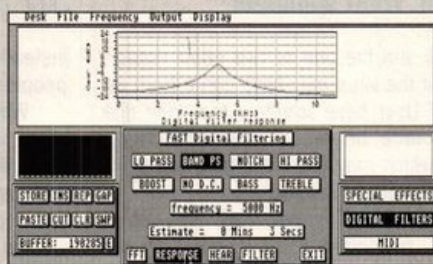

5. The finished result: the central part of the sample, between 3kHz and 6kHz, is basically the same, while the outside frequencies have gone. Using filters it's possible to isolate any band of frequencies you desire. In this way, you could remove cymbal crashes from vocals

6. Another type of filter, a notch filter reduces the volume of a narrow band of frequencies and lets both higher and lower frequencies pass unscathed. This notch is set to cut out 5kHz sounds

■ The helpful "Estimate" window, just below the frequency, warns you when effects will take a while to execute

7. A bandpass is the reverse of a notch and allows only the selected frequency through. This bandpass allows 5kHz sounds through and clips all the others

sample is simple, thanks to a mouse-controlled cursor system which produces instant results and enables perfect loop points to be set up.

You can then save your finished sample as part of a set, for use in the drum editor or as an individual sample for use in games, demos or other programs. There are even playback routines supplied for your favourite language.

The drumbeat editor turns your ST into a fully-fledged drum machine, except that it has the ability to sound different every time you load in a new set of samples. You can create

repeating patterns for each bar in your song, complete with fill-ins and solo-breaks. You then link each of the patterns together in your chosen order to create the entire percussion department for your song. Output is via the hi-fi socket only, but you can also select MIDI output to sequence a keyboard or other MIDI device.

Overall, the Replay 8 system is an excellent way to get started in sampling. It has many features you won't use until you get confident (and perfectionist) about sampling, but this enables you to grow into the package without having to buy a better one later. Everything is here to

begin with and the whole lot is dead simple to use, right from day one. Even the more powerful 2-Bit System (which has a higher sample resolution) uses the same editing software, so there really is no better sampling kit to start off with. Mastersound, with its similar 8-bit hardware, comes close, but its editing software is far less able than that of Replay 8. **stf**

Those specs in full...

REPLAY 8 CARTRIDGE

Anti-aliasing filters	Two: one each on input and output
Signal-to-noise ratio	48dB
Maximum sample frequency	100kHz
Frequency selection	Software controlled
Sample resolution	8 bits
Linearity (accuracy)	±1 least significant bit
Max. Input signal	2V peak-to-peak
Max. Output signal	0.7V (root mean square)

REPLAY EDITOR SOFTWARE

Preset sample frequencies	5.5, 8, 11, 16, 22, 32kHz (via monitor and Hi-Fi) 44 and 48kHz (via Hi-Fi only)
Sample editing facilities	Reverse, fade in/out, overlay, insert, delete, copy, clear, fill, shrink, filter, echo, and flange
MIDI facilities	Mono channel (MIDI 1 to 16) 10 note-assignable samples Loop points with full envelope shaping Real time pitch shift MIDI trigger/shift
Total free memory	520ST: more than 230KBytes (10secs @ 22kHz) 1040ST: more than 750KBytes (34secs @ 22kHz)

DRUMBEAT SOFTWARE

Playback frequency	22KHz only
Max. Kit size	15 samples
Max. individual sample size	10kBytes (half a second each)
Max. number of patterns	50
Max. Patterns per song	100
Beat registration	1/8, 1/16, 1/32 and triplets (2,4,8,3,6,9 Beats per quarter note)
MIDI synchronisation	Internal tempo or external trigger

FORMAT RATINGS

REPLAY 8/£79.95/Microdeal/
0726 68020

Features 96%
All the features you'll ever need, and then some!

Speed 85%
Fast; some more complex digital filters and special effects take a few minutes, but you get a warning

Ease of Use 95%
For beginners, straightforward; for experienced users, as easy as falling off a log

Results 96%
The more you work, the better the output: time spent on sample cleaning reaps perfect results

FORMAT VALUE 95%
Not the cheapest 8-bit sampler system, but the range of features and drum editor are unbeatable

The Competition

■ Mastersound 2, also from Microdeal at £39.95, is aimed more at the muck around and have a go market. Full review in STF soon.
■ PRO-series 12 from AVR (☎ 0582 457348) is a 12-bit input/output sampler aimed at the professional market, hence its £245 price tag.
■ Pro-sound Designer Gold, £49 from Power Computing (☎ 0234 273000), is another 8-bit sampler, with less sophisticated editing facilities.
■ Replay Professional, big brother to Replay 8, can output 12-bit samples and input 8-bit ones. Also from Microdeal at £129.95.

That virus

I am a regular reader of *ST FORMAT*. You may be interested to know that while I was using the Cover Disk on *ST User* the pulldown menu titles inverted, and I suspected I had found a virus. Sure enough, it turned out to be the Goblin virus, according to my virus killer. I duly destroyed it, and thought I'd better check out your Disk too. Funnily enough, it also proved to be infected, independently I might add, because I had re-booted in between loading the disks.

I suppose it was inevitable that at some stage the Cover Disks would be subject to this kind of tampering; I hope it does not affect your reputation for producing a quality informative magazine.

Neil Willis

Willenhall, West Midlands

stf To Neil and the one or two other readers who thought the virus may have come from us: it didn't. *ST User* have admitted that their disk was the source of the problem (see News, page 14), which may therefore have gone out to as many as 30,000 readers.

You need to remember, Neil, that simply re-booting – especially a soft re-boot – is not going to clear out any virus from your machine's memory. You must let it "cool" for half a minute or so.

We are absolutely furious that we are getting blamed for distributing a virus that was nothing to do with us.

Red hot Cover Disks

Last week eight of my *ST FORMAT* Cover Disks (Disks 1-8) were damaged after someone put them near our central heating system. I've been trying to think of how to get replacements ever since.

I would gladly pay for any replacements you could do for me, hopefully all of them.

K Westfield
Swindon

stf This once again underlines the absolute necessity for backing up your Cover Disk as soon as you first use it.

As you know, oh mysteriously Christian-nameless K Westfield of Swindon, the earlier issues of *ST FORMAT* are now all sold out, so there is simply no way at all that you can acquire original replacements. We can't offer a disk-copying service (if we did, we'd rapidly become inundated). There are, however, two possible options.

If any reader is able to help K Westfield, the address is: 3 Kemerton Walk, Park South, Swindon, Wilts SN3 2EA. Who knows, there could be quite a demand for such a service...

Secondly, all of the *ST FORMAT* Cover Disks, and indeed the Disks from our predecessor, *ST Amiga Format*, are available on Bath Bulletin Board for downloading. Details in our comms section (page 161).

Spinal tip

I've just bought STF 17. Like the eager fool I am, I turned quickly to the Feedback page, keen to learn of the latest topics of discussion in the world of ST programming, the hottest tips, the pokes, the newest software.

**Send your letters to: Feedback, ST FORMAT,
30 Monmouth ST, Bath BA1 2BW**

Instead, what do I find? A whole bunch of people whingeing!

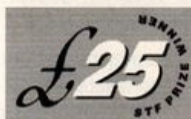

Why (oh why, oh why) do people have to moan incessantly about the magazine? If you don't like it, don't buy it! Or better still, buy it and send it to me. Is there a secret society in which people buy a magazine they don't like just so they can tell everyone they meet that they don't like it? I think we should be told.

I think the new *FORMAT* is excellent – in fact I think it's "king brilliant." When I read that on the spine of STF 15, I laughed so much that the man in Smith's had to bring me a glass of water, and so did my friend when I pointed it out to him. "Look Harold," I said, "a witty and amusing addition to our favourite computer magazine. How clever of them to make it funny without erring on the side of tweeness."

I have now cut all the spines off my copies of *ST FORMAT* and made them into a nice collage – and so have all my friends. I have hung this work of art in my hall and I make sure all my visitors get a good look at it before they leave.

There is however one grey cloud on the horizon. I seem to have mislaid the spine from STF 10, so if any kind reader has some swaps I'll be happy to contact them with a view to some spinal transfers.

Oh, and another thing. I wish to complain about the price of *ST FORMAT*. When you consider that I get a 220 page magazine plus a free Cover Disk packed with over 1MByte of software to boot, I think that £2.95 is far too cheap. I would gladly pay £30 for my copy of *ST FORMAT* and quite possibly more if you twisted my arm.

If you were to press me for any suggestions about a possible enhancement to your excellent publication, it would be to publish a series of articles looking at the hardware of the ST and at the programming side of owning an ST – for example, how to create sprites, how to move sprites, collision detection and so on.

I was for many years a dedicated BBC person (sighs of boredom echo about the place) before buying an Atari STE last Christmas – "I gave you my heart the very next day..." (Sorry.) One of the great things about the BBC computer was the way Acorn made available so much detailed specification about the hardware side of the machine and showed how programmers could utilise what was there.

A serious deficiency with Atari is the lack of similar information. Even at an introductory level Atari fail badly to supply the required information. The owner manual for my STE is 94 pages in length; the equivalent for the BBC was 510! Of course I realise that the BBC and the Atari were created for quite different reasons, but I don't feel this lets Atari off the hook.

Jonathan Scandrett
Ipswich, Suffolk

stf Good to know not everyone thinks we're a bunch of foul-mouthed degenerates. Oops, sorry I spoke.

Missing star

On STF 15's Cover Disk, why didn't you include the monochrome resource file for the Star LC10 accessory? This would be the perfect

Mad, bad and dangerous to know

Concerning the letter from I Lloyd: may I be number three in your letters complaining about some of the unnecessary use of "bad" language in *ST FORMAT*. In this modern world of declining standards you really don't need to use some of the words you do use.

You recently ran a competition for the best Fanzine. What on earth is a Fanzine? I'm keen on DTP – perhaps I have one I can enter without knowing it. (While translating Fanzine, can you also tell me what "stonking" means?)

JF Bailey
Broxbourne, Herts

PS You ask us to use first names. I am only on first name terms with people I've been introduced to.

stf Thanks for your letter, JF. I take it you have some firm proof of these "declining standards" to which you refer? Personally I am not convinced.

A fanzine is a magazine written by fans – and hence the title. "Stonking" means something like "smashing," "terrific," or "excellent."

It appears to be derived from the 20th century word "stunk" ("to bombard with artillery" – Collins English Dictionary). In Australian slang, "stonkered" (unknown origin) apparently means "completely exhausted or beaten; whacked."

Some people are of the opinion that it's just a tiny bit rude.

AND A PROSPEROUS NEW YEAR**

type of program for me to use with my Star NX1000 II (what the LC10 is known by in North America) from the ST's Desktop, as my printer is in the sort of position on my limited desk space that changing fonts or doing line feeds would require a contortionist to do.

I know one exists; it even says so in the documentation for the program! I hope that in future, when putting in a program of this nature in your disk, you include all the files so that all ST users can benefit from the program.

Now for the soapbox section of this letter. I feel sometimes that programmers tend to forget that there are ST users who prefer the crisp output of the SM124/125 monitor for their everyday use, over the output of colour monitors, which aren't as defined as mono (no slur intended against the capabilities of the ST's colour function or the colour monitors).

I use my ST for word processing with 1st Word Plus and designing signs for the hardware store I work for with Printmaster Plus. Yet we are unable to play the current hot games on the market after a hard day's work (I especially pine after *Sim City*, *Archipelegos* and *Monty Python*), because the games are written to work only in low resolution mode.

I have been having some luck using a shareware program called *Big Colour* on Public Domain games and some programs I find in the disk magazines, but there are drawbacks – it tends to run the game slower (probably due to the time needed to convert the colours to the suitable shades of black, white and grey), it doesn't run TOS programs (blurs them), and it won't run commercial games.

Daniel Dreibelbis
Toronto, Canada

stf We shall be putting that missing Star LC10 monochrome resource file on a future Cover Disk, and we're sorry we didn't include it first time round – a bit of unduly zealous space-saving, we seem to recall.

As for the games for mono monitors argument, it would be good if programmers remembered you, but then you must bear in mind that it would require them writing a completely new version of each game.

The screens are different sizes, for one thing, and colours are often used for effects (flashing, animation and so on), making it a not inconsiderable task.

In our opinion, *Electronic Arts' Imperium* is the best mono-compatible game of 1990. Give it a go!

Star reviews

I'm sure you've hundreds already but this is my humble contribution to your request for celebrity review ideas:

Sheffield Forgemasters – *Pipemania* (In

co-operation with the Iraqi government)

The villagers of Towyn – *Flood*

John Kettley – *Days of Thunder*

Lord Justice Pickles – *Judge Dredd*

Princess Anne – *Hard Drivin'*

Poll tax collectors – *Blood Money*

Eric Hughes

Shrewsbury, Shropshire

stf Oh dear. That's enough of these truly appalling suggestions. What we'd like from you

STRAIGHT TO THE POINT

Quick, smooth and deadly

■ How many issues do your binders take?

Rory Fowler (11)

– The new, improved, expanded ones currently available hold 12 issues – though if we continue growing at our current rate we may have to make them even bigger!

■ I think mail order is a great idea, especially for ST users like myself who don't exactly have pots of money to spend on games. I have saved about £50 on the five or six games I have bought recently.

Kriss Knights,
Ellon, Aberdeenshire

– Anyone want to take issue with Kriss on this one?

■ I took the main ST PCB to Third Coast in Wigan to ask them about upgrading my 520 to 1MByte, and they told me exactly what to do with it – well, not quite (ooer), but they told me how to go about fitting the 4 extra DRAM chips under the power supply. I write my own STOS programs to scroll video titles, and can now scroll many more screens than before. Please thank them through your pages for their help.

Dave Roberts, Liverpool

– Well done, Third Coast. I trust you voted for them in last month's ST FORMAT Gold Awards. And that you also enjoyed winning the Yamaha SY-22 competition, too!

■ After I'd been on a fortnight's holiday, I came back to find my lovely 1040ST suffering from a distorted case, caused by my leaving my curtains open, and letting the sun get at it.

Please could you tell me of a dealer that sells these cases, and also how much would I pay for one?

Robert Corrin, Isle of Man

– Evesham Micros can help, though they admit it's not something they get asked to do very often. A replacement top half ST case costs £30, including fitting and return postage (if the bottom half needs replacing too, that would cost an extra £12.42). Call Evesham Micros on 0386 765500.

■ I'm a musician, currently working with the Quartet package, which is fine. One day, though, I happened to stumble across another package called *Audio Sculpture: Digisound Composer* by Synchron Assembly.

"Wow!" I thought, "this package is brilliant!" But I can't do much with it as it's only a demo program. Is it available in full form?

Stewart Gardner,
Dewsbury, W Yorkshire

– *Audio Sculpture* began life as a demo, but we understand it is indeed very likely to become a commercial program. As soon as there's any news, you'll hear it here.

■ My six-and-a-half year old son Craig saw the Turtle preview on page 19 (STF 17) and

said, "Dad can you read it to me?" Great – until the last sentence! The evil Splinter? Craig says he's the Turtles' mentor and tutor, so a good guy. Does he get a free game? Craig's Dad, Stevenage

■ On page 19, STF 17 you made a bit of a bodge up. You said that the Turtles are in a bid to overcome the evil Splinter. I'd just like to say that actually Splinter's the goody; Shredder's the baddy.

Gareth Colah,
Waterloo, Huddersfield

– Cow – and though we say it ourselves – a blinkin'-bunga! We admit the error of our ways. In fact the Turtles came round to the office to point out where we'd been going wrong – we've still got the marks to prove it. Sorry 'bout that, dudes!

■ As a fairly new Atari STE user and an ardent sport sim fan, I am disappointed at the lack of cricket sims. Apart from a boring text version on PD, I've found nothing. Aren't there any?

Devon Burnett
London

– Riding high in this month's charts (well, number 11) is *Cricket Captain* from D&H Games (reviewed in STF 17; 73%).

■ I've just found the ultimate solution to the old problem, "Why do disk labels stick on like superglue so you can't pull them off again?"

Once you've taken the label off the plastic backing, stick it to your forehead and peel it off. Keep doing this until it starts to lose its stickiness and then put it on the disk. Next time you try to pull it off to replace it, it'll come off easily!

James Beswick,
Westerham, Kent

– Our lawyers, Messrs Parnes, Shillings and Pence, wish to point out that under no circumstances can we be held responsible for any facial disfigurement that may result from this suggestion. You should also make a back-up of your forehead before you commence this operation.

■ The STE is undoubtedly a brilliant machine (I know, I've got one!) I think it's about time Atari realise that unless they get their act together, they are not going to attract any new customers but drive them away. Who would want to buy a computer that keeps running into trouble? In fact they are more likely to lose the support of people who already have STs and STEs.

Islam Uddin, London

– Our point precisely. See how Atari respond in this month's special feature on page 29. (We'd be keen to see what readers think about this whole debate. Read the piece, then write to us: Atari 1991, ST FORMAT, 30 Monmouth St, Bath BA1 2BW.)

now is an ST limerick – anything ST-related, but don't bother mentioning the bloody awful Commodore Amiga games machine, because that's a boring non-subject.

Mono moan

Do you realise that someone with a mono monitor and a single-sided drive in his ST can't access any of the ST FORMAT Cover Disk? And where has that listings page got to? Us programmers are neglected compared to games players. They get a top 30 games section – vast quantities of the magazine for

reviews – and all we get is DESKTOP, the odd article here and there and... well that's it, really.

James Beswick
Westerham, Kent

stf You have a point, James, though I doubt that there are many people who own mono monitors (serious, business types, requiring high speed and large amounts of memory), who also own single-sided drives.

As for the "us" and "them," I don't believe for one moment there is a very strong distinction to be made between games players and "serious" users. We've been fighting hard to

ATARI REPAIRS

- ★ Over 10 years experience with Atari computers
- ★ 20 qualified technician engineers at your disposal
- ★ Most computers will be turned around in just 24 hours!
- ★ Prices include full service check, overhaul and soak-test
- ★ All repairs covered by a 90 day warranty

★ ★ Simply send your machine along with a £15 diagnostic fee ★ ★
and we will send you a written quote for the cost of repairing your machine, typically £45.00

How to take advantage of this exceptional offer:

Simply send or hand deliver your machine to the workshop address detailed below, enclosing payment and this advert and we will do the rest. (If possible, please include a daytime telephone number and fault description).

convince gamers that they're not exploiting the machine's full potential, and at the same time saying to programmers and serious techie types, "Look, why don't you give games a go? They're great fun, honest!"

Anyway, it must be said that as Christmas gives way to New Year, it's inevitable that the games side will die down a bit (not a moment too soon, as far as I'm concerned) and the tips, programming, techie and business side will build up.

Prints uncharming

Please recommend a word processor – one that simply presents me with a clear screen, allows me to type, then save and print it out. The one we got with the Atari STE Power Pack keeps refusing access to saved material and won't print properly.

Alison Bell

Aberdeenshire, Scotland

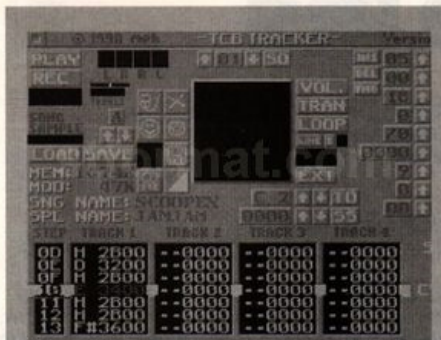

stf Probably the most popular word processor is 1st Word Plus, available at £79.95 from GST (☎ 0480 496666). Before you buy you might like to try the Public Domain version, 1st Word, which lacks only spell-checking and graphics importing – things you may well manage without for the saving. Buy it from Goodman PD for just £2.50 (Disk WORD3 ☎ 0782 335650), or from any of the Public Domain libraries listed in our PD pages (see page 165).

Incidentally, next month (issue out on Thursday 10 January) we shall be telling you what to look for when you buy word processors, or indeed almost any kind of ST program. Don't miss it!

Software sale

I have recently become the proud owner of an Atari 1040 STE which I purchased along with a sequencing package called Creator. The computer came with a professional pack and a few games. I seldom used the professional pack as the applications such as K-Spread 3 are so user unfriendly, and the instruction manuals are so thick. Also the games are so boring.

I therefore invested in some of the Public Domain software which meets my needs and is much easier to understand. The question I want to ask you is what do I now do with all this redundant software? It seems criminal

■ The Carebears' TCB Tracker revealing all its secrets in 4-track sampling

Tracker trouble

To readers having problems with the TCB Tracker on Cover Disk 16: you have to put all the files in the root directory to load any samples or modules.

How about more TCB Tracker files?

D Rance

Hatfield, Herts

stf Thanks. We're sorry about that. Cover Disk Editor Neil Jackson tells me that the version we had to put on the Cover Disk was an upgrade to the one we were testing – but in such small and subtle ways we didn't expect that problem. And do you know, I think I believe him.

There's nothing wrong with it, so long as you open the folder and copy all the files onto another disk without putting them inside a folder.

We may be putting more TCB Tracker files on future Cover Disks, though we stand by our opinion (STF 16, page 126) that the full, commercial version is well worth having (£39.95 from MPH ☎ 0603 503382).

binning this software, as does leaving it sitting around not used. Any suggestions?

S Robinson

Herts

stf Our market-leading, sister weekly magazine New Computer Express (and may I just say what a damn fine ST column it features each and every week) includes a section of free classified ads, which would be ideal for you. You might even make some money from it!

I wonder if there's a need for such a section in ST FORMAT?

Hard drive with Atari

My computing days started with the purchase of STF 5, and based on the advertising it contained, I bought a 520STE and Philips FST Fast Test colour monitor. This was shortly followed by a Star LC10 colour printer, and I haven't looked back since buying a second floppy disk drive – the PC720 from Power Computing.

The whole system works so well that my wife gave up her job, and now, armed with Protext and Canvas for her stationery headings, runs this installation as a home word processing service. Success has bought her an answerphone, photocopier and fax machine.

Looking to the future and increased efficiency, a 2.5MByte memory update is on the cards, and I am very interested in the new Slimline Series Hard Disk Drive which Power Computing have on sale. I was horrified when I read the article in STF 16 concerning the STE and a hard drive problem I never knew existed!

Since my STE is one of the first, I assume that a hard drive is out of the question unless my DMA chip is exchanged? I don't see that I should incur any costs for this, and how does my wife cope whilst the machine is away and can't work? She can't expect her clients to be entirely sympathetic!

What do Atari expect me to do, buy a hard drive only to find it's useless? That's an expensive form of trial and error! I have now formed the increasing opinion that Atari don't seem to recognise just how fantastic their machines are. It isn't "just a games machine." Are you listening, Atari? There are people out here earning a living with your equipment: wake up!

Peter Frances

**Computer Text Secretarial Services
Surrey**

stf There are important developments in this story. Read ST FORMAT's letter to Atari boss Bob Gleadow and his detailed reply on pages 32-33 of this very issue. Briefly, Atari still won't guarantee that their machines work with third party hard drives. **stf**

■ Please send your letters of comment, observation and disagreement on all matters ST related to **FEEDBACK, ST FORMAT, 30 Monmouth St, Bath BA1 2BW**. Each month we award a prize of £25 to the best one.

Correspondence of a more technical nature should be addressed to **DESKTOP** at the same address.

that tour: Atari's passengers speak

Recently, Atari visited the big cities traditionally overlooked by the computer industry. But what did you think? Steve Carey finds out

You may recall that in late October Atari took its first ever national tour, calling at Bristol, Manchester, Leeds, Newcastle, Glasgow and Birmingham. The idea was a bold one. Instead of turning up at the increasingly knackered-looking Earls Court with everyone else in September for the Computer Entertainment Show, why not take the show to the people? That's what Atari did, visiting six cities not normally blessed with a superabundance of computer shows.

Atari's own verdict isn't difficult to guess (see Managing Director Bob Gleadow's comments in his open letter on page 29, for instance). They say they were inundated, that the public were immensely pleased to get their hands on the latest generation of STs and some of the latest software and hardware developments for them. The response has prompted them to think seriously about doing it on a more regular basis.

But that's just Atari's opinion. Our own taste of the tour wasn't so great. We turned up at Bristol on the first morning of the tour, to find that we were being asked to invite every visitor to sign in, with full name and address. Predictably chaos ensued, the fire officer was obliged to ask us to clear the reception area, and we were back in the office by lunchtime. Hardly a storming success, and I think Atari themselves were a little embarrassed by the tour's inauspicious openings.

What do you, the people, think? While I was at Bristol I took the opportunity to talk to a few visitors, who seemed divided in their opinion

"For once Atari should be applauded for daring to break the North/South divide"

according to age. Everyone under the age of 15 found the Lynxes and arcade machines tremendously exciting; most grownups were appalled at the crush and bored rigid by the lack of real "serious" activity. In the former category were **Chris Knight** (15), **Robert Mills** (13), **Ben Durkin** (15) and **Michael** and **James Greenrod** (14 and 12 respectively). Their mother **Kate** wasn't quite so keen on such a "hot, sticky and crowded" environment, while **Ben Durkin's** dad **Mike** was hoping for more on the business side.

Also visiting the Tour at Bristol, Mr **Clive Parker** of Pill found a "bunch of dodgy-looking geezers wearing ST FORMAT tee-shirts" (who can he mean?), and observes that a railway car-

riage is really desperately narrow for an exhibition. "On the whole I enjoyed the day out," he says, "and finally got to see the TT, which I intend to get as soon as possible; my boy saw the Lynx, which he intends to get; the Stacy was there running MIDI software; Third Coast

"Everyone under 15 found the Lynxes tremendously exciting; most grownups were bored rigid by the lack of real 'serious' activity"

had genlocks on display; the ATW [Transputer Workstation] was there, even Steve Carey was there taking photos. All I can say to fault is more room required!"

Mr **Parker's** son **Matthew**, whom I interviewed at Bristol, reckoned it was all "quite good" (blimey Matt, don't overexcite yourself!) and liked in particular the Lynxes.

"Brilliant!" is the verdict of **Hadley Coull** (13) of Solihull in the West Midlands: "I don't know what more 'serious' ST users thought of the tour, but for me it was well worth it. We want another call!"

Joe Clemson (age 35) of Gateshead visited the tour at Newcastle and greatly appreciated its arrival: "Most welcome was the fact that I didn't have to travel to London in order to see it!" All Joe needs now, he goes on to say, is to persuade his wife to let him have access to the piggy bank...

"What a pity, though," he continues, "that the organisers failed to capitalise on the obvious passing market on a railway station – the adult business/serious home use. The presence of arcade games on the platform, and the devotion of the first carriages exclusively to games, labelled Atari UK once again as primarily games orientated. The Germans at least recognise the potential of the ST. Is this why the German economy is so much healthier than the UK's?"

The mysteriously Christian-nameless **I Marsh** (just turned 15) "quite enjoyed" the tour's visit to Leeds, finding a range of interesting things from games to programming and some very helpful people around who gave lots of information.

Not quite so happy is **Brian Goodinson**, who has to work to earn his living and therefore couldn't get along to the visit to Leeds until 5.30. He goes on to complain, "since the advertising said they were open until 6.30 pm I

thought I might at least get something out of the visit – you know, little things like courtesy from the demonstrators, even possibly helpful interest. Wrong!" If Atari do the tour next year, he suggests, they could do it on weekends when people are actually able to go to see it. "Oh, and next time, change the staff and give us human beings, please!"

Mr Goodinson's objections are shared in part by **Bill Brouard**, who complains that no firm times were advertised, and who, like Mr Goodinson, arrived late in the day (at Bristol) to find the whole thing winding down: "It would definitely save a lot of hassle and aggravation if one knew in advance that one would not be able to make it at all."

Steven Pynegar hit the tour at Leeds: "The most important thing for me is that Atari achieved their objective, which was to bring a show to the parts that other show organisers cannot reach.

"I am fed up," he goes on, "with continually travelling hundreds of miles in one direction to go to shows. For once Atari should be applauded for daring to break the North/South divide." He does, however, suggest that Atari should consider "getting off the train" and using some of the North's many conference venues.

David Price presumably visited the tour at Newcastle – he doesn't say, but lives in Northumberland – and gives the thing two out of ten for conception, nought for execution and minus several million for Atari image polishing: "I've no idea what the train cost Atari, but however little it was, to me it was a wasted journey and my colleague (also a radio amateur and retired like me) was disgusted."

Tony Knight feels that the limitations imposed by a train and the attractions of the free games arcade meant that there was not a

"Next time, change the staff – and give us human beings!"

great deal that could be done among the masses of younger people whose primary interest was games.

And there you have it. The idea seems to be almost universally applauded, though a train doesn't necessarily seem the brightest and best way to go about it. Personally I believe Atari should be represented at both the London-based shows, like the Computer Entertainment Show, and in the provinces. But if there has to be a choice, then Atari would seem to be going the right way about it. Verdict: a success, on the whole. **stf**

49.56		Co	745.95	
34.99		CI	710.96	

■ With a couple of windows open at once, giving you information about several accounts, you can move money around between accounts faster than you can say "The Diddy Men"

PFM Plus is a database program specially created to handle personal bank accounts, savings accounts, credit card transactions and similar applications. With its full GEM interface, entering new transactions is dead easy, and graphical reports can be called up instantly from the drop down menus. Standing orders can automatically be debited or credited to your account without you having to remember them, and when it's time to check the account against an official statement PFM Plus even works out which transactions have not yet cleared!

PFM Plus can work with up to ten accounts at the same time, and transfers of money between accounts are handled automatically. The program runs on all STs either with a high resolution monochrome monitor or with a colour monitor in medium resolution.

On the Cover Disk is a full manual for PFM Plus, which you can read on screen or print out if you're lucky enough to have a printer. But to get you started quickly, just follow these simple steps.

1 Put your back-up copy of this month's Cover Disk in your ST (you have backed it up, haven't you? See Cover Disk pages, beginning page 41, for more information). Double-click on the folder called PFM-PDEMO to open it. Inside are the following files:

PFMPDEMO.PRG	The PFM Plus program
PFMP.RSC	Resource file for PFM Plus
EXAMPLE.MNY	An example account file
PFMP.CFG	Options configuration file
EPSON.PCD	Epson printer definitions
MANUAL.TXT	Extracts from user manual
README	Read this file (hence, no doubt, the name)

2 Run the program by double clicking on the icon labelled PFM-PDEMO.PRG. After a few seconds a dialog box appears asking you to enter today's date. Press the [Esc] key to clear the old date and enter the correct date. Then press [Return] or click on "OK."

3 The screen now displays the PFM Plus desktop. Along the bottom are ten account icons and a trash can, and on the right a clock and a calculator icon. This desktop behaves similarly to the normal GEM desktop. (Icons are moveable, so you can rearrange them to taste.)

4 Next, load the Accounts. Here's how: from the "File" menu select "Load file." Load the file named "EXAMPLE.MNY." After a few moments the first five account icons now have the names CURRENT, DEPOSIT, BSOCIETY, ACCESS, and VISA.

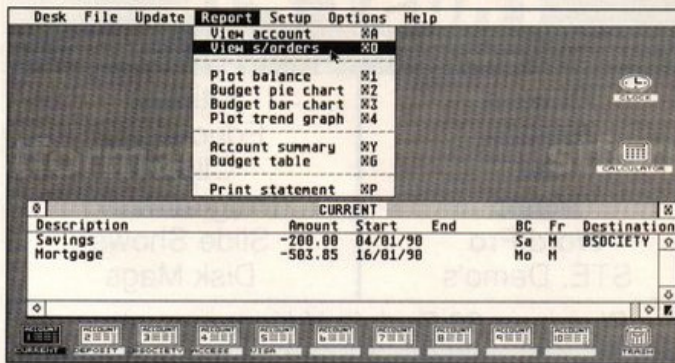

5 Select the CURRENT account by clicking on that icon and select "View account" from the "Report" menu at the top of the screen. A window containing the account entries is displayed, and you can see a number of columns. Under these are all the financial details already entered into the EXAMPLE.MNY file.

6 Have a good look around, and don't be afraid to experiment. You can scroll up, down and across the window, and open up windows for another Account by simply double-clicking on its icon. Five account windows can be open simultaneously, and they can be moved and re-sized on screen like all GEM windows. Now go up to the "Reports" menu and try some of the options.

Here are some features you can try out; just use the "Reports" drop down menu options – no typing required!

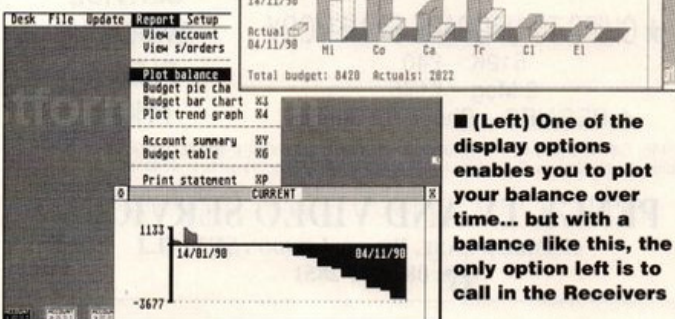

Plot Balance – Display a window containing a plot of the balance against time for the account named CURRENT. You soon see when the account is in credit (or when it's in the red, more likely!).

Pie Chart – Still in the "Report" menu, click on "Budget pie chart," the next option directly under "Plot Balance". You see a Pie chart with six dif-

■ Among its other helpful features, the "Report" options menu makes it child's play to keep track of all your Standing Orders. No more rude letters from the finance company! (Possibly)

■ (Right) With the option of a pie chart or a bar chart, like this one, to keep track of your budget, at least you'll know where the overdraft is going...

■ (Left) One of the display options enables you to plot your balance over time... but with a balance like this, the only option left is to call in the Receivers

➤ ferently shaded segments, each of which represents one budget category, making it easy to judge what gets the largest share.

Budget Comparison Bar Chart – Close the Pie chart window and select "Budget bar chart" from the "Report" menu. A 3D bar chart shows a pair of vertical bars for each selected budget category. Try some of the other options too.

Starting a New File – Don't forget that you can use this PFM Plus Demo to create accounts of your own, instead of using the example file provided. Select "Load file" from the "File" menu. There's a dialog box warning you that the current file has not been saved. But in this case you don't want to save it, so click on "Load."

Enter the file name "MONEY.MNY" into the file selector (the actual name is not important provided the file doesn't exist). Click on "OK" or press Return, and all existing data is cleared and the account names in the desktop icons emptied. The program is now in the same state as when it was first loaded – except that it knows the name of the new account file.

To start with, create just one account. Select "New account" from the "File" menu to display the new account dialog form. Now enter the name of the first account "BANK" on the first line of the form. The next two lines specify the size of the account in terms of the maximum number of entries and standing orders.

At this stage enter the figures 30 against "Max account entries" and 2 against "Max standing orders." Click on "OK" and the account name appears below the icon for account 1. Pretty easy, eh?

Have a go, and remember: you can't possibly do any harm – provided you're working from a back-up of your Cover Disk. If you really want to get stuck in, print out the manual, which details all the features of the program. Virtually all are available for you to try for free! **stf**

■ If you would like to order the full version of *Personal Finance Manager Plus*, turn now to our Special Offers (page 212) and buy it at the special price of £29.95 – £10 off the recommended retail price! For some more basic loading information, turn to this issue's Cover Disk pages (beginning on page 41)

twilight zone

"What I Really, Really Hate" corner

This month Ebenezer Scrooge, our Really Tight Correspondent, writes on the subject of Things What I Really, Really Hate.

"Don't throw those bones away, mother, they'll make a perfectly good soup. Oh, it's you lot. Er, harumph. Right then, Things What I Really, Really Hate.

"Here's the first Thing What I Really, Really Hate. Long letters that begin, 'I know you ask for short letters, so I'll try and keep this one really short.' (Pathetic. Short letters don't insist on telling you at great length how short they're going to be.)

"Ten pages later these letters invariably end, 'Well, I know you asked for short letters, but I think you'll agree that this one was worth reading.' How wrong can a person be? Bah, and not to put too fine a point on it, humbug.

"If you sincerely want your letter to be appreciated, restrict it to one good, solid point ('Give Ebenezer a pay rise,' for instance). Resist the temptation to add, 'Oh, and while I'm at it...' which only serves to dilute the effect of the original point.

"Second Thing What I Really Really Hate. Letters begging us to send information. Like this one from the mysteriously Christian-nameless

DT Wilson of Dungannon in County Tyrone, Northern Ireland.

"I am studying A-level Mathematics," he writes, 'so what I am asking you at STF to do is to send me some information on different software packages available and where they can be purchased, pleez!'

"Despite DT Wilson being very complimentary about ST FORMAT - 'Congratulations are in order for the best mag out for the ST!' etc etc - we are simply not in a position to help, bah humbug, harumph.

"By all means write in and ask us to send you information. Enclose an SAE if you wish. But unless you also enclose some shillings and some pennies I'm afraid you won't get a reply. Probably not even then.

"Having said all which, next month's issue contains exactly what this gentleman is requesting. So none of your whining. Pass the gruel.

"Third thing What I Really, Really Hate. People who write virus programs. Morons.

"Fourth thing What I Really, Really Hate. People who don't hate people who write virus programs. Morons.

"Fifth thing What I Really, Really Hate. People who don't hate people who don't hate people who -" (Yes, Ebenezer, I think that's quite enough Things What I Really, Really Hate for this month - Everyone else).

■ **Getting Ebenezer to write Things What I Really, Really Hate has been a thoroughly depressing experience for everyone in the office. So let's have yours instead. Write to: Things What I Really, Really Hate, ST FORMAT, 30 Monmouth St, Bath BA1 2BW. Ebenezer has donated some dead spiders, an old soup can (Sainsbury's tomato - it dilutes much better than Heinz's, apparently) and some rotting potato peel for any entries we use, so be sure to indicate your preference.**

If the following people could get in touch - call Steve Carey on 0225 442244 - they will learn something to their advantage... Thing is, we've stupidly managed to lose your addresses, and we have stuff for you - cheques, in one or two cases!

Steven Moore, N. Charley, N. Adams, D. Vincent, Saul de Jorge, R. Stenhouse, Jason Wingate, Rosham Betchoo, Peter Holland and Kevin Voller.

Right, us lot are off to get a little better acquainted with the girls from production at the office party and breathe unpleasant fumes all over them, with any luck. We'll leave Steve Carey to write Twilight Zone and lock up (he's married anyway). See you all next month!

Pining for a spine line

This month we nearly came to blows. Technical Editor Neil ("He knows his bits from his bytes") Jackson took a strong dislike to December's spine line, "A thumping good read," and was duly awarded the task of coming up with something better.

His sole suggestion - "Christmas is coming, the Ed's getting fat" - was ruled out on three grounds: 1) too long; 2) factually inaccurate ("fatter" would have been more apposite); and, last and as far as we're concerned very much least, 3) liable to lose him his job.

The end result is better, though not much (take a look and decide for yourself). So what we're doing is appealing for your help. What we need is a few really classic spine lines (maximum 35 characters), for which we will pay £10 for each one used.

Anagrams might be a good idea... are there any good anagrams of ST FORMAT, ATARI KING or BRITAIN'S BEST ST SELLER - or anything along those lines? Or something funny, or punny, or quirky, or just anything that makes for a cracking good spine line - or better still, a series.

Just think. If you hit upon a good idea and submit a dozen that get used, this could be worth (quick mental calculation) over, er, £70, probably (?). Send your inspired suggestions to: Spine Lines, ST FORMAT, 30 Monmouth St, Bath BA1 2BW.

A pride of fat cats

Blimey. "Ask," should be our motto, "and we shall receive." No sooner had we casually wondered whether anyone out there had an index of ST FORMAT, than lo and - to be absolutely frank about this - behold, in blows a blizzard of the buggers.

Well, a few anyway. Many thanks in particular to John Upton of Brighton and Simon Greig of Lydney in Gloucestershire, who both sent immensely useful Cover Disk indexes. Cover Disk Editor Neil ("He Edits The Cover Disk") Jackson has taken delivery of them and is cur-

rently writing a program to predict what ought to be on next month's Cover Disk*.

One of the items chalked in is Jason King's complete ST FORMAT index, in its own PD database. Jason even includes info from ST AMIGA FORMAT, our predecessor of beloved (but distant) memory.

Very many thanks to all those who sent indexes, partial or complete. We've used them to cross-check Jason's, so they haven't gone to waste.

*viruses not included ➤

Atari: plane failing?

A delightful little present arrived in the post the other morning from Frontier's Martin Walsh. "Aware as we are of your team's interest in everything Atari," he writes, "please find enclosed a little freebie I picked up at a recent Atari Fest in Washington. I trust it has pride of place near your heart (or waste bin!). It performs as well as an STE - which leaves much to be desired."

Martin was not wrong. His present was a dinky balsa-wood aeroplane, neatly emblazoned with the Atari logo ("Flying high" it lies). The thing is, the three pieces can only be put together to make a plane that would be excellent for flying round corners - if only it could fly at all.

➤ INTERPHASE: THE EXTRAS

We sincerely hope you enjoy *Interphase* as much as we do. It's a cracking game, and well worth investing a little time exploring.

Indeed, we'd be very glad to hear from you if you discover some of the game's many hidden nooks and crannies. Send details – or indeed your opinions on the whole notion of having a complete game as a second Cover Disk – to: *Interphase, ST FORMAT*, 30 Monmouth St, Bath BA1 2BW. We'd also like your suggestions as to what game, if indeed any, we should aim to bring you next...

Next month's STF

It's very likely that you first opened up the cardboard box containing your brand new ST around Christmas. This year is no exception, with many, many thousands being sold around the festive season. (At least, if it is an exception Atari are going to be in big trouble.)

The consequence is that thousands of brand new readers are going to be picking up this magazine for the very first time. And looking for assistance.

In addition we get dozens and dozens of letters every week from people asking for the most rudimentary help. What is a root directory? they ask, and, How do you create a RAM disk? And, what the hell are those geezers at *ST FORMAT* going on about, anyway?

So next month's issue – in a newsagent near you from Thursday 10 January – is dedicated to all those readers, both new and old, to whom all this computing lark is a bit of a puzzler. It's the first computer magazine in history that can honestly claim: NO PREVIOUS EXPERIENCE REQUIRED.

Sure, we'll get a few moans from people who can program in raw machine code with one hand while soldering in a RAM upgrade with the other, at the same time as they recite the ST's memory map, complete with interfacing protocols (whatever that means).

To them we can only say, be patient. You were a learner once. And remember, the greater the

number of competent ST users there are out there, the better the machine's long term future. Besides, there are really very, very few readers competent across the whole range of the ST's capabilities. Programming? Graphics? Serious/productivity software? Games? If you can seriously claim to know all there is to know about all those categories, then why haven't we had a job application from you? (See page 12, by the way.)

In short, it's "Everything you ever wanted to know about your ST but never dared to ask because you assumed everyone else knew."

So reserve your copy now, by filling in this form. Alternatively you could become one of the rapidly growing number of people who subscribe to *ST FORMAT*. Take a look at page 201 – what have you got to lose? *Au contraire*, Claude, you have £25 to gain!

Tell you what. Whichever way you make sure of next month's copy, see you here on Thursday 10 January, OK? And one more thing afore ye go: we know all about your New Year's resolution. So no slacking, OK? **stf**

■ As we go to press we can reveal that **STF 18 is going to be printed just in time to be on sale at the massive Wembley Arena Computer Shopper Show, which begins on Thursday 6 December – a full week before the issue officially "hits" as it were "the streets."**

See you there, folks!

Complete this form and hand it to your newsagent

Please reserve me _____ copy/copies of *ST FORMAT* every month, beginning with the February issue, out Thursday 10 January

BILLY

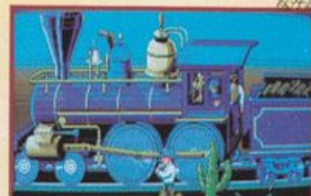

The KID

ATARI ST

... **A HERO?**

CBM AMIGA

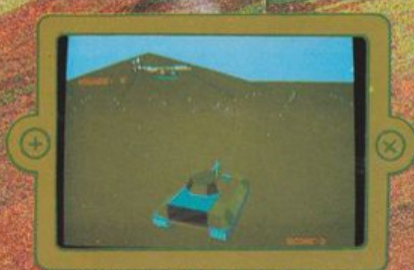

OCEAN SOFTWARE LTD · 6 CENTRAL STREET · MANCHESTER · M2 5NS · TEL: 061 832 6633 · FAX: 061 834 0650

ENTER FIRST INTO BATTLE... LAST TO LEAVE

ATARI ST
CBM AMIGA
IBM PC &
COMPATIBLES

Set in the near future, as an alternative reality, **BATTLE COMMAND** is an arcade/strategy game in which the player controls a single "MAULER" Assault Tank in one of 16 scenarios (missions) in the ultra war, fought between two dominant races in the **NEW WORLD**. The latest phase of the North/South war has been going on for over 10 years, with a stalemate eventually developing - a standoff between armies massed over a long dug-in battlefront. Such are the defensive capabilities of each side, full scale attacks are suicidal, so any offensive moves are, by necessity, small "behind the lines" actions performed by elite troops in specially designed vehicles. The Mauler is the latest such machine - capable of being lifted in and out of hostile territory by fast stealth choppers and armed with the most advanced weaponry the Northern scientists can devise.
